Subway  Bus  Access-A-Ride
Executive Summary - NYCT

- The Fall 2023 bi-annual Customer Satisfaction survey was conducted November 6-20, 2023, with English and Spanish offered online and on the phone. We received more than 115,000 subway line, 25,000 bus route and 3,000 AAR evaluations from over 80,000 NYCT customers.

- **Subway customer satisfaction is 52%,** a four-percentage point decrease from the Spring. **However, most key performance metrics are improved,** as customer satisfaction with their line is up four percentage points to 58%, and satisfaction with their station is up six percentage points to 67%.
  - Customers who ride most frequently (5 or more days a week) are the most dissatisfied group, as only 46% of customers who ride the subway five or more days a week are satisfied, down percentage points from the Spring. Furthermore, as our ridership has increased, the survey sample, especially among frequent riders, has also increased and now accounts for 47% of the study sample (up from 45% in the Spring).

- Customers continue to feel safer on trains and in stations, with safety on trains up four percentage points to 54% and in stations up three percentage points to 51%.
  - However, safety remains an important issue for customers. Quality-of-life concerns (43%) and People behaving erratically (41%) are the most mentioned areas that, if addressed, would increase customer satisfaction. Furthermore, Safety from Crime and Harassment on trains is the second most important attribute driving satisfaction.

- Service Reliability and Waiting times, two important drivers of customer satisfaction, improved by two percentage points to 58% and 55%, respectively.
  - Frequent travelers (5 or more days a week) are more likely to mention reliable service and frequent service on weekdays as areas that need improvement to increase their satisfaction.

- **Overall Local, Limited and Select Bus customer satisfaction is 57%,** an eight-point decrease from the Spring. Overall Express bus customer satisfaction is 72%, a seven-percentage point decrease.
  - Local bus customers who ride most frequently (5 or more days per week) make up nearly half (46%) of the survey sample and are the least satisfied group at 50% (down 11 percentage points from Spring).
  - Local bus route satisfaction is 65%, down from 69% in the Spring. At the borough level, declines are concentrated in Brooklyn (down six), Queens (down five), and Staten Island (down 10). Satisfaction with Bronx and Manhattan routes remained consistent with the Spring.
  - Customers in Queens and Brooklyn are more likely to mention wait times and more reliable service as what needs to improve to increase their satisfaction.

- **Access-A-Ride continues to improve its service, which is reflected in customer satisfaction score increase to 68%,** up from 64% in the Spring
  - The increased overall score can be explained by gains in attributes with largest influence on overall satisfaction. Satisfaction with On Time Pick Up increased eight points from the Spring to 59%. Travel times and Getting a ride for the day/time of your request increased four and six points respectively.
