# MTA LIRR Broadway Station Renovation Work to Affect Eastbound Customers Starting June 11

The MTA Long Island Rail Road's renovation work at the Broadway Station on the Port Washington Branch will affect eastbound customers starting Monday, June 11. As of that date, only the rear four cars of eastbound trains will platform at the station. Customers wishing to exit at the Broadway Station will have to use the rear four cars. During that time part of the platform will be replaced. The work is expected to take approximately six months.

The Broadway Station work includes the demolition and replacement of the westbound and eastbound platforms west of the station building and improvements to the platforms east of the station building. Work on the westbound platform is almost complete. Other work includes improvements to the station underpass, handicapped accessible ramps, sidewalks, stairs, retaining walls and fencing. The project is expected to be complete by the third quarter of 2008.

The \$18.7 million budget for the work is included in the MTA LIRR Capital Improvement Program. During the past 13 years, 77 LIRR stations have been rehabilitated or restored utilizing more than \$400-million in Capital Improvement Program funds. Approximately 1,200 customers use the Broadway Station daily.
