IMMEDIATE

Hugh L. Carey Tunnel Tube Closure

One Lane will be Open in Each Direction in East Tube

The westbound tube at the Hugh L. Carey Tunnel will be closed from 9:30 p.m. Friday, October 23 through 9:30 p.m. Saturday, October 24 as part of the ongoing four-year, \$282.5 million Sandy repair project.

One lane will operate in each direction in the remaining tube. Motorists may experience delays. This work is weather dependent and may be canceled if it rains.

The Sandy repair project includes replacing multiple systems that were damaged in 2012 from Superstorm Sandy including the entire traffic control and communications, lighting, drainage pump and fire line systems.

Contractors are also repairing damaged concrete, installing new LED lights and emergency way-finding safety lights; replacing tunnel wall tiles, ceiling finishes, catwalks and duct banks; rehabilitating curbs and gutters and repaving tunnel roadways.
