Executive Summary

MTA Construction & Development (MTA C&D) contracted with AECOM USA, Inc. (AECOM) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the commercial property located at 90-01 168th Street, Jamaica, Queens, New York (the subject property). The Phase I ESA was performed in general conformance with the scope and limitations of ASTM International, Designation: E1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-21). Exceptions to, or deletions from, this practice are described in this report.

The site visit occurred on March 15, 2023. The subject property contains an approximately 1.9-acre irregularly shaped asphalt-paved parking lot with a manned attendant booth located adjacent to the exit gate on the northern side, two out-of-service booths adjacent to the north entrance and south exit gate, and a storage shed on the southwestern corner of the subject property. One two-cubic yard solid waste dumpster located on the north side of the subject property, to the west of the entrance lane, and 55-gallon drums used as solid waste containers were observed throughout the property. Landscaped areas were observed on the corners of the subject property as well as small trees planted in the medians between parking rows.

The subject property is located in a primarily residential area in Jamaica, Queens, New York. Gasoline service stations and dry cleaners were not observed in the immediate vicinity (approximately 500 feet) of the subject property. Other off-site sources of concern were not identified in the immediate vicinity of the subject property.

AECOM's historical research indicates that the subject property was first developed with a number of residences in 1897. By 1901 commercial structures, including a steam laundry were present on the site. Mixed residential and commercial use of the site continued through at least 1951 with commercial uses including a tailor shop and cleaner, awning manufacturer, and auto repair. By at least 1961, all on-site structures had been razed and the subject property redeveloped as an asphalt-paved parking lot which remains in use to the present day.

The surrounding area is primarily residential; however historical commercial uses including auto repair, black smithing, and a steam laundry were noted in historical records reviewed.

The subject property address was not identified on the environmental database search report obtained and reviewed.

A number of surrounding sites were identified in the environmental database search report. Based on AECOM's review and analysis of the database listings, none of the surrounding sites are expected to present a recognized environmental condition (REC) to the subject property, based on their distance (generally greater than 500 feet), regulatory status (i.e., regulatory closure, no violations found), media impacted (soil only), and/or topographical position relative to the subject property (i.e., down-gradient or cross-gradient).

No historic RECs (HRECs) or controlled RECs (CRECs) were identified during this assessment.

The following RECs were identified during this assessment:

- The property was historically occupied by a steam laundry from at least 1901 to 1912; and by a tailor shop and cleaner in at least 1939. No information was available to determine if dry cleaning activities were performed on-site. The potential historic use of the subject property as a dry-cleaning facility is considered a REC.

- The property was historically occupied by an auto repair facility and an awning manufacturer in at least 1925. No records indicate the extent of automotive repairs on-site or the historic use and disposal of petroleum products or other chemicals associated with auto repair and manufacturing operations on the subject property. The potential historic use of the subject property for auto repair and awning manufacturing is considered a REC.
- The property adjacent to the south of the subject property contains the historic locations of a blacksmith (1891-1925), an auto repair shop with a gasoline tank (1912), and a steam laundry (1925). No information was available to determine if dry cleaning activities were performed on-site, or the extent of vehicular maintenance; however, the potential use of this adjacent site for metal working, dry-cleaning, and auto repair and fueling is considered a REC.
- The subject property was occupied by residential dwellings and commercial properties from at least 1897 until 1961 when the buildings were razed. No information was available regarding disposition of the demolition debris. Historic below grade foundations and suspect buried debris, including the potential for buried heating oil tanks, have the potential to impact the site and are considered RECs to the site.
- The property adjacent to the south of the subject property contains the historic location (1912 Sanborn) of an auto repair facility with a 200-gallon underground storage tank. Due to the lack of tank closure documentation, this off-site UST is considered a REC to the site.
- The property adjacent to the southwest corner of the subject property is currently occupied by Police Precinct 103. The police garage contained two 550-gallon gasoline above ground storage tanks (ASTs) in contact with soil. Spill # 9511826 was reported on 12/18/1995 due to findings of gasoline contaminated soil in the garage area. The two 550-gallon gasoline ASTs and associated pumps located in the garage were removed in 1996 and the case is listed as closed. No additional information was provided in the EDR report. Based on the lack of closure documentation, this off-site spill case is considered a REC to the site.

The following vapor encroachment condition (VECs) were identified during this assessment:

- Portions of the subject property were utilized as a steam laundry in 1901-1912, as an auto repair and awning manufacturer in 1925 and, a tailor shop and cleaner in 1939. No additional information was provided for review. Given the site usage as a public parking lot, the potential for vapor intrusion is not considered a concern at this time; however, should there be a change in property usage, it is AECOM's opinion that a VEC cannot be ruled out and is considered a REC.

The following de minimis conditions (DMCs) were identified during this assessment:

- Minor areas of staining typically associated with parked vehicles were observed along the north, south and west sides of the parking lot on intact asphalt pavement; however, all stained areas are considered de minimis.

Other Business Considerations

- Based on the date of construction of the subject property (circa 1961), asbestos-containing materials (ACM) and Lead-Based Paint (LBP) may be present at the structures (attendant booths, maintenance equipment storage shed) at the subject property. It has been AECOM's experience that asbestos in building materials and LBP can only be thoroughly evaluated by sampling and laboratory analysis. It should be noted that an asbestos survey by a licensed inspector and/or a lead-based paint survey was not included within the scope of this assessment.

1. Introduction

1.1 Purpose

This Phase I Environmental Site Assessment (Phase I ESA) was performed pursuant to AECOM USA, Inc.'s (AECOM) written proposal, dated February 22, 2023, for the proposed new Jamaica Bus Terminal (Block 9800, Lot 5) located at 90-01 168th Street in Jamaica, Queens, New York (herein referred to as the "subject property"). This assessment was performed in advance of the potential lease of the subject property by MTA C&D.

The purpose of the Phase I ESA is to provide MTA C&D with information for use in evaluating recognized environmental conditions (RECs) associated with the subject property. Per ASTM International, Designation: E1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-21), potential findings can include RECs, historical RECs (HRECs), controlled RECs (CRECs), de minimis conditions (DMCs) and significant data gaps as follows:

- A REC is defined by the ASTM standard as "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment." The term includes hazardous substances or petroleum products even under conditions in compliance with laws.
- A HREC is defined as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority and meeting unrestricted use criteria established by a regulatory authority or authorities without subjecting the subject property to any required controls.
- A CREC is defined as a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (activity and use limitations or other property use limitations).
- DMCs are conditions related to a release that generally do not present a threat to human health or the environment and generally would not be subject to enforcement action if brought to the attention of the appropriate governmental agencies.
- A significant data gap is a data gap that affects the ability of the environmental professional to identify a REC.

In addition, a Tier 1 vapor encroachment screening (VES) is completed as part of this assessment. This screening is conducted in general accordance with ASTM E2600-15. The objective of the VES is to evaluate if a vapor encroachment condition (VEC) exists or if a VEC does not exist.

This Phase I ESA is based on a review of existing conditions, reported pre-existing conditions, and observed operations at the subject property and adjacent properties.

1.2 Scope of Work

The Phase I ESA included a site visit, interviews, regulatory research, historical review, and a review of the environmental database analysis of the subject property. In conducting the Phase I ESA, AECOM assessed the subject property for visible signs of possible contamination, researched public records for the subject property and adjacent properties (as applicable), and conducted interviews with persons knowledgeable about the subject property. Non-Scope Services per ASTM E1527-21, include but are not

limited to asbestos-containing building materials, lead-based paint, and Per- and polyfluoroalkyl substances (PFAS) concerns, and were not included in this Phase I ESA.

This project was performed in general accordance with ASTM E1527-21 and AECOM's proposal, dated February 22, 2023. Conclusions reached in this report are based upon the assessment performed and are subject to limitations set forth in Sections 1.3, 1.4, and 1.5 below.

1.3 Study Limitations

This report describes the results of AECOM's Phase I ESA to identify the presence of conditions materially affecting the subject facility and/or property within the limits of the established scope of work as described in our proposal.

As with any due diligence assessment, there is a certain degree of dependence upon oral information provided by facility or site representatives, which is not readily verifiable through visual observations or supported by any available written documentation. AECOM shall not be held responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed by facility or site representatives at the time this assessment was performed. In addition, the findings and opinions expressed in this report are subject to certain conditions and assumptions, which are noted in the report. Any party reviewing the findings of the report must carefully review and consider all such conditions and assumptions.

This report and all field data and notes were gathered and/or prepared by AECOM in accordance with the agreed upon scope of work and generally accepted engineering and scientific practice in effect at the time of AECOM's assessment of the subject property. The statements, findings and opinions contained in this report are only intended to give approximations of the environmental conditions at the subject property.

This report and associated work have been provided in accordance with the principles and practices generally employed by the local environmental consulting profession. This is in lieu of all warranties, expressed, or implied.

This ESA is not a regulatory compliance audit or an evaluation of the efficiency of the use of any hazardous materials at the subject property. Unless otherwise specified, the tasks included no collection and analysis of samples. Findings and opinions are based on information available from public sources on specific dates (historical photographs, maps and regulatory agency files, lists, and databases); this information is changing continually and is frequently incomplete. Unless AECOM has actual knowledge to the contrary, information provided to AECOM or obtained from interviews is assumed to be correct and complete. AECOM does not assume any liability for information that has been misrepresented to us or for items not visible, accessible, or present on the subject site during the time of the site reconnaissance.

AECOM cannot warrant or guarantee that not finding indicators of hazardous materials means that hazardous materials do not exist on the subject property. There is no investigation sufficiently adequate to preclude the presence of materials on the subject property, which presently, or in the future, may be considered hazardous. Due to regulatory evaluation criteria constantly changing, concentrations of contaminants that may be present and considered to be acceptable at the time of this report preparation may become subject to different regulatory standards and require remediation in the future.

Where records indicate that prior remedial work or tank removals have occurred, there is the possibility that the work may not have been performed correctly or completely. Opinions and judgments expressed herein are based on AECOM's understanding and interpretation of current regulatory standards and should not be construed as legal opinions.

As specified in ASTM E1527-21, it is incumbent that the client and any other parties who review and rely upon this report understand the following inherent conditions surrounding any Phase I ESA:

- **Uncertainty Not Eliminated** - No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a subject property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a subject property, and this practice recognizes reasonable limits of time and cost. (Section 4.5.1 of ASTM E1527-21)
- **Not Exhaustive** - "All appropriate inquiries" does not mean an exhaustive assessment of a property. There is a point at which the cost of information or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an ESA and the reduction of uncertainty about unknown conditions resulting from additional information. (Section 4.5.2 of ASTM E1527-21)
- **Comparison with Subsequent Inquiry** – It should not be concluded or assumed that an investigation was not AAI merely because the inquiry did not identify RECs in connection with a subject property. ESAs must be evaluated based on the reasonableness of judgments made at the time and under the circumstances in which they were made. Subsequent ESAs should not be considered valid standards to judge the appropriateness of any prior assessment based on hindsight, new information, use of developing technology or analytical techniques, or other factors. (Section 4.5.4 of ASTM E1527-21)

A similar set of inherent limitations exist in cases where the Phase I ESA included a screening-level assessment of vapor migration or vapor encroachment; such an assessment is a required part of a Phase I ESA when ASTM E1527-21 is employed. According to ASTM E2600-15, the following limitations apply:

- **Uncertainty Not Eliminated in Screening** - No VES can wholly eliminate uncertainty regarding the identifications of VECs in connection with the target property. Screening is intended to reduce, but not eliminate, uncertainty regarding whether or not a VEC exists in connection with the property. (Section 4.5.1 of ASTM E2600-15)
- **Not Exhaustive** - The guide is not meant to be an exhaustive screening. There is a point at which the cost of information obtained or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of real estate transactions. One of the purposes of this guide is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing a VES and the reduction of uncertainty about unknown conditions resulting from additional information. (Section 4.5.2 of ASTM E2600-15)
- **Comparison with Subsequent Investigations** - It should not be concluded or assumed that an investigation was not adequate because the investigation did not identify VECs in connection with a property. The VES must be evaluated based on the reasonableness of judgments made at the time and under the circumstances in which they were made. Subsequent VESs should not be considered valid bases to judge the appropriateness of any prior screening if based on hindsight, new information, use of developing technology or analytical techniques, or similar factors. (Section 4.5.4 of ASTM E2600-15)

This report was prepared pursuant to an agreement between MTA Construction & Development (MTA C&D) (Client) and AECOM and is for the exclusive use of the Client. No other party is entitled to rely on the conclusions, observations, specifications, or data contained herein without first obtaining AECOM's

written consent and provided any such party signs an AECOM-generated Reliance Letter. A third party's signing of the AECOM Reliance Letter and AECOM's written consent are conditions precedent to any additional use or reliance on this report.

The passage of time may result in changes in technology, economic conditions, site variations, or regulatory provisions, which would render the report inaccurate. Reliance on this report after the date of issuance as an accurate representation of current site conditions shall be at the user's sole risk.

1.4 Report Viability

According to ASTM E1527-21, an ESA "meeting or exceeding this practice is presumed to be viable when it is conducted within 180 days of acquisition of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). The dates of the components presented in 4.6.2(i), (iii), (iv), and (v) for interviews, review of government records, visual inspections, and declaration by environmental professional, shall be identified in the report. Completion of searches for recorded environmental cleanup liens (4.6.2(ii)) is a user responsibility; however, if the user has engaged the environmental professional to conduct these searches, then that date shall also be identified in the report." The table below lists the dates of completion for pertinent components of this Phase I ESA.

Component	Date of Issuance/Completion
Interviews with Owners, Operators and Occupants	N/A
Environmental Lien/AUL Search	March 8, 2023
Environmental Database Report	March 8, 2023
Visual Inspection of the Subject Property and Adjoining Properties	March 15, 2023
Declaration by Environmental Professional	March 21, 2023
Issuance of Report	April 27, 2023
Report Expiration/Viability Date*	October 27, 2023

* The 180-day viability date is based on the date of report issuance noted in the table above.

1.5 Site-Related Limiting Conditions

The following site-specific limitations were encountered during the course of this assessment and are considered data gaps:

- An approximately 10-foot by 10-foot storage shed located at the southwest corner of the subject property was inaccessible during the site visit. The shed is labeled "existing electrical room" on the site plan provided by MTA C&D and appeared to be used for the storage of maintenance supplies as a large number of bags of ice melt were observed through the window. Based on the historical research documentation obtained and reviewed, this shed was developed by at least 2006 and has not identified conditions indicative of releases or threatened releases in, on, or at the storage shed. Additional information would not likely assist the environmental professional in determining whether a recognized environmental condition or controlled recognized environmental condition exists.

1.6 Data Gaps/Data Failure

The following data failure/data gaps were encountered during the course of this assessment:

- As specified in the agreed upon scope of work, a title search was not conducted as part of this Phase I ESA. Based upon historical data collected from other sources, including review of the New

York City Department of Finance, Office of City Register records, this data gap is not expected to be significant so that it would impact the results of this assessment.

- Per ASTM E1527-21, past owners, operators, and occupants of the subject property who are likely to have material information regarding the potential for contamination at the subject property shall be contacted to the extent that they can be identified and that the information likely to be obtained is not duplicative of information already obtained from other sources. AECOM was unable to interview past owners and/or operators at the subject property. However, based upon historical data collected from other sources, this data gap is not expected to be significant so that it would impact the results of this assessment.
- Per the agreed scope-of-work and ASTM E1527-21, information related to certain site-specific items should be provided by the Phase I ESA report user to AECOM. To assist the user in gathering information that may be material to identifying RECs, AECOM provided the Client (the users) with the User Questionnaire from ASTM E1527-21; at this time the completed form has not been returned for inclusion in this report. However, this data gap is not expected to represent a significant data gap to this investigation, as an Environmental Lien Search was conducted and reviewed as detailed in Section 5.2.
- AECOM submitted a Freedom of Information Law (FOIL) request to the New York State Department of Environmental Conservation (NYSDEC), the New York State Department of Health (NYSDOH), the New York City Department of Environmental Protection (NYCDEP), the New York City Department of Health and Mental Hygiene (NYCDOHMH), and the New York City Fire Department (FDNY) to determine if they have files related to a historical hazardous materials release that may have occurred at the subject property. As of the date of this report, a response to AECOM's FOIL request has not been received. Based on AECOM's research to date, AECOM does not anticipate the response (if any) from the NYSDEC, NYSDOH, NYCDEP, NYCDOHMH and the NYCFD to our FOIL request will significantly alter the conclusions of this report and is not considered a significant data gap; however, if information is received from this FOIL request that significantly impacts the conclusions of this report, this information will be forwarded upon receipt.

2. Site Description

2.1 Site Location and Parcel Description

The subject property is located at 90-01 168th Street in Jamaica, Queens, New York and is currently occupied by a public parking lot. The L-shaped subject property occupies most of the city block that is bounded by 90th Avenue to the north, 169th Street to the east, 91st Avenue to the south and 168th Street to the west. An off-site 4-story apartment complex occupies the southeast corner of the city block with the balance of the city block occupied by an asphalt-paved public parking facility. The subject property is surrounded by metal guard rails and chain link fencing. Access and egress is provided by electronic gates located on the north portion of the subject property, along 91st Avenue and on the southern portion of the site, along 91st Avenue. Limited landscaped areas are located at the northwest, northeast, and southeast corners of the subject property and small trees were noted along the east-west oriented centerlines of two parking lanes.

A cinderblock shed, approximately 10 feet by 10 feet, which appears to be utilized for the storage of maintenance supplies (i.e., rock salt) is located at the southwest corner of the subject property. A cinderblock and metal manned attendant booth is located adjacent to the east side of the northern exit gate. Out of service attendant shelters are located on the north and south sides of the subject property at the entrance and exit lanes. Vehicles were observed parked throughout the lot during the March 15, 2023 site reconnaissance.

According to the New York City Zoning and Land use (Zola) map, the subject property consists of a single 84,499 square foot (sq ft) parcel of land that is designed by the county as Block 9800, Lot 5. According to the New York City Department of Building (NYCDOB) records, the subject property has been designated as “parking lot” since August 11, 1955 and is zoned C4-5X (Commercial)/DJ (Special Downtown Jamaica District). The special DJ district builds upon Jamaica’s strengths as a multimodal transportation hub to support the downtown business district.

The approximate location of the subject property is illustrated on Figure 1 - Site Location Map. The layout of the subject property is illustrated on Figure 2 – Site Layout Plan.

2.2 Site Ownership

According to the New York City Department of Finance, Office of the City Register records, the subject property is owned by Jamaica First Parking, LLC, who purchased the subject property on March 28, 2001. Based upon review of available on-line deeds in the Office of the City Register records, a summary of historical ownership is presented below.

Grantor	Grantee	Date	Document/Record
New York City Economic Development Corporation	Jamacia First Parking LLC	03/28/2001	FT_4870007637887
New York City	New York City Economic Development Corporation	03/28/2001	FT_4740007637874
---	New York City	04/01/1958	---

2.3 Site Visit

Ms. Darshana Thapa and Ms. Christine Wagner with AECOM visited the subject property on March 15, 2023. Site-related limiting conditions encountered during this assessment were previously summarized in Section 1.5.

The site visit methodology consisted of walking over accessible areas of the subject property, which was comprised of a paved parking lot, and the portions of the surrounding area. The following sections summarize the results of the site visit.

2.3.1 Site and Facility Description

The approximately 1.9-acre subject property consists of an irregularly shaped asphalt-paved parking lot. The subject property is occupied by a manned attendant booth located adjacent to the exit gate on the north side of the site with one small out-of-service attendant shelter located adjacent to the entrance gate on the north side, and a second out-of-service shelter located adjacent to the exit gate on the south side of the subject property. Small, landscaped areas were observed at the northwest, northeast, and southeast corners of the subject property along with small trees located in the center line of each of the parking rows.

One two-yard dumpster, used for general trash, was observed on the north side of the site, immediately west of the entrance gate; and several 55-gallon drums were provided throughout the lot for the collection of solid waste/general trash. No staining was noted on the pavement beneath or around the solid waste containers observed on-site and each was observed to contain general trash.

On the southwest corner of the subject property, a cinderblock building was observed. There was no access into the building during the site reconnaissance. Bags of rock salt/ice melt were observed through the window. This building appears to be used for the storage of maintenance supplies.

The parking lot pavement was in good to fair condition with areas of cracks/breaks noted throughout the parking lot area. Minor areas of staining typically associated with parked vehicles were observed along the north, south and west sides of the parking lot; however, all stain areas are considered de minimis. The site is generally flat, sloping gently to the east. No visual evidence of discolored soil, water, or unusual vegetative conditions or odors was identified during the site visit.

During the site visit, no visual evidence of potable water wells, monitoring wells, dry wells, clarifiers, septic tanks, or leach fields was identified on the subject property.

The general layout of the subject property is illustrated on Figure 2 - Site Layout Plan and representative Site photographs are provided in **Appendix A**.

2.3.2 Surrounding Properties

The subject property is in a residential area within the Borough of Queens, New York. The subject property is bordered as follows:

- **North and Northwest:** The site is bounded by 90th Avenue to the north followed by residential dwellings and beyond which are St. Stephen's Church, and an Adult Day Care center followed by residential buildings.
- **South:** The subject property is bordered to the south by 91st Avenue with commercial development and offices including (east to west) NYS Workers Compensation Board, Department of Motor Vehicles, Tello Stores (clothing and housewares), Raymour & Flannigan, Marshalls, Feel Beauty (beauty salon), NYC Venue Space (168-09 91st Street) and Police Precinct 103.

- **East and Southeast:** A 4-story residential building (Ackroyd Court 9020 169th Street, Jamaica NY) is adjacent to the southeast portion of the site with 169th Street followed by 2-story and multi-story residential buildings noted further to the east.
- **West:** The subject property is bordered to the west by 168th Street followed by 90Ninety LLC Construction Site (166-20 90th Avenue) which is being developed with a below grade parking area and at grade multi-story commercial and residential structure..

AECOM did not identify any gasoline service stations or dry cleaners in the immediate vicinity (500 feet) of the subject property. In addition, no sensitive receptors (i.e., child day care centers, schools, hospitals, water bodies) were identified as being located adjacent to the subject property. Based on AECOM's site reconnaissance of the surrounding neighborhood, no off-site sources of concern were identified.

2.3.3 Petroleum Products and Hazardous Materials

Other than normal commercial maintenance supplies (bags of rock salt), hazardous materials or petroleum products were not identified at the subject property. Staining or visual evidence of a hazardous materials release was not identified at the time of the site visit.

2.3.4 Hazardous Waste

No hazardous waste, except for universal waste such as spent metal halide light bulbs, is generated at the subject property. Based on the presumed limited quantities, universal waste generation is not expected to represent a REC.

2.3.5 Polychlorinated Biphenyls

Polychlorinated biphenyl (PCB)-containing dielectric fluids have been widely used as coolants and lubricants in transformers, capacitors, and other electric equipment due to their insulating and nonflammable properties. No pad-mounted or pole-mounted transformers were observed at the subject property or immediately adjacent properties.

2.3.6 Aboveground Storage Tanks

Aboveground storage tanks (ASTs) were not observed on the subject property during the site visit. In addition, no ASTs were listed at the subject property in the site-specific environmental database report reviewed by AECOM, or otherwise identified during AECOM's review of historical aerial photographs.

2.3.7 Underground Storage Tanks

Visual evidence of underground storage tanks (USTs) (e.g., vent pipes, fill ports) was not identified during the site visit. No USTs were listed at the subject property in the site-specific environmental database report.

2.3.8 Solid Waste

One two-yard dumpster, used for general trash, was observed on the north side of the subject property, just west of the entrance gate and several 55-gallon drums were staged throughout the subject property for the collection of solid waste/general trash. No staining was noted on the pavement beneath or around the solid waste containers observed on-site and each was observed to contain general trash.

2.3.9 Water

The facility does not currently receive potable water. Potable water is provided to the site vicinity by the NYCDEP Bureau of Water.

2.3.10 Wells

No potable water wells, irrigation wells, or monitoring wells were observed at the subject property during site reconnaissance.

2.3.11 Wastewater

There is no wastewater discharged from the subject property. Sanitary wastewater in the vicinity of the subject property is discharged to sewers that are serviced by a NYCDEP wastewater treatment plant.

2.1.12 Stormwater

Stormwater from the subject property appears to drain via sheet flow to the numerous stormwater catch basins located throughout the paved portions of the subject property. Below grade stormwater catch basins was identified on the site plan and were confirmed during the walk-through. The subject property is connected to the municipal stormwater sewer system. No staining was identified in the vicinity of the storm drains.

2.1.13 Wetlands

According to mapped National Wetland Inventory (NWI) information contained within the environmental database search report, no wetlands are depicted at the subject property. In addition, AECOM did not observe on-site water bodies or wetlands-type vegetation. A wetlands delineation survey was not conducted as part of this assessment.

2.1.14 Heating and Cooling

The manned attendant booth located adjacent to the entry gate on the north side of the site is heated and cooled by electric heating, and air conditioning (HVAC) units. Con Edison provides electricity to the subject property.

3. Environmental Setting

3.1 Topography

Based on the U.S. Geological Survey, (USGS) 1:24000-scale Quadrangle for Jamaica, NY dated 2019, the surface topography at the site is relatively level, sloping gently to the east and lies at an elevation at approximately 60 feet above mean sea level. In the absence of man-made influences (e.g., stormwater drains and drainage ditches), surface water from the subject property likely drains generally south-southeast, following local topography, towards J Baisley Pond, located approximately 1.9 miles south of the site. Jamaica Bay is identified approximately 3.5 miles south-southwest of the subject property.

3.2 Soil/Geology

Site-specific geologic information was not identified during the course of this assessment; however, according to state and regional geologic sources, the subject property is located in the Paleozoic era, Ordovician era with Eugeosynclinal deposits. Surface soils at the subject property are mapped as mostly Urban Land comprised of silt loam, loamy sand, and sandy loam. Deeper soils are characterized as unweathered bedrock, very gravelly loam and stratified sandy loam.

Based upon site investigations conducted at the immediately adjoining property to the west, soils in the site vicinity were generally characterized as coarse to fine sands with little silt and trace clay to depths of approximately 15 feet below ground surface (bgs) grading to coarse to fine sand with some coarse to fine gravels to depths of approximately 35 feet bgs.

3.3 Groundwater/Hydrology

Site-specific hydrologic information was not identified during the course of this assessment. Groundwater in this area of Queens is not used as a source of potable water. Groundwater in the vicinity of the subject property is present at depths of approximately 38 feet bgs, as measured from monitoring wells in vicinity of the site. Based upon topography, area groundwater flow is anticipated to be in a south-southeasterly direction towards Baisley Pond, located approximately 1.9 miles away. Actual groundwater flow can be affected by many factors, including underground utilities and other subsurface obstructions such as basements and subway tunnels, past filling activities, active or historical pumping, and other factors. A hydrogeologic investigation would be required to determine site-specific groundwater flow direction.

4. Site and Area History

Historical information for the subject property and surrounding properties is based on AECOM's review and analysis of the following historical sources:

- Aerial photographs dated 1924, 1946, 1951, 1954, 1961, 1966, 1971, 1975, 1985, 1994, 2006, 2011, 2015, 2019;
- Google Earth aerial images dated 1995, 2002, 2008, and 2012 through 2022;
- Topographic maps dated 1897, 1898, 1900, 1947, 1957, 1966, 1979, 1994, 2013, 2016, 2019;
- Sanborn Fire Insurance Rate Maps dated 1886, 1891, 1897, 1901, 1912, 1925, 1926, 1942, 1951, 1963, 1967, 1981, 1982, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1995, 1996, 1999, 2001, 2002, 2003, 2004, 2005, 2006.
- City directories for the years 1934, 1939, 1945, 1962, 1967, 1970, 1983, 2005, 2010, 2014, 2020

These references were reviewed for evidence of activities that would suggest the potential presence of hazardous substances at the subject properties and to evaluate the potential for the subject properties to be impacted by off-Site sources of contamination. Historical sources are provided as **Appendix B**.

4.1 Subject Property

Historical research indicates that the subject property was vacant or undeveloped from 1886 to 1891. In 1897 the first development appears on the site as low-density residential structures. In 1901 and 1912 a steam laundry is depicted in the Sanborn Fire Insurance Maps on the southwestern portion of the subject property along with a hay and feed shed (in 1901) and wagon house (in 1912). By 1912 the subject property has been predominantly developed with residential structures, which remain on the site until 1961. The 1925 Sanborn Fire Insurance Map depicts an auto repair and a radio supplies store in the location previously occupied by the steam laundry and awning manufacturing adjacent to the southwest of that area. In 1939, City Directory listings include three listings at an address, 90-05 168th St, historically located at the western end of the subject property for a tailor shop and cleaner. A listing at 90-09 168th St, also historically located at the western end of the subject property, is for a heating company. By at least 1961, the subject property had been redeveloped as a surface parking lot; which remains in use to the present day.

The presence of a steam laundry in 1901 and 1912 and potential use of petroleum or other solvents; auto repair activities in 1925, and potential use of petroleum products for fuel or vehicle maintenance; the presence of a manufacturing operation in 1925, and presence of a cleaner in 1939 with the potential use of petroleum or chlorinated solvents is a REC, in AECOM's opinion.

On-Site RECs/VECs identified during review of historical documentation are summarized in the following table:

Year(s)	Source(s)	On-Site RECs/VECs
1901-1912	Sanborn Maps	The presence of a steam laundry.
1925	Sanborn Maps	The presence of an auto repair facility, and awning manufacturing.
1939	Sanborn Maps, City Directories	The presence of possible dry cleaners.

4.2 Adjoining Properties and Surrounding Area

Based on Sanborn Fire insurance Maps, aerial photographs, and city directories the area surrounding the subject property has been primarily residential since at least 1886. This includes several high-density residences (apartment buildings). Some commercial or non-residential development is depicted as early as 1886 and is detailed below.

North:

The area to the north of the subject property across the intersection of Ackroyd Ave (now known as 169th Street) and 1st Avenue (now known as 90th Avenue) is depicted in Sanborn Fire Insurance Maps, or appear in aerial photographs, as primarily residential, including a high-density apartment building immediately adjacent across the intersection. A sash, blind, and door factory is depicted approximately 170 feet to the north-northeast of the property in 1901. The area, adjacent across 90th Avenue to the northwest of the subject property, is depicted with residences and residential sheds or garages from at least 1897 to 2006 in Sanborn Fire insurance Maps, and appears to remain primarily residential in aerial photographs to at least 1921.

East:

From at least 1912 to 1926, the area to the east of the subject property is depicted primarily as residential. As early as 1942, a high density apartment building is depicted abutting the subject property to the east, along the southeast portion of the subject property. This apartment building (Ackroyd Court, 9020 169th Street, Jamaica, NY) remains until the present day.

South:

Sanborn Fire insurance Maps in 1886 covering the area to the southeast through southwest of the subject property depicted a mix dwellings, barns, stables, and store fronts. By 1891, while still predominantly residential, several uses are depicted off-site and adjacent to the subject property. Between 1891 and 1925 a blacksmith is located adjacent to the south across 91st Avenue (historically Liberty St). In 1912, an auto repair shop with a 200-gallon gasoline UST is depicted adjacent to the south across 91st Avenue. By 1925, the adjacent auto repair shop has been replaced with a steam laundry. From 1942 to at least 2006, a police precinct and garage with a gasoline tank are depicted at the intersection of 91st Avenue and 168th Street adjacent to the south of the subject property.

West:

Sanborn Fire insurance Maps depict the area to the southwest of the subject property as primarily residential from at least 1886 until 1951. As early as 1961 the properties to the west and southwest of the subject property across 168th St. have been redeveloped as a large surface parking lot which remained in use until 1921.

Northwest:

The area to the northwest of the subject property adjacent across the intersection of 168th St and 90th Ave. is depicted with primarily residential or non-commercial (churches) development until at least 1912. From 1925 to 1951, an auto repair facility behind a residence is depicted approximately 200 feet to the west-northwest of the subject property. From 1963 to the present day, the area to the northwest remains developed with residential structures; and a church with a rectory. The auto repair facility northwest of the subject property is no longer depicted on the 1963 Sanborn Fire Insurance Map.

Off-Site RECs/VECs identified during review of historical documentation are summarized in the following table:

Year(s)	Source(s)	Off-Site RECs/VECs
1891-1925	Sanborn Maps	The presence of a blacksmith adjacent to the south
1912	Sanborn Maps	The presence of an auto repair shop with a 200-gallon gasoline UST adjacent to the south.
1925	Sanborn Maps	The presence of a steam laundry adjacent to the south.
1946-2006	Sanborn Maps, Aerial Photographs, City Directories	The presence of a police precinct and associated garage with two 550-gallon gasoline ASTs adjacent to the south, near the southwest corner of the subject property.
1925	Sanborn Maps	An auto repair facility is depicted approximately 200 feet to the west-northwest.

4.3 Previously Prepared Environmental Reports

AECOM inquired about existing environmental reports associated with the subject property. No previous environmental assessments or reports associated with the subject property were provided for review.

5. Database and Records Review

5.1 User Provided Information

Section 6 of ASTM E1527-21 states that certain tasks, which will help to determine the possibility of RECs associated with the subject property, are generally conducted by the Phase I ESA report user. This includes the following: reviewing title records for environmental liens or activity and land use limitations and considering awareness of any specialized knowledge (e.g., information about previous ownership or environmental litigation), experience related to RECs at the subject property, or significant reduction in the purchase price of the subject property. Per the agreed scope-of-work, information related to these items should be provided by the Phase I ESA report user to AECOM. To assist the user in gathering information that may be material to identifying RECs, AECOM has provided the MTA C&D with the User Questionnaire from ASTM E1527-21. The user is not aware of environmental liens or other use limitations recorded on the subject property. A copy of the completed User Questionnaire is provided as **Appendix C**.

5.2 Land Title and Judicial Records for Environmental Liens and Activity and Use Limitations

Per the agreed upon scope of work, an Environmental Lien and Activity and Use Limitation (AUL) Search Report was ordered from EDR as a part of this assessment (**Appendix C**). According to the report, no environmental liens are recorded on the subject property.

5.3 Database Information

In accordance with the scope of work and ASTM E1527-21, a search of various governmental databases was conducted by EDR. The site-specific environmental database report was reviewed to evaluate if soil and/or groundwater from on-site and/or off-site sources of concern has the potential to impact the subject property. The database abbreviations are provided in the site-specific environmental database report. It should be noted that this information is reported as AECOM received it from EDR, which in turn reports information as it is provided in various government databases. It is not possible for either AECOM or EDR to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence.

The database report includes various reports detailing database information for each of the sites identified/geocoded within the specified radius. Additional sites were identified within the database report; however, EDR was not able to map them to specific locations due to insufficient/contradicting address information. These sites were included in the database report as "orphan" sites. Based upon AECOM's review, there does not appear to be any significant concerns associated with any of the orphan sites. A summary of AECOM's review and analysis of the site-specific environmental database report is presented below. A copy of the database report is provided in **Appendix D**.

Based on AECOM's research, the subject property is not located on or within a 1-mile radius of tribal lands.

A summary of sites identified through the regulatory agency databases review is provided in the following table:

Federal and State List	Last Updated	Search Radius*	No. of Sites within Search Radius	Site Appears on List	RECs, CRECs, VECs, or Environmental Concerns Identified
National Priority List (NPL) and Delisted NPL	01/25/2023	1 mile	0	No	No
Superfund Enterprise Management System (SEMS) and SEMS-ARCHIVE	01/25/2023	1/2 mile	0	No	No
Corrective Action Report (CORRACTS) and Resource Conservation and Recovery Act - Treatment, Storage, and Disposal (RCRA-TSDF)	11/21/2022	1 mile / 1/2 mile	0	No	No
Resource Conservation and Recovery Information System Generators/Transporters (RCRIS Gen/Trans)	11/21/2022	1/4 mile	14**	No	No
US Aerometric Information Retrieval System (AIRS)	11/04/2022	1/4 mile	0	No	No
Federal Institutional Control/Engineering Control Registries	11/02/2022	1/2 mile	0	No	No
Emergency Response Notification System (ERNS)	12/12/2022	Site	0	No	No
Toxic Chemical Release Inventory System (TRIS)	12/31/2021	1/4 mile	0	No	No
New York State Inactive Hazardous Waste Disposal Site (SHWS)	11/07/2022	1 mile	0	No	No
Hazardous Substance Waste Disposal Site Inventory (HSWDS)	01/01/2023	1/2 mile	0	No	No
Solid Waste Facilities/Landfill Sites (SWF/LF)	12/21/2022	1/2 mile	16	No	No
Vapor Reopened	01/01/2022	1/2 mile	0	No	No
New York State Spills Information Database (NY Spills)/Leaking Storage Tank Incident Reports (LTANKs)	02/06/2023	1/2 mile/ 1/2 mile	22/71	No	No
Petroleum Bulk Storage Tanks (USTs/ASTs)	09/19/2022	1/8 mile	38/36	No	No
Chemical Bulk Storage Tanks (CBS)	09/19/2022	1/4 mile	0	No	No
Voluntary and Brownfield Cleanup Program Sites	01/07/2022	1 mile	6/2	No	No
State Institutional Control/Engineering Control Registries	06/22/2022	1/2 mile	0	No	No
Registered Drycleaners	12/07/2022	1/2 mile	0	No	No
E-Designation Sites	10/27/2022	1/8 mile	5	No	No
EDR Manufactured Gas Plants (Coal Gas)	N/A	1/4 mile	1	No	No
EDR Historical Auto Stations	N/A	1/4 mile	1	No	No
EDR Historical Cleaners	N/A	1/2 mile	2	No	No

* The surrounding area search radius indicates the radial area (measured from perimeter of the Site) for which the databases review was performed.

