### Rail Repair Scheduled on 4 Line in the Bronx

Due to a rail problem north of the Burnside Avenue station, uptown 4 trains have been traveling at a slow speed through the area today and will continue to do so until it can be repaired. Repairs will take place tomorrow, Thursday, April 21, between 10:30 a.m. and 3 p.m.

During that time, uptown 4 trains will operate express from 167th Street to Mosholu Parkway, making one stop at Burnside Avenue (on the southbound platform). There will be no uptown 4 trains at 170th Street, Mt. Eden Avenue, 176th Street, 183rd Street, Fordham Road, Kingsbridge Road and Bedford Park Blvd.

Uptown customers wishing to get to the bypassed stations may ride to Burnside Avenue or Mosholu Parkway and backride downtown to their station. Uptown customers originating at bypassed stations may backride downtown to Burnside Avenue or 167th Street for uptown trains.

We apologize to our customers for the inconvenience and ask for their patience as we make this necessary repair. Customers may visit our website at [www.mta.info](http://www.mta.info) and click on "Current Service Status" for information or sign up for free email and text message alerts. Our Travel Information line may be reached at 718-330-1234 daily, between 6 a.m. and 10 p.m. for assistance with travel plans.
