Fast Former Bus Network Bronx Bus Network Redesign Final Place

December 10, 2019

w York City Transn

Post-Draft Plan Update

Outreach Summary

200	✓Subway stations with digital screens ran digital messages systemwide at time of posting
50	\checkmark Social media posts promoting the Bronx Bus Network Redesign
13	✓On-street engagement events in the Bronx and Upper Manhattan in July and August
11	Community Board presentations in the Bronx and Manhattan
9	✓Open Houses in the Bronx (8) and Upper Manhattan (1)
6	✓Workshops to introduce the project
3	✓Videos of our presentations to the Joint Borough Service Cabinet/Borough Board available on Bronxnet.org
2	✓Fast Forward Community Conversations
1	 Update to the public timeline with explanation to support transparency
\checkmark	✓Met with all stakeholders who requested a meeting or phone call

Outreach Summary

16,000	✓Pamphlets handed out by our street team or distributed on buses
15,000	✓Unique project webpage views
6,000	✓Posters printed for distribution on buses and in subway stations
2,419	✓ Digital screens on buses ran digital messages systemwide at time of posting
2,000	✓ Average views per social media post
1,300	✓Surveys completed between June and August
1,150	✓Comments received via webmail, phone, twitter and mail
1,000	✓ Survey cards distributed

Redesign Strategies

More Direct Routings

- Streamlined complex, circuitous routings to make them more simple, straight, and direct
- Bus routes with straight and direct routing tend to be more reliable

Bus Stop Balancing

- Every bus stop is a trade-off between convenience of access to the bus and the speed and reliability of service
- NYC buses have the shortest average stop distance (805 ft.) of any major city
- Improved stop spacing in the Bronx to get customers where they are going faster

Improved Connectivity

- Improved east-west bus connections which are crucial for intra-borough travel
- Improved connections to the subway lines
- Improved crosstown access to Manhattan

Increased Frequency

 Improved frequency for 11 routes on 9 key corridors to create an all-day frequent network

More Bus Priority

- NYCDOT has identified 10 key transit priority corridors in the Bronx
- Bus lanes and other priority treatments would provide the biggest benefit to customers
- NYCDOT, with MTA, continues to expand Transit Signal Priority (TSP) in the Bronx

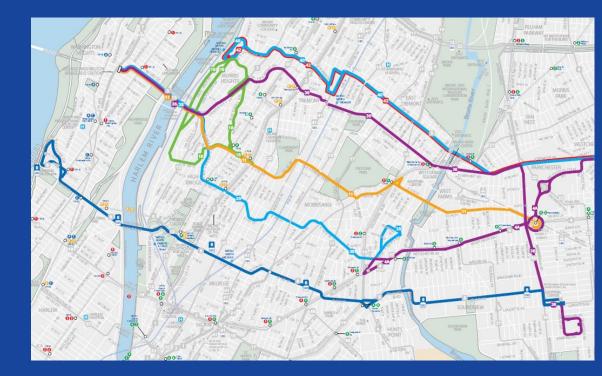

Proposed Final Plan

More Direct Routings

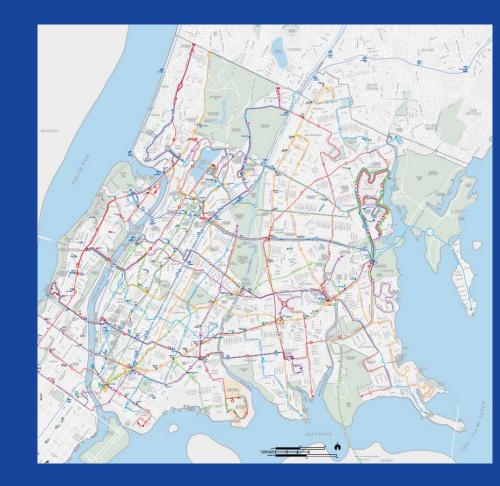

- 18 total route changes are proposed with 2 new routes
 - Bx4A
 - Bx6 SBS
 - Bx11
 - Bx15
 - Bx18
 - Bx24
 - Bx25 (new)
 - Bx28
 - Bx29
 - Bx30
 - Bx34
 - Bx35
 - Bx36
 - Bx40
 - Bx42
 - Q50 Ltd
 - M100
 - M125 (new)