**The database search identified 7 large quantity generators (LQGs), 4 small quantity generator (SQG), 3 very small quantity generator (VSQG), and [X] non-generators within a 1/4-mile radius of the Site.

5.3.1 Subject Property

The subject property was not identified in the site-specific environmental database report.

5.3.2 Surrounding Sites

According to the environmental database report, numerous sites (over 300) were identified within their respective ASTM E1527-21 and/or EDR search distances from the subject property. Based on AECOM's review of these database listings, none of these sites are expected to present a REC to the subject property based on their distance from the subject property, regulatory status (i.e., closed, no violations found), media impacted (i.e., soil only), and/or topographical position from the subject property (i.e., down-gradient or cross-gradient). Due to its proximity to the subject property, the following sites are discussed in additional detail:

- **90-02 168TH Street Site, 90-02 168th Street, Jamaica, NY located adjacent to the west (188 feet):**

This offsite property was identified on the Brownfields/PFAS database. Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor was sampled for VOCs. Based on the investigations conducted in 2018-2019, the primary contaminants of concern are SVOCs and metals in soil and groundwater, and VOCs in soil vapor.

Soil: SVOC exceedances of the unrestricted use soil cleanup objectives (UUSCOs) included fluoranthene (maximum of 620 parts per million (ppm); UUSCO is 30 ppm), benzo(a)anthracene (max. of 220 ppm; UUSCO is 1 ppm), benzo(a)pyrene (max. of 190 ppm; UUSCO is 1 ppm), benzo(b)fluoranthene (max. of 240 ppm; UUSCO is 1 ppm), benzo(k)fluoranthene (max. of 46 ppm; UUSCO is 0.8 ppm), chrysene (max. of 150 ppm; UUSCO is 1 ppm), phenanthrene (max. of 570 ppm; UUSCO is 100 ppm), dibenzo(a,h)anthracene (max. of 24 ppm; UUSCO is 0.33 ppm), indeno(1,2,3-cd)pyrene (max. of 130 ppm; UUSCO is 0.5 ppm), and pyrene (max. of 440 ppm; UUSCO is 100 ppm). Metal exceedances included arsenic (max. of 96.1 ppm; UUSCO is 13 ppm), cadmium (max. of 10.5 ppm; UUSCO is 2.5 ppm), lead (max. of 1740 ppm; UUSCO is 63 ppm), mercury (max. of 9.84 ppm; UUSCO is 0.18 ppm), and zinc (max. of 3890 ppm; UUSCO is 109 ppm). Perfluorooctanesulfonic acid (PFOS) was also detected in one soil boring at 0.931 parts per billion (ppb) compared to the applicable unrestricted use guidance value of 0.88 ppb. Data does not indicate any off-site impacts in soil related to this site.

Groundwater: Exceedances of the NYSDEC Technical and Administrative Guidance Series 1.1.1 Ambient Groundwater Quality standards (AWQS) included chloroform (max of 31 ppb; AWQS 7 ppb), dieldrin (max of 0.021 ppb; AWQS 0.004 ppb), perfluorooctanoic acid (PFOA) (max of 38.6 parts per trillion (ppt); Maximum Contaminant Level (MCL) [drinking water standard] of 10 ppt), and PFOS (max of 34.2 ppt; MCL 10 ppt). There are no public water supply wells within a half a mile and there is a municipal prohibition for use of groundwater at the site. Data does not indicate any off-site impacts in groundwater related to this site.

Soil Vapor: Multiple VOCs were detected in the soil vapor including trichloroethene (max. of 71.5 micrograms per cubic meter, or ug/m³) and tetrachloroethene (max. of 113 ug/m³). Data does not indicate any off-site impacts in soil vapor related to this site. This off-site property was observed under development as a multi-story structure with below grade parking, ground level retail space with residential units above. Approximately 26,500 cubic yards of contaminated soil have been removed from the property and a partial cover system remedy has been approved for the site. Institutional and engineering controls (cap) will be implemented at this off-site property per a November 2021 Decision Document issued by the NYSDEC. Based upon the regulatory status, it is AECOM's opinion that this site does not represent a REC to the subject property.

- **103 Precinct NYPD – DDC, 168-02 168-02 to 168-10 91st Avenue, Queens, NY located adjacent to the south (96 ft):** According to the EDR database report the site had one (1) 275-gallon #2 fuel oil AST, one (1) 2,500 – gallon fuel oil UST, and two (2) 550-gallon gasoline ASTs. A #2 fuel oil spill (Spill # 9211531) was reported on January 07, 1993, which was caused due to a faulty gauge. The spill was contained at the concrete surface located at the vent pipe and the case was closed. Based upon the regulatory status (closed case) this off-site spill does not represent a REC to the site.

Spill # 9511826 was reported on 12/18/1995 due to findings of gasoline contaminated soil in garage area. Two 550-gallon gasoline ASTs and associated pumps were located in the garage. The ASTs were removed in 1996 and the case is listed as closed. No additional information was provided in the EDR report. Based on the lack of closure documentation, this off-site spill case is considered a REC to the site.

One 2,500-gallon #2 oil UST was removed June 2011. According to the tank test report dated 07/17/2009, the 2,500-gallon tank system failed in dry portion. At the time of the test, the tank had 1.203 gal of oil in it. Prior to, during and after the tank removal, no visual evidence of petroleum contamination was encountered. The tank was found in good condition and free of any visual damage. No visual cracks were observed in the tank. No sign of release was noted during the removal of tank system. Based upon this report, the LTANK case was closed. Based upon the regulatory status (closed case) this off-site spill does not represent a REC to the site.

5.4 Vapor Encroachment Screening

AECOM conducted a Tier 1 VES as part of this assessment. This screening was conducted in general accordance with the ASTM E2600-15. The objective of the VES was to determine if a VEC exists or if a VEC does not exist.

5.4.1 Subject Property

Portions of the subject property was utilized as a steam laundry in 1901-1912, as an auto repair and awning manufacturer in 1925 and, a tailor shop and cleaner in 1939. No additional information was provided for review. Given the site usage as a public parking lot, the potential for vapor intrusion is not considered at concern at this time; however, should there be a change in property usage, it is AECOM's opinion that a VEC exists and is considered a REC.

5.4.2 Off-site

To conduct the VES of the nearby area, AECOM conducted a detailed review and analysis of the site-specific environmental database report with particular focus on the follow two types of sites:

1. Off-site properties that are impacted by chlorinated volatile organic compounds (CVOCs) and/or semi-volatile-organic compounds (SVOCs) and are located within approximately 1,750 feet of the subject property, and
2. Off-site properties that are impacted by petroleum hydrocarbons and are located within approximately 525 feet of the subject property.

The following paragraph summarizes the results of AECOM's VES of the nearby area.

A review of the site-specific environmental database indicates that numerous (greater than 10) CVOC/SVOC or petroleum impacted sites exist with the above radii; however, due to their regulatory status (i.e., regulatory closure has been issued), media impacted (i.e., soil only), and/or topographical position from the subject property (i.e., down-gradient or cross-gradient) it is AECOM's opinion that a VEC at the subject property due to an off-site source does not exist.

Due to its proximity to the subject property the following site is discussed in greater detail.

- **90-02 168TH Street Site, 90-02 168th Street, Jamaica, NY located adjacent to the west (88 ft):** This site is listed in the Brownfields/PFAS inventory and contains SVOC contamination above regulatory limits; however, historical site investigation data does not suggest off-site soil vapor impacts from this site.
- **103 Precinct NYPD – DDC, 168-02 168-02 to 168-10 91st Avenue, Queens, NY located adjacent to the south (96 ft):** Spill # 9511826 was reported on 12/18/1995 due to findings of gasoline contaminated soil in garage area at Police Precinct 103 located immediately south of the site. Two 550-gallon gasoline ASTs and associated pumps were located in the garage. The ASTs were removed in 1996 and the case is listed as closed.

5.5 Agency File Review

5.5.1 Local

AECOM submitted Freedom of Information Law (FOIL) requests to the City of New York Department of Health (NYCDOH), New York City Department of Environmental Protection (NYCDEP), the New York City Department of Health and Mental Hygiene (NYCDOHMH), and New York City Fire Department (FDNY) to determine if they have files related to a historical hazardous materials release that may have occurred at the subject property. As of the date of this report, a response to AECOM's FOIL request has not been received. Based on AECOM's research to date, AECOM does anticipate that a response (if any) from the these agencies to our FOIL request may significantly alter the conclusions or recommendations of this report. If information is received from this FOIL request that significantly impacts the conclusions of this report, this information will be forwarded upon receipt.

AECOM reviewed readily available New York City Department of Building (NYCDOB) records for the subject property. No complaints or notice of violation for the subject property were identified based upon the NYCDOB review.

5.5.2 State

AECOM submitted Freedom of Information Law (FOIL) requests to the New York State Department of Environmental Conservation (NYSDEC) and New York State Department of Health (NYSDOH), to determine if they have files related to a historical hazardous materials release that may have occurred at the subject property. As of the date of this report, a response to AECOM's FOIL request to NYSDEC and NYSDOH has not been received. If information is received from this FOIL request that significantly impacts the conclusions of this report, this information will be forwarded upon receipt.

5.5.3 Federal

AECOM searched the U.S. EPA's Envirofacts and Superfund Enterprise Management System (SEMS) online databases. The SEMS database replaced the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) which has since been retired. SEMS includes the same data fields and content as CERCLIS. The Envirofacts database retrieves information obtained from 17 national systems, including the CERCLIS, Superfund program (NPL sites), hazardous waste sites, and potentially hazardous waste sites. No records were identified for the subject property.

6. Findings and Opinions

AECOM performed a Phase I ESA of the subject property in conformance with the scope and limitations of ASTM E1527-21, which meets the requirements of Title 40, Code of Federal Regulations Part 312 and is intended to constitute *all appropriate inquiry* for purposes of the landowner liability protections. Any exceptions to, or deletions from, this practice are described in Section 1.3 through 1.5 of this report.

The following sections summarize the findings of this Phase I ESA and the opinions of the environmental professional.

6.1 Recognized Environmental Conditions

The following RECs were identified during this assessment:

- The property was historically occupied by a steam laundry from at least 1901 to 1912; and by a tailor shop and cleaner in at least 1939. No information was available to determine if dry cleaning activities were performed on-site. The potential historic use of the subject property as a dry-cleaning facility is considered a REC.
- The property was historically occupied by an auto repair facility and an awning manufacturer in at least 1925. No records indicate the extent of automotive repairs on site or the historic use and disposal of petroleum products or other chemicals associated with auto repair and manufacturing operations on the subject property. The potential historic use of the subject property for auto repair and awning manufacturing is considered a REC.
- The property adjacent to the south of the subject property contains the historic locations of a blacksmith (1891-1925), an auto repair shop with a gasoline tank (1912), and a steam laundry (1925). No information was available to determine if dry cleaning activities were performed on-site, or the extent of vehicular maintenance; however, the potential use of this adjacent site for metal working, dry-cleaning, and auto repair and fueling is considered a REC.
- The subject property was occupied by residential dwellings and commercial properties from at least 1897 until 1961 when the buildings were razed. No information was available regarding disposition of the demolition debris. Historic below grade foundations and suspect buried debris, including the potential for buried heating oil tanks, have the potential to impact the site and are considered RECs.
- The property adjacent to the south of the subject property contains the historic location (1912 Sanborn) of an auto repair facility with a 200-gallon underground storage tank. Due to the lack of tank closure documentation, this off-site UST is considered a REC to the site.
- The property adjacent to the southwest corner of the subject property is currently occupied by Police Precinct 103. The police garage contained two 550-gallon gasoline ASTs in contact with soil. Spill # 9511826 was reported on 12/18/1995 due to findings of gasoline contaminated soil in the garage area. The two 550-gallon gasoline ASTs and associated pumps located in the garage were removed in 1996 and the case is listed as closed. No additional information was provided in the EDR report. Based on the lack of closure documentation, this off-site spill case is considered a REC to the site.

6.2 Controlled Recognized Environmental Conditions

Based on the above-described activities, no CRECs were identified in connection with the subject property.

6.3 Historical Recognized Environmental Conditions

Based on the above-described activities, no HRECs were identified in connection with the subject property.

6.4 Vapor Encroachment Conditions

Portions of the subject property was utilized as a steam laundry in 1901-1912, as an auto repair and awning manufacturer in 1925 and, a tailor shop and cleaner in 1939. No additional information was provided for review. Given the site usage as a public parking lot, the potential for vapor intrusion is not considered a concern at this time; however, should there be a change in property usage, it is AECOM's opinion that a VEC cannot be ruled out and is considered a REC.

6.5 De Minimis Conditions

Minor areas of staining typically associated with parked vehicles were observed along the north, south and west sides of the parking lot on intact asphalt pavement; however, all stained areas are considered de minimis.

6.6 Significant Data Gaps

ASTM E1527-21 requires the environmental professional document significant data gaps, as well as any exceptions to, or deletions from the ASTM Practice E1527-21. A significant data gap is a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

Based on the above-described activities, no significant data gaps were identified during this Phase I ESA.

Additional investigation may be appropriate to detect the presence of hazardous substances or petroleum products.

6.7 Other Business Considerations

Based on the date of construction of the subject property (circa 1961), asbestos-containing materials (ACM) and Lead-Based Paint (LBP) may be present at the structures (attendant booths, maintenance equipment storage shed) at the subject property. It has been AECOM's experience that asbestos in building materials and LBP can only be thoroughly evaluated by sampling and laboratory analysis. It should be noted that an asbestos survey by a licensed inspector and/or a lead-based paint survey was not included within the scope of this assessment.

7. Conclusions

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM E1527-21 of 90-01 168 Street, Jamaica, Queens, New York, the subject property. Any exception to, or deletions from, this practice are described in Sections 1.3 through 1.5 of this report. This assessment has revealed no evidence of CRECs or HRECs in connection with the property.

The following RECs were identified in connection with the subject property:

- The property was historically occupied by a steam laundry from at least 1901 to 1912; and by a tailor shop and cleaner in at least 1939. No information was available to determine if dry cleaning activities were performed on-site. The potential historic use of the subject property as a dry-cleaning facility is considered a REC.
- The property was historically occupied by an auto repair facility and an awning manufacturer in at least 1925. No records indicate the extent of automotive repairs on site or the historic use and disposal of petroleum products or other chemicals associated with auto repair and manufacturing operations on the subject property. The potential historic use of the subject property for auto repair and awning manufacturing is considered a REC.
- The property adjacent to the south of the subject property contains the historic locations of a blacksmith (1891-1925), an auto repair shop with a gasoline tank (1912), and a steam laundry (1925). No information was available to determine if dry cleaning activities were performed on-site, or the extent of vehicular maintenance; however, the potential use of this adjacent site for metal working, dry-cleaning, and auto repair and fueling is considered a REC.
- The subject property was occupied by residential dwellings and commercial properties from at least 1897 until 1961 when the buildings were razed. No information was available regarding disposition of the demolition debris. Historic below grade foundations and suspect buried debris, including the potential for buried heating oil tanks, have the potential to impact the site and are considered RECs.
- The property adjacent to the south of the subject property contains the historic location (1912 Sanborn) of an auto repair facility with a 200-gallon underground storage tank. Due to the lack of tank closure documentation, this off-site UST is considered a REC to the site.
- The property adjacent to the southwest corner of the subject property is currently occupied by Police Precinct 103. The police garage contained two 550-gallon gasoline ASTs in contact with soil. Spill # 9511826 was reported on 12/18/1995 due to findings of gasoline contaminated soil in the garage area. The two 550-gallon gasoline ASTs and associated pumps located in the garage were removed in 1996 and the case is listed as closed. No additional information was provided in the EDR report. Based on the lack of closure documentation, this off-site spill case is considered a REC to the site.

The following VECs were identified during this assessment:

- Portions of the subject property was utilized as a steam laundry in 1901-1912, as an auto repair and awning manufacturer in 1925 and, a tailor shop and cleaner in 1939. No additional information was provided for review. Given the site usage as a public parking lot, the potential for vapor intrusion is not considered of concern at this time; however, should there be a change in property usage, it is AECOM's opinion that a VEC cannot be ruled out and is considered a REC.

The following de minimis conditions (DMCs) were identified during this assessment:

- Minor areas of staining typically associated with parked vehicles were observed along the north, south and west sides of the parking lot on intact asphalt pavement; however, all stained areas are considered de minimis.

Other Business Considerations

- Based on the date of construction of the subject property (circa 1961), asbestos-containing materials (ACM) and Lead-Based Paint (LBP) may be present at the structures (attendant booths, maintenance equipment storage shed) at the subject property. It has been AECOM's experience that asbestos in building materials and LBP can only be thoroughly evaluated by sampling and laboratory analysis. It should be noted that an asbestos survey by a licensed inspector and/or a lead-based paint survey was not included within the scope of this assessment.

8. Environmental Professional Statement

Ms. Christine Wagner was the Environmental Professional (EP) for this project. Ms. Wagner's EP statement is below and her resume is provided in **Appendix E**:

I declare that, to the best of my professional knowledge and belief, I meet the definition of an EP as defined in §312.10 of 40 Code of Federal Regulations (CFR) and that I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AECOM were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by AECOM were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

Coordinates:

P.O.#	NA	Latitude:	40.707725 40° 42' 28" North

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1934 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

User Questionnaire and Environmental Lien Search Report

ASTM 1527-21
USER QUESTIONNAIRE

To qualify for one of the *Landowner Liability Protections (LLPs)*¹ offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"),² the *user* must conduct the following inquiries required by 40 C.F.R. §§ 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *user* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that "*all appropriate inquiries*" is not complete.

(1.) Environmental liens that are filed or recorded against the *subject property* (40 C.F.R. § 312.25).

Did a search of *land title records* (or judicial records where appropriate, see Note 1 below) identify any *environmental liens* filed or recorded against the *subject property* under federal, tribal, state, or local law?

No, the title report did not disclose any Environmental liens filed or recorded against the subject property
NOTE 1—In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that *environmental liens* and *AULs* be filed in judicial records rather than in *land title records*. In such cases judicial records shall be searched for *environmental liens* and *AULs*.

(2.) Activity and use limitations that are in place on the *subject property* or that have been filed or recorded against the *subject property*.

Did a search of *land title records* (or judicial records where appropriate, see Note 1 above) identify any *AULs*, such as *engineering controls*, *land use restrictions* or *institutional controls* that are in place at the *subject property* and/or have been filed or recorded against the *subject property* under federal, tribal, state or local law?
The title report discloses that per the COO, the permitted use of the property is for a municipal parking field and attendant shelter.

(3.) Specialized knowledge or experience of the person seeking to qualify for the *LLP* (40 C.F.R. § 312.28).

Do you have any specialized knowledge or experience related to the *subject property* or nearby *properties*? For example, are you involved in the same line of business as the current or former *occupants* of the *subject property* or an *adjoining property* so that you would have specialized knowledge of the chemicals and processes used by this type of business? No.

(4.) Relationship of the purchase price to the fair market value of the *subject property* if it were not contaminated (40 C.F.R. § 312.29).

Does the purchase price being paid for this *subject property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *subject property*? Yes.

(5.) Commonly known or reasonably ascertainable information about the *subject property* (40 C.F.R. § 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *subject property* that would help the *environmental professional* to identify conditions indicative of *releases* or threatened *releases*? For example,

- (a.) Do you know the past uses of the *subject property*? parking
(b.) Do you know of specific chemicals that are present or once were present at the *subject property*? No
(c.) Do you know of spills or other chemical *releases* that have taken place at the *subject property*? No
(d.) Do you know of any environmental cleanups that have taken place at the *subject property*? No

(6.) The degree of obviousness of the presence or likely presence of contamination at the *subject property*, and the ability to detect the contamination by appropriate investigation (40 C.F.R. § 312.31).

Based on your knowledge and experience related to the *subject property*, are there any *obvious* indicators that point to the presence or likely presence of *releases* at the *subject property*? No

Project Address: 90-01 168th St., Project City: Jamaica, Queens County, New York
Completed by: Niko Sciacchetti Company Name: Greyco.com Date: April 17, 2023

¹ Landowner Liability Protections, or LLPs, is the term used to describe the three types of potential defenses to Superfund liability in EPA's Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability ("Common Elements" Guide) issued on March 6, 2003.

² P.L. 107-118.

EDR Environmental Lien and AUL Search 1980

The EDR Environmental Lien and AUL Search 1980 report provides results from a search of available land title records for environmental cleanup liens and other activity and use limitations (AULs), such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address and/or parcel information to:

- search for parcel number and/or legal description
- search for ownership information filed between 1980 and the most current publicly available date
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.
- search for environmental encumbering instrument(s) filed between 1980 and the most current publicly available date
- provide a copy of any environmental encumbrance(s)
- provide a copy of the current deed when available

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Property Archives, LLC researched and compiled the land title information contained in this EDR Environmental Lien and AUL Search 1980 report on behalf of EDR.

THIS INDENTURE, dated as of March 28, 2001, between NEW YORK CITY ECONOMIC DEVELOPMENT CORPORATION ("Grantor"), a local development corporation incorporated under Section 1411 of the New York State Not-for-Profit Corporation Law, having an office at 110 William Street, New York, New York 10038, and JAMAICA FIRST PARKING, L.L.C. ("Grantee"), a Delaware limited liability company formed for non-profit purposes, having an office at c/o G. J. D. C., 90-04 161st Street, Jamaica, New York 11432.

WITNESSETH

WHEREAS, the Mayor of The City of New York, on the 27th day of March, 2001, authorized the sale of the premises hereinafter described by The City of New York ("the City") to Grantor; and

WHEREAS, the Queens Borough Board by Resolution adopted on November 20, 2000, approved such transfer of title.

NOW, THEREFORE, Grantor, in consideration of the sum of ONE MILLION SEVEN HUNDRED FIFTY-THREE THOUSAND DOLLARS (\$1,753,000.00), paid by Grantee, and other valuable consideration, does hereby grant and release unto Grantee, its successors and assigns forever:

ALL that certain lot, piece or parcel of land situate, lying and being in the Borough of Queens, City and State of New York, being known and designated as Block 10151, Lot 39 ("Site 1"); Block 9800, Lot 5 ("Site 2"); and Block 9796, Lot 63 ("Site 3"), on the Tax Map for said Borough, as such Tax Map existed on (i) April 26, 1965 when the City acquired title to Block 10151, Lot 39 and (ii) April 1, 1958 when the City acquired title to Block 9800, Lot 5, and Block 9796, Lot 63, bounded and described as follows:

BLOCK 9800, LOT 5:

BEGINNING at the corner formed by the intersection of the northerly side of 91st Avenue and the easterly side of 168th Street;

THENCE RUNNING northerly along the easterly side of 168th Street, on an interior angle of 92 degrees 45 minutes 36 seconds a distance of 200.41 feet (Actual), 200.43 (Final Map), 200.25 feet (Tax Map) to the intersection of the easterly side of 168th Street and the southerly side of 90th Avenue;

THENCE RUNNING easterly along the southerly side of 90th Avenue, on an interior angle of 87 degrees 14 minutes 24 seconds a distance of 467.55 (Actual) 466.37 feet (Final Map) to the intersection of the southerly side of 90th Avenue and the westerly side of 169th Street;

THENCE RUNNING southerly along the westerly side of 169th Street, at right angles to the southerly side of 90th Avenue a distance of 100.18 feet;

© LANDMAP JAMAICA FIRST, LTD. TO PURCHASE DRAFT FOR 01-15-01 DDC

RECEIVED 11 11 11

THENCE RUNNING westerly at right angles to the westerly side of 169th Street, a distance of 82.75 feet;

THENCE RUNNING southerly at right angles to the last mentioned course, a distance of 100 feet to the northerly side of 91st Avenue;

THENCE RUNNING westerly along the northerly side of 91st Avenue a distance of 375.15 feet to the intersection of the northerly side of 91st Avenue and the easterly side of 168th Street, the point or place of BEGINNING.

BLOCK 9796, LOT 63:

BEGINNING at a point formed by the intersection of the westerly side of 168th Street and the southerly side of 90th Avenue;

THENCE RUNNING westerly along the southerly side of 90th Avenue along an interior angle of 89 degrees 58 minutes 20 seconds, a distance of 292.50 feet;

THENCE RUNNING southerly along an interior angle of 90 degrees 57 minutes 33 seconds, a distance of 143.60 feet;

THENCE RUNNING easterly along an interior angle of 89 degrees 49 minutes 40 seconds, a distance of 21.45 feet (Actual) 21.50 feet (Tax Map);

THENCE RUNNING southerly along an exterior angle of 90 degrees 02 minutes 42 seconds, and along the easterly side of 91st Avenue, a distance of 118.30 feet (Actual) 117.36 feet (Tax Map);

THENCE RUNNING westerly along the southerly side of 91st Avenue on an exterior angle of 90 degrees 44 minutes 31 seconds a distance of 3.68 feet;

THENCE RUNNING southerly along an interior angle of 90 degrees 46 minutes 00 seconds a distance of 100 feet;

THENCE RUNNING easterly along an interior angle of 89 degrees 14 minutes 00 seconds, a distance of 120 feet;

THENCE RUNNING northerly along an interior angle of 90 degrees 46 minutes 00 seconds, a distance of 14.70 feet (Actual) 15.50 feet (Tax Map);

THENCE RUNNING easterly along an exterior angle of 89 degrees 39 minutes 50 seconds, a distance of 153.44 feet to the westerly side of 168th Street;

THENCE RUNNING northerly along the westerly side of 168th Street (Present Street Line) on an interior angle of 90 degrees 35 minutes 10 seconds a distance of 214.66 feet to a point;

THENCE RUNNING still northerly along the westerly side of 168th Street (Present Street Line), on an interior angle of 178 degrees 20 minutes 20 seconds, 135.85 feet to the corner at the point or place of beginning.

BLOCK 10151, LOT 39:

Beginning at the corner formed by the intersection of the westerly side of 165th Street and the northerly side of Archer Avenue;

Running Thence westerly along the northerly side of Archer Avenue the following (2) courses and distances:

- (1) On an interior angle of 90 degrees 44 minutes 40 seconds a distance of 210.94 feet

- to a point;
- (2) From said point, thence on an interior angle of 166 degrees 46 minutes 31 seconds a distance of 93.38 feet, to the westerly side of the former 164th Street;

Thence northerly along the westerly side of former 164th Street on an interior angle of 101 degrees 32 minutes 09 seconds, a distance of 114.34 feet;

Thence easterly at right angles to the last mentioned course a distance of 46.00 feet, to the present westerly line of tax lot 39;

Thence northerly at right angles to the last mentioned course and along the present westerly line of tax lot 39, a distance of 159.19 feet to the southerly side of 92nd Road and the present line of tax lot 39 as shown on the present tax map for block 10151;

Thence easterly along the southerly side of 92nd Road and the present line of tax lot 39 as shown on the present tax map for block 10151 on an interior angle of 87 degrees 07 minutes 00 seconds, a distance of 253.41 feet to the corner formed by the southerly side of 92nd Road and the present line of tax lot 39 as shown on the present tax map for block 10151 and the westerly side of 165th Street;

Thence southerly the following (3) courses and distance along the westerly side of 165th Street to the corner, at the point or place of beginning:

- (1) On an interior angle of 94 degrees 34 minutes 20 seconds a distance of 187.89 feet to a point;
- (2) From said point on an interior angle of 172 degrees 37 minutes 40 seconds a distance of 32.09 feet to a point;
- (3) From said point on an interior angle of 186 degrees 37 minutes 40 seconds a distance of 53.50 feet to the corner, at the point or place of beginning.

TO HAVE AND TO HOLD said premises herein granted unto Grantee, the successors and assigns of Grantee forever.

(A)(1) Grantee, on behalf of itself, its successors and assigns, covenants, (x) within three (3) months from the date hereof, to commence rehabilitation of the parking garage building on Site 1 and improvements to Site 2 and Site 3, and (y) within two (2) years from the date hereof to have completed rehabilitation of the parking garage building on Site 1 and improvements to and installation of revenue control equipment on and around Site 2 and Site 3, as more particularly described in this subparagraph (A)(1) ("the Promised Improvements"). Grantee shall be deemed to have fulfilled this covenant by completing all of the items of work detailed in Exhibits A1-A4, provided that, in case field conditions indicate in Grantee's reasonable judgment that different or additional work items may be necessary for proper improvement of the physical condition or utility of the premises for use for the purposes set forth herein, subject to Grantor's consent within fifteen (15) business days of Grantee's request which will not be unreasonably withheld, work of comparable scope to the work identified in Exhibits A1-A4, whether relating to repair or replacement of structural elements or parking surfaces, deferred maintenance of improvements

(but not cosmetic improvements), purchase of capital equipment and its installation at the premises for use in relation to parking operations or similar capital investments, may be substituted for the work identified in Exhibits A1-A4. Notwithstanding the provisions of the preceding sentences, in order to be in compliance with the requirements hereof, within two (2) years from the date hereof Grantee shall be required to replace the deteriorated concrete topping at the roof and second level and install a 1/4" thick ter-polymer topping at the roof level of the garage at Site 1, purchase and install new revenue control equipment for the parking lots at Sites 2 and 3 and plant at least sixty (60) trees at and around Sites 2 and 3 and to incur aggregate direct costs in connection with the Promised Improvements of at least Two Million Twenty-Three Thousand Eight Hundred Thirty Dollars (\$2,023,830.00). Grantee, within sixty (60) days of the completion of the work meant to satisfy the construction requirements hereof, shall deliver evidence of performance of this covenant by delivering a certificate from a licensed engineer or architect to Grantor stating the work has been completed, the cost of such work and that it satisfies the construction requirements hereof set forth above. Also, Grantee shall deliver copies of paid receipts to Grantor detailing the direct cost of labor, materials, equipment, design fees and expenses related to such construction, purchase and installation with the certificate. Grantor shall deliver written acknowledgment to Grantee of compliance with this covenant within sixty (60) days after receipt of the above described certificate and receipts.

(A)(2) Also, Grantee, on behalf of itself, its successors and assigns, covenants, within seven (7) years from the date hereof to complete other improvements to the parking garage identified in Exhibit B (or subject to Grantor's consent within fifteen (15) business days of Grantee's request which will not be unreasonably withheld, to complete items comparable to the work identified in Exhibit B, whether relating to repair or replacement of structural elements or parking surfaces, or deferred maintenance of improvements (but not cosmetic improvements), or purchase of capital equipment to be located at Site 1 and utilized in relation to parking operations). Any improvements referred to in this subparagraph (A)(2) shall have a minimum direct cost of Five Hundred Ninety-Eight Thousand Dollars (\$598,000.00). Grantee shall evidence performance of these improvements and proof of payment to Grantor in the same manner as in subparagraph (A)(1) above. Grantor shall acknowledge Grantee's compliance in the same manner as provided in subparagraph (A)(1).

HIS 04 5 85 1111

(A)(3) Grantor's agents or representatives shall have access to the premises at reasonable times and upon reasonable notice to Grantee for the purposes of determining whether the work required above is being undertaken and shall have the right to audit Grantee's books, records and financial statements. If Grantee transfers title to the premises to New York City Industrial Development Agency ("IDA") in connection with obtaining financial assistance, Grantee, on behalf of itself and Grantee's successors, covenants that, so long as it or its successor leases the premises from IDA or a successor agency, Grantee or Grantee's successor will be bound by and will complete the rehabilitation required in subparagraphs (A)(1), (A)(2) and (A)(3) herein (the "Rehabilitation") as if Grantee or Grantee's successor had retained title to the premises. Grantor will not require that IDA or a successor agency do such Rehabilitation or have recourse against IDA or a successor agency in connection therewith. IDA on behalf of itself and any successor agency will covenant that, until the Rehabilitation required by subparagraphs (A)(1), (A)(2) and (A)(3) has been completed, any lease of the premises from it or such successor agency shall require the lessee of the premises to complete such Rehabilitation as if it was the title holder of the premises and to provide in leases of the premises that Grantor and its successors and assigns and designees are a named third party beneficiary of such obligation. Such requirement on the part of IDA shall be IDA's sole obligation in connection with Grantee's Rehabilitation obligation herein.

(B) Grantee, on behalf of itself, its successors and assigns, covenants that, for a period of seven (7) years from the date hereof, the premises and any improvements thereon shall be used in connection with the non-residential business operations and corporate purposes of Grantee, primarily in connection with Grantee's public parking lot and parking garage facilities and for no other purposes, except with the prior written approval of Grantor. In addition, Grantee covenants to maintain 556 parking spaces at Site 1, 256 parking spaces at Site 2, and 303 parking spaces at Site 3, for a period of seven (7) years from the date hereof. The above restrictions in this paragraph shall not apply to the premises after a foreclosure sale or a transfer in lieu of foreclosure under a mortgage held by an institutional lender securing financing with regard to the purchase of the premises by Grantee or construction financing with regard to construction on the premises or a permanent "take-out" loan with regard to such construction financing.

(C) Grantee, on behalf of itself, its successors and assigns, covenants that, for a period

111 515 515 111

0
C

of seven (7) years from the date hereof, it shall not convey the premises (or any improvements thereon) or any interest in either, except (i) as part of a bona fide sale of Grantee's entire business or (ii) with the prior written approval of Grantor or (iii) to IDA in connection with financial assistance provided by IDA to Grantee in connection with Grantee's purchase of the premises and or Rehabilitation of the site and the building space required hereby to be rehabilitated on the premises; provided, however, that Grantee, its successors and assigns may not convey the premises (or any improvements thereon) or any interest in either at any time (except to IDA as indicated above) until the Rehabilitation described in subparagraphs (A)(1), (A)(2) and (A)(3) hereof has been completed, except with the prior written approval of Grantor. In addition to the foregoing, IDA or any successor agency may reconvey the premises (and any improvements thereon) back to Grantee. The above restrictions and covenants in this paragraph shall run with the land. The above restrictions and covenants in this paragraph shall not prohibit, or apply to, a foreclosure sale or a transfer in lieu of foreclosure under a mortgage held by an institutional lender securing financing with regard to the purchase of the premises by Grantee or construction financing with regard to construction on the premises or a permanent "take-out" loan with regard to such construction financing, nor to any sale or other transfer subsequent to such a foreclosure sale or transfer in lieu of foreclosure. In addition to the foregoing, until the later of (x) completion of the Rehabilitation required on the premises by this Deed and (y) seven (7) years from the date hereof, any additional member in Grantee, and any change in the interest of any member of Grantee in Grantee, must be approved in writing by Grantor. Grantee agrees to provide Grantor with such information as Grantor needs in deciding whether to give any approval required hereby. Any request for approval by Grantor of any of the above matters, and any notice to Grantor, and any notice of approval or disapproval by Grantor, shall be in writing and given by mailing the same by certified or registered mail addressed as follows: if to Grantor, New York City Economic Development Corporation, 110 William Street, New York, New York 10038, Attn: President; if to Grantee, Jamaica First Parking, LLC, c/o G. J. D. C., 90-04 161st Street, 7th Floor, Jamaica, New York 11432, Attn: President; with a copy to Gary Steinberg, Esq., Albanese & Albanese, Esqs., 1050 Franklin Avenue, Garden City, New York 11050; or to such other address as either party designates to the other in writing in the manner set forth above.

(D) In the event of acquisition by the City by condemnation or otherwise of any part

111 563535 51 b

or portion of the above described premises lying within the bed or lines of any street, avenue, parkway, expressway, park, public place or catchbasin, as shown on the present City Map. Grantee, and its heirs, successors and assigns shall only be entitled, as compensation for such acquisition by the City, to the amount of One Dollar (\$1.00) and shall not be entitled to compensation for any buildings or structures erected thereon which may lie within the bed or lines of any street, avenue, parkway, expressway, park, public place or catchbasin so laid out and acquired. This covenant shall run with the land and shall continue until the City Map is amended or changed to eliminate from within the bed or lines of any street, avenue, parkway, expressway, park, public place or catchbasin, any such part or portion of the premises and no longer.

(F) For purposes of this deed, "Hazardous Substances" shall mean any (i) "hazardous substance" as defined under the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. Section 9601, et seq., or (ii) "hazardous waste" as defined under the Resource Conservation and Recovery Act, 42 U.S.C. Section 6901 et seq., or (iii) "hazardous materials" as defined under the Hazardous Materials Transportation Authorization Act, 49 U.S.C. Section 5101 et seq., or (iv) "hazardous waste" as defined under New York Environmental Conservation Law, Section 27-0901 et seq., or (v) "hazardous substance" as defined under the Clean Water Act, 33 U.S.C. Section 1321 et seq., and the regulations adopted and publications promulgated pursuant to the above, and all other applicable laws, rules or regulations of all Federal, State and local authorities having jurisdiction over the premises.

For purposes of this deed, "Environmental Laws" shall mean, collectively, the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. Section 9601, et seq., the Resource Conservation and Recovery Act, 42 U.S.C. Section 6901 et seq., the Hazardous Materials Transportation Authorization Act, 49 U.S.C. Section 5101 et seq., the New York Environmental Conservation Law, Section 27-0901 et seq., the Clean Water Act, 33 U.S.C. Section 1321 et seq., and any Federal, state, or local statute, law, ordinance, code, rule, regulation, order or decree regulating, relating to, or imposing liability or standards of conduct concerning, any hazardous, toxic, radioactive, biohazardous or dangerous waste, substance or materials, including any regulations adopted and publications promulgated with respect thereto.

