*FASTRACK* has been designed around the careful determination that there is adequate alternate means of transportation, including enhanced services along some bus lines during work periods. Alternative transportation options will be detailed in announcements and posters on trains, in stations and on selected buses; brochures will be available in both English and Spanish. Information on this *FASTRACK* is available on the web at [http://web.mta.info/nyct/service/fastrack\\_23.htm#serviceChanges](http://web.mta.info/nyct/service/fastrack_23.htm#serviceChanges) Joseph Leader, Senior Vice President for the Department of Subways, said, "FASTRACK has proven to have a significant impact on decreasing delays – both in terms of consolidating maintenance forces in a concentrated area and in terms of proactive maintenance that improves service delivery."

*FASTRACK* was introduced in January 2012, devoting four straight weeknights to perform maintenance work in tunnels, stations and on tracks, completely suspending service within a given line segment for a seven-hour period between 10 p.m. and 5 a.m.. This gives free access to the system, allowing an army of maintenance workers to perform dozens of tasks repairing and replacing components that are vital to providing safe and reliable train service without the concern of having to "clear up" to allow trains to pass. *FASTRACK* efforts have been highly successful in providing a safer work environment for employees and improved station conditions for customers.

Our next *FASTRACK* overnight closure will be on the E F M R Queens Blvd Line, between 5 Av/ 53 St and Jackson Hts-Roosevelt Av beginning Monday night March 30, and ending early Friday morning, April 3.