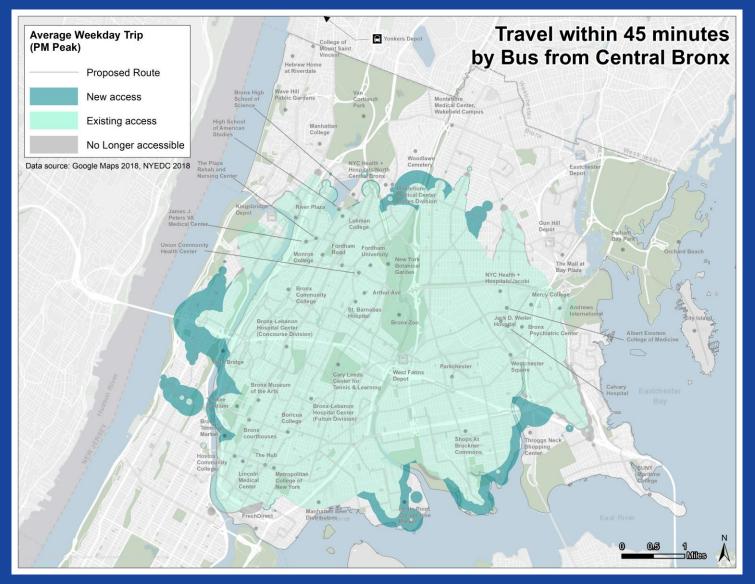

Improved Connectivity

- Ease of connections at key transfer locations
- Route alignment changes bring new access for customers
 - Bx6 SBS extension to
 Soundview
 - Bx11 extension to Parkchester
 - Bx18 extension in High Bridge
 - Bx25 new service from Northern Co-op City to Bedford Park
 - Bx30 reroute to Boston Rd
 - Bx34 reroute to terminate at Fordham Plaza
 - Bx35 extension to West Farms
 - Bx40/42 new connection to E
 180 St 25 station