Grantee, for itself and its successors and assigns, hereby absolutely waives, and agrees that neither it nor its successors and assigns, if any, shall make any claim for damages,

contribution, indemnification or otherwise against Grantor or the City, as applicable, which Grantee or its successors or assigns may now or hereafter have or discover in connection with Hazardous Substances on, in, at, under, beneath, emanating from or affecting the premises, or in connection with any voluntary or required removal or remediation thereof (including, without limitation, claims relating to the release, threatened release, disturbance, emission or discharge of Hazardous Substances). Grantor and the City shall have no liability to Grantee, or its successors or assigns, with regard to Hazardous Substances, on, at, in, under, beneath, emanating from or affecting the premises. Such waivers and/or releases shall cover, without limitation, any and all liability to Grantee, both known and unknown, present and future, for any and all environmental liabilities, including without limitation any and all strict and other liability, costs, claims, fines, penalties, damages under any and all Environmental Laws with respect to investigating, remediating, mitigating, removing, treating, encapsulating, containing, monitoring, abating, or disposing of any Hazardous Substance, and any costs incurred to come into compliance with Environmental Laws.

ERR 53555 518

(F) If Grantee (1) shall fail to perform, commence or complete the Rehabilitation on the premises within the time and in the manner required by this deed or (2) shall fail to use, or cause to be used, the premises for seven (7) years in the manner required by this deed or (3) shall convey the premises (or any improvements thereon) or any interest in either in violation of the terms of this deed, or if (4) any additional member shall be admitted in Grantee or there shall be any change in the interest of any member of Grantee in Grantee, in violation of the terms of this deed, then Grantor may notify Grantee of such failure or violation. If, within 30 days after receiving such notice, Grantee fails to cure the failure or violation (A) in the case of a failure specified in subdivision (1) above, by commencing or resuming the Rehabilitation required by this deed and diligently continuing such Rehabilitation until completion, or (B) in the case of a failure specified in subdivision (2) above, by causing the premises to be used in the manner required by this deed (provided that if Grantee does not diligently continue such Rehabilitation to completion after commencing or resuming such Rehabilitation as indicated above, or does not cause to be continued such use, Grantor shall have the hereinafter described rights without any further notification to Grantee), or (C) in the case of a violation specified in subdivision (3) above, by reacquiring the premises (and any improvements thereon) or any interest in either or

O
C

(D) in the case of a violation specified in subdivision (4) above, by causing the reacquisition of the interest of any member of Grantee in Grantee issued or transferred in violation of the terms of this deed, then, in addition to any remedies available to Grantor by law or by this deed or under the contract of sale pursuant to which Jamaica First Parking, LLC purchased the premises, Grantor, without paying Grantee (or any subsequent owner of the premises (or any improvements thereon) or any interest in either) any consideration, shall have the right to re-enter and take possession of the premises (together with any improvements thereon), and the estate conveyed hereby to Grantee shall thereupon terminate, and fee simple title to the premises, and any improvements thereon, shall revert in Grantor forever in the same manner and to the same extent as if the conveyance made by this deed had not been made, except, however, that Grantor's reacquisition of the premises (together with any improvements thereon) shall be subject to the lien of mortgages held by institutional lenders securing financing with regard to the purchase of the premises by Jamaica First Parking, LLC or construction financing with regard to construction on the premises or a permanent "take-out" loan with regard to such construction financing. Upon Grantor's exercise of such option to re-enter and reacquire, Grantee (and/or any subsequent owner of the premises (or any improvements thereon) or any interest in either), upon demand by Grantor, shall execute and deliver to Grantor a deed for the premises (and any improvements thereon) in form and substance satisfactory to Grantor. The execution and delivery of the foregoing deed(s) shall not, however, be construed as a condition precedent to Grantor's acquisition, as aforesaid, of the premises (and any improvements thereon). Notices pursuant to this paragraph shall be in writing and sent by certified or registered mail, and if to Grantee shall be addressed to Jamaica First Parking, LLC, c/o G. J. D. C., 90-04 161st Street, 7th Floor, Jamaica, New York 11432, Attn: President, with a copy to Gary Steinberg, Esq., Albanese & Albanese, Esqs., 1050 Franklin Avenue, Garden City, New York 11050, and if to Grantor shall be addressed to New York City Economic Development Corporation, 110 William Street, New York, New York 10038, Attention: President, or to such other address as Grantor or Grantee designates to the other in writing in the manner indicated above. Any attorney's costs and fees of Grantor in exercising the above right to re-enter and reacquire the premises (together with any improvements thereon) or any interest in either shall be paid by Grantee. Grantor's right to re-enter and reacquire the premises (together with any improvements thereon) shall terminate

6 1 9 0 4 1 6 1 S T 7 5 7
 9 0 0 4 1 6 1 S T 1 9

O
 C

at the time that Grantee transfers title to the premises to IDA. Whenever Grantor or Grantee is referred to in this paragraph, it shall mean Grantor and its successors and assigns or Grantee and its successors and assigns, respectively.

The conveyance pursuant to this deed is subject to the trust fund provisions of Section 13 of the New York State Lien Law.

The covenants of the Grantee hereunder shall run with the land and bind Grantee's successors and assigns.

IN WITNESS WHEREOF, Grantor has caused its corporate seal to be hereunto affixed and has executed this deed by having it signed by its duly authorized officer, and Grantee has duly executed this deed, the day and year first above written.

KNOW BY ALL PERSONS BY THESE PRESENTS,

that NEW YORK CITY ECONOMIC DEVELOPMENT CORPORATION, a corporation pursuant to the Not-for-Profit Corporation Law of the State of New York, having an address at 110 William Street, New York, NY 10038 ("NYCEDC")

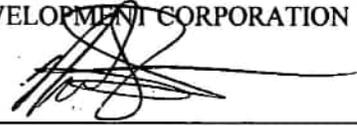

DOES HEREBY CERTIFY that the following covenants are deemed **SATISFIED:**

Covenants set forth in Paragraphs (A), (B), and (C) of the Indenture dated as of the 28th day of March, 2001, whereby, New York City Economic Development Corporation conveyed to Jamaica First Parking, LLC, certain premises identified as Block 10151, Lot 39 ("Site 1"), Block 9800, Lot 5 ("Site 2") and Block 9796, Lot 63 ("Site 3") on the Tax Map for the Borough of Queens, City and State of New York, a/k/a/ 92-02 165th Street, Jamaica, New York; 90-01 168th Street, Jamaica, New York; 90-02 168th Street, Jamaica, New York, recorded in the office of the City Register of Jamaica, Borough of Queens, New York (the "City Register"), on April 25, 2001 at Reel: 5855; Page: 510.

PROVIDED, however, that in the event of acquisition by The City of New York (the "City") by condemnation or otherwise of any part or portion of the above described premises lying within the bed of any street, avenue, parkway, expressway, park, public place or catch basin, as shown on the present City Map, the Grantee, and its heirs, successors and assigns shall only be entitled, as compensation for such acquisition by the City, to the amount of One Dollar (\$1.00) and shall not be entitled to compensation for any buildings or structures erected thereon which may lie within the bed or lines of any street, avenue, parkway, expressway, park, public place or catch basin so laid out and acquired. This covenant shall run with the land and shall continue until the City Map is amended or changed to eliminate from within the bed or lines of any street, avenue, parkway, expressway, park, public place or catch basin, any such part or portion of the premises and no longer.

Dated as of the 19 day of August, 2013.

NEW YORK CITY ECONOMIC
DEVELOPMENT CORPORATION

By: 
Name: David Ehrenberg

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

NY RGA LF.....	Recovered Government Archive Solid Waste Facilities List

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 7 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQQ: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQQ list, as provided by EDR, and dated 11/21/2022 has revealed that there are 3 RCRA-VSQQ sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 11/07/2022 has revealed that there are 5 NY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 12/21/2022 has revealed that there are 16 NY SWF/LF sites within approximately 0.5 miles of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/06/2023 has revealed that there are 71 NY LTANKS sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 38 NY UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the NY VCP list, as provided by EDR, has revealed that there are 6 NY VCP sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

EXECUTIVE SUMMARY

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 02/06/2023 has revealed that there are 22 NY Spills sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/21/2022 has revealed that there are 93 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

NY PFAS: DEC surveyed select businesses, fire departments, fire training centers, bulk storage facilities, airports, and Department of Defense (DoD) facilities. The responses to the survey have helped to determine if these entities used or stored materials containing PFOA/PFOS including AFFF and dispersants used in Teflon coating operations. The results of this survey will be updated periodically as additional responses are received..

A review of the NY PFAS list, as provided by EDR, has revealed that there is 1 NY PFAS site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

NJ MANIFEST: Hazardous waste manifest information.

A review of the NJ MANIFEST list, as provided by EDR, and dated 12/31/2018 has revealed that there are 19 NJ MANIFEST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
JAMAICA GAS AND LIGH	BEAVER RD., AND 158T	SW 1/2 - 1 (0.583 mi.)	BK395	1049

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

ALSTON CHARLES INC	8815 168TH ST APT 2D	NW 0 - 1/8 (0.100 mi.)	M88	198

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

 Site Description: "Site Location: The site is located at 90-02 168th Street, Jamaica, NY. The approximately 2.28-acres site is bounded to the north by 90th Avenue, to the east by 168th Street, to the west by a church complex, a religious bookstore, and residential buildings, and to the south by commercial retail buildings. The site is located in a predominantly mixed-use commercial and residential neighborhood with some religious and institutional uses. Site Features: The site is paved and is being used as a public parking lot. The parking lot is enclosed in chain-link fencing, with gated entrances, each with small metal and concrete attendant shelters. Current Zoning and Land Use: The site is

Env Problem:

currently located in a C4-5X (commercial) district. The site is paved and is currently used as a parking lot with three metal and concrete attendant shelters. The closest residential zone is directly to the north of the site, starting on 90th Avenue and continuing north. Past Use of the Site: According to Sanborn maps, the site was developed prior to 1886 with residential dwellings and stables. Commercial properties were present on the site by 1925 including a plumbing shop and paint storage shed. An auto repair shop and church were present on the northern portion of the property in the 1940s and 1950s. By 1963 all on-site structures were demolished, and the property has since been utilized for parking. Buried foundation elements and demolition debris from former structures could include petroleum storage tanks. Site Geology and Hydrogeology: The surface topography at the site is relatively level and lies at an elevation at approximately 60 feet above mean sea level. The regional surface topography slopes in a south-southeast direction. Subsurface materials consist of historic fill (including sand with coarse to fine gravel, silt, and some brick fragments) from the surface to a depth of approximately 9 feet below grade surface (bgs). The fill material is generally by apparent native material consisting of sand and silt to approximately 102 feet bgs. Bedrock was not encountered during previous site investigations. Groundwater is present at depths of approximately 38 feet bgs, as measured from monitoring wells across the site. Groundwater flows in southwesterly direction towards Jamaica Bay, located approximately 3.5 miles away. Groundwater in this area of Brooklyn is not used as a source of potable water. "Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor was sampled for VOCs. Based on the investigations conducted to date, the primary contaminants of concern are SVOCs and metals in soil and groundwater, and VOCs in soil vapor. Soil - SVOC exceedances of the unrestricted use soil cleanup objectives (UUSCOs) included fluoranthene (maximum of 620 parts per million (ppm); UUSCO is 30 ppm), benzo(a)anthracene (max. of 220 ppm; UUSCO is 1 ppm), benzo(a)pyrene (max. of 190 ppm; UUSCO is 1 ppm), benzo(b)fluoranthene (max. of 240 ppm; UUSCO is 1 ppm), benzo(k)fluoranthene (max. of 46 ppm; UUSCO is 0.8 ppm), chrysene (max. of 150 ppm; UUSCO is 1 ppm), phenanthrene (max. of 570 ppm; UUSCO is 100 ppm), dibenzo(a,h)anthracene (max. of 24 ppm; UUSCO is 0.33 ppm), indeno(1,2,3-cd)pyrene (max. of 130 ppm; UUSCO is 0.5 ppm), and pyrene (max. of 440 ppm; UUSCO is 100 ppm). Metal exceedances included arsenic (max. of 96.1 ppm; UUSCO is 13 ppm), cadmium (max. of 10.5 ppm; UUSCO is 2.5 ppm), lead (max. of 1740 ppm; UUSCO is 63 ppm), mercury (max. of 9.84 ppm; UUSCO is 0.18 ppm), and zinc (max. of 3890 ppm; UUSCO is 109 ppm). Perfluorooctanesulfonic acid (PFOS) was also detected in one soil boring at 0.931 parts per billion (ppb) compared to the applicable unrestricted use guidance value of 0.88 ppb. Data does not indicate any off-site impacts in soil related to this site. Groundwater - Exceedances of the NYSDEC Technical and Administrative Guidance Series 1.1.1 Ambient Groundwater Quality standards (AWQS) included chloroform (max of 31 ppb; AWQS 7 ppb), dieldrin (max of 0.021 ppb; AWQS 0.004 ppb), perfluorooctanoic acid (PFOA) (max of 38.6 parts per trillion (ppt); Maximum Contaminant Level (MCL) [drinking water standard] of 10 ppt), and PFOS (max of 34.2 ppt; MCL 10 ppt). There are no public water supply wells within a half a mile and there is a municipal

Health Problem:	prohibition for use of groundwater at the site. Data does not indicate any off-site impacts in groundwater related to this site. Soil Vapor - Multiple VOCs were detected in the soil vapor including trichloroethene (max. of 71.5 micrograms per cubic meter, or ug/m3) and tetrachloroethene (max. of 113 ug/m3). Data does not indicate any off-site impacts in soil vapor related to this site. "
	"Direct contact with contaminants in the soil is unlikely because the majority of the site is covered with pavement. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into buildings and affect the indoor air quality. This process is referred to as soil vapor intrusion. Because there is no on?site building, inhalation of site contaminants in indoor air due to soil vapor intrusion does not represent a concern for the site in its current condition. However, the potential exists for the inhalation of site contaminants due to soil vapor intrusion for any future on-site development and occupancy. Environmental sampling indicates soil vapor intrusion from site contaminants is not a concern for off-site structures."

KOLLEENY DGS MONITOR. URS Corp. did site investigation and found limited area of soil contamination and minor groundwater contamination in one well. They proposed soil vapor extraction and GW monitoring. DEC approved remedial design report in March 2001. After additional GW sampling, DEC approved NFA for GW in August 2001. SVE system was started up in August 2003. By early 2004, system was getting diminishing results, and URS proposed confirmation soil sampling to evaluate remedial progress. DEC approved confirmation soil sampling plan in March 2004, sampling took place in April 2004. In Nov. 2004, URS submitted System Performance Monitoring Report for Aug.-Oct. 2004, with results of confirmation soil sampling and round of groundwater sampling. One of three borings showed residual soil contamination, so SVE system was re-started in August 2004. GW sampling showed no impacts. URS will continue to operate SVE system until vapor influent indicates system has reached asymptotic conditions, then advance another soil boring to evaluate soil conditions. - J. Kolleeny 3/18/05. Spill transferred to Alex Zhitomirsky on 4/4/05. - JK 10-12-2005 URS indicated that there is an increase in the extraction of contaminants from the vadose zone. In April 2005, URS issued a work plan for collection of another confirmation soil sample in the vicinity of SB-01. AZ 11/03/2005 Reviewed System Performance Report dated June 2005. SVE system was modified -K-Packer installed and ventilation wells closed. Soil sample will be collected near SB-01. URS indicated that there is an increase in the extraction of contaminants from the vadose zone. AZ 1/09/2005 Reviewed System Performance Monitoring Report received on Nov. 29, 2005. An increase in the extraction of contaminants from the vadose zone was observed. URS will collect another confirmation sample in the vicinity of soil boring SB-01. AZ 3-17-2008 An e-mail was sent to Brian Morrissey (Roux) requesting the update for this spill. AZ 3-23-2009 Response was received from Craig Werle(Roux): Groundwater has had an NFA here since Roux started on the project. Soil borings need to be done to assess current soil quality. A work plan has not been prepared, which will be the next step. AZ 3/24/2009 An e-mail was sent to DDC/Roux: Last report for this site was dated November 29, 2005. NYCDDC should address this spill without delay. 9-30-2009 I have received Request for No Further Action for the above spill number dated September 3, 2009. The site had limited area of soil contamination and minor groundwater contamination in one well. Soil vapor extraction and groundwater monitoring were proposed as remedial strategy. DEC approved remedial design report in March 2001. After

additional groundwater sampling, DEC approved NFA for groundwater in August 2001. SVE system was started up in August 2003. By early 2004, system was getting diminishing results, and URS proposed confirmation soil sampling to evaluate remedial progress. DEC approved confirmation soil sampling plan in March 2004, sampling took place in April 2004. Based on the sampling results, SVE system was modified by URS. In 2005 URS issued a confirmation soil sampling plan which was approved by DEC. No sampling was performed at that time. On several occasions DEC requested that Roux perform the approved sampling. The sampling was performed in the summer of 2009. Sampling revealed only two minor detections found in sample SB-04 which were below NYSDEC Residential Soil Cleanup Objectives. Based on the above information this spill is closed. The e-mail confirming the site closure is sent to DDC/Roux. AZ "

Tank Info:

Tank Number: 001
Tank Id: 3494
Material Code: 0002
Common Name of Substance: #4 Fuel Oil (On-Site Consumption)

Equipment Records:

E00 - Piping Secondary Containment - None
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
K00 - Spill Prevention - None
B00 - Tank External Protection - None
F00 - Pipe External Protection - None
J02 - Dispenser - Suction Dispenser
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)

Tank Location: Aboveground - contact with impervious barrier... Tank bottom rests on impervious barrier, allowing visual indication of leaks.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 10/18/1972
Capacity Gallons: 7500
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True
Modified By: MJGRIFFI

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking

DEC Memo: "Sharif responded to the site 02/22/06 Sharif Rahman- Responded to the site on 02/17/06 evening.The driver did n't check the gauge of the tank and started delivering oil. Oil came out of the vent due to overfill. Spill impacted the side walk and went down to the basement. FDNY put down speedy dry. Sewer was impacted. NYC DEP(Mr. Cellace) was at scene.Oil Company is Millenium Heating and Transport,(718)246-5700 and I told them to clean up the oil impact both outside and inside the basement. 03/28/06 Sharif Rahman- I left few messeges for Mr. Rafat,(718)669-8674 to call back DEC regarding the clean up of the oil spill in the basement. 04/03/06 Sharif Rahman- Being unsuccessful to get the feed back from Mr. Rafat about the spill clean up in the basement,I called the oil company and spoke with Ms.Barbara, who said she will have Manager Eddie call DEC to report the status of the basement. 04/05/06 Sharif Rahman- I spoke with Best Buy Furniture,(Mr. Howard Haj@718-291-4000). They are comfortable with the spill clean up.There is no more odor complain in the basement.NFA required."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Region: 2
DER Facility ID: 306381
DEC Memo: "12/2/2005 Sangesland spoke to Chris Gabriel at JC Broderick Assoc. (516-351-3233) He said the site is a vacant lot, construction site of a future Home Depot. Several buried tanks were found. A contractor from Conneticut pulled the tanks and removed some soil. End point samples came back with some minor hits. 12/5/2005 Chris Gabriel called back with the name/contact for the property owner: Starwood Ceruzzi LLC 1720 Post Road Fairfield CT 06824 Attn: Kenneth Cartelli 203-256-4000 Several tanks have been found on the site. So far many tanks have been pulled and are laying on plastic. Various soil piles are also divided up based on if they are contaminated or not. 12/6/05 - Raphael Ketani. I spoke to Chris Gabriel at (631) 584-5492, ext. 22 (cell:(516) 315-9254). He said the previous contractor was EWMA of NJ. Nine (9) tanks have been discovered so far. Grammercy Demolition is doing the excavating. We will meet a 2PM today at the site. I met with Mr. Gabriel, Senior Environmental Scientist, and Paul Fazio, Project Manager. Mr. Gabriel showed me a site map depicting about 10 former building locations. There were 11 tank sites. I told Mr. Gabriel that the tanks have to be registered and then closed. He said he would do this. The tanks are as follows: #1 - not found #2 - 1,000 gal. UST, excavated, removed fuel and water mix #3 - 500 gal. UST, excavated, former gas tank #4 - 500 gal. UST, excavated, former gas tank #5 - not found #6 - 3,000 gal. UST, excavated, former #2 oil #7 - 1,000 gal. UST, excavated, former #2 oil EarthCare pumped out all liquids. #8 - 250 gal. AST, removed #9A- 10,000gal. AST, removed, motor oil&fuel mix #9B&C-1,500gal. AST, removed, motor oil&fuel mix #10 - 500 gal. UST, excavated, oil&water mix Mr. Garbiel said that the former environmental company was Environmental Waste Management Associates in NJ (973) 560-1400. The owners are Starwood Ceruzzi, LLC, Fairfield, CT, (203) 256-4000. The site is about 10 acres. Sandy soil is visible all over the site, aside from the C&D rip rap. Some basement walls are still present along the perimeter of the site. Slight odors from the cut up tanks that are still present. I told Mr. Gabriel to have someone cleanup the cut up pieces quickly so that they are not an odor nusiance. He said he would do that. Otherwise, there were no odors on site. 12/7/05 - Raphael Ketani. I reviewed the analytical data for the soil samples taken during 11/05 by the previous consultants, Environmental Waste Management Associates. There was no data for the tank 7 site or the tank 9C site. Additionally, the boring sites 6-1, 6-3, A8, 9A-1, 9A-2, 9A, 9B-1, 9B-2, 8A, 7-2, 7-5, 3-2, 3-3, and 2-5 need further soil removal. I will send Mr. Gabriel of J.C. Broderick a letter stating this and ordering further cleanup. 12/14/05 - Raphael Ketani. Spoke to Mr. Gabriel today. He said they did a total of 7 excavations of soil over 12/12 and 12/13. Total volume was 800 to 900 tons. Contaminated soil

is presently stockpiled on site, but will go to a disposal facility in Carteret, NJ once they get permission. The cut up oil tanks have been shipped off site. 12/15/05 - Raphael Ketani. Brian Owen of Environmental Waste Management Associates ((973) 560-1400, ext 150) called to get clarification regarding the soil testing methods. I told him the methods are 8260B and 8270C, and compared to TAGM 4046. 12/16/05 - Raphael Ketani. Mr. Gabriel e-mailed me the summary sheets for the lab analysis of soil samples taken at excavation (former tank) sites: 9B, 9C, and 8. The SVOC values were just above TAGM. I told him he could backfill the pits. Data for sites 6 and 9A weren't sent as the results were below the TAGM, according to Mr. Gabriel. 12/20/05 - Raphael Ketani. I reviewed the December 14, 2005 and December 15, 2005 soil analytical results for former tank sites 2, 3, 8, 9B, and 9C. There were no exceedences of TAGM 4046. I told Mr. Gabriel that he could back fill the pits where the samples were taken. 12/29/05 - Raphael Ketani. Today, I received the Spill Closure Report dated 12/28/05 for the site. I reviewed the report and found the analytical results and the documentation to have met the requirements that the Department had set forth during previous correspondences with J.C. Broderick. I am closing the case based upon the information in this report. 1/17/06 - Raphael Ketani. Chris Gabriel of JC Broderick Assoc. called (516) 315-9254 and requested that an NFA letter be sent to Starwood Ceruzzi. I will send the letter."

Remarks: "WHILE DOING CONSTRUCTION AT THIS LOCATION FOUND TANKS AND CONTAMINATION:"

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Spiller Contact: SHANTA PURAN
Spiller Phone: (718) 725-1911
Spiller Extention: Not reported
DEC Region: 2
DER Facility ID: 324119
DEC Memo: "Joe Cornacchioli Petro - 718-628-3370 Petro tested the suction line

- Failed recheck delivery dates and quantity of oil unaccounted for. 12/08/06-Vought-Called Joe Cornacchioli and left message to return call to DEC. Vought sent general soil contamination letter with one month due date to owner: Shanta D Puran 168-11 88th Avenue Jamaica, NY 11432 12/8/06-Vought-Vought spoke to Shanta Puran and she just started working today and money is hard. As such Vought arranged site visit by DEC Rahman for preliminary inspection. Shanta's contact information is home (718-725-1911) and cell (347-754-2803). 12/13/06 Rahman- I made a site inspection on 12/11/06 afternoon to discover any potential oil release because of the suction line failure. The old suction line which failed, runs under shallow near concrete. There was no apparent petroleum odors in the basement. Therefore, I suggested them to take the old line out of the cement and find out if there is any visual/olfactory evidence of contamination present. If no contamination found, a statement from the property owner along with couple of nice pictures of the uncovered suction line area would help to consider the close out of the case. 12/13/06-Vought-Site visit performed by DEC Rahman. No odors or stains in concrete. Supply line is approximately 20' long with 10' running under concrete and 10' running above concrete but under masonry cement (spill would be visible via staining). DEC Rahman called Puran and required her to excavate line. Vought called Puran and she will have concrete broken and call DEC back for site visit to inspect soil. 1/9/06-Vought-Received call from Shanta and concrete was broken and is requesting site visit. 05/18/07 Rec'd closure document from Eastmond. Approx. 40 bags of contaminated soil was disposed, one end point sample was collected from the pit. Results came back VOC/SVOC non detect. Waste disposal manifest was provided. Reviewing case on behalf of case manager's request. Spill closed. (SR)"

Remarks: "OIL LINE IS LEAKING AT ABOVE LOCATION: PETRO OIL ON SCENE"

DER Facility ID: 7106
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was MULQUEEN 06/16/06: This spill is transferred from Mike Mulqueen to Mr. Koon Tang. 11/10/06. Reassign to J.Krimgold. TTF letter was send to: Concerned MGNT Corp. 251-38 71st Street Queens, NY 11426 Contact 718-347-0018 JK. 1/16/07. Karen Ferraro of Concerned MGNT Corp. called J.Krimgold to discuss steps necessary to close this spill. She has never received our TTF letter, because address was wrong. It should be 71st Road not Street. She was suggested to contact PTC, who made tank repair back in 1998, and find what caused the tank failure. She stated that this 5000 gal UST was closed in-place and a new AST ~4000 gal was installed(no PBS info. regarding this). Another TTF letter was sent to: Attn. Karen Ferraro Concerned MGNT Corp. 251-38 71st Road Queens, NY 11426 7/6/07. J.Krimgold reviewed the letter report submitted by Action Remediation, Inc dated June 28, 2007. Six soil borings were installed around tank and along piping. Lab results show some contaminants level marginally above TAGM levels. PBS registration was corrected. NFA letter."

Remarks: "5000 gal u/g tank tank failed then was uncovered and retested failed a second time "

DEC Memo: "12/06/05: This spill transferred from J.Kolleeny to S.Kraszewski.
07/26/06: NYCHA update summary states that one 10K UST that uses #2
oil is currently in-service. This tank suffered a TTF due to a man
way gasket leak, tank was repaired and retested on 12/07/01. The tank
is scheduled for a retest on 12/07/06, but no mention of whether it
passed seeing how this summary was prepared 5 months after the
scheduled retest. One MW installed in 1995 in bailing water only.
NYCHA recommends closure of the spill. - SK 11/21/11: NYCHA
submitted a letter dated March 5, 2010 which provided results of a
tank tightness test which was performed on 11/06/06. The tank passed.
A second tank tightness test was performed on 9/9/11. The tank
passed; the results were submitted to DER at the november 17 meeting.
11/22/11: NYCHA submitted a letter on November 21 requesting closure.
Based on this information (edoced), the spill was closed. NFA "

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
 Tank Id: 51782
 Material Code: 0001
 Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

K00 - Spill Prevention - None
 D01 - Pipe Type - Steel/Carbon Steel/Iron
 F01 - Pipe External Protection - Painted/Asphalt Coating
 I01 - Overfill - Float Vent Valve
 A00 - Tank Internal Protection - None
 B01 - Tank External Protection - Painted/Asphalt Coating
 L09 - Piping Leak Detection - Exempt Suction Piping
 E00 - Piping Secondary Containment - None
 G03 - Tank Secondary Containment - Vault (w/o access)
 H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
 C01 - Pipe Location - Aboveground
 J02 - Dispenser - Suction Dispenser

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.

Tank Type: Steel/Carbon Steel/Iron
 Tank Status: In Service
 Pipe Model: Not reported
 Install Date: 09/01/1962
 Capacity Gallons: 2000
 Tightness Test Method: NN
 Date Test: Not reported
 Next Test Date: Not reported
 Date Tank Closed: Not reported
 Register: True
 Modified By: MJGRIFFI

DEC Region: 2
DER Facility ID: 130356
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND ROSSAN - CALLED ROMEO, DON CARLOS ENVIRONMENTAL,(DEC), ON 12/24/2001, WHO CONFIRM TANK TEST FAILURE. NO PHYSICAL EVIDENCE OF A SPILL. AUSTIN - SEE ALSO 0100429 3/16/2005 - Sangesland reviewed a report prepared by James Skeley P.G.(Geologist) stating that borings done through the basement floor were found to be unaffected by the spill on the basement floor surface. Also, the vaulted AST that had been the cause of the leaking line problem has been taken out of service and rendered unusable. Spill Closed - No Further Action"
Remarks: "caller states he got a call from dec about a tank test failure and was told to get a spill number for it - does not have any further info - will be installing a new tank"

Environmental Interest/Information System:
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 4/11/2001 Sangesland spoke with John Maltz (718-786-5050) of Greiner Maltz Management about this spill. Mr. John Maltz Greiner Maltz Management 42-12 28th St Long Island City, NY 11101 According to tenents, leaking tank is a cronic ongoing problem. Commercial building - tank in a vault - Mina Fuel Oil Astoria is in charge of the clean up. Mr. Maltz was told he had NO PBS RECORDS FOR THIS SITE, he said he would check it out. 2/14/2002 Sangesland spoke with John Maltz agian on this site. Mr. Maltz said the tank had been replaced and the site was cleaned up. When Sangesland requested details, Mr. Maltz said that Mina Fuel Oil was handling all details. When

Sangesland again asked Mr. Maltz about the PBS records, the reply was that they did have all the proper permits. Mr. Maltz listed 3 different addresses the building could have been permitted under... NONE HAD A PBS. Mr. Maltz had no idea what size tank was in the building, nor what size was installed. See also spill #0109404 6/9/05 Spill case was closed out (cross ref 0109404) 5/9/2006 Sangesland spoke to Suzanne Misson who works with a bank holding an escrow on this property. Sangesland told her that the DEC will not be sending out a No Further Action Letter , Only a copy of this spill report showing the Case Closed Date of 06/09/2005. If there are any further questions on this subject call- Steven Sangesland, NYSDEC Spills Group at 718-482-6753. "

Remarks: "leaking tank inside the basement - on going problem - ray dowd is on scene - dec to call him @ the # giving"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 222488
Material Code: 0022
Common Name of Substance: Waste Oil/Used Oil

Equipment Records:

E00 - Piping Secondary Containment - None
G11 - Tank Secondary Containment - Double-bottom (Aboveground)
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
H02 - Tank Leak Detection - Interstitial - Manual Monitoring
J01 - Dispenser - Pressurized Dispenser
G10 - Tank Secondary Containment - Impervious Underlayment
K00 - Spill Prevention - None
D00 - Pipe Type - No Piping
L00 - Piping Leak Detection - None
I04 - Overfill - Product Level Gauge (A/G)

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Tank Type: Steel/Carbon Steel/Iron

Tank Status: In Service

Pipe Model: Not reported

Install Date: 02/01/2008

Capacity Gallons: 275

Tightness Test Method: NN

Date Test: Not reported

Next Test Date: Not reported

Date Tank Closed: Not reported

917-815-8456, Fax: 718-658-1411), person running gas station at subject site. he owns this business for last three years. before him Mittermaan (Lucky) Singh (Ph.: 718-658-6610, Cell: 718-314-3070, Fax: 718-658-0106) was running the gas station business in 1998, who owns business currently behind subject site. left message for Mr. Singh. spoke with landlord's relative, Paul Sinanis (718-476-1752). landlord passed away and the Department can send correspondance to Mr. Sinanis. received message from Mr. Lucky Singh. left message for Mr. Singh. 11/15/06-Hiralkumar Patel. spoke with Mr. Singh. he leased the land and owned gas station in 1998. then he sub-leased gas station to currnet station owner and running car delarship in back of gas station. before sub-leasing gas station, he replaced tanks and cleaned contaminated soil. Mr. Singh has some documents about that soil removal work. he will check his record and will send copy of documents that he has. 11/30/06-Hiralkumar Patel. left message for Mr. Singh. received call from Mr. Singh. he hasn't got any documents and he will forward once he finds anything. 12/14/06-Hiralkumar Patel. spoke with Mr. Singh. he spoke with person at trucking company (516-634-0509) who transported contamianted soil to land in Pensylvennia. but trucking company doesn't have any records after seven years. left message for Paul Sinanis for his address to send letter. from PBS record, address for Paul is: Paul Sinanis Maria Sinanis 39-48 64th Street Woodside, NY 11377 Ph. (718) 476-1752 received call from Mr. Sinanis. he confirmed above address. 12/15/06-Hiralkumar Patel. sent out letter to Mr. Sinanis at above address requiring soil delineation. letter faxed to Mr. Kabir, current tenant at subject site. 12/22/06-Hiralkumar Patel. received message from Mr. Singh. spoke with Mr. Singh. he asked to call trucking company who transported contaminated soil from site. explained to Mr. Singh that without proper documentations/report, this case will stay open. Mr. Singh will check for any available reports on this case. asked Mr. Singh to hire another consultant for soil/groundwater delineation if he couldn't find any report. 01/09/07-Hiralkumar Patel. left message for Mr. Sinanis. 02/16/07-Hiralkumar Patel. received only copies of disposal tickets from Mr. Singh. no endpoint sample data. spoke with Mr. Sinanis and asked him to submit report by 04/01/07 as he never received letter from the Department. sent another letter to Mr. Sinanis with same requirement. 03/09/07-Hiralkumar Patel. left message for Mr. Sinanis. 03/19/07-Hiralkumar Patel. received message from Mr. Singh. spoke with Mr. Singh. he is in process of hiring contractor for required work. he will call by end of this week with contractor's

info who will going to do
soil/groundwater investigation. 03/22/07-Hiralkumar Patel. received
call from Mr. Singh. he has
hired Environmental Management Solutions Inc. Patricia Badding
Environmental Management Solutions
Inc. Ph. (908) 604-2291 (O) (908) 500-7160 (C) FAX (908) 604-4949
email: pbadding@aol.com
03/23/07-Hiralkumar Patel. received message from Ms. Badding. they
have scheduled geoprobing on
04/03/07. she requested deadline extension to May 15, 07 for report
submission. spoke with Ms.
Badding. approved her request to extend deadline. 05/02/07-Hiralkumar
Patel. received call from Mr.
Singh. he mentioned that consultant did borings at site and took
samples. he will call consultant
and ask them to submit report. 05/15/07-Hiralkumar Patel. received
call from Patty from
Environmental Management Solutions, who took soil samples. Patty will
send report in next week.
06/06/07-Hiralkumar Patel. spoke with Patty. she will send report by
06/15/07. 06/15/07-Hiralkumar
Patel. received call from Patty. she is preparing report and will send
by 06/18/07.
06/26/07-Hiralkumar Patel. received report from Patty. abstract: -
currently site has three
single-walled steel 4000 gal gasoline USTs and one fiberglass-coated
4000 gal diesel UST - tanks
are filled directly - during Feb. 1998, three 4000 gal gasoline USTs
were upgraded and one 4000 gal
diesel UST was installed and approx. 146 tons of contaminated soil was
removed - total of seven
soil borings were advanced to depths ranging 8 to 23 ft bg depending
upon rock refusal - no
groundwater encountered in any boring - found contamination in SB-3
and SB-6 - boring SB-3 was
advanced centrally in front of the dispenser along Hillside ave.
highest PID measured was 219 ppm
and measured at the 14-15 ft interval where refusal was met <----- -
boring SB-6 was advanced off
the northwestern corner of the dispenser along Hillside ave. refusal
encountered at 8.5 ft bg.
highest PID, 770 ppm, was measured at 7-8 ft and PID decreased to 450
ppm where refusal was
encountered
-----SB-3-----SB-6-----limit 14-15 ft
7-8 ft
Xylene-----24,800-----7,160-----1,200
1,2,4-Trimethylbenzene--19,000-----12,000-----10,000
1,3,5-Trimethylbenzene---6,400-----3,300-----3,300 spoke
with Patty. she mentioned that
tank top is right under asphalt floor and tank invert could be 5-6 ft
bg (means all samples area
almost two ft below tank invert). Patty mentioned that store manager
told her about electric lines
going underground from tank/dispenser to store and as he didn't had
any map, they hadn't took any
samples south of tank pad. spoke with Mr. Singh. asked him to do more

soil investigation around SB-3 and SB-6 to define area of contamination and soil boring between tank location and convenience store on-site. also asked him to take groundwater sample between SB-3 and SB-6. sent letter to Mr. Sinanis requiring further soil delineation around SB-3 and SB-6 and also area south of USTs (which was not investigated during first investigation), groundwater sample and endpoint samples (if excavation possible). letter faxed to Mr. Singh, Mr. Kabir and Patty. 08/14/07-Hiralkumar Patel. received message from Patty (on 07/26/07). they drilled and found rocks at site. they will use mobile drill rig and try again. they will do drilling on 08/27/07. 09/25/07-Hiralkumar Patel. received message from Patty. they did borings on 09/20/07. 10/11/07-Hiralkumar Patel. spoke with Patty. she is waiting for analyticals. 11/07/07-Hiralkumar Patel. spoke with Patty. she will send report next week. 11/12/07-Hiralkumar Patel. received message from Patty. they put well between tank field and garage. they had problem putting well along Hillside ave as found underground lines and can't install any wells around previous borings SB-3 or SB-6. 11/21/07-Hiralkumar Patel. left message for Patty. 11/23/07-Hiralkumar Patel. received call from Patty. she is going next week to sample one well which installed between tank field and on-site store. they tried to install another well closed to previous boring SB-3, but got refusal after 16 ft and may some electrical lines running at that depth. asked Patty to find general groundwater depth and flow direction in that area. Patty will send groundwater analyticals for one sample from recently installed well. 12/12/07-Hiralkumar Patel. received message from Patty. she took groundwater sample on 12/07/07 and will send results once gets it. 01/11/08-Hiralkumar Patel. left message for Patty. 01/14/08-Hiralkumar Patel. received message from Patty. she will send report tomorrow. 01/22/08-Hiralkumar Patel. received report from Patty. abstract: - installed two borings, one converted to well - one boring SB-8 was installed on south of tank field, between tank field and on-site store. boring was advanced to depth of 50 ft; no PID readings found - two soil samples were taken from boring B-8; one soil sample from depth of 40-42 ft interval (the soil/water interface) and another sample was taken to depth of 48-50 ft - boring B-8 was converted to well - boring B-9 was advanced east of previous boring B-3; rock refusal was met at depth of 15-17 ft bg where soil sample was collected; PID at 15-17 ft depth was 1.2 ppm - one groundwater sample collected from installed well - depth of groundwater was measured at 41.66 ft from top of well casing - no LNAPL

or sheen observed in groundwater - no contamination found in any soil or groundwater sample spoke with Patty. mentioned her that the department required complete delineation of soil contamination around previous boring B-3 and B-6. Patty mentioned that due to electrical and other lines in ground, west of boring B-6, they couldn't do any further boring in that area and found refusal at 15-17 ft on east of boring B-3. asked Patty to do borings on sidewalk along Hillside Avenue; north of previous borings B-3 and B-6. 02/20/08-Hiralkumar Patel. spoke with Patty. she still waiting for schedule from drilling company. will call back. 03/06/08-Hiralkumar Patel. received call from Patty. she hasn't scheduled any work yet due to non-payment for previous work. spoke with Mr. Singh. asked him to submit work schedule for sampling on sidewalk along Hillside ave. 03/20/08-Hiralkumar Patel. received message from Patty. they will schedule further work once get paid for earlier work, by next week. 05/30/08-Hiralkumar Patel. received message from Patty. she hasn't schedule any further work yet. spoke with Mr. Singh. asked him to be present during site visit at 2 PM on 06/02/08. Mr. Singh will call landlord and ask him also to be present. 06/02/08-Hiralkumar Patel. met Mr. Singh and Patty at the site. explained to Mr. Singh that the department requires further delineation to define zone of contamination and based on complete delineation, the department will decide about remediation of the site. asked Mr. Singh to perform soil borings on sidewalk along Hillside ave (minimum three borings to min. depth of 20 ft) and also asked for one monitoring well nearby dispenser island, in zone of previous boring SB-3 and SB-6. asked Mr. Singh to submit work schedule by end of 06/10/08 and delineation report by end of 07/15/08. mentioned to Mr. Singh that if department doesn't receive work schedule and report by mentioned dates, then case may be referred to legal department. 06/03/08-Hiralkumar Patel. received call from Mr. Singh. he mentioned that as landlord is out of country, he needs some more time to respond in terms of further delineation. approved his request and asked him to submit work schedule for further delineation by end of 06/20/08. 06/16/08-Hiralkumar Patel. received message from Patty. spoke with Patty. she has applied for sidewalk permit and will submit work schedule once permit available. 07/08/08-Hiralkumar Patel. spoke with Patty. she is dealing with three drilling companies to find way to install well. she also mentioned that soil borings on Hillside ave sidewalk is not possible as subway running under it. asked Patty to consult with MTA also regarding distance of well location from subway lines. left message for Mr.

