MTA New York City Transit Implements Bus Service Enhancements for 2013

MTA New York City Transit announced today that it is implementing the additions and extensions of service on several bus routes throughout the city as outlined in our Service Enhancement Plan released in July 2012. At that time, the MTA announced \$17.8 million in service investments for NYC Transit which included restoring services that were reduced or eliminated as part of the MTA's 2009-2010 budget cuts.

"We are here to provide mass transit service and that we are able to restore some earlier service cuts while at the same time extending service along several routes is great news for us to share," said New York City Transit President Thomas F.
