You are receiving this notice as part of the MTA's continuing effort to keep the community apprised of construction activities in support of the West 28th Street Substation project.

The MTA's contractor for the W28th Street Substation Project, Skanska E-J Electric 28S Joint Venture, completed the following items this week:

Main work zone – Continued secant pile installation, rock drilling, concrete placement and delivery of core beams

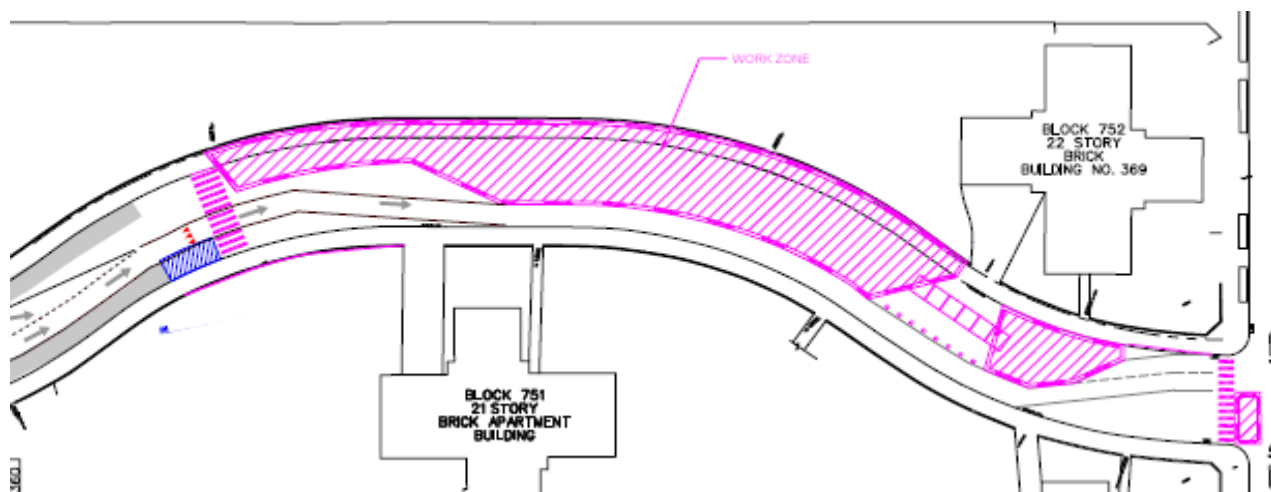

East work zone – Completed surface restoration by NYC Transit sewer manhole. Continued work on NYC Transit duct bank. Excavated, installed rebar, placed concrete, backfilled, and poured road base.

Con Edison pulled cables into the new manhole and conduits. Cables need to be spliced so that old conduits interfering with subway roof penetration work can be removed.

Work during the week of August 28th will include, but not be limited to:

- **Main work zone** – Demobilize one drill rig. Continue secant pile drilling and installation.
- **East work zone** – Con Edison to splice new cables in preparation for removal of old cables.
- **Construct structure for subway roof penetration. Continue NYC Transit duct bank and manhole construction.**
- **Con Edison to continue conduit work near 9th avenue on weekends. Work will be performed within main work zone**
- **Move into new work zone configuration below**

Stage 2 - Installing/Rerouting Utility Lines, Secant Piles

Project Status

Contract Awarded: 10/24/2022

- Contractor: Skanska E-J Electric 28S Joint Venture
- Mobilization: 1/16/2023
- Milestone #1 (restoration of 28 Street): 12/25/2024
- Milestone #2 (Substantial Completion): 9/16/2025
- Final Completion: 12/15/2025

Work hours for the project are 7am to 6pm Monday to Friday, though we anticipate confining the noisiest of work to 8am-4pm.

The contractor is allowed per DOT permit to work 8am-4pm on weekends, but no noisy work is allowed.

The MTA is building a new underground power substation at West 28 Street. This will provide dependable and redundant power for the existing system serving the **A**, **C**, **E** subway lines, while also supporting our upgrade to a new train control system which will bring you better, more frequent, and more reliable service.

The community can expect regular communication, throughout the project, including regular construction updates and at key milestones on the [project's webpage](#) and a dedicated email address (w28thoutreach@mtacd.org) to field concerns.

Thank you for your patience while we build this vital public works project.