Singh and Mr. Sinanis.
07/17/08-Hiralkumar Patel. recieved message from Patty. they will do boring on 07/23/08.
09/22/08-Hiralkumar Patel. received call from Patty. they tried to sample well, but pump didn't work. will come back with stronger pump by end of this week (09/26/08). 12/02/08-Hiralkumar Patel. spoke with Patty. she found contamination in groundwater, but waiting for payment before releasing report. asked Patty to submit sample analyticals with site map for review. Patty will submit these information tomorrow (12/03/08). 12/03/08-Hiralkumar Patel. received sample analyticals from Patty. they installed four wells. found groundwater contamination in wells #2 and #3.
-----MW-2-----MW-3
Ethylbenzene-----120-----20
Xylene-----930-----124
1,3,5-Trimethylbenzene-----200-----48
1,2,4-Trimethylbenzene-----560-----150
Naphthalene-----78-----14 wells MW-2 and MW-3 are installed on north side of dispenser island, between dispenser island and Hillside ave sidewalk. sent email to Petty to submit site-specific groundwater flow direction.
12/04/08-Hiralkumar Patel. received email from Patty with groundwater elevation values on site map. based on groundwater elevation data, site specific groundwater could be flowing in north-northwest direction. and based on that, well MW-2 and MW-3 are downgradient from tank field. spoke with Mr. Sinanis regarding submission of report. Mr. Sinanis will call Mr. Singh and will call back. spoke with Mr. Singh. he mentioned that all work has done. asked him to submit report by end of 12/12/08.
02/04/09-Hiralkumar Patel. spoke with Mr. Singh. asked him to schedule site visit with landlord and consultant. Mr. Singh mentioned that landlord is out of country and will be back by next week. he will schedule site visit once landlord comes back. asked Mr. Singh to submit investigation report by end of 02/27/09 (final notice). according to ACRIS, Paul Sinanis and Maria Sinanis are owner of the property. alternate addresses: 87-81 Merrick Blvd, 87-81 166th Street Block #: 9818, Lots #: 53, 54 & 56. 03/02/09-Hiralkumar Patel. spoke with Maria Sinanis. she will ask Paul to call back.
03/03/09-Hiralkumar Patel. received call from Mr. Sinanis. asked him to schedule a site visit with all parties involved. will call back and try to set up next week.
03/11/09-Hiralkumar Patel. received limited subsurface investigation report from Petty. abstract:
- installed three monitoring wells (MW-2, MW-3 and MW-4) - borings were advanced through the groundwater table to a depth of approx. 50 ft bg - from each boring, soil samples from the interval exhibiting highest PID reading

and/or at the groundwater interface, were collected - soil/groundwater interface is at approx. 40-42 ft bg <----- - high PID readings found during installation of well MW-2 - type of soils generally encountered were brown silt with gravel mixture to a depth of approx. 18 ft bg. rock was observed from 18 to 48 ft bg - static groundwater was measured at approx. 42 ft bg <----- - wells were installed to a depth of 50 ft - LNAPL was not detected in any of the wells; no sheen observed in any well - some odor noticed in MW-2 - site groundwater flow is approx. to be in northerly direction <----- - found heavy VOC contamination in soil sample from MW-2 at 10-12 ft depth soil analyticals:
-----MW-2 (10-12 ft)
Benzene-----240 (detection limit raised)
Toluene-----52,000
Ethylbenzene-----140,000 Xylene-----860,000
1,2,4-Trimethylbenzene-----280,000 1,3,5-Trimethylbenzene-----93,000
groundwater analyticals:
-----MW-2-----MW-3
Ethylbenzene-----120
Xylene-----930-----124
1,2,4-Trimethylbenzene-----560-----150
1,3,5-Trimethylbenzene-----200 PID readings: -----MW-2
5-7 ft-----2,300
10-12 ft-----2,395 15-17 ft-----290 20-22
ft-----110 48-50 ft-----28
found one foot change in water elevation in well MW-3 compare to other wells. requires gauging to confirm data. spoke with Mr. Sinanis. asked him to schedule a site visit with all responsible parties, current tenant and consultant. he will call back. 04/22/09-Hiralkumar Patel. visited site. met Mr. Sinanis, Mr. Singh and Patty. discussed about investigation report and informed that the department requires further soil/groundwater delineation suspecting contamination might have travelled off-site. asked Mr. Singh and Mr. Sinanis to submit soil/groundwater delineation work plan by end of May 15, 2009. informed them that if work plan will not be submitted by the end of May 15, 2009, then this case will be referred to legal division. Mittermaan Singh 85-15 263rd Street **home address** Floral Park, NY 11001 05/04/09-Hiralkumar Patel. received message from Khela (718-420-5100). left message for Khela. 05/06/09-Hiralkumar Patel. received call from Khela, friend of Mr. Singh. he asked what needs to be done at the site. informed him that required work was discussed during the site visit on 04/22/09 and the department requires submission of work plan by end of 05/15/09 as discussed earlier. 05/06/09-Hiralkumar Patel. sent letter to Mr. Sinanis and Mr. Singh requiring submission of work plan by end of 05/15/09 or else case will be referred to

legal department. letter emailed to Patty. 05/13/09-Hiralkumar Patel. received message from Mr. Gill. Cal Gill Ph. (732) 690-0659 05/14/09-Hiralkumar Patel. left message for Mr. Gill. 05/15/09-Hiralkumar Patel. received work plan from Patty. proposes to install five two-inch monitoring wells: one in southeast corner of the site in front of garage, one in northwest corner of the property and three wells on north sidewalk of Hillside ave (across the street from the site). Patty proposes to submit report within 90 days of work plan approval. and no word about soil sampling during well installation. spoke with Patty. asked her to submit report within 60 days of approval. also asked her for soil sampling during well installation to know any other source of groundwater contamination. asked her to submit revised work plan. received revised work plan from Patty. will collect soil samples every five ft and screen for VOCs during wells installation. soil will be sampled to a depth of 5 ft below water table and soil sample with highest PID or at groundwater interface (if no PID found) will be collected for analysis. report will be submitted within 60 days of the work plan approval. sent work plan approval letter (via certified mail) to Mr. Sinanis and Mr. Singh requiring submission of an investigation report by end of 07/17/09. letter emailed to Patty. 05/21/09-Hiralkumar Patel. 12:57 PM:- received signed return receipt from Mr. Sinanis. 06/04/09-Hiralkumar Patel. 10:53 AM:- letter sent to Mr. Singh at his home address came back undelivered. 06/16/09-Hiralkumar Patel. 11:50 AM:- spoke with Mr. Singh. according to him, he is not responsible for anything and owner is taking responsibility. 11:56 AM:- left message for Mr. Sinanis to provide updates. 06/17/09-Hiralkumar Patel. 9:42 AM:- received call from Mr. Sinanis. he is dealing with Mr. Singh and he will call back on 06/22/09 and will inform about who will take responsibility for further delineation and remediation. asked him to send letter signed by him and person who will take responsibility. 07/22/09-Hiralkumar Patel. 11:04 AM:- received message from Patty. 12:32 PM:- spoke with Patty. she inspected site with driller. as subway runs under hillside ave, driller refused to drill without MTA's approval. Patty requested contact at MTA. 12:51 PM:- sent email to Patty with Mr. Udeshi's contact info. email copied to Mr. Udeshi. Rajen Udeshi Capital Program Management 2 Broadway, 7th Floor New York, NY 10004 Ph. (646) 252-3673 email: rajen.udeshi@nyct.com 07/27/09-Hiralkumar Patel. 9:39 AM:- received call from Patty. she spoke with MTA regarding wells in area. MTA asked to hire engineer/architect for required work. Patty will contact engineering firm and will send email.

08/05/09-Hiralkumar Patel. 12:49 PM:-
received email from Patty. Walter T. Gorman, P.E., P.C. had been
secured to provide the maps
required by the MTA. they will be going to the MTA building to get the
necessary information late
this week or early next week. 08/18/09-Hiralkumar Patel. 8:10 PM:-
received email from Patty. she
submitted documents to MTA and waiting for approval.
11/18/09-Hiralkumar Patel. 3:19 PM:- received
message from Patty. they finally got approval from MTA. will send
email with updates.
11/20/09-Hiralkumar Patel. 11:06 AM:- spoke with Patty. she will talk
to driller and will send
schedule. 11/24/09-Hiralkumar Patel. 12:24 PM:- received email from
Patty. will start well
installation on 12/03/09. 12/07/09-Hiralkumar Patel. 2:18 PM:-
received message from Patty. she
mentioned that driller hasn't got permit from NYC DOT for well
installation yet. 3:33 PM:- spoke
with Patty. she requested a sidewalk permit request letter. asked
Patty to send email with specific
location of proposed wells. 12/08/09-Hiralkumar Patel. 12:49 PM:-
received email from Patty with
specific locations of proposed wells. 1:53 PM:- sent sidewalk permit
request letter to Patty. DK
Drilling of NY, Inc. **driller** PH. (718) 352-0100
01/29/10-Hiralkumar Patel. 3:39 PM:- received
email from Patty. they received required permit and will do mark out
on 02/03/10. Patty will send
drilling schedule once available from driller. 04/19/10-Hiralkumar
Patel. 10:34 AM:- received
message from Patty. she mentioned that MTA stopped work as it is near
subway area. currently, Patty
is working to get all permits from MTA and planning to install well on
05/13/10.
05/17/10-Hiralkumar Patel. 2:20 PM:- spoke with Patty. due to DK
Driller's inability to meet MTA's
requirement, new drilling company CMI Subsurface is working on this
project. Patty will send email
with updates. 05/18/10-Hiralkumar Patel. 11:03 AM:- received email
from Patty. she spoke with CMI
Subsurface who expect to get permit this week. will send dates for
drilling. 06/02/10-Hiralkumar
Patel. received email from Patty (at 2:37 PM on 05/27/10). she
mentioned that contractor will
install wells in a week of 06/14/10. 10:41 AM:- received email from
Patty. she asked whether 2 inch
well is ok and whether mud-rotary drilling techniques are sufficient.
1:24 PM:- spoke with Patty.
asked her to refer to DER-10 and other DEC regulations for guidance
and informed her that 2 inch
well is fine. 09/13/10-Hiralkumar Patel. 11:54 AM:- spoke with Patty.
she mentioned that wells have
been installed and will sample by end of this week. she will submit
report by end of 10/11/10.
10/18/10-Hiralkumar Patel. 2:42 PM:- received message from Patty. she
received groundwater

U000412015

analyticals and found no contamination. she is waiting for well survey result and will submit report by 10/25/10. 10/27/10-Hiralkumar Patel. 8:21 AM:- received email from Patty. she has mailed report today. 11/01/10-Hiralkumar Patel. received report from Patty. abstract: - installed five groundwater monitoring wells (MW-5 through MW-9) - soil borings were advanced through the groundwater table to a depth of approx. 50 to 54 ft bg - soil samples from the interval exhibiting the highest PID reading or if no contamination is encountered from the groundwater interface were collected for analysis - highest PID in MW-5 was noted at 20-22 ft bg: 75.8 ppm - highest PID in MW-6 was noted at 50-57 ft bg: 94.7 ppm - highest PID in MW-7 was noted at 50-52 ft bg: 14.8 ppm - there was no PID readings in excess of 5 ppm through the soil profile in borings MW-8 and MW-9 - no product or sheen found in any well (MW-1 through MW-9) - wells were constructed with 2 inch diameter PVC with 30 ft of slotted screen and 25 ft of riser - site groundwater flow is approx. to be in a south-southeasterly direction - no contamination found in any soil or groundwater sample the report is missing well log (specifically information about screen interval). 11/30/10-Hiralkumar Patel. reviewed previous report and found that well logs are missing for wells MW-1 to MW-4 also. 10:21 AM:- spoke with (and sent email to) Patty and asked her to submit detailed well logs (groundwater depth in each well, well size, screen interval etc.) for each well. 10:39 AM:- left message for Mr. Sinanis. 11:39 AM:- sent letter to Paul and Maria Sinanis (via certified mail: 7009 0820 0000 8687 1323) requiring quarterly groundwater monitoring/sampling for minimum of two years. asked them to submit first quarterly groundwater monitoring report by the end of 03/31/11. letter emailed to Patty. 12/03/10-Hiralkumar Patel. received signed return receipt from Mr. Sinanis. 03/23/11-Hiralkumar Patel. 4:16 PM:- sent email to Patty inquiring updates regarding quarterly groundwater monitoring report. 4:22 PM:- received email from Patty. she will receive lab results tomorrow. 04/11/11-Hiralkumar Patel. 9:03 AM:- received report from Patty. on 03/09/11, gauged and sampled eight out of nine wells. well MW-2 was not accessible as it was asphalted over during paving operation. no product/sheen or contamination observed in any wells. groundwater found flowing in a south-southwesterly direction, which is completely reverse from initial findings which states that groundwater was flowing to northerly direction. based on current flow direction, there are no downgradient wells. 04/14/11-Hiralkumar Patel. 1:01 PM:- left message for Patty. 1:51 PM:- received call from Patty. inquired her about change in groundwater

HILLSIDE SERVICE STATION, INC. (Continued)

U000412015

flow direction. she mentioned that new wells were surveyed in Sep, 2010. as the well MW-2 was found mostly contaminated during initial investigation and has been covered (and probably destroyed) during paving work, well MW-2 needs to be replaced. informed her that if the groundwater is flowing towards the north-northwesterly direction, then need monitoring well downgradient from well MW-2. asked Patty to re-survey all existing wells to define groundwater flow direction again, prior to replacing MW-2. she will talk to site tenant, who is paying for work, and will call back (or send email) with re-survey schedule. 07/27/11-Hiralkumar Patel. 4:46 PM:- received email from Patty including results of re-survey which confirms that groundwater flows in a south-southwesterly direction (away from Hillside ave). based on this flow direction, there are no wells downgradient from the highest contamination zone around MW-2. 08/04/11-Hiralkumar Patel. 2:21 PM:- spoke with Patty. asked her to submit detailed well logs for all wells (as requested in Nov. 2010). she will send well logs. discussed about groundwater survey results. informed her that the Department requires replacement of well MW-2 (where highest contamination was found) and installation of a downgradient well from MW-2 (based on new groundwater flow direction). she will send schedule for replacement of MW-2 and installation of downgradient well from MW-2. 2:24 PM:- left message for Mr. Sinanis regarding replacement of well MW-2 and installation of downgradient well from MW-2. 2:30 PM:- spoke with Mr. Mahmood, on-site tenant. he mentioned that they are paying for the monitoring process. informed him that the department requires replaced of well MW-2 and installation of new well downgradient of MW-2. Alauddin Mahmood Ph. (347) 459-3911 email: alauddinmahmood@hotmail.com 2:39 PM:- sent email to Patty and asked to submit well logs (by 08/12/11) and schedule for well installation (by 08/19/11). email copied to Mr. Mahmood. 08/11/11-Hiralkumar Patel. 10:10 AM:- received email from Patty including logs for wells MW-5 through MW-9. logs include soil type, but doesn't include PID values. 08/19/11-Hiralkumar Patel. 11:52 AM:- received email from Petty. they will install wells on 08/25/11. 11/25/11-Hiralkumar Patel. 3:02 PM:- sent email to Patty inquiring updates. 11/28/11-Hiralkumar Patel. received email from Patty (at 12:01 PM on 11/27/11) including results of groundwater samples from well MW-2 and MW-10. she was able to locate well MW-2 with metal detector. no contamination found in groundwater samples. she will collect another round of groundwater samples this week. 11/30/11-Hiralkumar Patel. 11:19 AM:- sent email to Patty and asked her to

submit report by the end of Dec. 2011. 01/13/12-Hiralkumar Patel.
 received report from Patty.
 abstract: - well MW-2, covered during repaving, was located and
 exposed - boring was advanced to a
 depth of approx. 50 ft bg - installed one two-inch monitoring well
 (MW-10), off the southwest side
 of the tank field, with 15 ft of screen - highest PID reading, 12.2
 ppm, was measured at the 40-42
 ft bg, the approx. groundwater interface - wells MW-1 through MW-10
 were sampled - no visual or
 olfactory indication of contamination found in purged groundwater - no
 contamination found in soil
 sample from 40-42 ft bg from MW-10 - no contamination found in any
 groundwater sample
 01/20/12-Hiralkumar Patel. after discussing with DEC Austin, case
 closed based on following: - soil
 contamination between 10 and 15 ft bg - groundwater at 42 ft bg - none
 or minor contamination in
 groundwater samples - leaking tanks and associated conamination were
 removed in 1998 - commercial
 use of the property 1:44 PM:- sent spill closure letter to Mr./Mrs.
 Sinanis. letter emailed to
 Patty."

Remarks: "FOUND CONTAMINATED SOIL ON SITE - SENT TO LAB - CONTAMINATED SOIL "

DEC Memo: "01/19/06: This spill transferred from J.Kolleeny to S.Kraszewski. One 20K tank installed in 1973 was removed in 2000, had two TTFs. No site assessment ever performed at this site. Need to contact NYCHA to check. Must have a site assessment. - SK 09/01/06: DEC Lead for this spill changed from unassigned to S. Kraszewski. - J. Kolleeny 02/09/07 - J.Kann - Spill reassigned from S.Kraszewski to J.Kann. 6/11/09: JKann - Meeting held on 5/28 with ALC Environmental and NYCHA. Investigative Work Plan submitted on June 10, 2009. 10/21/10: J.Kann - work plan approved. email sent. 04/2012: J.kann - reminder sent to NYCHA re this site. They responded that it was overlooked. New deadline for October 2012. 5/6/13: J.Kann - Stip and CAP emailed to NYCHA (edoced). Signed stip due back to DEC by 6/5/13. 8/12/13: J.Kann - STIP RCVD 5/29/13 AND FRWDED TO LEGAL. RIR rcvd 7/31/13. 8/12/13: J.Kann - reviewed file and RIP dated July 2013. Based on the review: -The spill was called in after a TTF (a previous spill was also called in for a TTF) -A 20,000 gallon UST was removed and replaced with a 6,000 gallon UST in NOV/Dec. 2000. -Lab data of soil from Nov. 2000 show non-detect for all STARS compounds -A Site Investigation was performed in 2013 around the tank. Boring logs do not show any indication of 'stained soils' or petroleum odors. -Six soil borings were advanced (10 soil samples collected) and four monitoring wells installed at the site. -All soil samples were below CP-51 with the exception of 1,2,4 Trimethylbenzene in SB-4. This was a minor exceedence and was detected below TOGS 1.1.1 in groundwater. -All groundwater samples were below TOGS 1.1.1 criteria. No free product detected. -NFA"

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

 DEC Region: 2
 DER Facility ID: 271411
 DEC Memo: "06/18/08 - LZ I reviewed a GCI report (eDocs), dated July 2nd. One additional boring--west of the former 1,000-gallon tank location--has been done. Neither VOCs nor SVOCS have been found above TAGM 4046 levels. I sent an application to Mr. Giorgianni to close-remove the 1,000-gallon tank and an NFA letter. The spill case is closed.
 07/19/06 - Zielinski Called GCI at (631) 851-1600 and left a message requesting additional information about the report. 07/19/06 - Zielinski According to a report by General Consolidated Industries, dated August 18, 2005, the tank was removed. Analytical results of soil samples revealed presence of naphtalene (1,075 ppb), p & m -xylene (3,336 ppb), o-xylene (1,572 ppb), pyrene (418 ppb). On June 6, 2005, 21.1 tons od contaminated soil was removed from the site. According to GCI, any futher excavation would jeopardize the structural intergrity of a building next to the site. 4/19/2005 jz: Tank will be removed by April 28. Application for sub mod is required. 3/30/2005 jz: GCI Environmental is retained by owner of the property. The 550 gallon of waste oil tank was failed the tightness test. It will be removed as well as contaminated soil. End point samples will be taken. Report will be sent to DEC by Mr. Matt Boeckel (631) 851-1600 ext. 201. tff ltr sent 3/25/2005"
 Remarks: "tank test failure. waste oil tank 550 gallons buried tank."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: "06/04/08 - LZ The spill is consolidated with spill # 0304763. The tank at 89-24 164th street and the tank at 89-30 164th street is the same 10,000-gallon tank that failed the tightness test. This information was confirmed by Maria Rohas, phone 718-268-8718, the manager of NYC American Management, Inc., This company that maintenances the building--block 09793, lot 0069--which has three entrances. The spill case is closed. 9/19/06 - Zielinski Sent a TTF letter to NYC American Management, Inc. 9/19/06 - Zielinski Spoke with Petroleum Tank Cleaners, Inc., phone (718)624-4842. The tank was repaired and passed the tightness test in 2004. Since the RP had not paid yet for the work, Petroleum would not have sent documentation to the department. 09/05/06 -Zielinski This spill case reassigned from Central Office to Region 2. 7/20/05 Spoke with Amy at NYC American Management, INC (RP). She claims site was remediated, faxed work proposal, does not have receipt of work or soil disposal. -Spoke with Petroleum Tank Cleaners, INC. They will fax remediation documentation when they receive payment from RP. See also 0304763 Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND Sent TTF Ltr to: SM Realty LLC PO Box 750710 Forrest Hills, NY 11375"

DEC Memo: "11/18/09 - LZ NYC American Management faxed information(eDocs) that fill and vent lines which failed the tightness were replaced and no contaminated soil was found excavation. According to PBS # 2-292109, the tank is 10,000-gallon tank, contains No. 6 oil, and has a suction line. The spill case is closed. A NFA letter has been sent off.
10/27/09 - LZ A second TTF letter was sent to; Markland Estates, Inc. c/o MAM Properties 144-54 35th Avenue Flushing, NY 11354 The letter sent on October 10th returned unclaimed. 10/03/09 - LZ A TTF letter (eDocs) was sent to SM Realty LLC (found at ACRIS and BPS registration), requesting information by 11/06/09. 06/04/08 - LZ This open spill consolidated with closed spill # 0305491. 05/07/08 - LZ Reviewed documents sent by Maria of NYC American Management, Inc. The documents, invoices and descriptions of work performed by Petroleum Tank Cleaners, Inc. show that new fill vent lines has been installed, and that the tank passed the tightness test. No information about contamination next to old fill line. NYC American Management will call to provide information about any found contamination. 09/19/06- Zielinski Sent a TTF letter to NYC American Management, Inc. 09/05/06

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 DER Facility ID: 19637
 DEC Memo: "need to send a ttf letter. 04/13/05-SR// A letter was sent. Mr. Mario Melvoi, 718-721-5289 of 164 Realty Associate, he is the contact person. 06/28/05-SR//Eastmond took out small contaminated area, will send DEC documentation. 10.19.05 Sharif- I spoke with Issac of Eastmond this morning.They are going to abandon the tank in place and install a new aboveground tank. I suggested to take soil samples by installing borings around the tank. He will send paper works to DEC. 05/04/06 Sharif Rahman- No PBS application has been filed for new tank registration.Case has been refered to ECO for law enforcement. The UST was closed in place.There was a crack found in return line at the foundation wall where it enters the building.Contaminated debri was removed.End point sample shows no indication of voc/svoc presence.Spill is closed."

Remarks: "Tank test failure. This is an above liquid leak. The owners will have to have the tank pumped so they can do an isolation test to find the leak. Caller says one of the lines is leaking... unsure where it is. Unsure of the extent of the release. Need to investigate further."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo: "09/30/09-Vought-Duty desk officer. Called ATS Environmental (John Lundquist (800)440-8265 fax:888-303-5323) and tank is not being pumped, possible vent pipe problem and tank will be retested. Isolate and retest recommended to owner by EPS. Vent pipe wobbly and as such dry leak (tank not required to be emptied immediately). Spill assigned to DEC Krimgold as site is PBS site. As per PBS #2-111333 site has one 5000-gallon #2 fuel oil AST in contact with soil. Tank test failure letter sent to owner with cc to Lundquist as per PBS registration #2-111333: Mr. Angelo Zoumas Alma Realty Corp. 31-10 37th Avenue Suite 500 Long Island City, NY 11101 Ph: (718)267-0300 Fax: (718)267-0329 10/08/09-Vought-Sent out TTF to above address and assigned spill to DEC Krimgold as TTF for PBS site with cc to Lundquist. 11/17/09. Alma Realty requested 3 weeks extension to complete the spill closure report. JK. 12/16/09. J.Krimgold reviewed the letter report submitted by Riteway Corp. dated December 11th, 2009. According to the information provided the tank system failed the test due to a failure in the vent line. The owner decided to close the tank in place with the foam. A site assessment performed before tank closure shows contaminants level marginally exceed TAGM levels in some samples. Case closed. JK."

DEC Region: 2
DER Facility ID: 270368
DEC Memo: "9/7/06 - Austin - Assigned from Albany to Region 2 staff (Patel) for review and closure - end 11/13/06-Hiralkumar Patel. spoke with David Schronbron, property manager. as per him, they had tank problem and petroleum tank cleaners had dug out soil upto about 15 ft below grade. spoke with Mark at Petroleum. they found 4000 gal UST, whose top was about 14 ft below grade. found contaminated soil around tank and tank was in bad condition. they backfilled excavated area without any soil removal. tank was abandoned and filled with concrete slurry. as per Mark, no soil investigation done as nobody was ready to pay for work. Petroleum installed new 3000 gal AST inside garage, which is not registered. spoke with David again. property rented by Metropolitan Council on Jewish Poverty . as per him, somebody has done soil testing and they found soil clean. David will call owner of building and ask them to call the Department. 11/14/06-Hiralkumar Patel. received fax from Mark from petroleum. document from petroleum shows abandoning of old tank but doesn't have any information about soil investigation or contaminated soil removal. spoke with David. he will call owner and will call back. no PBS record.
11/16/06-Hiralkumar Patel. left message for David.
11/20/06-Hiralkumar Patel. left message for David. from propertyshark.com, owner of property is: Lincoln Court Apts Inc 505 E 175TH St Bronx NY 10457-6205 sent out letter to above address. copy of letter sent to David at Metropolitan Council on Jewish Poverty .
12/01/06-Hiralkumar Patel. spoke with David (212-453-9537). he got copy of letter. 12/05/06-Hiralkumar Patel. received call from Mark from PTC. he was contacted by David asking to close out spill as Mark was reported initially. 12/19/06-Hiralkumar Patel. received fax from Bob from Protest. Protest have been hired for soil testing and they will start on 12/21/06. 12/20/06-Hiralkumar Patel. received message from Ted (718-406-1817) from Protest. they have rescheduled their work on 12/28/06 as Keyspan is working in the area and Keyspan is not allowing protest for any digging or geoprobing. Ted will send lab analyticals once he gets it. 01/11/07-Hiralkumar Patel. left message for Ted at protest. 01/12/07-Hiralkumar Patel. received call from Ted from Protest. he got sample analyticals and will fax today. received sample analyticals. found Naphthalene contamination in sample B5 (33000 ppb at 16-18 ft). waiting for investigation report.
02/20/07-Hiralkumar Patel. spoke with Bob at Protest about report. he will check with Ted and will send documents, if any available. spoke with David and asked him to submit report. received call from Bob. he mentioned that Ted has faxed sample analyticals. asked Bob to send boring logs for these samples. 02/21/07-Hiralkumar Patel. received call from Tom from Protest. he will send boring logs and detailed site plan with surrounding area of tank room. 02/28/07-Hiralkumar Patel. spoke with Bob at Protest. they are waiting for boring logs from company who did boring at site. will send by end of next week. 03/07/07-Hiralkumar Patel. received borings logs, detailed site plan

 DEC Memo: "08/07/08 - LZ Kelvin Cullen of Diversified Realty Corp. faxed information about the 4,000 gallon tank. A tightness test conducted on May 20, 2003, revealed that a dry portion part of the tank failed the test. The tank was permanently closed in place on April 25, 2004. The spill case is closed. 07-02-08 - LZ I visited the site. The superintendent, Jorge Lopez, showed me the place where the tank which had failed TTT was closed in place in 2004--a new AST replaced it. The fill port and the fill line, common for the new and the old tanks, are aboveground (photo 1). The 4,000-gallon tank closed in place has its fill lines cut off (photo 2), and the tank is filled with soil(photo 3). The are below the fill line is intact concrete. Mr. Lopez does not have documents pertinent to the old tank. I called the Crown Leak Detection, phone 516-939-2959, asking for a report from 2003 showing what part of the tank failed the tightness test.

