Staten Island Open House For Hylan Boulevard Transportation Improvement Study

MTA New York City Transit and the New York City Department of Transportation invite the public to discuss transit service, traffic conditions and pedestrian safety on Staten Island's Hylan Boulevard. This Open House will be held on December 2, at The Renaissance conference center in the Grant City section of Staten Island beginning at 6:30 p.m.

The goal of the study is to improve safety, traffic flow and ease congestion along this major thoroughfare. The Hylan Boulevard study corridor extends from the Staten Island Mall on Richmond Avenue to the 86th Street (R) subway station in Bay Ridge, Brooklyn. It carries several express bus routes and is served by the S78 and S79 with a combined average weekday bus ridership of more than 30,000. NYCT and NYCDOT will begin work on the plan to bring Select Bus Service to Hylan Boulevard following its successful introduction in the Bronx (Bx12) and Manhattan (M15).

In addition to concepts for Select Bus Service, the Hylan Boulevard Transportation study team will develop two or three different proposals for transportation improvements to be evaluated and discussed with the community. The public is invited to learn more about the objectives of the study, examine display boards, and share their concerns regarding transit, traffic and curb use on Hylan Boulevard with project team members. There is no formal presentation; people may stop by any time between 6:30 p.m. and 8:30 p.m. at the Regency Room of The Renaissance at 2131 Hylan Boulevard (at Bedford Avenue) in Staten Island.

Visit the NYC DOT website at www.nyc.gov/brt for updated project information.
