### Casting Call for Second Avenue Subway Multi-Media Exhibit

The MTA announces a voiceover actor casting call for a multi-media exhibit on the history of the Second Avenue Subway. This interactive video will be part of the first exhibit installed in the newly created Community Information Center on Second Avenue.

Auditions call for one female and one male from the Second Avenue community to provide voiceover narration. If you live or work between First and Third Avenue from 63rd to 105th Street, then you're eligible to audition. There will be two rounds of auditions and auditions can be submitted by email or phone.

Auditions are open until October 22nd and instructions on how to submit your audition recording can be found online at [www.mta.info/capconstr/sas/](http://www.mta.info/capconstr/sas/) under Project News.

The SAS Community Information Center aims to foster and encourage a continued exchange among neighbors and the SAS team regarding the construction of the Second Avenue Subway. It will be located in a storefront within the 86th Street Station contract area and will serve as space for the public to meet with community liaisons and discuss construction-related matters. The center will also serve as a space for Second Avenue Subway project related exhibitions.

We look forward to hearing your submission!
