### 103 St 6 Station to Undergo Major Component Work This Summer

#### *No Downtown Service at All Hours from May to September 2015*

Beginning at 5:01 a.m. Monday, May 4, the southbound platform of the 103 St  station on the Lexington Avenue Line will be closed at all hours for three months as part of a necessary station rehabilitation project. All southbound trains, including  and overnight  local service, will bypass the station during that time.

The rehabilitation project at 103 St consists of critical repairs of the station's draining system; repair of platform edges, floor tiles, ceiling and walls; repair of floors, ceiling and walls on the mezzanine level; and repainting of the entire station. The station originally opened for service in July 1918.

To accommodate customers who use the 103 St station, the northbound platform will remain open during construction. Southbound customers traveling to the station can take the M101, M102 or M103 bus at the 110 St  station or exit the train at the 96 St  station and transfer to an uptown 6 train. Customers who are traveling southbound from the station can take the M101, M102 or M103 bus to the 96 St  station and use a free MetroCard transfer to subway service.

Downtown service at 103 St is expected to be restored in September 2015.