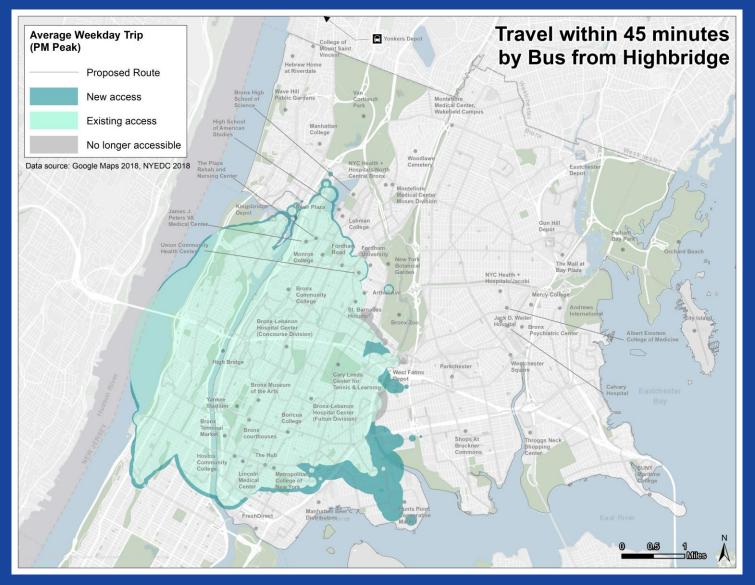

Improved Connectivity

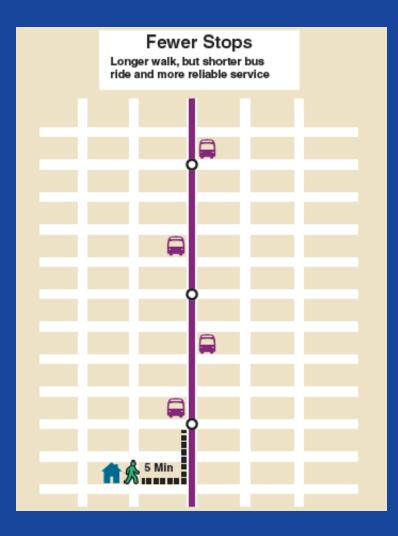

Improved Connectivity

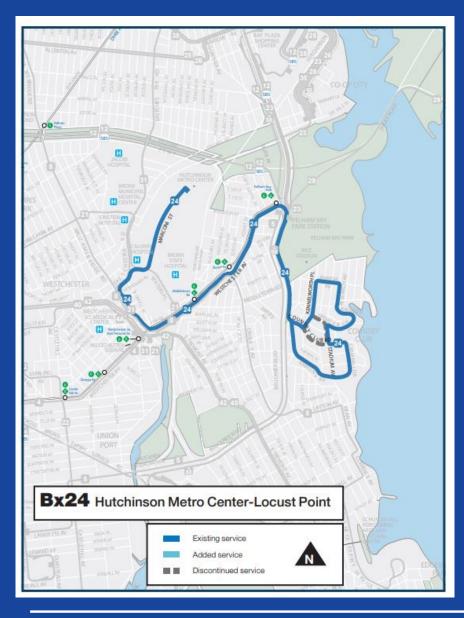

Bus Stop Balancing

- **400** Local/Limited stops are proposed for removal
- This would improve average stop spacing from every 882 feet to every 1,100 feet
- For every bus stop removed 20 seconds is shaved off a customer's commute
- Those routes with fewer stop removals are due to severe drawbacks (such as elevation) and community impacts if spacing was more aggressive
- Maintained stops that provided connection to subway stations and other bus routes
- Maintained stops with heavy ridership, specifically those used by populations for whom a removal would present a significant burden (e.g. retirement communities, hospitals, schools)

