Beginning Monday, May 2nd Two Toll Lanes on RFK Bridge Bronx Plaza Closed While Necessary Repair Work Is Completed

Beginning **Monday, May 2nd** a new configuration will be in place at the Robert F. Kennedy Bridge's Bronx toll plaza heading to Queens while necessary deck replacement work is completed. The construction will require the round-the-clock closure of two toll lanes.

The work, which includes removing old concrete, repairing steel rebar and installing a new section of roadway decking, will be done on the Bronx side of the toll plaza as drivers head south towards Queens. The two closed lanes are located just right of the toll plaza's center. Construction work, which is being done by Queens contractor El Sol, is expected to take approximately a month.

The construction zone will result in the plaza being split with one E-ZPass and three cash lanes to the right and three E-ZPass lanes to the left. Signs will be posted in advance of the toll plaza so motorists driving from the Bronx will be able to navigate to either cash or E-ZPass lanes.