 DEC Memo: "1/3/13 A Frischeisen TTF letter sent and upped to eDocs. 3/5/13 A Frischeisen intern Upped response letter to TTF letter I had sent out. The letter states the property is owned by a new company. Sent TTF letter to the new company and upped to eDocs: Just Management Corp 103-26 68th Rd Suite BB2 Forest Hills, NY 11375 3/27/13 A Frischeisen intern TTF letter sent. 9/8/16 TJD File review. PTC is no longer in business, however, as part of operations shutdown DEC DeMeo requested information regarding open spills called into hotline by PTC without any further documentation provided. In 8/11/16 letter report regarding this site, PTC provided the original failing tank test report (dry leak) associated with 3K gallon UST. As per report,

Tank Info:

Tank Number: 002
Tank Id: 3242
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

H00 - Tank Leak Detection - None
I00 - Overfill - None
K01 - Spill Prevention - Catch Basin
E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
J04 - Dispenser - On Site Heating System (Suction)
L00 - Piping Leak Detection - None
B00 - Tank External Protection - None
F00 - Pipe External Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
A00 - Tank Internal Protection - None
C03 - Pipe Location - Aboveground/Underground Combination

Tank Location: Aboveground in subterranean vault with access for inspections.....
Tank in subterranean vault but accessible for inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 05/01/1982
Capacity Gallons: 5000
Tightness Test Method: 21
Date Test: 03/09/2011
Next Test Date: Not reported
Date Tank Closed: Not reported

Left message to call back. Mr. Fellows called back and left a message at 10 am. The tank was taken out of service. Tank proposal was faxed to him for repair and retest. The facility has one other tank that could be used for heating, but they are currently using natural gas. I called him back at 2:50 pm and left message that ttf letter was sent to him. bf 5/10/07 On 5/9/07, received fax from Abby of Fenley & Nicol Environmental. Fax included tightness test results for failure on

Reassigned from Vought to Foley. 11/26/03 File review (KMF): Third Quarter 2003 Monitoring Report
Depth to groundwater = 15-18' bgs Flow generally southeasterly 0.03' LNAPL present in W-07 on 9/5/03 Air Sparge/SVE system running. Jamaica public supply wells 2, 6, and 33 are all approx 0.5mi away but are not available for service. TOTAL BTEX TRENDS: MW-1, MW-6, MW-7, W-21, W-22, W-34, and W-35 are mostly non-detect. MW-2 appears to be decreasing. Highest was 11730ppb(10/22/01). Now 107ppb. MW-3 has been variable. Highest was 172880ppb(6/27/01). Now 23650ppb. MW-4 was increasing from 10/22/01 to 2/4/03. Highest 36110ppb(2/4/03). Now 17740ppb. MW-5 has generally been stable since 7/9/02 remaining at approx 40000ppb. W-07 has measured LNAPL in three gauging events. W-08 measured 1.06' of LNAPL on 2/20/02 but has been non-detect since. W-23 measured 0.08' and 0.24' of LNAPL in consecutive events from 2/20/02 and 5/1/02. Total BTEX levels have been relatively low since. W-24 measured 0.67', 0.29', 0.19' and 0.05' in consecutive events from 2/20/02 to 10/23/02. Total BTEX has been relatively low since. W-32 had some hits in 2000 and 2001 but has been non-detect or relatively low since. W-33 has been variable with total BTEX remaining in excess of TAGM. Highest was 33550ppb(10/23/02). Now at 15390ppb. W-50 has generally been decreasing. Highest 8844ppb(8/22/00) Now non-detect. MTBE TRENDS: W-33 was consistently high (16300ppb on 2/8/01) but have been decreasing. Now 22.7ppb. MW-1, MW-2 and MW-3 exceeded TAGM from 3/00 to 5/02 and have since been non-detect. All others have been either not sampled due to LNAPL or have been non-detect or below 10ppb. 3/15/04 Received 4Q03 monitoring report, Quarterly and

Monthly Remedial System O&M reports and January 2004 O&M report for SVE/AS system. 5/7/04 From portfolio meeting: SVE/AS system continuing. Reaching asymptotic levels. Higher dissolved in MW-2, MW-3. There has been a significant rise in the water table. Plume is submerged. Jamaica wells are 2200' south. MTBE is appearing in north NYCTA remediation system. 6/23/04 Feb 04 O&M report received. SVE/AS system not operating upon arrival. Moisture separator was full and auto shut-off. System was reset. No measurable quantities of BTEX, MTBE or TPH removed in 2/04. 6/23/04 Mar 04 O&M report received. Operating with no alarm conditions. AS operating at flow rate in excess of 25 SCFM on AS-2. Valves to sparge wells AS-1 and AS-4 were closed during 12/03 and AS-3 was closed during 1/04 to increase effective radius of wells. Based upon influent sampling, 1.13lbs of total BTEX, 0.32lbs of MTBE and 263lbs of TPH were removed from 2/18/04-3/16/04. 6/25/04 Apr 04 O&M report received. Operating with no alarm conditions. Removed 0.44lbs BTEX, 0.37lbs MTBE and 126lbs TPH from 3/16/04-4/28/04. 6/25/04 May 2004 O&M report received. No alarm conditions. Removed 0.06lbs BTEX and 118lbs TPH. Will open valves to sparge wells and adjust air flow to deliver oxygen and stimulate bio activity. 6/30/04 Met with Spartan Petroleum and Impact Env. Tanks to be removed 8/04. Elementary school downgradient. 8/26/04 Email from A. Lapine, Delta. BP's lease expired and will be removing tank system and doing source removal. AS/SVE system was removed and may be reinstalled after excavating. Prospective buyer intends to operate a check cashing business. 9/22/04 Update from A. Lapine. Delta to begin UST removal on 9/27/04. 9/24/04 Demolition postponed to 10/4/04. 11/9/04 Received UST excavation assessment report(Delta, 11/2/04). Three 4000gal gas USTs, two previously abandoned 4000gal gas USTs and product piping removed. In addition, six previously abandoned 550gal USTs were discovered and removed. 4000gal TANKS (Work done 10/1/04-10/12/04) Tank observed to be in good condition. PID readings ranged from 4.3 to 511ppm. The max PID reading was from beneath the eastern portion of tank 3. Soil was overexcavated to 20'bgs below this tank. GW observed in areas overexcavated at 20'bgs. Post-ex samples were collected for analysis by 8260+MTBE. Samples did not identify VOCs above TAGM cleanup objectives. 550gal TANKS (Work done 10/7/04-10/12/04) Four of the six (tanks 8-11) had a concrete base. Several were observed to be abandoned with concrete slurry. Oil/water mix was transferred to 55gal drums. Tanks were observed to be in fair condition with no visible holes but some pitting. Soil beneath the tanks did not appear impacted. Post-ex samples

were collected for analysis by 8260+MTBE. Samples did not identify VOCs above TAGM cleanup objectives. PRODUCT PIPING (Work done 10/1/04-10/12/04) Approx 20' of piping was excavated. Soil beneath the piping(which serviced two pump islands) was excavated during the tank system excavation. The soil available for screening was from underneath the vent piping. Soil beneath the vent lines was screened and read 2.5ppm. A soil sample from beneath the vent lines did not identify VOCs above soil cleanup objectives. Approx 211tons of petroleum impacted soils were disposed of. A black silt layer was observed at 15'bgs within an overexcavated area beaneath the two 4000gal tanks. GW is at approx 14-20.5'bgs and flows S-SW. SVE/AS system decommissioned as part of abandonment of site. 11/22/04 Close to NYCDEP supply wells #2, #6, #33. STIP issued. CAP includes requirement for vertical delineation. Due 11/29/04. 11/29/04 Received faxed copy of signed stip. 12/6/04 Stip effective. Investigation Summary Report due 2/6/05 and RAP due 4/6/05. 2/8/05 Received site assessment summary report. MW-8,9,10 were installed as nested wells. Each well consists of four individual 1 MWs(A,B,C,D) screened from 10-20', 25-30', 35-40', and 45-50'. It appears that VOCs identified in soil samples may be due to #2FO associated with Jamaica Depot. Total BTEX were ND. 2/8/05 Site Assessment Summary Report received. 4/7/05 Received RAP proposal for MNA. Station was abandoned and tanks excavated clean. Currently monitoring. Off-site system operated by Transit Authority aiding cleanup. 6/8/05 1Q04 - DTW 14.32-27.30'bgs. 0.66' LNAPL in W-24. BTEX from ND to 57050ppb(MW-3). MTBE from ND to 52ppb(W-33). 2Q04 - DTW 13.91-20.57'bgs. 0.01' LNAPL in W-07 and 0.82' LNAPL in W-24(bus depot). BTEX from ND to 49310ppb(MW-3). MTBE from ND to 227ppb(W-33). 3Q04 - DTW 14.01-20.52'bgs. 1.39' LNAPL in W-24(bus depot). BTEX from ND to 56500ppb(MW-3). J.A. Maisonave. - JAM
4/11/2011 - Spill transferred back to JFeng. 5/10/2011 - email from Chris Meyer of Antea Group dated 5/9/2011, received 1Q2011. eDoc. JF 7/20/2011 - email to Chris Meyer
We reviewed the site history as well as the 6/30/2009 work plan and we have some comments. 1) We have some concerns about the former MW-5 and AS-1 area. MW-5 has been had product and exhibited high BTEX concentration before it had no access. AS-1 (20-24') also show high VOCs concentration during the installation.
Therefore, in addition to the 2 proposed soil borings location, we require one more soil boring to be installed in the vicinity of this area to see if any residual contamination. 2) We have a new list for soil cleanup objectives in CP-51/Soil Cleanup Guidance. Please run the soil using this list (ex. table 2 for gasoline contaminated soil). And use the same constituents list for groundwater analysis. 3) Question. Why the work plan proposed discreet groundwater samples? one from interface and one from the interval exhibiting the highest soil PID reading? any questions, let me know. I will expect to have a revised work plan within 30 days.
9/16/2011 - 1Q2011, 5/7/2011, by Antea Group. The groundwater samples were collected on 2/9/2011. 24 wells were sampled. Flows to south. Max BTEX 742 ug/L (MW-9B). Low or no MTBE. 10/25/2011 - 2Q2011, 8/31/2011, by Antea Group. The groundwater samples were collected on June 27, 2011. 24 wells were sampled. MW-9B, 1,770 ug/L BTEX, less than 2.5 ug/L MTBE. W-50, 481 ug/L BTEX, less than 0.5 ug/L MTBE. The rest of the wells are low/ND. 10/26/2011 - Reviewed Drilling Work Plan, dated 10/18/2011. Antea Group proposed to install 3 soil borings. Soil samples from water interface, highest PID reading interval, and a reduced PID reading interval will be collected, plus groundwater samples. Work plan is approved. Summary report will be due January 2012. 11/3/2011 - email from Chris Meyer. Drilling work is scheduled for next Tuesday/Wednesday 11/8-9/2011. 2/17/2012 - Investigation Summary Report, dated 1/31/2012, by Antea Group. On 11/8,9,28/2011, Longshore Environmental Inc advanced 3 soil borings, SB-1/MW-2A, SB-2/MW-3A and SB-3/MW-5A, to a depth of 20-30 feet. SB-1 (14.5-15') with PID 1,147 ppm, SB-1 (17-18'), SB-2 (13.5-14'), SB-2 (19-20'), SB-2 (20-21'), SB-2 (29-30') with PID 495 ppm, SB-3 (15-16'), SB-3 (20-21'), SB-3 (23.75-25) with PID 1,474 ppm, had no soil exceedances.
Groundwater was sampled. MW-2A, ND. MW-3A, 416 BTEX, 2,434 total VOCs, MW-5A, 13.4 total VOCs.
Groundwater will be quarterly monitored and will not monitor offsite MTA's well W-32. 2/21/2012 - Sent a letter to BP require RAWP to address the groundwater problem by 3/2012. 6/4/2012 - 1Q2012,

4/27/2012, by Antea Group. Groundwater samples were collected on 2/13/2012. MW-3A, 2,574 ug/L BTEX, less than 0.50 ug/L MTBE. MW-9B, 1,590 ug/L BTEX, less than 0.5 ug/L MTBE. W-33, 120 ug/L BTEX, 0.50 ug/L MTBE. W-50, 506 ug/L BTEX, less than 0.50 ug/L MTBE. 8/8/2012 - 1Q2012, same as the one above with just the correct First Quarter 2012. 9/28/2012 - 2Q2012, 7/31/2012, by Antea group. Groundwater was sampled on May 18, 2012. The next sampling will be in August 2012. MW-3A, 952 BTEX, less than 1.0 MTBE. MW-9B, 1,632 BTEX, less than 1.0 MTBE. W-33, 19.6 BTEX, less than 0.5 MTBE. W-50, 42.5 BTEX, less than 0.5 MTBE. 12/7/2012 - 3Q2012, 10/31/2012, by Antea Group. Groundwater was sampled on August 20, 2012. the next sampling will be in November 2012. MW-3A, 710 BTEX, less than 0.5 MTBE. MW-9B, 522 BTEX, less than 0.1 MTBE. W-50, 118 BTEX, less than 0.5 MTBE. 4/17/2013 - 4Q2012, 2/1/2013, by Antea Group. MW-3A, 4,074 BTEX. 7/23/2013 - met with BP/Antea. the new quarterly sampling of MW-9B, 1.9 benzene, 240 toluene, 490 ethylbenzene, 660 xylenes. The little property does not belong to the Jamaica Bus Depot, might be the City's and now is used for parking. DEC suggest 1 more quarter, targeting the central line of the plume wells and downgradient wells. Email to confirm the wells selection. 10/2/2013 - 2Q2013, 7/30/2013, by Antea Group. Groundwater was sampled on 5/28/2013. MW-3A, 2,280 BTEX. MW-9B, 1,392 BTEX. 3Q2013, 9/5/2013, by Antea Group. Groundwater was sampled 8/22/2013. MW-3A, 1,050 BTEX. MW-9B, 761 BTEX. 10/4/2013 - Discussion has been held on 10/2/13 among DEC R. Austin, R. Ketani, J. Vought and J. Feng. Spill to be closed based on: 1)All the known sources, including (5) 4,000-gallon USTs, (6) previous abandoned 550-gallons USTs, piping and 210.61 tons of soil were excavated and removed in 2004. All the endpoint samples indicated no CP51 exceedence has been detected. 2)A SVE system with extraction wells installed in the formerly identified soil contamination areas onsite has been installed and operated from 6/2002 to 8/2004 and recovered 276.82 lbs of BTEX, 1,264.17 lbs of MTBE and 30,973 lbs of TPH. 3)The site has been developed with fast food franchise restaurants, i.e. Papa John s, Subway, Dunkin Donuts, Popeye s. The building is a slab-on-grade structure. No vapor or odor related complaint has been received by NYSDEC since the site development. NYSDEC is not aware of any change of use of the site. 4)In the confirmatory sampling in 11/2011, the soil samples collected from MW-2A, MW-3A and MW-5A were non-detect for soil contamination. 5)The groundwater flows to south consistently as shown by years of gauging and monitoring. The downward trend of BTEX concentration suggested natural attenuation is occurring. 6)The BTEX

concentration in MW-9B shows a downward but fluctuating trend. The screen interval is 25-30 feet. The appearance of BTEX contamination in this interval of water column could be due to the rise of water table in this area because of the water supply wells were shutdown in the Jamaica area years ago and submerged contaminated water to a deeper water column. It is technically unfeasible to lower the water table and to identify the source of a particular spike of BTEX concentration. The shallower and deeper water columns in this cluster well have shown minimum groundwater impacts suggesting the remaining groundwater contamination has not impacted the deeper aquifer. 7)There are no sensitive receptors as per Appendix 2A of DER-10, i.e. the property lot for car parking immediately downgradient and the Jamaica Bus Depot (which has continued presence of free product) are downgradient of this spill. 8)Inclusion of remaining soil contamination language in the spill closure letter in case site is redeveloped. 9)Site data was submitted to, reviewed by DEC Central Office (who also approved closure) 10/4/2013 - spill is closed. spill closure letter to BP/Antea Group."

letter was PBS registration, PBS fees and tank test results. Both of our tanks failed and had to be worked on. One tank has been abandoned and filled with slurry and we have changed over to gas. The other tank was repaired where the problem was and no passed the second test . Vought left message with Zalak to find out nature of repair and whether contaminated soil was encountered. 11/14/2003-Vought-Spoke with Zalak. No contamination noted. Contractor is 917-559-5519 (Mark Salamack). One tank 2 fill and vent was installed. Vought called and left message for Mark to return call to DEC. 11/17/2003-Vought-Spoke with Salamack who will be sending in report. 11/20/2003-Vought-Reviewed fax sent from PTC. Soil analyticals shows two soil samples sent for analysis. Soil analyticals show 11670ppb xylenes(SB2), 4770ppb propylbenzene(SB2), 12900ppb 1,3,5-trimethylbenzene(SB2), 41200ppb 1,2,4-trimethylbenzene (SB2) and 23100ppb naphthalene(SB1). Tank was filled by concrete slurry and building now uses natural gas. DEC requires due to sensitive receptor nature of school: 1)excavation of tank 2)collection of endpoint samples 3)disposal manifests 4)detailed observations including school basement/sump observations. Vought called Zalak to explain requirements and left message to return call to DEC. 12/10/03 - PROJECT TRANSFERRED FROM VOUGHT TO SAWYER 2/3/2006 - letter requested further info prepared and sent. 3/06 - resampled above water table - clean. closed"

Tank Info:

Tank Number: 2S1
Tank Id: 30634
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

A01 - Tank Internal Protection - Epoxy Liner
H00 - Tank Leak Detection - None
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
D01 - Pipe Type - Steel/Carbon Steel/Iron
I04 - Overfill - Product Level Gauge (A/G)
F06 - Pipe External Protection - Wrapped
G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser

Tank Location: Aboveground in subterranean vault with access for inspections.....
Tank in subterranean vault but accessible for inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: Closed - In Place
Pipe Model: Not reported

meeting is scheduled for 5/31/12. The site is within the former Jamaica Water Supply district (now part of the NYC DEP). I contacted Trudy Holm-Sullivan (845) 985-2275 regarding who in DEP would know when water pumping will resume. Ms. Holm-Sullivan stated that my request will be sent to Juanita James in their Public Affairs office and someone will get back to me. Knowing the date that pumping will resume is important to the remediation of the site as the water table rose 8 feet over the course of the previous year. This has made product recovery difficult and inefficient. (The site is 30 feet above mean sea level. From 2002 to 2005, the water table rose 7 feet. It rose another 2 to 3 feet from 2005 2006. Not only are private homes located adjacent to the west of the depot - and some to the southwest - but senior apartment buildings are located due south.)

5/22/12 - Raphael Ketani. As Ms. James had not contacted me, I called Ms. Holm-Sullivan. I explained that the DEC was still trying to find out who the contact at DEP was for the pumping in the Jamaica water district. She asked whether Ms. James had contacted me. I told her No. Ms. Holm-Sullivan said that she will get right on the matter.

5/29/12 - Raphael Ketani. I still haven't been contacted by DEP with the name of the person responsible for managing the withdrawal of water from the Jamaica Water District. However, from 5/18/12 to 5/25/12, the DEP conducted a pumping test of well #24. This well is about 3500 feet to the east-southeast of the site. The pumping was performed due to the complaints by residents and business owners that their basements were flooding.

6/1/12 - Raphael Ketani. I was given a couple of names of engineers in DEP who may possibly know who I can talk to regarding the pumping of the wells. One person called me back and said that he didn't know who was in charge of the pumping. The other person never called me. I read a news article today. It stated that a total of 2 reverse seepage basins will be constructed at the intersection of 155th Street and Linden Boulevard and 165th Street and Linden Boulevard. The 165th Street site is right next to the bus depot. The construction will take place between 6/4/12 and 6/8/12. The idea is that the DEP will pump the water and put it into these basins so that it enters the storm sewer system and drains into Jamaica Bay. These basins are part of a larger plan whereby 2 to 4 basins will be constructed at each of 12 locations. Each site will draw 2 million gallons of water per day.

6/7/12 - Raphael Ketani. I contacted Shay McAtamney, DEP Manager for Environmental Compliance, (718) 595-4618 regarding whether the seepage basins will be constructed. She said that they will be constructed, but she didn't know when. Right now, there is no remediation taking place. Partly because recent construction has damaged or destroyed some wells and some equipment and partly because of the high water table.

6/8/12 - Raphael Ketani. Ms. McAtamney (718) 595-4618 (mac-a-ta-ma-nee) called me back. She said that well #33 would not be restarted for simply groundwater pumping. She said that the SPDES permit was for only public supply pumping. Also, the first basin to be constructed will be at Sayers Avenue and 175th Street (4500 feet southeast). This construction will take place at the end of the summer. This location was chosen to be done first as the water here will not require treatment for pH or sediment. So the SPDES conditions will be easily satisfied.

5/9/13 - Raphael Ketani. June Feng of the Region 2 Spills Unit sent me a map for the upgradient site, the BP-AMOCO gas station, which depicted the groundwater flow direction and the BTEX concentrations for the wells in the gas station downgradient sampling array. As depicted on the map, MW-9 (which is just upgradient of the

S104073307

bus depot) had high BTEX hits in the B well of the well cluster. 1/22/15 - Raphael Ketani. I reviewed the December 2014 Site Specific Investigation Work Plan dated 1/5/15. The purpose of the proposed investigation is to determine the extent and concentration of the oil contamination. The NYCT will redevelop the site by tearing down the present depot building and constructing a new one. Adjacent properties have been purchased for the redevelopment of the site. The demolition is scheduled to take place during late 2015. Several investigations took place from 1991 to 2009. A pool of heating oil was discovered underneath the northern part of the property and a pool of diesel fuel was discovered under the southern part of the property. The product in the northern part of the property has historically been up to 3.9 feet thick. Three recovery wells were installed in the southwest part of the site, a fourth recovery well and a drawdown well in the southeast part of the site and 3 recovery wells in the northern part of the site. Groundwater was found to be at between 15 feet and 21 feet bgs. However, the Jamaica Water Supply District stopped pumping during 2002 and the water table rose 7 feet over the following years - precluding product collection, except on a limited basis. The collection system was shut down permanently during 2005. Wells W-7, 31, 45 and 49 and RW-3 consistently had product. The thickness varied from 0.01' to 0.02' from January 2013 to September 2013. Soil contamination was discovered as deep as 41 feet below grade in one area of the site. An investigation conducted during 2003 found that 18 of the 25 soil borings encountered contamination which exceeded the TAGM standards. During this investigation, 34 borings will be installed with 5 being turned into wells. The boring will be done to 50' bgs and samples will be collected continuously. If there are no visible signs of contamination in a boring, then one sample will be collected at the sediment-water interface and one other sample at 7 feet below the interface. The soil samples will be analyzed for DRO and via method 8260. The groundwater samples will be analyzed via methods 8260 and 8270. The work will be performed during the first quarter of 2015. I drafted a letter approving the SSIWP and requiring the use of working casing or augers in order to protect the sides of the hole and collect representative soil samples from particular horizons. I submitted the letter to Hassan Hussein, EE III and head of Unit C, for his approval. 1/28/15 - Raphael Ketani. Mr. Hussein approved the letter and it was sent to Gregory Mathelier (Construction Administrator, Capital Management Program, MTA-NYCT) by email and by regular mail. 1/31/15 - Raphael Ketani. In response to my 1/28/15 letter requiring the use of working casing or augers, Mr. Mathelier sent an email explaining that they wanted to use a Macro Core boring and sampling system as this would also take representative samples. I responded by asking for a brochure with pictures describing the Macro Core system. 2/2/15 - Raphael Ketani. Stephen Tauss of the consulting firm, Dvirka and Bartilucci, sent me the Macro Core brochure. I reviewed the document and determined that the Macro Core system would provide samples from discrete soil horizons - similar to the functioning of a standard geoprobe machine with a split spoon sampler. I sent an email approving the use of the method for soil boring and sampling at the site. 4/22/15 - Raphael Ketani. Gregory Mathelier, Construction Administrator, UST & Environmental Remediation Program, MTA NYCT (718) 613-0029, called today. He said that the storage drum for the oil that is periodically recovered from the monitoring wells is missing. Staff at the depot were asked whether they had seen the drum, but no one said they had.

JAMAICA BUS DEPOT - NYCT (Continued)

S104073307

The NYCT will continue to look for the drum. 11/20/15 - Raphael Ketani. A NYCT-DEC Site Status Update meeting took place on 11/19/15. During the meeting, Mr. Mathelier brought up the issue of how to deal with the oil spill at the site. He commented that the environmental engineering group at NYCT was trying to figure out what was the best means of either containing or removing the floating product. They were leaning to designing a slurry containment wall along the footprint of the new depot building. Mr. Mathelier stated that the very high water table resulted in the oil being above the well screens and this was preventing the collection of the product. He showed me a map depicting three areas where the product had migrated from under the depot. One area was adjacent to the north end of the building. One area was adjacent to the west side of the building and under a row of private homes and one area was adjacent to the east side of the building and under a row of small commercial buildings (which were bought by the NYCT and which will be demolished). He wanted to know when the NYC DEP will resume pumping from the municipal supply wells which are near the depot. I told him that I didn't know, but that I will find out. Today, I tried to contact Ms. McAtamane (718) 595-4618 (mac-a-ta-ma-nee) in order to find out whether any DEP wells will be turned on soon. However, I could only leave a message. The wells that have a radius of influence which affects the depot are: 33 (to the southwest of the depot); 6D (very near and south of the depot); 6 (just a little south of 6D); 6A (a little further south); and 24B (somewhat near and east of the depot). 12/2/15 - Raphael Ketani. I spoke to Ms. McAtamane (718) 595-4618 regarding whether DEP will turn on the pumps for the wells near the depot. She said that she had contacted the operations people in her department regarding this, but they haven't gotten back to her yet with an answer. She said that, in all likelihood, the wells will not be turned on until 2017 and 2018. Part of the reason is that the pumps and buildings are not up to code. A lot of refurbishment work needs to take place. The only event that would result in the wells being turned on for supplying water would be if the aqueduct that is under repair upstate does not come on line until much later than planned and there is a water emergency. Ms. McAtamane said that she will call me with news from the operations people as soon as she hears anything. 12/3/15 - Raphael Ketani. Ms. McAtamane called me back today. She said that the operations people in DEP told her that the pumps in the wells near the Jamaica bus depot are turned on only occasionally for maintenance. I sent an email to Mr. Mathelier with the same information. 1/21/16 - Raphael Ketani. A site status meeting for all of the NYCT bus depots and related properties took place today. During this meeting, Ms. Cadecia Josephs of NYCT stated that letters would be sent out to residents next to across from the depot requesting their assistance regarding allowing exploratory borings to be performed on their property. Later, Ms. Josephs sent the DEC a sample letter addressed to Tyrone Green. 4/22/16 - Raphael Ketani. I reviewed the February 2016 Monthly Status Report for all of the NYCT bus depot sites and other properties that are under the global Consent Order. Product was gauged at the Jamaica Depot on 1/8/16. Only a few wells had product and the thickness varied from 0.01' to 0.02'. Many wells were sampled for groundwater and the VOC concentrations generally varied from non-detect to moderate hits up to 39 ppb for individual contaminants. Groundwater flow was generally due south. Since collecting began, a total of 34,116 gallons of oil has been recovered. The final soil investigation is progressing both

inside and outside the depot footprint. 5/4/16 - Raphael Ketani. A new spill was called in on 5/2/16 by Connor Lane of Senator Leroy Conrie's office (718) 454-0162. The notifier was citizen Dolores Sharpe. The call to the Senator's office consisted of complaints by several citizens that there was oil from a spill at the Jamaica Bus Depot site (#9010039) that had migrated under their homes and the MTA was not doing anything about it. Information about the earlier spill was conveyed by Rodney Rivera, the Region 2 political liaison, to Senator Conrie's office. He provided the information about the depot site, the spill and the current status of the spill remediation. As the older spill case is still open and active, I am closing spill case #1601057 and I will cross reference both cases. All future work regarding spill #1601057 will be managed through spill #9010039. Additionally, Ms. Sharpe had sent letters dated 4/19/16 complaining about the presence of the oil spill to Senator Conrie and to Representative Gregory W. Meeks. 5/5/16 - Raphael Ketani. Mr. Rivera sent additional information regarding the history of the spill and its present status to Mr. Conrie's office. The information was provided by Vadim Brevdo, EE III and supervisor of Unit B in Remediation in Region 2. 5/19/16 - Raphael Ketani. I spoke to Cadecia Josephs, Associate Project Manager I (718) 613-0296 today regarding progress with the additional offsite investigation program. She said that 7 borings had already been performed on the residential properties bordering the west side of the site. However, at some locations, it was physically impossible to set up the drilling equipment because the residence had been built out leaving no room. Ms. Josephs added that the NYCT had recently received approval to conduct another 7 borings on the residential properties. Also, a meeting will take place today between the NYCT and stakeholders regarding the site status and the need for additional borings. 5/20/16 - Raphael Ketani. Gregory Mathelier, Construction Administrator, UST & Environmental Remediation Program, MTA NYCT (718) 613-0029 called me today and stated that a meeting had taken place yesterday, May 19th, at the NYCT. Attending the meeting were the residents who own the homes on the west side of the site, staff from the NYCT UST & Environmental Remediation Program office and lawyers from the NYCT. Mr. Mathelier made no statements about what was said during the meeting, but added that the NYCT lawyers wanted to review Mr. Brevdo's information request that had been sent by email days ago. Thus, the official NYCT response will be about a week from today. I told Mr. Mathelier to call Mr. Brevdo and let him know this. He said he will. 6/15/16 - Raphael Ketani. A public meeting regarding the remediation of the oil spill at the site will take place today. It will be held at the Richard S. Grossly JHS (IS 8), 108-35 167th Street, Queens at 6 PM. The Department does not plan to send representatives to the meeting, but will receive information regarding its outcome. 7/22/16 - Raphael Ketani. Monica Kreshik of the legal division in the Central Office ((518) 402-8555) called to say that a citizen living next to the depot wanted her home inspected for vapors. I asked Ms. Kreshik who this was. She said it was Delores Sharpe. Ms. Kreshik added that the MTA had told the citizens at the latest public meeting that they could contact the DEC in order to have their homes inspected. I told Ms. Kreshick that this was not true and that the DEC does not routinely inspect homes for vapors. However, I said, since Ms. Sharpe had made the request herself, I will set up an appointment for inspecting her home for vapors. Ms. Kreshik said that she will send Ms. Sharpe's telephone number to me

JAMAICA BUS DEPOT - NYCT (Continued)

S104073307

by email. I thanked her and said that I will meet her sometime next week. Later, Ms. Kreshik sent me Ms. Sharpe's address and phone numbers. The address was 104-39 165th Street, Jamaica, 11433. Her phone numbers are (718) 291-5798(H) and (917) 224-5982(C). 7/25/16 - Raphael Ketani. I contacted Ms. Sharpe by calling her cell phone. We set up an appointment for Thursday, 7/28/16, at 10:30AM. 7/28/16 - Raphael Ketani. The home inspection took place as planned. Ms. Sharpe met me at the front of her property and walked me to the side entrance of her home which lead down to her basement, the location of the alleged contamination. While walking to the side entrance, I noted that the driveway looked free of oil spills and free of any stains. The fill port and vent pipe for her heating oil system protruded from the side of the home and looked clean and free of any signs of spillage. Upon entering Ms. Sharpe's home I did not sense any oil odors. I turned on my PPM PID meter and we walked downstairs to the affected area of the basement. Ms. Sharpe took me to the very back basement area which is just east of the laundry/furnace/tank room. This back basement area was being used to store various items. The temperature inside this area was not noticeably warm. I estimated the temperature to be about 78 degrees Fahrenheit. The PID meter did not register any VOC vapors. There were no odors. Ms. Sharpe showed me the affected south wall of the back basement. I saw a darkly stained area under the lower shelf on the wall. It looked wet. I touched the staining and it felt very slightly tacky, but not wet. The stain had no odor. I touched the unaffected part of the wall for comparison and didn't feel any tackiness - my finger was just dusty and dry. I could see that this substance was seeping into the wood bracket that held up the shelves. The front of the lower shelf did not look affected. Ms. Sharpe said that the substance had stained the box. She took it down and I could see that some surfaces of the box were, indeed, stained. I noted that the back half of the lower shelf (which is against the wall) looked darker than the front half, but I wasn't sure that this was due to the substance soaking into it as the front half looked dry and light in color. I noted a lamp (blue object in the picture) and asked Ms. Sharpe whether it was an oil lamp. She said that it wasn't. She added that you use the lamp with tea light candles (candles which are about 1 1/2 inches in diameter and about 1/2 inch high). On the top shelf I noticed that there were some Sterno cans. These are cans of an alcohol (ethanol-methanol mix) based fuel in a gel. Sterno is typically used to heat food which is standing in a tray above. Ms. Sharpe removed the blue lamp and some other objects on the lower shelf, but I could not tell if something had spilled from above, though the pattern of staining suggested that something had. I took a number of pictures of the wall and the box. We then left the back basement area and entered the laundry/boiler/tank room of the basement. The boiler looked to be in good working order with no leaks, no stains, nor any odors. I could see a very slightly raised line of cement which ran from the boiler to the AST. The fuel line seemed to start and end at this line. However, once next to the AST (275 gals.), I noticed some very slight oil odors. My PID meter was running and initially detected 0.4 ppm (400 ppb) of vapors, though it soon settled down to a constant 0.1 ppm value. I took my flashlight and shined it on the top of the AST. I noticed a stain which ran from the connection of the fill pipe with the tank, but which had stopped part way down one side of the tank. The connecting threads looked dark. I mentioned this to Ms. Sharpe and stated that it was a sign that her fill pipe needed to be

S104073307

examined and possibly tightened, otherwise she could eventually have a larger leak. Ms. Sharpe said that she had a service contract with the oil company and that they were due to come over to service her fuel system soon. We left the basement and stood outside her home in such a position as to be above the affected part of the south wall. I took a closer look at the bottom of the exposed south wall - the only part of the concrete that was actually visible. I asked Mr. Sharpe whether any work had been done beneath the siding such as applying a sealant. She said that no such work had taken place and that the present appearance of the wall was the same as when her father had the shingles installed. I asked her what was above this part of the basement. She said that it was just a bedroom. I then asked whether anything had spilled in the bedroom. She said No. At the end of our meeting, I told her that I wasn't sure what the stain could be from. She asked whether the stain was from the contamination that had taken place at the depot and was now under her home. I told her that the water table was about 20 feet below ground and about 12 feet below her basement floor. I added that there was a thin veneer of oil floating on the water table, but this was far below the staining in the back basement. I asked Ms. Sharpe whether anyone had this staining in their basements or any possible contamination problems. She said that no one had. I concluded our meeting by stating that I will ask the NYCT to investigate the staining and take a wipe sample and have it analyzed, but, as this is an isolated incident, I could not guarantee that they will do this. Ms. Sharpe thanked me and the meeting ended. The entire meeting had been cordial and Ms. Sharpe had been attentive to what I was telling her. 8/1/16 - Raphael Ketani. I sent an email to Mr. Mathelier (718) 613-0029 and Ms. Josephs (718) 613-0296 of the NYCT requesting that they conduct an inspection of Ms. Sharpe's back basement and take a wipe sample in order to identify the stain causing material. 8/4/16 - Raphael Ketani. I spoke with Mr. Mathelier (646) 879-1970/cell (646) 765-0336 regarding the Department's request that an investigation of Ms. Sharpe's basement take place. Mr. Mathelier said that he spoke to his legal people at NYCT about this and they said that an inspection should not be performed. This was because if the stain turns out to be oil, then Ms. Sharpe can point to the depot as the source. I told Mr. Mathelier that the stain has no odors of any kind and that the piping for Ms. Sharpe's heating oil system is some distance away from the location of the stain - about 12 feet or so. I added that Ms. Sharpe keeps containers of Sterno on one of the shelves and so one container may have tipped over causing the gel inside to spill out, spread on the warm day of my visit and soak into the concrete. I asked Mr. Mathelier to try talking to his legal people again and to send me an email concerning their response. He said that he will do this. 10/18/16 - Raphael Ketani. I called up Ms. Sharpe (718) 291-5798(H) and (917) 224-5982(C) and let her know that NYCT was not going to investigate the staining of the shelves in her basement. I told her that Mr. Mathelier had talked to his legal staff and they had told him not to sample the staining. Ms. Sharpe asked whether the DEC would do the sampling. I told her that if the NYCT were to do the work, then we would either ask them to send us the results or we would do sampling, too. She commented that doing the sampling was being left to her. I said that was true. I told her she could contact several of the many environmental testing labs in the NYC metropolitan area and probably find at least one lab that can provide a wipe sampling kit that can be used by the average citizen. Ms.

Sharpe said that she will do this. I ended the conversation by asking her to send the DEC a copy of the results of the wipe sampling test when she gets them. May 1, 2018 - V. Brevdo Due to Project Manager Raphael Ketani's retirement on April 27, 2018, Vadim Brevdo became new project manager for this spill case effective April 30, 2018. VB April 23, 2020 - V. Brevdo Letter and e-mail from NYCT: Hope this email finds you well. So far, things are fine on my side. Attached, please find a letter request to NYSDEC to allow NYCT to decommission/demolish the remediation systems at the Jamaica and Kingsbridge Bus Depots. As detailed in the letter, both systems have reached their level of effectiveness. The NYSDEC spill number(s) for these sites remain open. However, any future measures to be implemented to remediate any residual contamination at these sites will not require the use of these systems. The real estate occupied by these systems is critical to the depots. For instance, at the Jamaica Bus Depot, the area occupied by the remediation shed is to be used for the installation of communication equipment as part of the ongoing NYCT Bus Radio System (BRS) ontract (W-32366). Your response to this request will be greatly appreciated. Best, Gregory Mathelier, CCM Construction Manager UST & Env. Remediation Projects Systems & Security Program, CPM/ MTA NYCT 300 Cadman Plaza, 6th Floor, Rm. 6375 (718) 613-0029/ (646) 879-1970 Gregory.Mathelier@nyct.com April 23, 2020 DEC Concurrence with decommissioning of inactive remedial system: April 23, 2020 Mr. Mathelier: This is in response to your April 23, 2020 email and April 21, 2020 letter, requesting decommissioning of remediation systems at Jamaica and Kingsbridge bus depots. Based on the aforementioned e-mail and letter, the NYSDEC understands that both systems have reached their level of effectiveness, and that any future measures to be implemented to remediate any residual contamination at these sites will not require the use of these systems. MTA-NYCT s request to decommission the remediation systems at Jamaica and Kingsbridge bus depots is hereby approved. This e-mail shall serve as NYSDEC s formal correspondence. Contact me if you have questions. Regards, Vadim Brevdo Vadim Brevdo, P.E. Professional Engineer 2 New York State Department of Environmental Conservation 47-40 21st Street, Long Island City, NY 11101 718.482-4928 vadim.brevdo@dec.ny.gov June 22, 2020 Jamaica Bus Depot, 165-18 South Road, Queens (Spill No. 9010039) Project Summary and Spill Closure Rationale and Decision The Site is located at 165-18 South Road in Queens, and is operated by NYCT as a bus depot and maintenance facility. Spill No. 9010039 was assigned to this site in 1990, following UST tightness failures and confirmation that the leaking oil UST systems released free-phase petroleum into the subsurface. Subsequently, several investigative and remedial activities were implemented at the site with NYSDEC s approval to further delineate the extent of the release and recover product to the maximum extent possible. A three-well pump and treat (P&T) remediation system was installed in 1995. Four additional product recovery wells were installed in 2000 and the P&T system was upgraded to address increased volume of gasoline-related contaminants in the groundwater from off-site source. This remediation effort was accompanied with routine (twice a year) dissolved-phase groundwater sampling and analysis. In 2000, the New York State Department of Health (NYSDOH) initiated a soil vapor intrusion investigation at residential properties adjacent to the depot. Soil gas samples collected at different depths revealed lower levels of VOCs as the sample depth became shallower (closer to the residential properties

JAMAICA BUS DEPOT - NYCT (Continued)

S104073307

slab). Following a groundwater rise in 2002 (associated with the Jamaica Water Supply Company/NYCDEP shutdown of operation of high-capacity groundwater supply wells), the P&T system product recovery rates significantly decreased. As the water table rose, the free-phase layer of petroleum smeared on the soils such that no measurable free product remained on the groundwater surface, severely inhibiting the product recovery. Considering the aforementioned, NYCT's design consultant (with NYCT and NYSDEC's approval) implemented a localized depression of the groundwater table through a large capacity pumping well (170 gallons/min.) to enable free-phase petroleum recovery. However, as the groundwater further rose another 2 to 3 feet, the remediation system was unable to maintain the 170gpm pumping rate resulting in a failure to lower the groundwater sufficiently to expose the trapped free-phase petroleum. Further analysis of the situation concluded that a pumping system of at least 1,000gpm would be required to lower the water table. The sewer system in the depot area cannot accommodate this volume of water. As agreed with the NYSDEC, NYCT's contractor shutdown the remediation system in July 2007. At that time, approximately 33,500 gallons of product had been recovered from the site. After the remediation system was shut down, site monitoring continued. The monitoring effort confirmed a continuous rise in the water table, with petroleum product detected in only one well (RW-3). A spill buster system (petroleum recovery) was installed in this well to expedite product recovery and operated from 2009 until its shutdown in 2011 because the pump location was converted to a natural gas piping room and operation of the remediation system would not be in compliance with fire codes. This recovery effort resulted in the collection of an additional 447 gallons of product. In 2013, NYSDEC agreed to reduce the frequency for monitoring from monthly to every three months. In 2015 and 2016, to obtain updated post-remediation subsurface (soil and groundwater) conditions at, and adjacent to, the Jamaica Bus Depot, a post-remediation soil and groundwater investigation was conducted by NYCT's design consultant (D&B). Sixty soil borings to 50-foot depths were installed, in general, adjacent to or near existing monitoring wells to enable comparison of new analytical data to previous data. The investigation revealed the following: - Groundwater ranges from approximately 10 feet to 22 feet bgs; - Limited evidence of soil contamination (e.g., staining, petroleum-like odors and elevated PID readings) at depths of 15 to 48 bgs; - Limited evidence of petroleum (e.g., blebs and sheens - no product greater than .05ft) only in two borings (JDSB-03 and JDSB-07) (at depths ranging from 15 to 35 bgs); - Analysis of soil samples collected from these borings revealed low exceedances of VOCs (just above the SCO values) in only ten of the 120 soil samples; no detection of SVOCs; and Diesel Range Organics (DROs) identified in eight of 19 soil samples analyzed for DROs with the greatest concentration of DROs in soil samples at depth ranging from 21 to 23 feet bgs. - In the groundwater samples, no more than four VOCs (benzene, isopropyl benzene, toluene and/or xylenes) were detected at concentrations above their respective NYSDEC Class GA Standards; two SVOCs were detected at concentrations above their respective NYSDEC Class GA Standards (in approx. three groundwater samples). No recoverable free product has been detected at the site since early 2018. Based on the current site conditions, the following conclusions can be drawn: - The contamination source was eradicated: the UST systems responsible for the petroleum releases were replaced following the discovery of the UST systems testing failures. -

