ADA Work Begins at Fulton Street Transit Center

Affecting the AC Platform at Broadway - Nassau

MTA NYC Transit announces that work on the Fulton Street Transit Center has entered the next phase with the start of construction work on the AC mezzanine at Broadway-Nassau and the new ADA accessible station entrance at William and Fulton Streets.

Barricades are being installed along portions of the AC platform and mezzanine levels. Existing artwork in the station will be removed and temporary stairs are being built as preparations are made for the eventual replacement of the AC mezzanine ramps and staircases. (For more information on the reconstruction, log on to www.mta.info and click on Capital Construction>Major Projects>Fulton Street Transit Center.)

Customers may find that they will have to change their usual travel patterns when using the complex, as the additional barricades will affect passenger flow. Entrances at the southwest corner of William and Fulton Streets and at the north side of John Street at Broadway will be closed. The easternmost AC platform staircase will be closed. Access to the northbound JMZ may also be affected. Customers should also expect weekend service changes during this time.

Service notices providing information about the project's impact on station conditions will be posted within the station. Customers may also call our Travel Information Center at 718-330-1234 from 6 a.m. to 10 p.m. daily, or log onto www.tripplanner.mta.info to use Trip Planner to plan their trips. Customers with web enabled phones or PDAs can use our Trip Planner On-the-Go! by going to www.tripplanner.mta.info/mobile; in addition to planning their trips, Blackberry users can download the free icon for one touch access to the service.