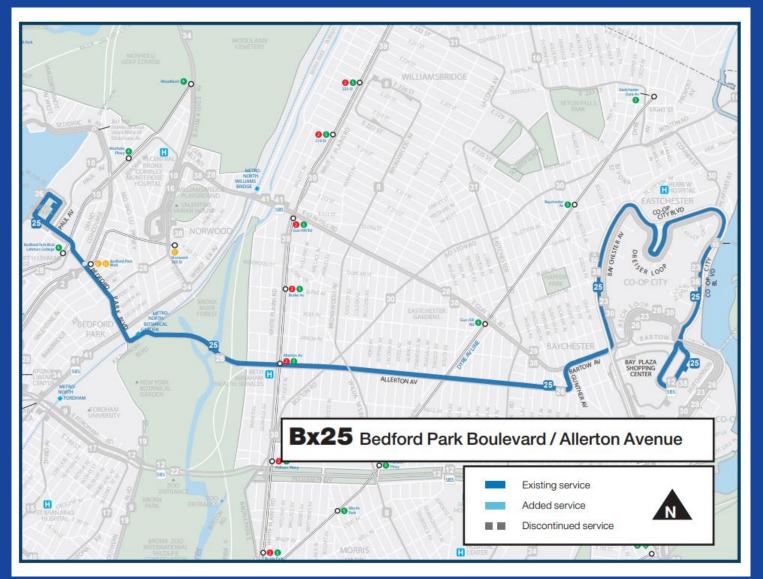

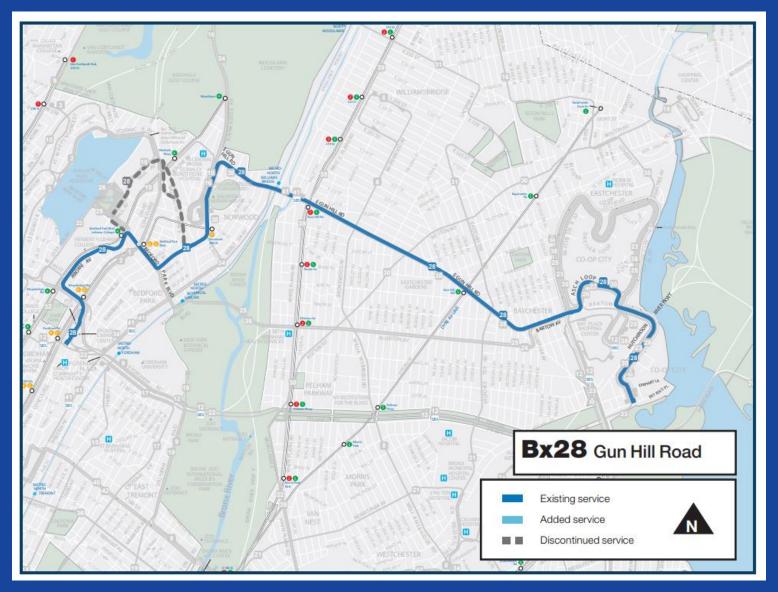

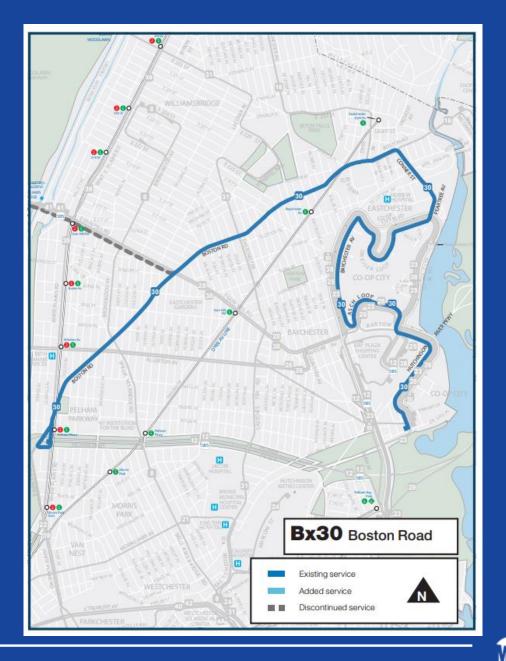

Bx25 (New)