JAMAICA BUS DEPOT - NYCT (Continued)

S104073307

Recovery of free product took place to the maximum extent feasible: remedial actions resulted in the recovery of 34,117 gallons of free product from the site. - Recent subsurface soil sampling found only few exceedances of CP-51 SCOs and those exceedances were just above the SCO values. The CP-51 SCO exceedances were in soils at depths from approximately 15 to greater than 40 feet bgs and mostly within depot property. - Residual impacts to soil exist at depth and are not migrating. The current status of the spilled product poses no human health risk to depot workers or adjacent residents because there are no exposure pathways, either through inhalation, dermal contact, or ingestion (drinking water or otherwise) - The dissolved-phase impacts identified at the site are related to a historical off-site gasoline release. Regardless of the source, the groundwater pump and treat remediation system significantly reduced contaminant concentrations. Monitoring data show that residual contaminant concentrations continue to degrade by natural attenuation processes. - The NYSDOH found that there is no potential for exposure of residual impacts to adjacent residents. - Given the above information, and considering that the commercial and residential properties surrounding the site are serviced by a municipal water supply; the unlikelihood of a residential property owner excavating soil to depths exceeding 16 to 20 feet below grade; and NYSDOH's conclusion that no discernable petroleum impacts could be demonstrated from indoor air or soil gas results, the potential for direct human exposure to remaining petroleum impacts associated with the site spill is minimal. - There is no current environmental exposure risk to flora, fauna, surface water bodies, or aquatic ecological resources. - Workers who could be exposed during excavation activities would need to be made aware of the potential for petroleum contamination at depth. This would be accomplished through the Site Management Plan (SMP) provided in Appendix B of the Petition for Spill Closure Report Jamaica Bus Depot May 2020. - There is the potential that the groundwater table could be lowered by the operation of nearby high-capacity groundwater supply wells. This could expose the submerged petroleum contamination at the site. Therefore, a long-term monitoring and sampling program will be implemented as discussed in the SMP. The SMP includes an Excavation Work Plan to provide guidance for excavations in impacted areas. Based on these observations/recommendations and as defined in Appendix C Sections I(c)1. i, ii and iii of the Global Consent Order executed between NYCT and the NYSDEC, NYCT believes that the results of the post-remediation sampling program and the latest groundwater sampling events conducted at the site show that site remediation (through the above-mentioned remedial actions) has been completed, to the maximum extent feasible (given the current site conditions), in a manner that is fully protective of all identified receptors. It shall be noted that groundwater at the site is not used for potable water or any other purposes. As such, the potential for human exposure to residual soil and groundwater impacts is not expected. On June 8, 2020, NYCT submitted Remedial Action Report, including Site Management Plan, and spill closure petition. Based on the completed investigative/remedial activities and associated findings and management of residual contamination as per the SMP, NYCT requested that Spill No.9010039 be closed by the NYSDEC. If closure of the spill is granted by NYSDEC, NYCT will coordinate the decommissioning of some of the groundwater monitoring wells. As part of the decommissioning process, NYCT proposed to have ORC mixed with well point backfill to provide a slow release of oxygen in order to

S104073307

enhance biodegradation of residual impacts. Based on review of the project history and RAR, NYSDEC concurred that spill closure is appropriate at this time and closed spill case on June 22, 2020. September 1, 2020 NYCT Submitted Addendum No. 1 to the Site Management Plan, dated August 7, 2020, prepared by AECOM. NYSDEC reviewed Addendum No. 1 to SMP and send concurrence e-mail on September 1, 2020 at NYCT's request. e-mail from NYCT: Vadim, I hope this email finds you well and safe. Attached, for your review and approval is Addendum#1 to the NYSDEC-approved Site Management Plan (SMP) for Jamaica Bus Depot. The SMP requires that the NYSDEC be informed of any changes to the site condition while the SMP is in effect. Addendum #1 is to inform the NYSDEC about upcoming Excavation Work Activities associated with the construction of a Bus Radio System Upgrade project. The work area is located in the southeastern portion of the site in the area of the former Groundwater Remediation Pump and Treat (P&T) System Building. The groundwater remediation P&T System Building will be demolished as part of this project. The excavation work will begin only after NYSDEC's approval of this Addendum #1. Best, Gregory Mathelier, CCM Construction Manager UST & Env. Remediation Projects Systems & Security Program, CPM/ MTA NYCT 300 Cadman Plaza, 6th Floor, Rm. 6375 (718) 613-0029/ (646) 879-1970 Gregory.Mathelier@nyct.com e-mail response from NYSDEC: September 1, 2020 Mr. Mathelier: I have reviewed the Addendum No. 1 to the Site Management Plan for Jamaica Bus Depot site, Closed Spill No. 9010039. The Addendum is dated August 7, 2020, submitted to NYSDEC on September 1, 2020 and prepared by AECOM. The NYSDEC hereby concurs with the Addendum No. 1 to the Site Management Plan. This e-mail constitutes an official NYSDEC correspondence. Please contact me if you have questions. Thank you. Vadim Brevdo e-mail response from NYSDEC to MTA/NYCT and AECOM: September 1, 2022 Mr. Connare, This is to acknowledge receipt of your Thursday, September 1, 2022 8:08 AM e-mail and the first Periodic Review Report (PRR) for the Jamaica Bus Depot (Closed Spill Case No. 9010039). I will review the report within 2-4 business days and get back to you should I have any questions concerning the report or need to discuss the document. In your aforementioned e-mail you informed me of the following: - MTA/NYCT and AECOM would like to establish the PRR submittal on a calendar year basis. - MTA/NYCT and AECOM further proposed submitting a PRR for the September/October 2022 activities at the end of this calendar year. - MTA/NYCT and AECOM would then perform the SMP-required annual inspection and groundwater sampling and two biannual monitoring events in 2023, with the PRR submitted for the 2023 calendar year and maintaining the calendar year schedule thereafter. Please be hereby advised that the proposed course of action is acceptable to the NYSDEC. This e-mail constitutes an official NYSDEC correspondence regarding this matter. Note that I properly filed the PRR dated July 2022 as well as this response in the NYSDEC electronic document repository for the subject project. Please contact me if you have questions. Respectfully, Vadim Brevdo"

DEC Memo: "02/27/09-Zhune spoke to Victoria stoddard from Pro-test (631) 321-4670. Tank fail test today with a Dry leak. No evidence of any leak. Tank is going to be isolated lines will be test. They sent porposal to: First Reformed Church 159-29 90th Ave. Jamaica NY 11432 Attn:Imogene Williams 8/5/2009 TTF sent to: Ms. Imogene Williams First Reformed Church 159-29 90th Ave. Jamaica, NY 11432 12/24/09- Pro Test Environmental sent a letter dated November 2,2009 and result of tightness test. The letter stated the following: On February 27,2009 Pro test performed a tightness test on the above subject tank system and it failed with a dry leak. On October 9,2009, Pro test returned to excavate and isolate the tank from its associated lines. The tank only passed a test, but the vent and fill failed line test. Technicians returned on October 22nd to excavate a trench at the existing vent line and removed the old line. Pro test returned the next day to install a new vent alarm. new vent lineand new fill/stick line. Upon completion of these repairs the tank system passed a retest. There was no evidence of contamination in the excavation before it was backfilled with existing clean fill. Spill Closed "

DEC Region: 2
DER Facility ID: 308230
DEC Memo: "1/19/06 - Raphael Ketani. I spoke to Mark Randazzo of O'Brien & Gere

((732) 225-7380, ext 231; cell (781) 883-6432) today. He said they were digging at the site and came across a large tank (17'X6') that was not known to be there. The soil is contaminated with oil. I told him to take 6 soil samples on the floor of the trench (one at each end and 2 at the base of the north wall and at the base of the south wall) and one 3 feet above the floor of the trench in each wall (total 10). He said that he had dug down 15' already and asked how much he should go. I told him that he has to dig out all of the soil that exceeds TAGM 4046, or until he hits groundwater. I told him that if there is groundwater, then water samples need to be taken. I told him that if he believes the digging will endanger buildings or structures, then he has to get an engineer to look at the site. If the engineer makes a determination that it is unsafe to dig deeper, then DEC needs to receive a report stating this from the engineer. He agreed to dig deeper and take the samples. Jan 20th, 2006 Sent CSL To Howard N. Apsan CUNY 535 East 80th St New York, NY 10021 2/17/06 - Raphael Ketani. I spoke to Mr. Randazzo. He said that the digging and soil removal have been completed and soil samples were sent to the laboratory. He said they only went 2 feet deeper due to safety concerns, but they didn't hit water. I asked him when I should receive the final report and he said in 2 or 3 weeks. 3/21/06 - Raphael Ketani. I received the Underground Storage Tank Closure Former St. Monica's Church Property report dated March 2006 and produced by O'Brien & Gere. I reviewed the report and found the results to be non-detect, or below TAGM 4046, or just above TAGM 4046. The PBS case #2-333638 has been updated. They want an NFA letter. Based upon the report, I am closing the spill case. Also, I am writing the NFA letter. "

Remarks: "tank is being pulled, soil contamination, remediation is in progress. tank size is 3600 gallon tanki."

S109580113

land near Liberty Avenue in Queens, New York, Queens County. The site is between 158th and 159th Streets. Site Features: The FDA building, parking, and the Nursing Science Building of York College CUNY are located on the site. Current Zoning/Use(s): The current land use for the parcels includes a college building and Federal Building. Past Use of the Site: The site operated as a gas distribution facility from 1944 to 1975. There was a 10.6 million cubic foot tar-sealed, remote gas distribution holder, a boiler room, and an office. The site was operated by Brooklyn Union Gas (BUG), a predecessor company to National Grid. BUG sold the property in 1987. Geology and Hydrogeology: Site geology consists of two unconsolidated units varying in thickness across the site. These units consist of fill ranging from 2.5 feet to 11 feet below ground surface, and well-graded sand ranging from 2.5 to greater than 45 feet below ground surface. Groundwater was encountered at depths ranging from approximately 11 to 34 feet below ground surface. The flow is northeast to southwest."

Env Problem: "Prior to Remediation: Based upon investigations conducted to date, there are no contaminants of concern at the site. Soil- There were no detections of contaminants above SCOs. Groundwater - There was only one PAH constituent (benzo(a)anthracene) detected above standards, at a concentration of 0.002 ug/L. The Site Characterization Report was approved in January 2013, with No Further Action for the site."

Health Problem: "Direct contact with contaminants in the soil is unlikely because the majority of the site is covered with buildings and pavement. Contaminated groundwater at the site is not used for drinking water or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination."

Updated By: GWBURKE

Site Description: "Location: The 107-35 Merrick Boulevard site is located in a generally residential and commercial area in the Jamaica section of Queens, New York. The site is bordered by Merrick Boulevard to the west, an auto repair shop to the north, a mixed-use building to the south, and residential homes to the east. The site is approximately .488 acres (21,282 square-feet) in area. Site Features: The property is improved with a single one-story, 3,800 square-foot, slab on grade commercial building. A large portion of the site consists of either an asphalt or gravel parking lot. Site access is restricted through the presence of a steel panel fence along Merrick Boulevard. Current Zoning and Land Use: The site is currently zoned for residential and commercial use and sits within an R4-1 zoning district with a C2-4 commercial overlay. The site is currently vacant. Past Use of the Site: The on-site building was constructed in 1973 and was used most recently as a diesel bus repair facility. Other past uses include a knitting mill, gasoline service station, and home heating oil delivery operation. These past uses are considered to be of environmental concern. A Phase 1 Environmental Site Assessment dated April 17, 2014 and the Draft Remedial Investigation Report dated June 2018 have been completed for this property. Site Geology and Hydrogeology: The site is underlain by asphalt pavement and supporting rocky fill to a depth of approximately six inches. Below the rocky fill is brown fine-grained sand grading into reddish-brown, stratified to medium to coarse grained sands with sub-rounded quartz pebbles and sub-angular rock fragments. These sands are likely native glacial outwash deposits and continue to a depth of 20 feet below ground surface (bgs). Depth to bedrock is approximately 450 feet. Depth to groundwater is approximately 14 to 14.5 feet bgs. Groundwater flows from north to south across the site based on well data. "

107-35 MERRICK BLVD-OER (Continued)

S122449255

Env Problem: "Nature and Extent of Contamination: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), and pesticides. Based on investigations performed to date, the primary contaminants of concern are elevated tetrachloroethene(PCE) and trichloroethene(TCE). Soil Vapor - concentrations of PCE in soil vapor range from 1,080 g/m3 to 552,000 g/m3 along with a maximum concentration of TCE detected on site of 2,250 g/m3 in the five on-site soil vapor probe locations sampled. Soil - no VOCs, SVOCs, metals, PCBs, or pesticides were detected above6NYCRR Part 375-5 Commercial Soil Cleanup Objectives (SCOs). Four SVOCs, Benzo(a)anthracene (UUSCO 1ppm, max. 1.1ppm), Benzo(b)fluoranthene (UUSCO 1ppm, max. 1.5ppm), Chrysene (UUSCO 1ppm, max. 1.3ppm), and Indeno(1,2,3-c,d)pyrene (UUSCO .5ppm, max. .85ppm), exceeded their Unrestricted Use SCOs. Other Unrestricted Use SCO exceedances include copper (UUSCO 50ppm, max. 181ppm), lead (UUSCO 27ppm, max. 125ppm), mercury (UUSCO .18ppm, max. .24ppm), and zinc (UUSCO 109ppm, max. 233ppm). Groundwater - concentrations for PCE slightly exceeded New York State Groundwater Quality Standards with a maximum concentration of 6.3 ug/l (NYSGWS max. 5 ug/l). Additionally, sodium and manganese were detected above their respective standards in all seven well samples. Further site investigation is needed to determine the extent and possible source of site-related contamination. "

Health Problem: "As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns."

Record Upd: 05/26/2021
Updated By: DJEATON

Site Description:

"Location: The Jamaica Gas and Light MGP site is located in an urban area. The 0.76 acre former manufactured gas plant (MGP) site is immediately east of the intersection of 158th St and Beaver Rd, in Jamaica, NY, Queens County. LIRR (Long Island Railroad) tracks lie to the north of the site, and Prospect Cemetery lies to the south of the site. Site Features: The site is a relatively flat property that is vacant, fenced in, and partially covered in pavement. Current Zoning and Land Use: The site is currently vacant land that is rented out to a waste services company that uses it to store roll-off containers and trash compactors. The site is zoned as R6, residential. The surrounding parcels are currently used for a combination of commercial, and light industrial. York College is about 0.25 miles east of the site. The South Jamaica Houses are about 1/3 of a mile southeast of the site. Downtown Jamaica is 1/10 of a mile north of the site. Past Use of the Site: A review of historical documents indicated that the site operated as a MGP for at least 25 years in the late 1800s before being converted to a gas storage and distribution facility around 1900 when the two smaller gas holders and structures associated with the MGP were demolished. The remaining large gas holder and associated gas storage and distribution structures were demolished in 1938. The property was subsequently used as offices by the Brooklyn Union Gas Company until the late 1960s, and then left vacant. Site Geology and Hydrogeology: Underlying the partially paved surface is urban fill consisting of poorly graded sand and gravel with varying amounts of anthropogenic debris, ranging from 3 to 19 feet in thickness. Underlying the fill is a native unit of sand, consisting of subunits of well and poorly graded sand. Discontinuous lenses of silty sand, sandy silt, and clay are present within the sand unit. Maximum boring depth was 45 feet bgs and the bottom of the well graded sand unit was not encountered. The Gardiner's clay, if present, is estimated to occur at depths ranging between 75 and 90 feet bgs. Bedrock is estimated to be at depths greater than 500 ft bgs. Groundwater was encountered at depths ranging from 13 to 27 feet bgs. Groundwater generally flows from the north/northeast to the south/southwest."

Env Problem:

"Nature and Extent of Contamination: Prior to Remediation- Based upon investigations conducted to date, the primary contaminants of concern include coal tar and PAHs (Polycyclic Aromatic Hydrocarbons). Soil-Impacts beneath the site consist of tar odors, staining, and tar coatings of soil grains, generally to the center and southern area of

the site, ranging from 3 to 33 feet bgs (below ground surface). Observations of tar coating were limited to four borings and 2 test pits, in the vicinity of the two smaller gas holders and former purifier and meter room. Observations of tar coating are limited to above the water table. Suspected purifier waste was observed in one test pit within the footprint of the former purifier and meter room. The total PAHs criterion, from DEC guidance document CP-51, of 500 ppm was only exceeded in 3 on-site subsurface soil samples. Groundwater- NAPL (Non Aqueous Phase Liquid) was not observed in any of the wells. Groundwater beneath the site does not contain manufactured gas plant (MGP) related constituents at concentrations exceeding the groundwater standards. Inorganic compounds, including iron, lead, manganese, and sodium, which were detected exceeding groundwater standards occur naturally in the aquifer and are not related to the historic MGP operations. Soil Vapor and Indoor Air- Soil vapor and indoor air assessments were not performed because there are no structures or occupants currently on the site."

Health Problem: "The NYSDOH will evaluate the potential for impacts to public health from exposure to site contaminants once sufficient information from the investigation of the site becomes available for review."

Site Description: "Location: The West Side Corporation site is located 107-10 180th Street in Jamaica, Queens County, New York. Site Features: This 4.5-acre site is owned by the now defunct West Side Corporation and includes a brick structure, approximately 21,600 square feet (sf) in size, currently leased by Atlantic Express Transportation (Atlantic), a school bus company for dispatching, repairing and maintaining school buses. Bus storage (approximately 200 buses) at the site was observed to cover a majority of the open space. The site is bordered to the west and south by a DEP maintenance and storage yard (Station 24). The area around the site building is paved with asphalt. The site property is surrounded by chain link and corrugated metal fencing. Historical Use(s): The site was used for the manufacture and distribution of ceramic pipes and fittings until 1969. From about 1969 to 1992, the site was used as a storage and distribution center for laundromat supplies, hangers, plastic garment bags, and most notably dry cleaning chemicals including large quantities of PCE. The property was operated as the West Side Corporation. Five 10,000 gallon aboveground storage tanks were located outside the southeast portion of the site building and were used for the storage of PCE. These tanks were filled via truck tankers and via railroad tanker cars. Apparently, improper handling of the chemicals has resulted in the disposal of hazardous wastes at the site, primarily PCE, at the site, some of which were released or have migrated in groundwater from the site to surrounding areas, including the properties to the south and east. Historical data indicate that contaminated groundwater from the site was drawn toward the former Jamaica Water Supply Company wells when they were in operation. Analytical data from that time is not available but current and historical information suggests that the concentration of PCE that may have been introduced to the water distribution system was likely low due to dilution. Formerly, the Jamaica Water Supply Company occupied Station 24 and operated several production wells (Nos. 24, 24A, 24B, and 24C). Well 24 was taken out of service by DEP in 1975. Wells 24A, 24B, and 24C were taken out of service by DEP in 1982 when contaminants were detected in these wells during routine monitoring. Operable Units: The site was divided into two operable units. An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of

WEST SIDE CORP. (Continued)

1009235339

release or exposure pathway resulting from the site contamination. Operable Unit No. 1 (OU1): OU1 addresses on-site soils and groundwater. A July 2000 ROD selected an on-site remedy to clean up the soil and groundwater utilizing groundwater recovery and treatment, hydraulic containment, soil vapor extraction (SVE) and treatment, chemical oxidation, and institutional controls. In September 2002, an Explanation of Significant Differences was issued revising the remedy to incorporate thermal technology in lieu of chemical oxidation. Thermal treatment, soil vapor extraction, and insitu chemical oxidation (ISCO) have since remediated on-site groundwater and soil source. Operable Unit No. 2 (OU2): OU2 addresses soil vapor and contaminated groundwater that has moved from the site to the south-southwest beneath Station 24 and a residential area. The plume is also migrating in the direction of the DEP Groundwater System Station 6 Site, a currently closed drinking water treatment facility that has been proposed for reuse. The OU2 remedy included installation of a high capacity (750 to 1,100 gpm) groundwater extraction and treatment (GWET) system with on-site treatment and discharge to the local storm sewer system. Construction of the GWET was completed by DEP in 2012, and it was operated by the Department for approximately three months until November 2012. Based on the groundwater level measurements and analytical results within the aquifer following GWET system operations, the Department issued an Amended Record of Decision (AROD) in December 2013. The modification to the remedy generally includes in-situ chemical oxidation (ISCO) which will require the installation of a network of injection wells to inject a chemical solution known as permanganate within the shallow and intermediate groundwater zones. Since permanganate injection will now occur within the GWET system capture area, operation of the GWET system is no longer necessary and has not been included in the amended remedy. Groundwater and indoor air monitoring will continue as part of the AROD. Remedial design of the amended remedy is underway. Site Geology and Hydrogeology: The soil deposits encountered at the site generally consist of fill materials, glacial outwash, and clay soil. The fill material encountered at the site ranges in thickness from approximately 0.5 feet to 10 feet below ground surface (bgs) and is comprised of brown sandy silt, brown silty sands, and gravelly sands with fragments of ceramic, glass, plastic pellets, and metal debris. An unconfined sand and gravel aquifer is present consisting of medium to coarse grained sands of Pleistocene age locally known as the Upper Glacial Aquifer. Soil samples collected showed the aquifer material to be very consistent throughout the OU2 study area. The depth to the top of the underlying Gardiner's clay layer, which is an undulating surface throughout the study area, increases southward from OU1 to OU2 and ranges from 62 feet to 105 feet bgs. The regional direction of groundwater flow is south-southwest from the site toward Jamaica Bay, located approximately 3 miles south of the site. The depth to groundwater was found to be 10 to 14 feet bgs throughout the study area. Water table elevations range from 22 feet above mean sea level (amsl) at OU1 to 15 feet amsl at the south edge of OU2. Site. The site topography and surrounding area is relatively flat. "

Env Problem:

"Post-Remediation Nature and Extent of Contamination: For OU1: On-Site Areas Soil- Between December 2005 and June 2006 an electrical resistive heating (ERH) system was installed and operational. The ERH system removed approximately 4,000 pounds of PCE from the source area. A soil vapor extraction (SVE) system had been operating from

WEST SIDE CORP. (Continued)

1009235339

September 2006 TO 2011. The system recovered and treated approximately 9222 pounds of the following compounds: acetone, trans 1,2-dichloroethene (trans 1,2-DCE), cis 1,2-DCE, TCE, and PCE. Groundwater- the concentrations of PCE and its degradation compounds have decreased to levels ranging from undetected to 66 ppb. ISCO injections continue on an annual basis as a pilot study. Soil Vapor- A Sub-slab Depressurization System (SSDS) installed within the breakroom of the former Atlantic bus company building to mitigate soil vapor intrusion. For OU2: Off-Site Areas Soil- no new data. Groundwater- Currently in RD phase. November 2012 groundwater data demonstrated that influent, untreated groundwater PCE concentrations were substantially lower than originally estimated during GWET system remedial design. In the intervening years since the GWET remedy was selected and designed, the plume near the source has attenuated due to the removal of the on-site source (i.e., the OU1 remedy). The recent data also indicated that the dissolved PCE plume is currently present across a greater areal extent and farther south from the site, with the most significant remaining contamination now beyond the identified capture zone of the GWET system. The direction of plume movement remains consistent with the southwesterly regional flow direction. Groundwater samples collected from the monitoring well network in 2012 were consistent in showing that PCE contamination extends deeper into the aquifer with increasing distance from OU1, with the most widespread contamination in the intermediate zone. Water quality data obtained from existing monitoring wells continue to indicate that shallow and intermediate PCE contamination predominates to the north of 174th Street, while deeper contamination predominates southward to 166th Street. Soil Vapor- Since May 2005, the Department and the NYSDOH have tested the air and soil vapor in over 170 homes near the Site. The State has also installed, and maintains, 30 vapor mitigation systems to reduce existing or potential exposures. The SVI investigation has been completed. Ongoing monitoring of the area will continue. Prior to Remediation Nature and Extent of Contamination: For OU1: On-Site Areas Soil- The primary contaminants of concern are tetrachloroethene (PCE), trichloroethene (TCE), 1,2-dichloroethene (1,2-DCE), 1,1-DCE, acetone, 2-butanone, ethylbenzene, vinyl chloride, and xylenes. Several semi-volatile organic compound (SVOC) petroleum-related compounds including benzo(a)pyrene, chrysene, and benzo(a)anthracene were detected at concentrations exceeding SCGs. PCE was identified in the surface soil at concentrations of 360 ppb to 920 ppb, below the 1400 ppb SCGs. PCE was detected in the subsurface soils with concentrations as high as 5,900,000 ppb in the shallow soils and as high as 7,100,000 ppb in the deep soils within the Source Area 1. PCE present in an area estimated to be 31,600 square feet at a depth of about 1 foot to 12 feet below grade (bgs). PCE concentrations in Source Area 2 were as high as 890,000 ppb found in the upper 4 feet of the soils. PCE concentrations in Source Area 3 were as high as 120,000 ppb found in the upper 4 feet of the soils. Groundwater- The most prominent area of shallow groundwater contamination appears to originate in Source Area 1 with a maximum PCE concentration of 210,000 ppb. The PCE plume extending downgradient of the site to the south-southwest. Elevated concentrations of PCE were also evident in the deep groundwater at maximum concentration of 25,000 ppb. Soil Vapor- No data prior to remediation. For OU2 Off-Site Areas: Soil- The highest concentration of PCE in the upgradient area off-site was 12 ppm at a depth of 4-6 feet bgs. Groundwater- PCE in groundwater

1009235339

exceeded the Class GA groundwater standard (5 ppb) over much of the downgradient study area. The maximum concentration of PCE in the offsite study area was reported at 8,800 ppb in the shallow well. The highest concentration of contaminants in deep groundwater was 2,300 ppb. Degradation compounds of PCE (TCE, 1,2-DCE and vinyl chloride) at concentrations exceeding their respective groundwater standards, were detected in both shallow and deep locations throughout the study area. Indoor & Ambient Air- PCE was detected at concentrations below NYSDPH Guideline of 100 micrograms per cubic meter in indoor and outdoor air at the off-site residential locations. Operable Unit No. 1 (On-site Soils): Remediation of on-site soils is complete and under site management. Prior to remediation, Operable Unit No.2 (off-site groundwater and soil vapor): Based upon investigations conducted to date, the main categories of contaminants that exceed their SCGs are VOCs, specifically PCE and its breakdown products. "

Health Problem: "People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Sub-slab depressurization systems (systems that ventilate/remove the air beneath the building) have been installed in both the on-site building and off-site buildings to prevent the indoor air quality from being affected by the contamination in soil vapor beneath the buildings. A monitoring program is in place to further evaluate the potential for exposure via soil vapor intrusion in off-site buildings."

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: (212) 637-3660

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

	Data Release Frequency: Quarterly

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilities name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

PFAS 3: PFAS Environmental Site Remediation List

Per- and Polyfluoroalkyl Substances (PFAS) are a group of chemicals used to make fluoropolymer coatings and products that resist heat, oil, stains, grease, and water. Fluoropolymer coatings are blends of resins and lubricants used in products such as water-repellent clothing, furniture, adhesives, paint and varnish, food packaging, heat-resistant non-stick cooking surfaces and insulation of electrical wires. Chemicals in this group include perfluorooctanoic acid (PFOA) and perfluorooctane sulfonic acid (PFOS).

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers for Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Longitude (West):	73.792447 - 73° 47' 32.81"
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	602008.2
UTM Y (Meters):	4506802.5
Elevation:	59 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14105978 JAMAICA, NY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

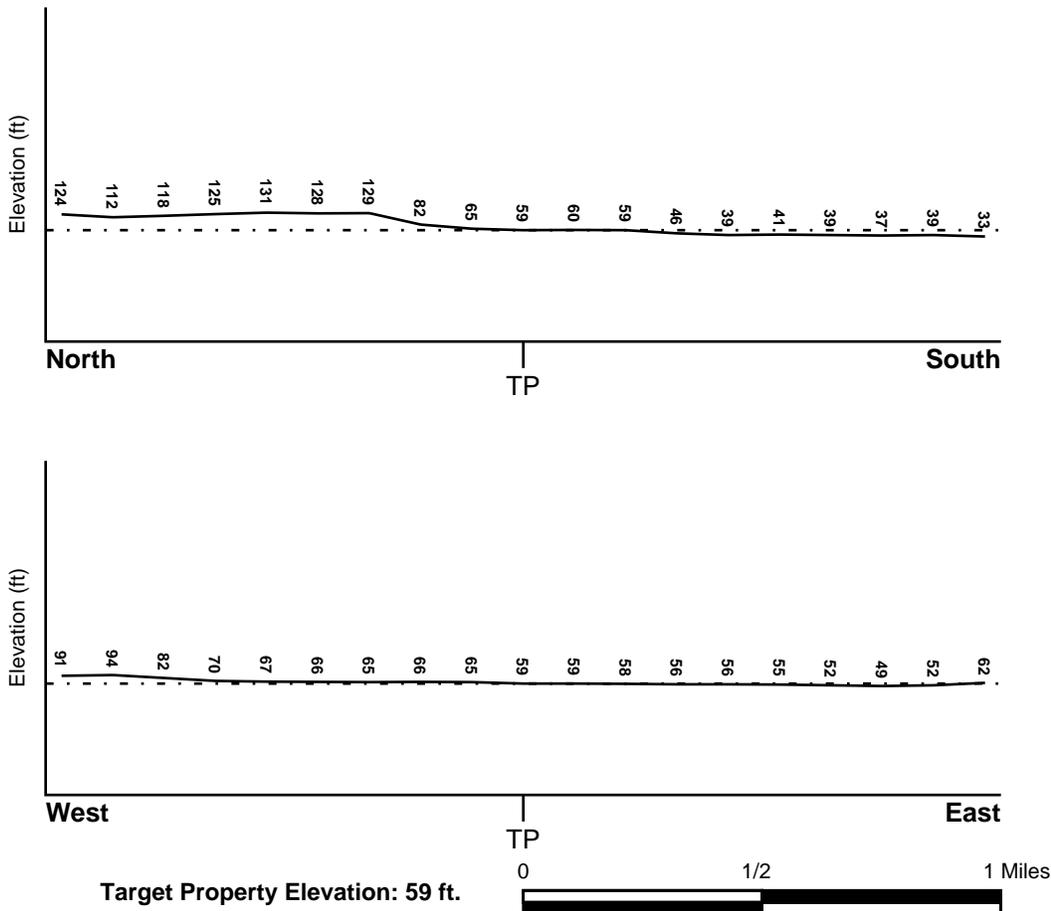

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
3604970059B	FEMA Q3 Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
3604970051B	FEMA Q3 Flood data
3604970052B	FEMA Q3 Flood data

3604970067B	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
JAMAICA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Pleistocene
Code: Qp (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Qualifications

Christine Wagner

Project Manager

Education

MA, Environmental Sciences/Toxics Option, New Jersey Institute of Technology, 1989
BA, Biology, Kean University, 1980

Years with AECOM

27

Registration/Certification

Organic Data Validation, NYSDEC
OSHA 40 Hour Hazardous Waste Health & Safety Training
OSHA 8 Hour Hazardous Waste Health & Safety Training for Supervisors
USDOT Hazardous Materials Transport

Areas of Expertise

Phase I & II Site Assessments
Regulatory Compliance
Environmental Audits

Ms. Wagner has extensive experience as a Project Manager for Phase I and Phase II Environmental Site Assessments, Environmental Regulatory Compliance and Hazardous Material Building Surveys and Inspections for commercial and industrial clients, law firms, and financial institutions throughout the United States for both single site and multi-site portfolios.

Professional history

Ms. Wagner has assisted clients in environmental regulatory matters, and has generated Phase I ESA Reports, Subsurface Investigation (Phase II) Reports, Remedial Closure Reports over the course of her 27-years in consulting. She has also directed complex industrial site remedial investigations, and has performed multi-media environmental regulatory compliance audits for various chemical and manufacturing facilities.

Ms. Wagner has participated in and managed over 500 Phase I ESAs and NJDEP Preliminary Assessments. All Phase I ESAs were conducted in accordance with ASTM Standard Practice E1527. Non-ASTM scope considerations such as the presence of suspect asbestos-containing building materials, radon, lead-based paint, lead in drinking water, wetlands and/or mold were considered and evaluated during select Phase I ESAs.

Select project experience

New York City School Construction Authority (April 2019-present). Project Manager for Due Diligence / Phase I ESAs at school properties and potential acquisition sites; conducted Indoor Air Quality assessment following NYSDOH protocols at school property in Brooklyn; evaluated reports prepared by others for playground improvement projects at facilities located in Staten Island, Bronx, Brooklyn, Queens, and Manhattan; and serve as Project Manager for multiple boiler conversion project at school facilities in all five Boroughs. Advised junior staff and ensured QA/QC requirements met for all deliverables.

New York City Department of Transportation (NYCDOT) – 37-25 34th Street, Long Island City, Queens, New York (2020-Present): Conducted Phase I Environmental Site Assessment (ESA) in general accordance with ASTM Standard Practice E1527 in support of potential leasehold property for NYCDOT. Based upon the findings of the Phase I ESA a Phase II Indoor Air Quality (IAQ) assessment was conducted including the collection and analysis of sub-slab vapor samples and indoor air quality samples. All samples were collected utilizing Summa canisters and analyzed for volatile organic compounds following USEPA Method TO-15. A report of IAQ findings was developed.

New York City Department of Transportation (NYCDOT) – 125th Street Comfort Station, New York, New York (2018): Project Manager and inspector for asbestos-containing material (ACM) survey for potential upcoming renovation/demolition of old Comfort Station building underneath overhead train tracks.

Confidential Client, Due Diligence Assessment of Former Hudson Generating Station Property, Jersey City, NJ (2021). Conducted due diligence assessment of former power plant property in general accordance with ASTM Standard Practice E1527-13. Assessment included site inspections, review of historical records, and readily available

environmental databases to evaluate sites for environmental liabilities.

Hazardous Materials Assessment of Confidential GSA Facility in New York, New York (2021-Present). Task Manager for hazardous material assessments of 12-story building located in lower Manhattan. Five floors of the facility was surveyed for suspect asbestos, lead-based paint, universal wastes (lamps, batteries) and other hazardous materials that would be impacted by building renovations. Prepared abatement specifications for asbestos, lead-based paint, and universal wastes in coordination with AECOM design team.

Confidential Wind Client, Due Diligence Assessments of Power Properties in Astoria, NY; Waterford, CT; and Pilgrim, MA. Conducted due diligence assessment of current and former power plant properties in general accordance with ASTM Standard Practice E 1527. Assessments included site inspections, review of historical records, and readily available environmental databases to evaluate sites for environmental liabilities. Developed cost estimates for hazardous material assessments and remediation based upon findings of due diligence reviews.

Atlantic Power/Capital Power – Preliminary Assessment (2014, 2016, 2021). Conducted NJDEP Preliminary Assessments associated with a 27-MW natural gas steam and electric cogeneration power plant in Kenilworth, NJ. Reviewed historical and previous reports and identified Areas of Concern (AOCs) Prepared PA Reports for submittal to NJDEP in accordance with the NJDEP Site Remediation Reform Act (SRRA) and Technical Requirements for Site Remediation (N.J.A.C. 7:27E).

EPA Region II Pre-Demolition Survey and Abatement Oversight, Building 209, Edison, NJ (04/2021 – 9/2021): Project Manager for hazardous materials survey for asbestos-containing materials, lead-based paint, PCBs, universal wastes and other hazardous materials that would require special handling prior to building renovation activities for EPA Region II facility in Edison, NJ. Based upon survey findings, prepared contractor bid specifications, conducted contractor walk-throughs, and assisted client with contractor selection. Managed asbestos abatement oversight and third-party monitoring of abatement and subsequent demolition activities. Maintained contractor schedule and assured that work was completed within schedule and budget.

United States Postal Service Combined Environmental Compliance Review (ECR)/Regulated Underground Storage Tank (UST) Inspection Program Environmental Compliance Technical Support - Team Leader - NJ, NY, PA (01/2013 – Present): Team Leader for over 200 ECRs and 40 UST inspections of US Postal Service P&DCs, NDCs,

VMFs and MPOs in New Jersey, New York, and Pennsylvania as part of ECRM's ECR program. Responsible for identifying federal, state, and local environmental regulations applicable to the facility operations and assets; coordinating with facility management and staff during the onsite ECRs; providing entrance briefings; reviewing onsite environmental records; collecting facility asset and aspect data while onsite; preparing a list of preliminary Findings, BMPs, and Recommendations for review during the exit briefings; and preparation of Draft and Final ECR Reports. Access Environmental Tool Kit (ETK) to review facility documents and provide ETK training to USPS staff. Follow-on audit activities include assisting facilities with air permit applications (Boiler permits, Emergency Generator permits, Gasoline Fueling Operations, etc.), at NJ and New York City locations; preparation of Stormwater Pollution Prevention Plans (SWPPP); and Spill Prevention Control and Countermeasure (SPCC) Plans.

