### Special Traffic Advisory: New Traffic Pattern At RFK – Manhattan Plaza

A new traffic pattern will be in place at the Manhattan toll plaza at the Robert F. Kennedy Bridge beginning Friday, July 1st while repaving work is done on the plaza.

Due to the location of the work, motorists coming from the Bronx will not be able to access the Bronx/Manhattan to Randall's Island ramp.

Motorists heading to Randall's Island from the Bronx will have to use the Randall's Island ramp, located just south of the Bronx toll plaza as an alternate. This ramp, which was opened to the public in March 2009 to help improve access to Randall's Island, will put drivers at the Ward's end of the island, near the New York State Psychiatric Center.

Signs will be in place to direct motorists about this temporary change. The work in and around the Manhattan toll plaza will continue through fall.