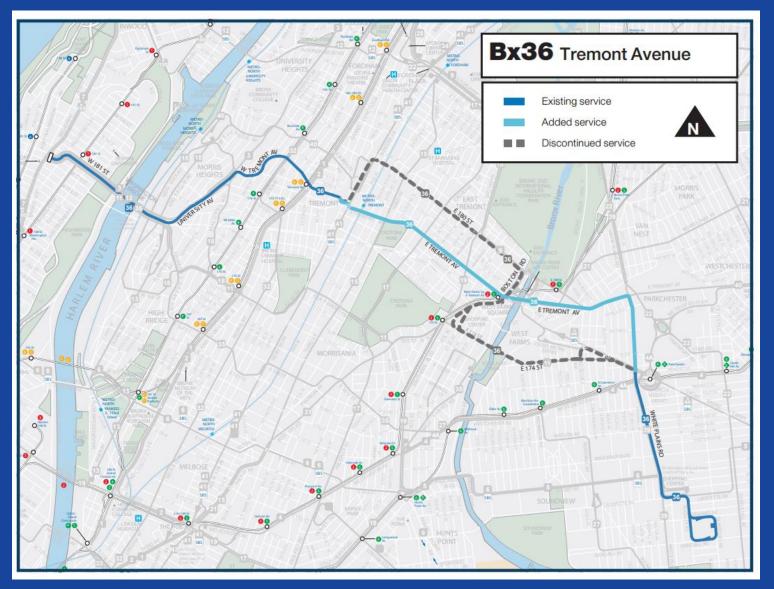

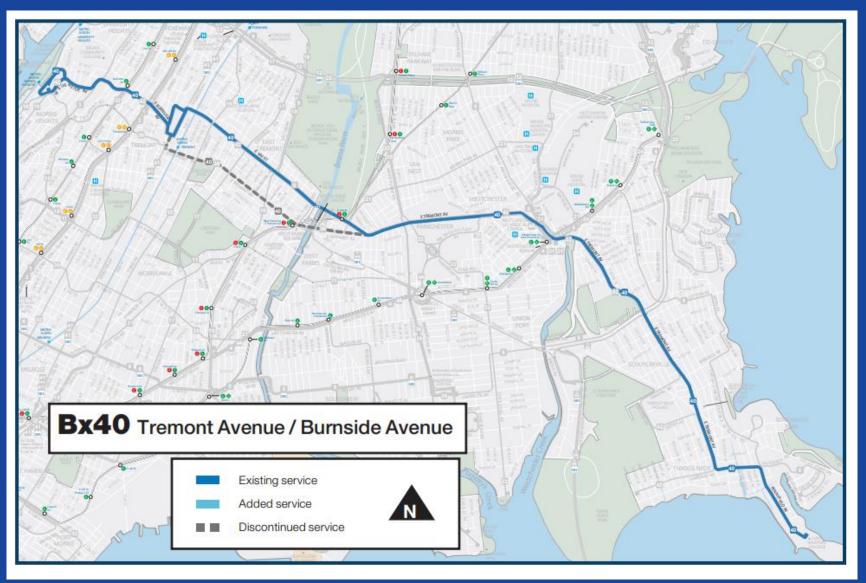

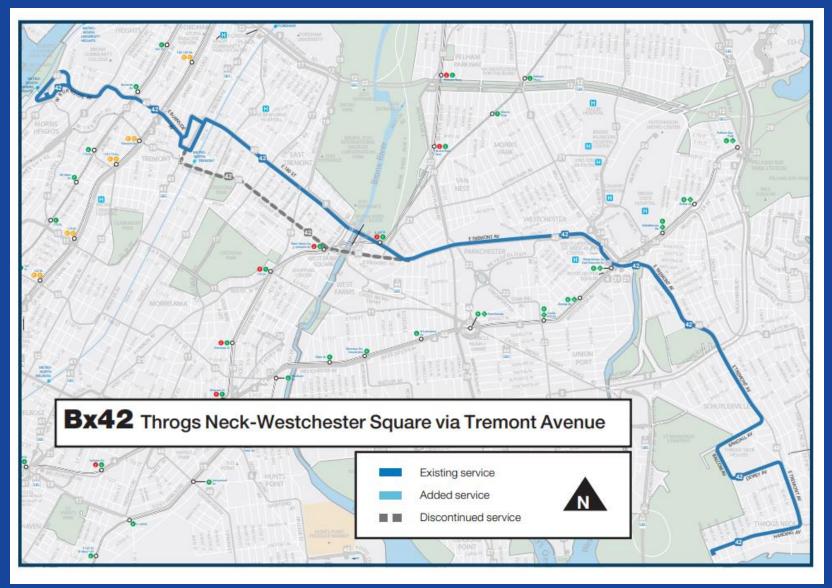

BxM10

Express Bus Schedule Changes

- All service reductions are guideline-based
- Numerous routes showed extremely low ridership, especially in the reverse peak direction
- On weekends, most buses carry fewer than 10 passengers per trip across a 14-16 hour service span
- We also reduced span in the reverse-peak direction where ridership was extremely low
- We reinvested much of the savings into insuring our scheduled running time more accurately matches road conditions, hence, improving overall reliability

Route		Proposed	Frequency - W	leekday (min.)	Proposed Service Span - Weekday		
	AM Peak	Midday	PM Peak	Evening	Overnight	SB/WB	NB/EB
BxM1	8	30	12	30	-	5:30 am - <mark>4:45 pm</mark>	6:45 am - 12:45 am

Next Steps

Outreach

- We have been out and about • in the Bronx and Manhattan to hear from customers & other stakeholders
- **Detailed information for public** input sessions is on the project website https://new.mta.info/bronxbus redesign
- We have heard from local and \bullet express bus costumers and are working to refine the **Proposed Final Plan and** publish an update in early 2020

- An alternative Trip Planner is \bullet available on the project website to allow customers to test out their travel options under the Proposed Final Plan:
- https://otp-mta-proto.camsys- \bullet apps.com/

Implementation

- Following outreach, we will begin to finalize the <u>Bronx</u> <u>Bus Network Redesign Plan</u> & prepare for implementation
- You will continue to hear from us as we grow closer to implementation

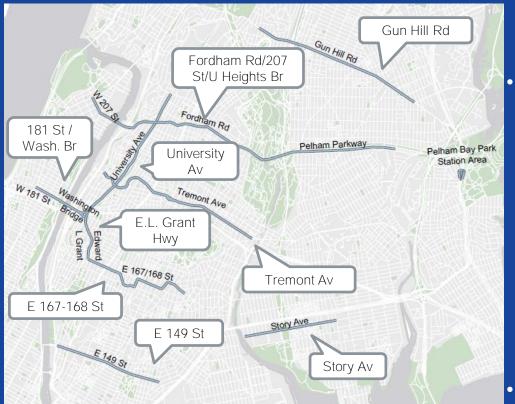

- Key Dates
 - Winter 2020
 - Public Hearing on Plan
 - MTA Board votes on Plan
 - Summer/Fall 2020
 - Implementation