Goodyear Tire & Rubber Company, Retail Facilities, Wayne, North Brunswick, Montgomery, Parsippany, and Wrightstown, NJ (2011 to 2019). Project Manager for baseline investigation of Goodyear Tire Service Centers. Managed and conducted Phase I ESAs at each location. Based upon findings, soil and groundwater was evaluated and remedial actions including removal of subsurface hydraulic lifts and excavation and off-site disposal of impacted soil was conducted at the North Brunswick, Montgomery, and Parsippany locations. Excavation and off-site disposal of an oil pit was conducted at both the Wrightstown and Parsippany facilities. All investigations and remedial actions were completed in accordance with the Technical Requirements for Site Remediation (NJAC 7:26E) and the Site Remediation Reform Act (SRRA). An unrestricted use Remedial Action Outcome (RAO) letter was prepared for each location.

Olympus Power – Brooklyn Navy Yard, Brooklyn, NY (2013-2014): Project Manager for Phase I ESA at Brooklyn Navy Yard. Phase I ESA was conducted in accordance with ASTM Standard Practice E 1527 to identify Recognized Environmental Conditions (RECs) and identify potential liabilities associated with property. Also served as Team Member for annual EHS compliance audits. Responsible for evaluation of compliance with federal and state air, water, hazardous and solid waste, petroleum storage/management, community right-to-know, regulated medical waste, and site remediation compliance. Provided summary report of findings and recommended corrective actions.

Confidential Client - Eleven Site Portfolio, Multiple States: Managed site investigation activities for a portfolio of eleven manufacturing sites located in New York, New Jersey, Pennsylvania, Ohio and Indiana. In preparation of the sale of the properties, each site was evaluated via Phase I Site Assessments for Recognized Environmental Conditions

(RECs). Each REC was further investigated (soil and groundwater) to evaluate aerial extent of impacts, if any. Based upon findings, cost estimates were developed to remediate each of the sites to meet State-specific criteria. The cost estimates were utilized in property divestiture negotiations. The site investigations at all eleven sites were completed within a 60-day due diligence time frame.

Tyche Power Partners LLC, Brooklyn Navy Yard Cogeneration Facility (BNYCF), Phase I ESA: The scope of work included a visual assessment of the Site, interviews with Site contacts; review of pertinent background and historical information; review of prior assessment documents; contact with appropriate regulatory agencies; prior ownership review; review of chemical and waste handling, storage, and disposal practices; observation of land use on surrounding land; and review of a regulatory database report.

PAR Pharmaceutical Company Inc., Phase I ESA, Spring Valley, Rockland County, New York: Project Manager for Phase I ESA of vacant manufacturing facility. A site visit was conducted, historical records reviewed, and historical site investigation reports assessed to evaluate RECs on-site. The Phase I ESA was performed according to the recommended guidelines established by ASTM Designation E1527-13, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process."

New York City Department of Environmental Protection, Hazardous Materials Assessment, New York, New York. Project manager for assessments of 360 facilities located throughout New York State. Each facility was evaluated for asbestos, lead-based paint, mercury, and PCBs. Assessment activities focused on worker health and potential for exposure to environmental contaminants. URS prepared summary reports for each facility detailing findings and recommendations for corrective actions. All assessments and reports were completed under an accelerated schedule in less than the two-year contract period.

New Jersey School Development Authority, Remedial Investigation and Remedial Action Workplan, Newark, NJ: Project Manager for proposed school development site. Groundwater investigations revealed light non-aqueous phase liquids (LNAPLs) present on groundwater associated with former residential USTs on-site. Implemented interim response measures including enhanced fluid extraction and recovery via vacuum extraction. Prepared Remedial Action Selection Report (RASR) in preparation of Remedial Action Workplan (RAWP) preparation. A Remedial Action Workplan that included limited excavation and bioremediation of petroleum-affected soil was prepared and submitted to NJDEP. NJDEP approval of the RAWP was obtained in April 2010. Managed legacy AECOM (URS) staff who prepared design specifications for future property use as parking facility.

Goodrich Corporation, Aerospace Manufacturing Facility, Cedar Knolls, New Jersey. Based upon a previously completed PA, a total of 23 Areas of Environmental Concern (AECs) were identified at this manufacturing facility. To assist the client in meeting ISRA obligations, a thorough document review with only limited site investigation activities, was completed and a SI Report prepared for submission to the NJDEP. A No Further Action determination was issued by the NJDEP at that time for 20 AECs. Three AECs remaining on-site included (i) trichloroethene (TCE) impacted soil beneath a former loading dock; (ii) one 10,000-gallon fuel oil UST; and (iii) volatile-impacted groundwater in the vicinity of the former loading dock. Remedial investigation and remedial actions were completed including the excavation and off-site disposal of an unknown 500-gallon boiler blow-down UST and of 300 tons of TCE affected soil. The NJDEP issued a No Further Action determination of the soils on-site. Groundwater monitoring was conducted in anticipation of Monitored Natural Attenuation (MNA) with a Classification Exception Area (CEA) as the remedial action.

Phase I Environmental Site Assessment (ESA) and Limited Regulatory Compliance Assessment for an Auto Dealership, Maplewood, NJ and Toms River, NJ: The Phase I ESA and Regulatory Compliance Assessments were conducted to assist the client in due diligence activities prior to purchase of the site. After completing this fast-track assessment, subsurface investigations were completed to evaluate potential contamination from historical underground storage tanks (USTs) and hydraulic lift trenches. The field investigation activities were completed during evening and weekend hours to minimize impact to the site operations.

Stephen Smith

Environmental Scientist

Key Skills

- Environmental Due Diligence and Site Assessment
- Environmental Regulatory Review and Compliance

Certifications and Training

- 40-Hour OSHA HAZWOPER 29 CFR 1910.120

Education

University of Maryland, College Park
B.S. Environmental Science and Policy
2020

Years of Experience

2 - AECOM

Professional History

Mr. Smith is an Environmental Scientist with one year of experience in environmental due diligence. Mr. Smith's experience includes environmental due diligence (Phase I/Phase II site investigations); environmental oversight of subsurface investigations on land and on water; preparation of site-specific Stormwater Pollution Prevention Plans (SWPPP); hazardous waste reporting; and environmental sampling and monitoring for various commercial, industrial, and governmental clients.

Experience

Phase I ESAs - Site Reconnaissance and Due Diligence Reporting, Various Federal and Commercial Clients, Nationwide (Environmental Scientist)

Experience conducting Phase I ESAs for various residential, commercial, and industrial facilities. Previous clients include, but are not limited to: Shell, Engie, Miller Pipeline, and several confidential programs. Tasks included site reconnaissance, regulatory agency reviews, submission of Freedom of Information Act (FOIA) requests, limited compliance review, and preparation of Phase I ESA reports following industry standard ASTM E1527 – 13. **Date:** 2021-Present

Phase II ESA - Subsurface Investigations, Various Commercial Clients, Nationwide (Environmental Scientist)

Performing Phase II ESAs for various residential, commercial, and industrial facilities. Previous clients include, but are not limited to: Shell, Messer, LLC. and a confidential program. Field tasks include site evaluation and investigation strategy, drilling contractor oversight, soil screening for contaminants, geologic borehole logging, and collecting environmental samples (soil, groundwater, soil gas). Reporting tasks include laboratory data evaluation, data comparison with state and federal regulatory standards, site plan and figure creation, and preparation of Phase II ESA reports following industry standard ASTM E1903 - 19. **Date:** 2021-Present

Due Diligence Desktop Reviews, Various Clients (Environmental Scientist/QC Reviewer)

Completed hundreds of due diligence desktop reviews for several large client portfolios. Desktop reviews consisted of detailed regulatory database research throughout various state and local departments, adapting to a fast-paced work environment while maintaining consistent turnaround times, and collaborating with industry professionals to ensure a high quality deliverable is provided to the client. **Date:** 2021-Present

AstraZeneca Biologics, Frederick, MD & Gaithersburg, MD (Environmental Scientist)

Serve as field and compliance lead for AstraZeneca research and manufacturing facilities including wastewater sampling, wastewater compliance monitoring, legionella bacteria sampling, as well as small environmental support tasks requested by the local AstraZeneca pharmaceutical manufacturing and research facilities. **Date:** 2021-Present

Stephen Smith
Environmental Scientist

District of Columbia Water and Sewer Authority, Combined Sewer Overflow (CSO) Long Term Control Plan – DC Clean Rivers (DCCR), Washington D.C. (Environmental Scientist)

Experience tracking non hazardous waste manifests for excavated soil, preparation of site specific SWPPPs, preparation of boring completion reports, and ongoing field support for DCCR includes soil and groundwater sampling, environmental compliance oversight, and assisting with the management of investigation derived waste (IDW). **Date:** 2021-Present

EPA Hazardous waste Reporting, Various Clients (Environmental Scientist)

Experience filing and submitting annual and bi-annual hazardous waste generation reports for CarMax and Mercedes Benz USA using several states submittal systems. **Date:** 2022-Present

Anne Arundel County, Bacteria TMDL Monitoring, Glen Burnie, MD (Environmental Scientist)

Conduct monthly Total Maximum Daily Load (TMDL) bacteria sampling for Marley Creek and Furnace Creek watersheds in Anne Arundel County, Maryland. Field tasks include recording water quality data, bacteria sampling within streambeds, and decontamination procedures. **Date:** 2021-2022

Joint Base Myer-Henderson Hall (JBM-HH), Stormwater Permit Program, Virginia and Washington, D.C. (Environmental Scientist)

Tasks include illicit discharge and outfall inspections and tracing, as well as assisting with the development of public outreach materials including posters and fact sheets for use on the base. **Date:** 2022- present.

US NAVFAC LANT, Environmental Final Governing Standards, Diego Garcia, Greece, Spain, and Italy (Environmental Scientist)

Tasks include the review of draft comparative analysis reports (CARs) for consistency and compliance with applicable formatting standards. **Date:** 2022- present

Howard County Bureau of Environmental Services, Multiple County Facilities – Maryland (Environmental Scientist & Task Manager)

Served as Task Manager for stormwater monitoring at nine facilities in Howard County, Maryland, including a water reclamation plant, a landfill, highway shops, and fleet facilities. Quarterly visual stormwater monitoring is conducted at all sites and benchmark monitoring is conducted at the landfill. Visual monitoring involved collecting stormwater from each outfall and documenting parameters such as color, clarity, oil sheen, odor, and floating or suspended solids. Tasks include coordinating teams of stormwater samplers to deploy to the nine sites during qualifying rain events, performing the sampling, completing the associated documentation, coordinating with the lab for benchmark sampling, and writing the quarterly reports. **Date:** 2021-Present

Equipment Experience:

YSI ProDSS Water Quality Meter (WQM)
YSI EXOSonde WQM
YSI 650 MDS/6920 Sonde WQM
Horiba U-52 WQM
Hach HQ11D Portable pH Meter
ISCO Programable Water Samplers (Portable & Permanent)
RAE Systems MultiRAE Lite – Multi-Gas Detector
RAE MiniRAE 3000 – Photo Ionization Detector (PID)
RKI GX-6000 – Multi-Gas Detector
Monsoon Groundwater Pump & Controllers
Peristaltic Pumps – shallow, low-flow sampling
Solinst Interface Probe / Water Level Meters

Software/Program Experience:

ArcMap & ArcGIS
Various EPA Portals (RCRA Info, CDX)
Various Local, State, and Federal regulatory reporting databases

Overview

Mr. Collins is an Environmental Scientist in the Compliance group based in Clifton, New Jersey. He is engaged in safety, health & environmental, compliance services and due diligence assessments. He has participated in health & safety audits, and conducted industrial hygiene sampling of air samples for contaminants. He has conducted noise survey and monitoring. Mr. Collins is experienced in writing and reviewing safe work plans for various projects. He also has experience with the use and fit testing of respirators. Michael has significant experience working at one of the largest liquid terminals in New Jersey at IMTT Bayonne, NJ on various projects including construction health and safety. He has experience in construction management as the Resident Engineer of a NYC Parks construction project.

Professional Experience

- NYC Department of Parks and Recreation, Resident Engineer, Red Hook Brooklyn, William Sheridan Playground, 9/19- present: Oversight of the environmental remediation and reconstruction of a ballfield and soccer field followed by oversight of the reconstruction of a playground. Responsibilities include photographing, documenting and tracking job progress, writing daily and weekly reports, calculating and tracking as built quantities, processing payments, running progress meetings, resolving issues in the field, facilitating communication between NYC Parks, the designer and contractor, tracking submittals and communication, and quality control.
- FEMA Hurricane Relief. USVI, St. Thomas and St. John. USVI, 9/18- 08/19: Perform daily site inspections of a construction site involving multiple contractors. Inspections included a walkthrough of both work areas to check for any safety hazards, a review of all documentation, presenting findings in the daily status meeting, and writing daily reports and monthly summaries to document findings. Assist in presenting safety materials in training class sessions.
- National Grid, New York City (2017): Provide supervision of construction crews during National Grid's installation of gas mains and services in NYC. Supervise construction crews to ensure that they do not damage trees as they perform excavations to install natural gas lines, ensure that construction activities don't damage tree roots or branches and document field activities through photos and daily reports and drawings.

- New York City Department Environmental Protection (NYCDEP), New York (2017): Supported a construction/inspection project at Jerome Park Reservoir, Bronx New York as a Site Safety Officer (SSO) for concrete coring and sampling. Also provide SSO services for hazardous material Survey for asbestos and Lead Based paint at the Jerome Park Reservoir.
- IMTT Boiler House Hazardous Material Survey, (2017): Conducted pre demolition hazardous material survey to include asbestos, lead based paint, PCBs, mercury and petroleum containing equipment of the 100 year oil Boiler building located at the IMTT Bulk Oil Terminal located in Bayonne, NJ.
- IMTT Bunk Building Hazardous Material Survey, (2017): Conducted pre demolition hazardous material survey to include asbestos, lead based paint, PCBs, mercury and petroleum containing equipment of the 100 year oil Boiler building located at the IMTT Bulk Oil Terminal located in Bayonne, NJ.
- IMTT Health & Safety and Environmental Audits (2016): Participated in a health & safety and environmental audit of the IMTT bulk oil terminal in Bayonne, NJ. Also assisted in writing environmental and health & safety reports of other IMTT facilities throughout the country.
- New Jersey Turnpike Authority Phase I (2016): Conducted a Phase I environmental assessment on an area of land near the Driscoll Bridge in Woodbridge, NJ for the Turnpike Authority.
- Northampton Generating Plant Phase I (2016): Conducted a Phase I environmental assessment at Northampton Generating Plant, a coal fired power plant in Northampton, PA.
- IMTT Compound Bundling Hazardous Materials Survey (2016): Conducted a hazardous materials survey for a building demolition project at the IMTT bulk oil terminal in Bayonne, NJ. Conducted an assessment and sampling for hazardous materials including lead based paint, asbestos, PCBs, and mercury.
- PSEG Tier II EPCRA reporting (2013-Present): Conducted annual chemical inventories of PSEG fossil facilities in New Jersey and Connecticut for the Emergency Planning and Community Right-to-Know Act. Conducted on site inventories and created spreadsheets of the chemicals stored at the power plants for EPCRA reporting.
- New York City Department of Homeless Services Environmental Site Assessments (2015): Noise monitoring and environmental site assessments of homeless shelters throughout New York City, prepared a report using city data and noise

monitoring data to assess the environmental impact of adding homeless shelters in various NYC neighborhoods.

- IMTT PFD and P&ID Project (2014-Present): Field work assisting in making process flow diagrams and piping and instrumentation diagrams for IMTT, a bulk oil terminal located in Bayonne, NJ. Field work included photographic documentation of equipment, sketching piping and tank layouts, and measuring the lengths of pipes.
- NJDEP Blue Acres Program (2014-2015): Field work for NJDEP project to demolish houses in Sayreville, South River, Woodbridge, and Manville, New Jersey for the creation of green spaces in floodplains. Marked properties, recorded utilities, conducted environmental inspections, drew maps, and photographed properties in the program.
- New York State Electric and Gas Phase I (2015): Conducted an extensive Phase I environmental site assessment of a 10 mile long parcel of land in the Auburn-Elbridge Electric Transmission Corridor in Cayuga and Onondaga Counties, NY.
- Save-A-Lot Transaction Screens and Asbestos Inspections (2015): Conducted transaction screen environmental assessments and asbestos inspections at the sites of future supermarkets in Hamilton, Paterson and Linden, NJ. Asbestos inspections were conducted through bulk sampling.
- CSX Asbestos and Lead Inspections (2015): Conducted lead and asbestos inspections at CSX rail yards through bulk sampling of suspect asbestos containing material and paint chip sampling of suspected lead based paint.
- Goodyear Tire Phase I (2015): Conducted a Phase I environmental assessment of a Goodyear automotive service facility in Hillsborough, NJ. Observed facility for potential contamination by petroleum products or other pollutants.
- Simpson and Brown Air Monitoring (2015): A contractor at the IMTT bulk oil facility was excavating chromium contaminated soil to install a fire suppression system. Provided industrial hygiene supervision. Conducted area and personnel air monitoring of hexavalent chromium dust. Area monitors were installed with alarms to indicate if dust levels were too high, and personnel air cartridges were sent to the lab to test for the presence of chromium.
- USPS - USPS ECRM Combined Environmental Compliance Review (ECR)/Regulated Underground Storage Tank (UST) Inspection Program Environmental Compliance Technical Support, FY2017 - Team member - NJ, NY, PA : Team member

for ECRs and UST inspections of P&DCs, NDCs, VMFs and MPOs in New Jersey, and New York, as part of ECRM's ECR program. Conducted site inspections; reviewing onsite environmental records; documents review, document filing; and SPCC applicability.

- GE Roseland Phase I and II (2015): Conducted a Phase I environmental site assessment on a parcel of undeveloped land in Roseland, NJ. This subsequently led to the need to conduct Phase II soil sampling. Tested for heavy metals, VOCs, and PCBs.
- EZ Pass Call Center Air Monitoring: Conducted air monitoring at a call center in Staten Island, NY when an air conditioning unit failed and burnt out. Sampled for oxygen, carbon dioxide, carbon monoxide, VOCs, and dust levels. Air assessment was conducted for the office to safely reopen.
- Reit Management and Research Phase I (2015): Conducted a Phase I environmental site assessment and air monitoring at a multi tenet medical facility in White Plains, NY. Monitored the carbon dioxide levels and checked for the presence of carbon monoxide and VOCs throughout the building.
- PSE&G Environmental Compliance and Resource Recovery (2015) Field inspector for PSE&G's compliance and resource recovery group. Conducts inspections of staging areas for overhead transmission work. Conducts inspections of transmission construction and maintenance crews, including overhead, right of way, and underground workers. Works on summaries of spill prevention plans.
- NJDEP Tier 2 Environmental Field Assessments for RREM, NJ (2013-2015): Field inspector for Tier II EAF for the New Jersey Rehabilitation, Reconstruction, Elevation and Mitigation (RREM) project. Responsible for investigating each parcel for environmental hazards (e.g., tank releases, chemical impacts, etc.) as well as the surrounding area for potential environmental concerns.
- Supreme Oil Co. Inc. Environmental and Health and Safety Compliance, NJ (2013-2014): Field Scientist. Responsible for assisting client in maintaining compliance with applicable environmental and health and safety regulations and permits. Conducts field analysis of wastewater samples for pH. Conducts NJPDES permit-required sample collection and submission of water samples to a NJ- accredited laboratory for analysis, conducted stormwater pollution prevention inspections, wastewater facility inspections, reviewed laboratory results and prepared reports for submission to the regulatory agencies.

- Commercial RREM Lead and Asbestos Inspections (2014): Conducted an asbestos inspection at DC Plastics, an industrial facility in Bayonne, NJ and conducted a lead and asbestos inspection at Providence House, a school for special needs children in Atlantic City, NJ. Inspections were conducted through visual inspections, asbestos sampling, soil sampling/dust wipes for lead, and XRF analysis for lead based paint.
- Lead and Asbestos Inspection for JCP&L (2014): Conducted a lead and asbestos survey of a JCP&L building in Dover, NJ for demolition. Inspection was conducted through visual inspection, asbestos sampling, and paint chip sampling.
- Lead and Asbestos Inspections for RREM, NJ (2013-2014): Lead and asbestos inspector for the New Jersey Rehabilitation, Reconstruction, Elevation and Mitigation (RREM) project and New York Rising Community Reconstruction Program Public Information Meetings after super storm Sandy. Investigated for the presence of lead and asbestos in homes in the program through visual inspections, asbestos sampling, soil sampling/dust wipes for lead and XRF analysis for lead based paint. Mr. Collins is experienced in construction, storm and hurricane recovery projects. He conducted investigation and inspection of residential and non-residential properties for asbestos and lead and other hazardous materials following the damage caused by Hurricane Sandy along the Jersey Shore. He has experience in wastewater and stormwater sampling as well as conducting environmental assessments.
- New York Rising Community Reconstruction Program Public Information Meetings (2013): Helped organize and run NYC community outreach meetings in Sheepshead Bay and Gerritsen Beach for community input on how to rebuild and revitalize those neighborhoods after Super Storm Sandy
 - The College of New Jersey, Ewing, NJ (2009-2013)
 - Graduated with a Bachelor's of Science in Biology
 - Conducted a year-long research project in crayfish and macroinvertebrate ecology.
 - Conducted an experiment to see if male crayfish are more likely to respond to female pheromones or food stimuli.
 - Conducted field work collecting aquatic macro invertebrates from a stream near the college
 - Identified, sorted and counted the invertebrates each week to document the seasonal changes in the aquatic invertebrate community.
 - Used biotic indices to gauge the water quality such as the Hilsenhoff water quality index.
 - Picatinny Arsenal, Rockaway, NJ (2010-2013)
 - Summer and winter internship in material science.

- Use of scanning electron microscope for materials and fracture analysis.
- Used 3D digital light microscope for materials and fracture analysis.
- Analyzed the resistivity, adhesion, and microscopic structure of flexible printed electronics.
- Used contact angle meter to test hydrophobicity of material surfaces.

1. Introduction

AECOM USA, Inc. (AECOM) was retained by Metropolitan Transportation Authority Construction & Development (MTA) to provide environmental services prior to their lease and redevelopment of the property located at 90-01 168th Street in Queens, New York for use as the new Jamaica Bus Terminal (See Figure 1). The proposed new bus terminal site is currently developed as an 85,000 sq-ft commercial parking lot and is owned by Jamaica First Parking, LLC. The existing Jamaica Bus Terminal is located on 165th Street, three blocks away from the proposed new bus terminal. The new bus terminal will accommodate ten bus lines for Queens County and six bus lines for the Nassau Inter County Express (NICE) Bus network from the existing Jamaica Bus Terminal. The new bus terminal will provide new bus shelters for Queens County northbound bus routes which include Q1, Q2, Q76, Q77 and Q82; southbound bus routes Q1, Q3, Q6, Q8, Q9 and Q41; and Nassau County NICE bus routes N1, N6, N6X, N22, N24 and N26. All MTA buses, MTA and employee vehicles will be accessed in and out through 168th and 169th streets. Modification of the existing sidewalk curbs are needed for buses to maneuver in and out of the lot. Three dispatcher's booths with toilet amenities will be included on the site.

This Phase II Environmental Site Assessment (ESA) Report was conducted in general accordance with ASTM standard E1903-19 to investigate whether the property was impacted by the following Recognized Environmental Conditions (RECs) identified in the Phase I ESA prepared by AECOM dated April 28, 2023. Figure 2 depicts the locations of the RECs:

- The property was historically occupied by a steam laundry from at least 1901 to 1912; and by a tailor shop and cleaner in at least 1939. No information was available to determine if dry cleaning activities were performed on-site. The potential historic use of the subject property as a dry-cleaning facility is considered a REC (Area of Concern [AOC] 1).
- The property was historically occupied by an auto repair facility and an awning manufacturer in at least 1925. No records indicate the extent of automotive repairs on site, or the historic use and disposal of petroleum products or other chemicals associated with manufacturing operations on the subject property. The potential historic use of the subject property for auto repair and awning manufacturing is a REC (AOC 2).
- The property adjacent to the south of the subject property contains the historic locations of a blacksmith (1891-1925), an auto repair shop with a gasoline tank (1912), and a steam laundry (1925). No information was available to determine if dry cleaning activities were performed on-site, or the extent of vehicular maintenance; however, the potential use of this adjacent site for metal working, dry-cleaning, and auto repair and fueling is a REC.
- The subject property was occupied by residential dwellings and commercial properties from at least 1897 until 1961 when the buildings were razed. No information was available regarding disposition of the demolition debris. Historic below grade foundations and suspect buried debris, including the potential for buried heating oil tanks, have the potential to impact the site and is a REC.
- The property adjacent to the south of the subject property contains the historic location (1912 Sanborn) of an auto repair facility with a 200-gallon underground storage tank (UST). Due to the lack of tank closure documentation, this off-site UST is considered a REC to the site.
- The property adjacent to the southwest corner of the subject property is currently occupied by Police Precinct 103. The police garage contained two 550-gallon gasoline ASTs in contact with soil. Spill # 951 1826 was reported on 12/18/1995 due to findings of gasoline contaminated soil in the garage area. The two 550-gallon gasoline ASTs and associated pumps located in the garage were removed in 1996 and the case is listed as closed. No additional information was provided in the environmental database report (EDR). Based on the lack of closure documentation, this off-site spill case is considered a REC to the site.

1.1 Site Background

The property is currently improved by an approximately 1.9-acre (85,000 square foot) commercial parking lot with chain link fencing owned by Jamaica First Parking, LLC. Signage on-site indicates that the lot is a self-park parking facility operated by Impark Park & Lock. Electronic gates located on 90th Avenue on the north side of the site and a 91st Avenue, on the southeast portion of the property provide entrance and egress. The site vicinity is primarily residential to the north, east and west with commercial/retail properties. A multi-story residential complex is under construction to the west of the site and a 4-story apartment complex is located at the southeast corner of the site, within the city block occupied by the subject property.

The property was developed with residential structures on both the north (90th Avenue) and south (91st Avenue) sides of the property since at least 1897. A steam laundry was located on the south side of the property (90-18 91 Ave) from at least 1901 through 1912. Additional development with residential dwellings and "stores" was observed in 1924. Based upon City Directory information some of the commercial businesses identified on the northwest portion of the property included barber shop/beauty salon (90-11 90th Ave – 1934); a tailor shop and cleaners (90-05 90th Ave – 1939), and meat market (90-03 90th Ave – 1934). The building on the south side of the subject property is identified as an auto repair shop and car park on the first floor and radio supplies on the second floor on the 1942 Sanborn Map.

In 1951 the building previously identified as auto repair shop and car park on the first floor and radio supplies on second floor (90-18 91 Ave) is labeled "Jamaica Social Hall". It remained a social hall through at least 1951. Sometime between 1951 and 1961 the buildings were razed, and the subject property was developed as a paved parking lot. It has been used as a parking facility since at least 1961.

Figure 2 depicts the AOCs on the subject property. AOC 1 was the approximate location of the tailor shop and cleaner and AOC 2 refers to the approximate location of former steam laundry, auto repair and awning shop.

2. Scope of Investigation and Methods

AECOM performed a Phase II ESA investigation, in accordance with ASTM E1903-19, to determine whether soil and groundwater at the property have been impacted by the RECs identified in the Phase I ESA (See Section 1.0). It should be noted that groundwater was not encountered in the top 15 feet during the investigation. As such, no groundwater samples were collected.

2.1 Geophysical Survey

Radar Solutions International, Inc. (Radar Solutions) performed a geophysical survey prior to initiating any intrusive activities to clear proposed boring locations of underground utilities and identify unregistered and abandoned underground storage tanks (USTs), pipelines, structures, etc., across the site. Boring locations were surveyed and cleared on March 27, 2023. The survey included ground penetrating radar and electromagnetic methods. The methods used for the investigation are detailed in a report prepared by Radar Solutions which is included in Appendix C.

Radar Solutions returned to the site on May 3, 2023 to complete the UST investigation. The exploration was completed utilizing Electromagnetic Time-Domain Surveyor, Electromagnetic Induction and Ground Penetrating Radar. Three (3) anomalies were identified that have the potential to be USTs and two (2) anomalies were identified that have the potential to be concrete slabs. A copy of the UST investigation report prepared by Radar Solutions which includes figures showing the locations of the anomalies is attached in Appendix C.

2.2 Subsurface Investigation

Drilling services were provided by Land, Air Water Environmental Services (LAWES). Between March 28 and March 30, 2023, ten borings were advanced at locations selected based on information obtained through the Phase I ESA and geophysical survey (See Figure 3). Soil borings were initially advanced to a depth of 6 feet below grade using an air knife to identify and avoid buried utilities and structures. Shallow soils were logged and screened with a Photoionization Detector (PID) by AECOM personnel. No soil screened during the investigation had total VOC detections above ambient conditions (0.0 ppm).

The remaining portion of each soil boring was advanced to a depth of up to 15 feet below grade using a direct-push Geoprobe 7822DT drill rig (see Appendix A). Continuous soil samples were collected using a 4-foot macro core sampler fitted with an acetate liner. A new liner was used for each sampling interval. Each sample was logged for geology, inspected for evidence of contamination (e.g., staining or petroleum odors), and screened for organic vapors using a PID (see photographs and boring logs included in Appendix A).

Average near surface site geology (0-15 ft. bgs), as observed in core samples, consisted of approximately 6 inches of asphalt on top of 5 feet of fill material (well mixed sand, silt, gravel, and brick fragments) overlaying approximately 10 feet of natural deposits of coarse to fine sand and gravel.

2.3 Soil Sampling and Analysis

The following section describes the soil sampling procedures and laboratory analysis from the samples collected at the 10 borings (see Figure 3) advanced during the subject investigation.

2.3.1 Soil Sampling Procedures

Upon recovery, each soil sample was inspected for evidence of contamination (e.g., odors and staining) and screened for organic vapors using a photoionization detector (PID). PID readings were documented on the boring logs (see Appendix A). General descriptions and representative photographs of soils were documented by AECOM field personnel (see Appendix A).

One grab sample was collected from each boring with a 5g Terracore sampler for volatile organic compound (VOC) analysis. Since no visual, olfactory, or field instrument readings indicative of VOC impacts were observed, grab samples were collected from the bottom of each boring.

Additionally, a composite soil sample, comprised of soils obtained along the entire length of the core, were collected from each of the 10 boring locations. Composite samples were prepared in new food grade containers and mixed until the contents were visually homogeneous and then transferred to laboratory-supplied glass sample containers.

2.3.2 Soil Sample Analyses

The soil samples were submitted to Hampton-Clarke Analytical Laboratories, Inc. (Hampton-Clarke). Hampton-Clarke participates in the New York State Department of Health Environmental Laboratory Approval Program (ELAP). All samples were analyzed using a standard turnaround time and Category B deliverables were provided for all analyses.

Soil samples collected from each boring were subjected to the following analysis scheme: The single grab samples were analyzed for VOCs via United States Environmental Protection Agency (USEPA) Method 8260. The composite samples were analyzed for semi-volatile organic compounds (SVOCs, USEPA Method 8270); target analyte list (TAL) metals (USEPA Method 6010/7000 series); total petroleum hydrocarbons (TPH, USEPA Method 8015); polychlorinated biphenyls (PCBs, USEPA Method 8082); herbicides (USEPA Method 8151); Resource Conservation and Recovery Act (RCRA) hazardous characteristics including ignitability, corrosivity, and reactivity; RCRA toxicity characteristics (toxicity characteristic leaching procedure [TCLP]) for VOCs, SVOCs, pesticides, and metals; and reactive cyanide/sulfide (USEPA Method 9012).

Matrix	Samples	MS	MSD	Field Blank	Field Duplicate	Trip Blank	Total
Soil	10	1	1	3	1	1	17

Quality Assurance/Quality Control samples consisting of a matrix spike/matrix spike duplicate (MS/MSD), field blank, and field duplicates were collected at a frequency of one per 20 samples.

Upon receipt of all analytical results, an AECOM chemist validated the data following NYSDEC and USEPA data validation procedures. The validated data along with a Data Usability Summary Report (DUSR) is provided in this Phase II investigation report under **Appendix B**. Based on a review of the laboratory deliverables, those results qualified 'J' or 'UJ' are considered conditionally usable. All other sample results are usable as reported. Data summary tables are included as **Tables 1 – 8**.

2.4 Waste Management

Soil generated from the boring/sampling processes was returned to the borehole from which it was generated; any remaining open portions of a boring was backfilled with either clean sand and/or bentonite pellets. No investigation-derived waste (IDW) was generated, as no indications of contaminated soil were observed during the investigation.

Boring locations were restored to the grade of adjacent conditions (e.g., asphalt, concrete). All down-hole drilling equipment (e.g., augers, rods, and spoons) were decontaminated with a Liquinox and water solution, scrubbed, and rinsed with clean water.

3. Findings of the Investigation

Summary tables comparing the analytical test results to New York State soil cleanup objectives (SCOs) (NYSDEC DER 6-NYCRR Part 375, Table 375-3.8b) are included in **Tables 1 – 6**, attached. The Toxicity Characteristic Leaching Procedure (TCLP) results were compared to the waste characterization limits set forth under NYSDEC DER 6-NYCRR Part 371 and are presented in **Table 7**. Total Petroleum Hydrocarbons (TPH) results are presented in **Table 8**. A discussion of the results is included below. It should be noted that the results reflect the chemistry of soils sampled at the time of the investigation and does not preclude the possibility of the potential for impacts outside the locations sampled.

Volatile Organic Compounds

Based on a review of the laboratory results (Table 1) none of the samples had reported concentrations of VOCs above any of the SCOs set forth under 6-NYCRR Part 375. Methyl acetate and methylene chloride were detected in the discrete sample collected from boring B-2. Methylene chloride was also detected in the discrete sample collected from boring B-3. The detections of methylene chloride were below the SCOs. No other VOCs were reported above laboratory reporting limits.

Semi- Volatile Organic Compounds

Based on a review of the laboratory results (Table 2) none of the samples had reported concentrations of SVOCs above any of the SCOs set forth under 6-NYCRR Part 375.

Metals

Based on a review of the laboratory results (Table 3), lead was detected in the composite samples collected from B1, B2, and B3 above the unrestricted use SCO set forth under 6-NYCRR Part 375. These lead detections at B1 and B3 were below the restricted use and protection of groundwater SCOs. The lead detection at B2 exceeded the residential, restricted residential, and protection of groundwater SCOs, but was less than the commercial and industrial SCOs. The following metals were detected in at least one of the samples collected during this sampling event, but the results indicate that the detected concentrations were below unrestricted use SCOs : aluminum, arsenic, barium, calcium, chromium (total), cobalt, copper, iron, magnesium, manganese, nickel, potassium, sodium, vanadium and zinc. Beryllium, cadmium, selenium and silver were not detected by the laboratory in any of the samples collected during the subject sampling event.

Polychlorinated Biphenyls

Polychlorinated biphenyls (PCBs) were not detected in the samples above laboratory reporting limits (Table 4).

Pesticides

Based on a review of the laboratory results (Table 5), P'P'-DDE (4'4'-DDE) concentrations in the sample collected from B2 was above the unrestricted use SCO set forth under Part 375 but below all of the restricted use and protection of groundwater SCOs.

Herbicides

No samples collected during this investigation had concentrations of herbicides above laboratory reporting limits (Table 6).

Hazardous Waste Determination

Based on a review of the laboratory results (Table 7), the soils collected as part of this investigation would not be classified as hazardous waste.