NYC DOT Bus Priority Corridors

Identified Bus Priority Corridors

 NYC DOT analyzed 46 major Bronx corridors to identify where bus lanes and other treatments would speed up buses and allow the MTA to operate more frequent service

The analysis ranked potential buspriority corridors using the following criteria:

- Demand for bus service
- Bus performance (speed and reliability)
- Service levels proposed by MTA
- Neighborhood demographics
- Feasibility of implementation

NYC DOT selected 10 of the highest ranking corridors and has begun studying bus priority projects to accompany the network redesign, with work beginning in 2020

NYCDOT Bus Priority Toolkit

- NYC DOT has developed and implemented bus priority treatments to provide faster, more reliable bus service:
 - New bus lanes
 - Upgraded bus lanes
 - Protected bus lanes
 - Bus boarders
 - Bus queue jump signals
 - Curb management
 - Pedestrian safety
 - Bus stop accessibility
 - Turn restrictions

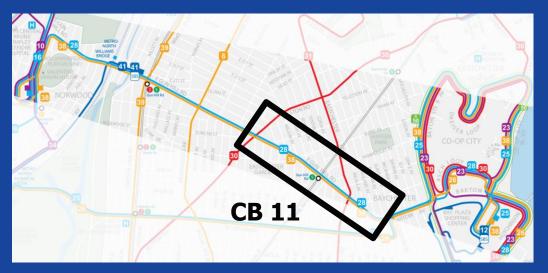

Other bus-supportive technologies: Transit Signal Priority (TSP) and Real-Time Passenger Information (RTPI)

Better Buses Action Plan sets annual goals for bus improvements:

- 10 miles of new bus lane
- 5 miles of upgrades to existing bus lanes
- 300 intersections of new TSP

Gun Hill Rd Bainbridge Ave to Bartow Ave

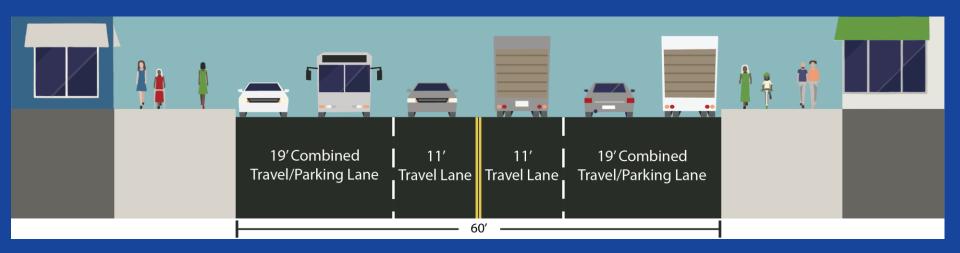

- Critical crosstown bus corridor
- Bx28 + Bx38 carry 18,000 daily riders
- After Redesign:

•

- Simplified routing + stop consolidation
- More frequent service: AM Peak + Evening
- Major destinations:
 - 2 5 D, 10 bus routes + Metro-North
 - Montefiore Hospital, Moses Campus
 - Bay Plaza Mall + Co-Op City
- Average peak bus speeds:
 - 3-4 mph west of White Plains Rd
 - 4-6 mph between WPR and Boston Rd
 - 7-8 mph east of Boston Rd
- Key issues:
 - Congested corridor w/ slow bus speeds
 - Double parking, weaving & merging
 - Irregular intersections with long
 pedestrian crossings

Gun Hill Rd: Existing Conditions

• Existing:

- 60' wide, curb to curb
- Each side has 2 travel lanes + parallel parking lane
- DOT will study feasibility by analyzing:
 - Geometric feasibility
 - Traffic volumes and turning movements
 - Curb access / double parking issues
 - Existing bus delays
 - Pedestrian safety data

Gun Hill Rd: Next Steps

Fall/Winter 2019

- Present existing conditions to CB 7, CB 11, CB 12
- Collect traffic data
- Survey merchants

2020

- Analyze traffic data
- Develop draft street design plan + present to CB 7, CB 11, CB 12
- Develop detailed final plan + present to CB 7, CB 11, CB 12
- Implement project improvements