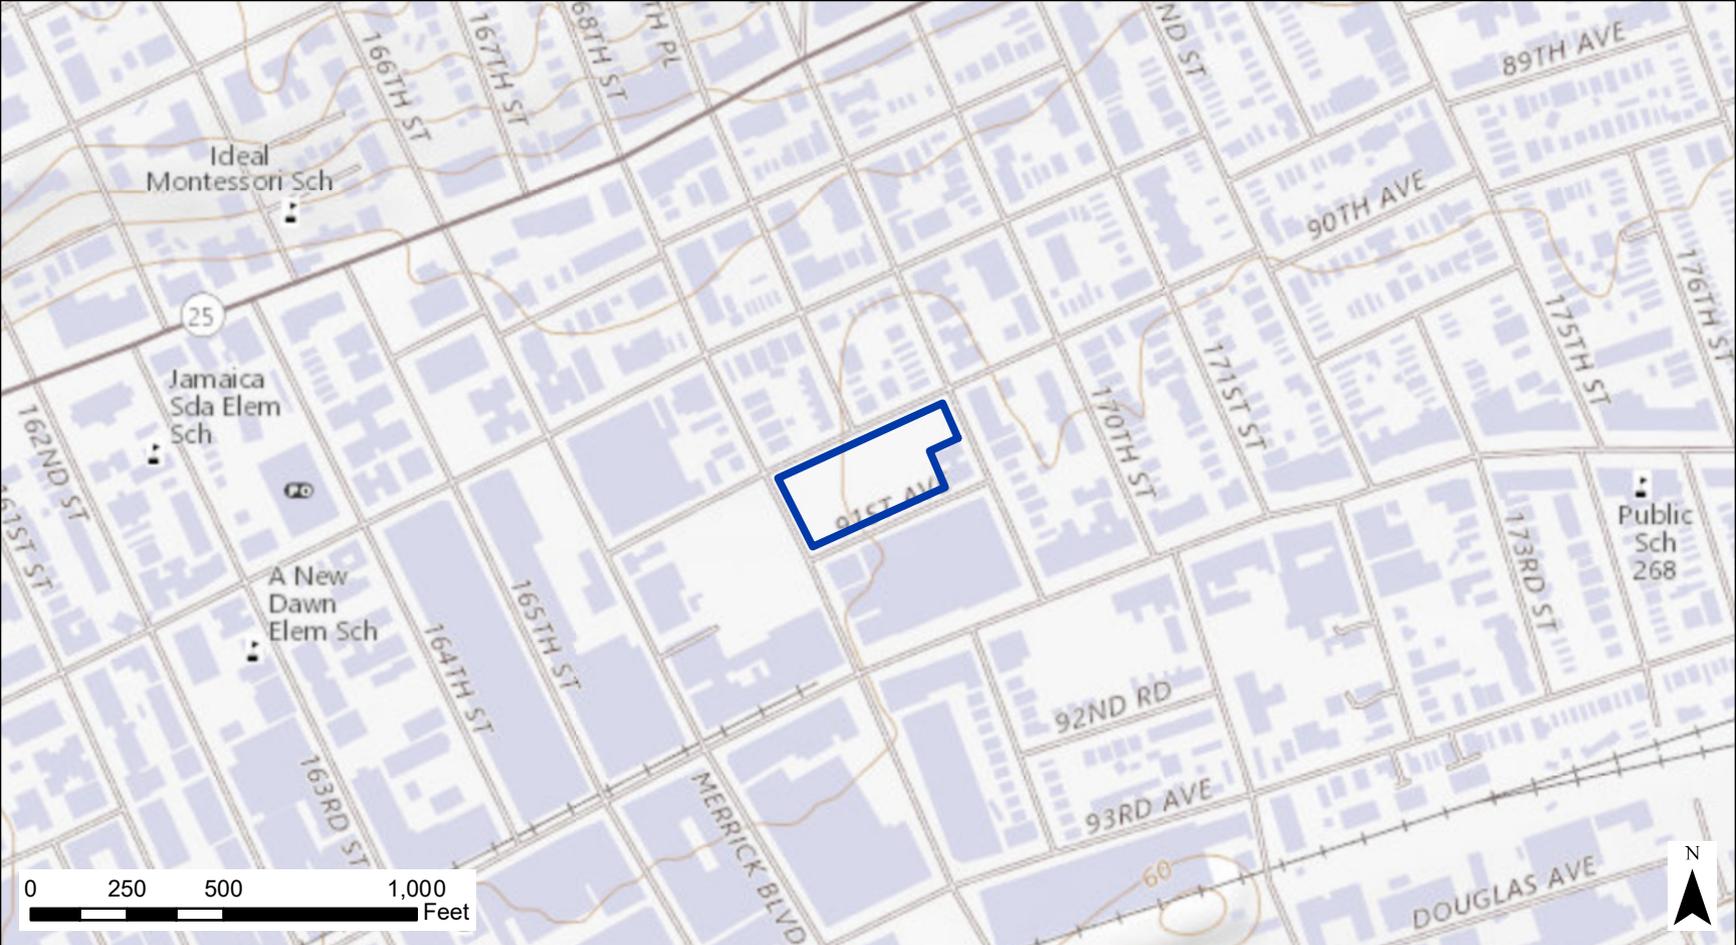

Total Petroleum Hydrocarbons

Based on a review of the laboratory results (Table 8), the soils collected as part of this investigation did not contain petroleum hydrocarbons above laboratory reporting limits.

4. Conclusions and Recommendations

Based on the data collected during the subject investigation, AOCs 1 and 2 at the subject site do not appear to be impacted by their former uses. There were no exceedances of the commercial use and industrial use SCOs in the soil samples collected, and only lead at one of the ten locations (B2) exceeded the residential, restricted residential, and protection of groundwater SCOs. Radar Solutions reported two (2) anomalies consistent with the presence of building slabs. There were three (3) anomalies consistent with apparent USTs found in the investigation performed by Radar Solutions on May 3, 2023. An additional investigation should be planned and implemented to determine whether USTs are present at the subject site. If USTs are positively identified, then they should be registered (if appropriate), closed and removed in accordance with NYSDEC Program Policy DER-10 (chapter 5).

Notes:

VOC = Volatile Organic Compound.

POGW = Protection of Groundwater

Results are reported in milligrams per kilogram (ppm) unless noted.

Depths are presented in feet below ground surface.

Detections are evaluated against soil cleanup objective MCLs defined by NYSDEC DER 6-NYCRR PART 375, Table 375-3.8, effective December 14, 2006.

Underlined values indicate result or reporting limit shown in excess of at least one standard.

ND = Not detected above laboratory reporting limits. Limits are presented in laboratory reports which are included in Appendix B of this report.

NR = Not Requested for analysis.

J - Indicates that the value was detected and is estimated.

Notes:

SVOC = Semi-Volatile Organic Compound

POGW = Protection of Groundwater

Results are reported in milligrams per kilogram (ppm) unless noted.

Depths are presented in feet below ground surface.

Detections are evaluated against soil cleanup objective MCLs defined by NYSDEC DER 6-NYCRR PART 375, Table 375-3.8, effective December 14, 2006.

ND = Not detected above laboratory reporting limits. Limits are presented in laboratory reports which are included in Appendix B of this report.

NR = Not Requested for analysis.

J - Indicates that the value was detected and is estimated.

Notes:

TAL = Target Analyte List

POGW = Protection of Groundwater

Results are reported in milligrams per kilogram (ppm) unless noted.

Depths are presented in feet below ground surface.

Detections are evaluated against soil cleanup objective MCLs defined by NYSDEC DER 6-NYCRR PART 375, Table 375-3.8, effective December 14, 2006.

DER 6-NYCRR Part 375 defines Chromium MCLs by oxidation state (see table below).

* - Duplicated results shown.

Underlined values indicate result or reporting limit shown in excess of at least one standard.

ND = Not detected above laboratory reporting limits. Limits are presented in laboratory reports which are included in Appendix B of this report.

NR = Not Requested for analysis.

J - Indicates that the value was detected and is estimated.

Notes:

Results are reported in milligrams per liter (ppm) unless noted.

Depths are presented in feet below ground surface.

Detections are evaluated against standards set forth by 6-NYCRR PART 371, Table 1, effective July 15, 2021.

* - Duplicated results shown.

ND = Not detected above laboratory reporting limits. Limits are presented in laboratory reports which are included in Appendix B of this report.

NR = Not Requested for analysis.

J - Indicates that the value was detected and is estimated.

Notes:

POGW = Protection of Groundwater

Results are reported in milligrams per kilogram (ppm) unless noted.

Depths are presented in feet below ground surface.

Detections are evaluated against soil cleanup objective MCLs defined by NYSDEC DER 6-NYCRR PART 375, Table 375-3.8, effective December 14, 2006.

ND = Not detected above laboratory reporting limits. Limits are presented in laboratory reports which are included in Appendix B of this report.

NR = Not Requested for analysis.

J - Indicates that the value was detected and is estimated.

**Easy Mobilization, Cushy Ride Home
... in a Powerful Truck Option**

7800 MACHINE OPTIONS

Augerhead

219256	GA4000 2-Speed Augerhead
213945	GA4100 4-Speed Augerhead

Automatic Drop Hammer

213898	DH103 Automatic Drop Hammer, 140 lb.
213899	DH103M Automatic Drop Hammer, 65 kg
213900	DH103 Mounting Kit
216826	Automatic Drop Hammer 340 lb. Expansion Kit
217067	Automatic Drop Hammer 300 lb. Expansion Kit
221820	Automatic Drop Hammer 170 lb. Expansion Kit
210126	Automatic Drop Hammer 65 kg Expansion Kit

Water Swivels

216398	High Speed Water Swivel w/ Float
210873	Float Sub NWJ Pin Asm
210874	Float Sub NWL Pin Asm
213482	Float Sub HWL Pin Asm
212606	Water Swivel 1.625 in. hex NWJ Pin Mod
212558	GH60 Series Water Swivel Asm

Mast / Winch

222816	5/16 in. Winch Kit (Single)
222817	1/4 in. Winch Kit (Single)
222818	3/16 in. Winch Kit (Single)
217508	Fixed Mast Top
213364	3 ft. Mast Extension

Breakout

212785	7 in. Single Clamp Breakout
217024	Coring Upgrade Kit for 7 in. Breakout
213421	Probe Rod Handling Clamp for 3.5 in. - 1.25 in. Probe Rods

Rotational Safety Cage

213002	Safety Cage for Machines with No Drop Hammer
212896	Safety Cage for Machines with Drop Hammer

Control System

216137	Head Feed Pressure Control Kit
213384	CPT Valve Kit

Water / Mud Pumps

215811	Moyno® 2L4 Pump & Mount
210693	GP50 Base Module
222833	Water Carrier Kit 50 gal
222834	Water Carrier Kit 50 gal w/ pump

Hydraulic Extruder

213465	60 in. Extruder Kit
220646	3 in. Shelby Tube Hydraulic Cradle Kit
221929	3 in. Shelby Tube Cradle
215781	Extruder w/ 2L4 Mounting Kit

Rod Racks

212306	Locking Side Mount Rod Rack
211734	Side Rack Mount Blank

Storage

212139	Rear Underbody Storage Package
212338	Underbody Storage - Passenger Side
212337	Underbody Storage - Driver Side
214351	Underbody Storage Package - Both Sides

Water Transport

219610	50 gal. Water Carrier Kit w/ Pump
215140	50 gal. Water Carrier Kit

Model 7800 Specifications

UNIT PLATFORM		
Stroke	78 in	1,981 mm
Weight (approximate)	8,250 lb	3,746 kg
Width	96 in	2,438 mm
Length (folded)	133 in	3,378 mm
Height, (folded)	116 in	2,946 mm
Height, (unfolded)	184 in	4,674 mm
Foot Travel	45 in	1,143 mm
Extension	16 in	406 mm
Lateral Movement (side-to-side)	± 7 degrees from centerline	
Oscillation	± 13 degrees from vertical	

PERCUSSION HAMMER		
Hammer System	GH63	
Percussion Rate	32 Hz	
Forward Torque	517 ft-lb	701 N-M
Reverse Torque	637 ft-lb	864 N-M
Rotation Speed	0 - 234 rpm	
Power Cell Weight	90 lb	41 kg

HYDRAULIC SYSTEMS		
Down Force	36,000 lb	160 kN
Retraction Force	48,000 lb	214 kN
Hydraulic Pressure (system)	4,000 psi	275 bar
Hydraulic Flow Rate (system)	40 gpm	151 Lpm

BP50 POWER UNIT		
Engine (diesel)	Kubota, 4-cylinder turbo, Tier 4i	
Engine Power (rated)	58 hp	42 Kw
Fuel Capacity (diesel)	17 gal	64 L
Cooling System	Liquid	
Power Unit Weight	1,700 lb	772 kg
Power Unit Dimensions	42 in L x 30 in W x 30 in H	

AUGERHEAD		
GA4100 Augerhead, 4-Speed		
High Torque	4,000 ft-lb	5,423 N-M
Low Torque	400 ft-lb	542 N-M
High Speed Rotation	0-750 rpm	
Low Speed Rotation	0-75 rpm	
Hex Adapter	1-5/8 in	41 mm
GA4000 Augerhead, 2-Speed		
High Torque	4,000 ft-lb	5,423 N-M
Low Torque	2,000 ft-lb	2,711 N-M
High Speed Rotation	0-150 rpm	
Low Speed Rotation	0-90 rpm	
Hex Adapter	1-5/8 in	41 mm

HYDRAULIC WINCH		
Winch Rating	2,500 lbf	10.5 kN
Winch Speed	0-125 fpm	0-38 m/min
Cable Length	75 ft	23 m

7-in. SINGLE CLAMP BREAKOUT		
Clamp Opening	7 in	178 mm
Clamp Range	1.25 - 6 in	31.75 - 152 mm
Clamp Force	0 - 17,500 lbf	0 - 78 kN
Breakout Torque	6,000 ft-lbf	8,135 N-m
Weight	350 lb	159 kg

Geoprobe® Tooling Run with 7800

- 60-in. Direct Push Tooling
 - Probe Rod Sizes: 3.75 in., 3.5 in., 3.25 in., 2.25 in., 1.5 in., 1.25 in.
 - Direct Image® Tooling
 - Macro Core® MC5 Soil Sampling (2.25 in. x 5 ft.)
 - DT22 Soil Sampling
 - DT325 / DT35 / DT375 Dual Tube Soil Sampling
 - SP22 Groundwater Sampling
 - SP16 Groundwater Sampling
- 2.0 in., 1.5 in., 1.0 in., 0.75-in. Prepacked Monitoring Well Installations
 - DH103 Auto Hammer for SPT
 - 4.25 in. and 6.0 in. H S A System

7800

Truck Mount

- **Reliable Geoprobe® GH60 Series Percussion Hammer**
- **Modular Percussion Power Cell Technology**
- **Auto Drop Hammer Compatible**
- **Lockable Storage Compartments**
- **Tooling Transport Rack Options**
- **58 hp Kubota Deck Engine**
- **Integrated Drill Mast Oscillation**
- **Auxiliary Power Outlets**
- **Frame Rail Mounting System**
- **Single-Clamp Breakout Option**

Comments, Notes, Special Requirements, HAZARDS
Indicate if low-level methods required to meet current groundwater standards (SPLP for soil):
 BN or BNA (8270E SIM)
 VOC (8260D SIM or 8011)
 SPLP (BN, BNA, Metals)
 1,4 Dioxane
Check if applicable:
 Project-Specific Reporting Limits
 High Contaminant Concentrations
 NJ LSRP Project (also check boxes above/right)

For NJ LSRP projects, indicate which standards need to be met:
 NJDEP GWQS
 NJDEP SRS
 NJDEP SPLP
 Other (specify):

Cooler Temperature
2-7

11) Sampler (print name): **Nikita Bendre** Date: **3/28/23**

Additional Notes
*** Confirm analysis w/PM ***

Please note NUMBERED items. If not completed your analytical work may be delayed. A fee of \$5/sample will be assessed for storage should sample not be activated for any analysis.

Table 1 Summary of Data Qualifications.

I. INTRODUCTION

This Data Usability Summary Report (DUSR) has been prepared following the guidelines provided in New York State Department of Environmental Conservation (NYSDEC) Division of Environmental Remediation *DER-10, Technical Guidance for Site Investigation and Remediation, Appendix 2B - Guidance for Data Deliverables and the Development of Data Usability Summary Reports*, May 2010. Discussed in this DUSR are the analytical data for twenty soil samples, two matrix spike/matrix spike duplicate pair (MS/MSD), one field duplicate, three field blanks, and one trip blank collected on March 28-30, 2023.

The samples were collected at the MTA – Jamaica Bus Depot site located in Jamaica, New York and sent to Hampton-Clarke (Fairfield, NJ) for analysis. Hampton-Clarke is a New York State Department of Health (NYSDOH) Environmental Laboratory Approval Program (ELAP) certified laboratory.

II. ANALYTICAL METHODOLOGIES AND DATA VALIDATION PROCEDURES

The samples were analyzed for the following parameter (not all samples were analyzed for all parameters):

Parameter	Method
Volatile Organic Compounds (VOCs)/Toxicity Characteristic Leaching Procedure (TCLP) VOCs	SW8260D
Semivolatile Organic Compounds (SVOCs)/TCLP SVOCs	SW8270E
Polychlorinated Biphenyls (PCBs)	SW8082A
Pesticides/TCLP Pesticides	SW8081B
Herbicides/TCLP Herbicides	SW8151A
Total Petroleum Hydrocarbons	SW8015D
Metals/Mercury/TCLP Metals/TCLP Mercury	6010D/6020A/7470A/7471B
Percent Solids	SM2540G
Reactive Cyanide/Sulfide	SW846 7.3
Ignitability/Burn Rate/Flame Propagation	SW1030

Parameter	Method
pH	SW9045D

A limited data validation was performed following the guidelines in the following USEPA Region II documents:

- *Validating Volatile Organic Compounds by Gas Chromatography/Mass Spectrometry, SW-846 Method 8260B & 8260C, SOP HW-24, Rev. 4, October 2014;*
- *Validating Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry, SW-846 Method 8270D, SOP HW-22, Rev. 5, December 2010;*
- *Validating Pesticide Compounds Organochlorine Pesticides by Gas Chromatography, SW-846 Method 8081B, SOP HW-44, Rev. 1.1, December 2010;*
- *Polychlorinated Biphenyl (PCB) Aroclor Data Validation, SOMO2.2, SOP HW-37A, Rev. 0, June 2015*
- *Validating Chlorinated Herbicides Gas Chromatography, SW-846 Method 8151A, SOP HW-17, Rev. 3.1, December 2010;*
- *ICP-AES Data Validation, SOP HW-3a, Rev. 1, September 2016; and*
- *Mercury and Cyanide Data Validation, SOP HW-3c, Rev. 1, September 2016.*

The limited validation included a review of: completeness of all required deliverables; holding times; quality control (QC) results [blanks, instrument tunings, calibration standards, duplicate analyses, MS/MSD recoveries, surrogate recoveries, and laboratory control sample (LCS) recoveries] to determine if the data are within the protocol-required limits and specifications; a determination that all samples were analyzed using established and agreed upon analytical protocols; an evaluation of the raw data to confirm the results provided in the data summary sheets; and laboratory data qualifiers.

Definitions of USEPA data qualifiers are presented at the end of this text. A summary of data qualifications is presented in Table 1. Validated Form 1s have been presented in Attachment A. Documentation supporting the qualification of data is presented in Attachment B. Only analytical deviations affecting data usability are discussed in this report.

III. DATA DELIVERABLE COMPLETENESS

Full deliverable data packages (i.e., NYSDEC ASP Category B or equivalent) were provided by the laboratory and included all reporting forms and raw data necessary to fully evaluate and verify the reported analytical results.

IV. SAMPLE RECEIPT/PRESERVATION/HOLDING TIMES

All samples were received by the laboratory intact, properly preserved and under proper chain-of-custody (COC) with the following exceptions.

A trip blank was received but not listed on the COC (SDG 3032904). The trip blank was analyzed for VOCs.

All samples were analyzed within the required holding times.

V. NON-CONFORMANCES

- **Instrument Calibration**

The percent difference (%D) between the initial calibration (ICAL) average relative response factor (RRF) and the RRF in one or more of the continuing calibration standards (CCALs) associated with the samples listed in Table 1 exceeded the QC limit of 20% and exhibited a decreasing response (i.e., low bias) for VOCs: 1,4-dioxane, bromomethane, carbon disulfide, chloroethane, chloromethane, dichlorodifluoromethane, methyl tert-butyl ether (MTBE), tetrachloroethene (PCE), toluene, trichloroethene (TCE), trichlorotrifluoromethane, and/or vinyl chloride (VC). The results in the associated samples as listed in Table 1 have been qualified 'UJ'.

The %D between the ICAL average RRF and the RRF in one or more of the CCALs associated with the samples listed in Table 1 exceeded the QC limit of 20% and exhibited a decreasing response (i.e., low bias) for SVOCs: benzaldehyde, hexachlorobenzene, and/or hexachlorocyclopentadiene. The results for these compounds in the associated samples as listed on Table 1 have been qualified 'UJ'.

The %D between the ICAL average RRF and the RRF in one or more of the CCALs associated with the samples listed in Table 1 exceeded the QC limit of 20% and exhibited an increasing response (i.e., high bias) for SVOCs: pyrene and benzo(a,h)anthracene. The detected results for these compounds in the associated samples as listed on Table 1 have been qualified 'J'.

- **Matrix Spike Blank**

The %R of VOC compounds 1,2,3-trichlorobenzene and 1,2,4-trichlorobenzene were below the lower QC limit in the MSB. These compounds have been qualified 'UJ' in the samples listed on Table 1.

The %R of all pesticide compounds were less than the QC limits in the MSBs. The associated samples as listed on Table 1 have been qualified 'UJ'.

- **Matrix Spike/Matrix Spike Duplicate/Matrix Duplicate**

The MS performed on sample B5-(11.5-12)-20230329 had a %R for VOC carbon disulfide that was less than the lower QC limit. The result for carbon disulfide in this sample has been qualified 'UJ.'

The MS/MSD performed on sample B5-CS-20230329 for metals antimony (Sb) and manganese (Mn) had %Rs less than the QC limit. The results for Sb and Mn in this sample have been qualified 'J' or 'UJ.'

The MSD performed on TCLP sample B10-CS-20230330 had a %R for SVOC pyridine that was below the lower QC limit. The non-detect result for pyridine in this sample has been qualified 'UJ.'

The MD performed on sample B5-CS-20230329 for metals barium (Ba) and lead (Pb) had an RPD > the QC limit. The results for Ba and Pb in this sample have been qualified 'J.'

The MS/MSD performed on sample B1-CS-2020230328 had %R for Sb, Ba, and Pb as being outside of the QC limits. The results for these metals in this sample has been qualified 'J' or 'UJ.'

- **Internal Standards (IS)**

The %R of SVOC IS perylene-d12 was below the QC limit in the samples listed on Table 1. The samples were re-analyzed, and similar outliers were observed, the initial analysis has been reported. The compounds associated with the IS outlier have been qualified 'J' or 'UJ.'

VI. SAMPLE RESULTS AND REPORTING

All sample results were reported in accordance with method requirements and were adjusted for sample volume (where applicable). Results reported below the quantitation limit (QL), but greater than the method detection limit (MDL), are qualified 'J' by the laboratory.

Several samples required initial dilutions due to an elevated levels of target compounds and/or matrix effects. The results for the non-detect compounds are the lowest achievable at the dilution utilized in the analyses.

A field duplicate was collected at location B-2 and exhibited good analytical/field precision (i.e., relative percent difference (RPD) between results < 50%).

VII. SUMMARY

All sample analyses were found to be compliant with the method criteria, except where previously noted. Those results qualified 'J' or 'UJ' are considered conditionally usable. All other sample results are usable as reported. AECOM does not recommend the recollection of any samples at this time.

Prepared By: Ann Marie Kropovitch, Chemist

Date:06/07/23

DEFINITIONS OF USEPA REGION II DATA QUALIFIERS

- U** – The analyte was analyzed for but was not detected above the reported sample quantitation limit.
- J** – The analyte was positively identified; the associated numerical value is the approximate concentration of the analyte in the sample.
- UJ** – The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the actual limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
- R** – The sample results are rejected due to serious deficiencies in the ability to analyze the sample and meet quality control criteria. The presence or absence of the analyte cannot be verified.
- D** – The sample results are reported from a secondary dilution.

**Table 1
Summary of Sample Qualifications**

Sample ID	Compounds	Qualification Added	Justification
VOCs			
FB020230330	Bromomethane, dichlorodifluoromethane, and trichlorotrifluoromethane	UJ	CCAL%D > QC limit of 20%, low bias
B-9(11.5-12)-2020230330 and B-10(11.5-12)-20230330	Bromomethane, carbon disulfide, chloromethane, PCE, trichlorofluoromethane, TCE, and toluene	UJ	CCAL%D > QC limit of 20%, low bias
B-8-(11.5-12)-20230329, B-6-(11.5-12)-20230329, B-5-(11.5-12)-20230329	Dichlorodifluoromethane	UJ	CCAL%D > QC limit of 20%, low bias
FB-20230329, Trip Blank (3/29/23)	Bromomethane	UJ	CCAL%D > QC limit of 20%, low bias
B-7-(11-11.5)-20230329	Dichlorodifluoromethane and trichlorotrifluoromethane	UJ	CCAL%D > QC limit of 20%, low bias
B-1-(11.5-12)-20230328, B-2-(11.5-12)-20230328, B-3-(11.5-12)-20230328, DUP-20230328 (B-2), B-4-(11.5-12)-20230328	1,4-Dioxane, bromomethane, dichlorodifluoromethane, carbon disulfide, chloromethane, chloroethane, trichlorotrifluoromethane, and VC	UJ	CCAL%D > QC limit of 20%, low bias
FB20230328	Dichlorodifluoromethane and MTBE	UJ	CCAL%D > QC limit of 20%, low bias
B-1-(11.5-12)-20230328, B-2-(11.5-12)-20230328, B-3-(11.5-12)-20230328, DUP-20230328 (B-2), B-4-(11.5-12)-20230328, and FB20230328	1,2,3-trichlorobenzene and 1,2,4-trichlorobenzene	UJ	MSB %R < QC limit
B5-(11.5-12)-20230329	Carbon disulfide	UJ	MS %R < QC limit
SVOCs			
B10-CS-20230330	Hexachlorobenzene and hexachlorocyclopentadiene	UJ	CCAL%D > QC limit of 20%, low bias
FB202030330	Benzaldehyde	UJ	CCAL%D > QC limit of 20%, low bias
B-1-(11.5-12)-20230328, B-2-(11.5-12)-20230328, B-3-(11.5-12)-	Benzaldehyde, hexachlorocyclopentadiene, pyrene, and benzo(a,h) anthracene	J/UJ	CCAL%D > QC limit of 20%, low/high bias

20230328, DUP-20230328, B-4-(11.5-12)-20230328

Total Target Concentration 4.1

ColumnID: (^) Indicates results from 2nd column

U - Indicates the compound was analyzed but not detected.

B - Indicates the analyte was found in the blank as well as in the sample.

E - Indicates the analyte concentration exceeds the calibration range of the instrument.

N-Nitrosodiphenylamine decomposes in the GC inlet and is detected as diphenylamine

R - Retention Time Out

J - Indicates an estimated value when a compound is detected at less than the specified detection limit.

d - Pesticide %Diff>40% between columns due to coelution. Lower concentration use a

Chlordane (Total) is sum of α -Chlordane and γ -Chlordane.

ColumnID: (^) Indicates results from 2nd column

U - Indicates the compound was analyzed but not detected.

B - Indicates the analyte was found in the blank as well as in the sample.

E - Indicates the analyte concentration exceeds the calibration range of the instrument.

N-Nitrosodiphenylamine decomposes in the GC inlet and is detected as diphenylamine

R - Retention Time Out

J - Indicates an estimated value when a compound is detected at less than the specified detection limit.

d - Pesticide %Diff>40% between columns due to coelution. Lower concentration use a

Chlordane (Total) is sum of a-Chlordane and y-Chlordane.

ColumnID:(^) Indicates results from 2nd column

U - Indicates the compound was analyzed but not detected.

B - Indicates the analyte was found in the blank as well as in the sample.

E - Indicates the analyte concentration exceeds the calibration range of the instrument.

R - Retention Time Out

J - Indicates an estimated value when a compound is detected at less than the specified detection limit.

d - Pesticide %Diff>40% between columns due to coelution. Lower concentration use a

Chlordane (Total) is sum of a-Chlordane and y-Chlordane.

Total Target Concentration 0

ColumnID: (^) Indicates results from 2nd column

U - Indicates the compound was analyzed but not detected.

B - Indicates the analyte was found in the blank as well as in the sample.

E - Indicates the analyte concentration exceeds the calibration range of the instrument.

R - Retention Time Out

J - Indicates an estimated value when a compound is detected at less than the specified detection limit.

d - Pesticide %Diff>40% between columns due to coelution. Lower concentration use a

Chlordane (Total) is sum of a-Chlordane and y-Chlordane.

B - Indicates the analyte was found in the blank as well as in the sample.

E - Indicates the analyte concentration exceeds the calibration range of the instrument.

N-Nitrosodiphenylamine decomposes in the GC inlet and is detected as diphenylamine

R - Retention Time Out

J - Indicates an estimated value when a compound is detected at less than the specified detection limit.

d - Pesticide %Diff>40% between columns due to coelution. Lower concentration use a

Chlordane (Total) is sum of a-Chlordane and y-Chlordane.

Total Target Concentration 0

ColumnID:(^) Indicates results from 2nd column

*U - Indicates the compound was analyzed but not detected.**B - Indicates the analyte was found in the blank as well as in the sample.**E - Indicates the analyte concentration exceeds the calibration range of the instrument.**R - Retention Time Out**J - Indicates an estimated value when a compound is detected at less than the specified detection limit.**d - Pesticide %Diff>40% between columns due to coelution. Lower concentration use a**Chlordane (Total) is sum of a-Chlordane and y-Chlordane.*

Comments, Notes, Special Requirements, HAZARDS
 Indicate if low-level methods required to meet current groundwater standards (SPLP for soil):
 BN or BNA (8270E SIM) 3/28 1425
 VOC (8260D SIM or 8011) 3/28 1625
 SPLP (BN, BNA, Metals)
 1,4 Dioxane
 Check if applicable:
 Project-Specific Reporting Limits
 High Contaminant Concentrations
 NJ LSRP Project (also check boxes above/right)
 Please note NUMBERED items. If not completed your analytical work may be delayed. A fee of \$5/sample will be assessed for storage should sample not be activated for any analysis.
 Internal use: sampling plan (check box) HC [] or client [] FSP#

For NJ LSRP projects, indicate which standards need to be met:
 NJDEF GWQS
 NJDEF SRS
 NJDEF SPLP
 Other (specify):

Reporting Requirements (Please Circle)

Volatile Organic Analysis:

Methylene chloride was recovered in samples AD37026-005, 007 due to possible laboratory contamination.

The Method Blank Spike for batch 107655 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries. Please refer to Form 4 to see which samples are associated with the Method Blank Spike.

The MS/MSD RPD, Matrix Spike Duplicate for batch 107654 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

Base Neutral/Acid Extractable Analysis:

The Method Blank Spike for batches 107035, 107091 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries. Please refer to Form 4 to see which samples are associated with the Method Blank Spike.

The MS/MSD RPD, Matrix Spike and/or Matrix Spike Duplicate for batch 107091 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

The Matrix Spike and/or Matrix Spike Duplicate for batch 107035 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

Sample SMB107091 had one or more surrogate recoveries outside QC limits. Please refer to the applicable Form 2 for the recoveries.

Samples AD37026-006, 009 had one or more internal standard areas outside +100% / -50% window from most recent calibration verification standard. The samples were reanalyzed confirming internal standard area counts out due to matrix interference. The initial analysis are reported. Please refer to the applicable Form 8 for the areas.

PCB Analysis:

Data conforms to method requirements.

Pesticide Analysis:

The Matrix Spike and/or Matrix Spike Duplicate for batch 107045 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

Herbicide Analysis:

The surrogates were double spiked in sample AD37026-007. Percent recoveries on form 2 were adjusted to reflect spiking error.

Total Petroleum Hydrocarbon Analysis:

Data conforms to method requirements.

Metals Analysis:

The Matrix Spike and/or Matrix Spike Duplicate for batch 104631 had recoveries outside QC limits. Please refer to the applicable Form 5/7 for the recoveries.

The MS/MSD RPD had recoveries outside QC limits in batch 104631. Please refer to the applicable Form 6/9 for the recoveries.

Wet Chemistry Analysis:

Samples AD37026-002, 004, 006, 007, 009 were analyzed for Reactivity using SW-846 7.3. SW-846 7.3 is not a NELAP accredited parameter.

TCLP Volatile Organic Analysis:

The Method Blank Spike for batches 107699, 107702 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries. Please refer to Form 4 to see which samples are associated with the Method Blank Spike.

The spiking compounds were diluted out from Matrix Spike and Matrix Spike Duplicate for batch 107702. Please refer to the applicable Form 3 for the recoveries.

TCLP Base Neutral/Acid Extractable Analysis:

The Method Blank Spike for batch 107072 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries. Please refer to Form 4 to see which samples are associated with the Method Blank Spike.

The MS/MSD RPD, Matrix Spike and/or Matrix Spike Duplicate for batch 107072 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

Samples AD37026-004, 009, WMB107072MS, AD37022-002MS, MSD had one or more surrogate recoveries outside QC limits. Please refer to the applicable Form 2 for the recoveries.

TCLP Pesticide Analysis:

The Matrix Spike for batch 107076 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

TCLP Herbicide Analysis:

Data conforms to method requirements.

TCLP Metals Analysis:

Data conforms to method requirements.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Per Kristine Garbarino, do not analyze FB for RIC or Full TCLP. Per Nikita Bendre, Field Blank for Metals for 3/28 will be provided on 3/29.
SBT 3/29/23

sherree192.168.1.210
4/27/2023 11:33:15 AM

Per Kristine Garbarino, reanalyze -002 in duplicate for Total Lead and TCLP Lead on a 5 day TAT. SBT 4/27/23

sherree192.168.1.210
5/16/2023 3:15:54 PM

Field blank provided on 3/29 is AD37044-013 under 3033001. SBT 5/16/23

Internal Standard Areas

Upper Limit = + 100% of internal standard area from daily cal or mid pt.

Lower Limit = - 50% of internal standard area from daily cal or mid pt.

Retention Times:

Limit = within +/- 0.5 min of internal standard retention time from the daily cal or mid pt.

Flags:

A - Indicates the compound failed the internal standard area criterion

R - Indicates the compound failed the internal standard retention time

TRIP BLANK	AD37044-014	Aqueous	Volatile Organics (8260D)

This case narrative is in the form of an exception report. Method specific and/or QA/QC anomalies related to this report only are detailed below.

Volatile Organic Analysis:

Acetone was recovered in sample AD37044-014 due to possible laboratory contamination.

The Method Blank Spike for batches 107658, 107659 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries. Please refer to Form 4 to see which samples are associated with the Method Blank Spike.

The MS/MSD RPD, Matrix Spike and/or Matrix Spike Duplicate for batches 107658, 107671 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

Base Neutral/Acid Extractable Analysis:

The Method Blank Spike for batches 107052, 107095 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries. Please refer to Form 4 to see which samples are associated with the Method Blank Spike.

The MS/MSD RPD, Matrix Spike and/or Matrix Spike Duplicate for batches 107052, 107095 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

PCB Analysis:

Data conforms to method requirements.

Pesticide Analysis:

The Matrix Spike and/or Matrix Spike Duplicate for batches 107045, 107089 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

Herbicide Analysis:

Data conforms to method requirements.

Total Petroleum Hydrocarbon Analysis:

Data conforms to method requirements.

Metals Analysis:

The Post Spike, Matrix Spike and/or Matrix Spike Duplicate for batches 104629, 104633 had recoveries outside QC limits. Please refer to the applicable Form 5/7 for the recoveries.

The RPD between the QC sample and the Method Replicate had recoveries outside QC limits in batch 104633. Please refer to the applicable Form 6/9 for the recoveries.

The serial dilution for batch 104629 is outside QC limits for one or more analytes. Please refer to the applicable Form 6/9 for the recoveries.

Wet Chemistry Analysis:

Samples AD37044-002, -004, -006, -010 were analyzed for Reactivity using SW-846 7.3. SW-846 7.3 is not a NELAP accredited parameter.

TCLP Volatile Organic Analysis:

The Method Blank Spike for batches 108348, 108408 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries. Please refer to Form 4 to see which samples are associated with the Method Blank Spike.

The spiking compounds were diluted out of the Matrix Spike and Matrix Spike Duplicate for batches 108348, 108408. Please refer to the applicable Form 3 for the recoveries.

The MS/MSD RPD for batch 108348 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

TCLP Base Neutral/Acid Extractable Analysis:

The MS/MSD RPD, Matrix Spike and/or Matrix Spike Duplicate for batch 107081 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

TCLP Pesticide Analysis:

The Matrix Spike and/or Matrix Spike Duplicate for batch 107082 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

TCLP Herbicide Analysis:

The MS/MSD RPD and/or Matrix Spike Duplicate for batch 107119 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

TCLP Metals Analysis:

Data conforms to method requirements.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hardcopy data package and in the computer-readable data has been authorized by the Laboratory Manager or his designee, as verified by the following signature.

Sean Berls
Quality Assurance Officer

This case narrative is in the form of an exception report. Method specific and/or QA/QC anomalies related to this report only are detailed below.

Volatile Organic Analysis:

The Method Blank Spike for batches 107672, 107678 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries. Please refer to Form 4 to see which samples are associated with the Method Blank Spike.

The MSD RPD, Matrix Spike and/or Matrix Spike Duplicate for batch 107678 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

Base Neutral/Acid Extractable Analysis:

The Method Blank Spike for batches 107072, 107115 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries. Please refer to Form 4 to see which samples are associated with the Method Blank Spike.

The MSD RPD, Matrix Spike and/or Matrix Spike Duplicate for batch 107072 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

The MSD RPD, Matrix Spike for batch 107115 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

Sample WMB107072(MS), AD37022-002(T)(MS/MSD), AD37079-002(MS) had one or more surrogates outside QC limits. Please refer to the applicable Form 2 for the recoveries.

PCB Analysis:

Data conforms to method requirements.

Pesticide Analysis:

The Method Blank Spike for batches 107045, 107117 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries. Please refer to Form 4 to see which samples are associated with the Method Blank Spike.

The Matrix Spike for batch 107045 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

Herbicide Analysis:

Data conforms to method requirements.

Total Petroleum Hydrocarbon Analysis:

The MSD RPD, Matrix Spike and/or Matrix Spike Duplicate for batch 107110 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

There is no surrogate recovery data for sample AD37175-002, -002(MS/MSD) due to high sample dilution. Please refer to the applicable Form 2 for the recoveries.

Metals Analysis:

The Post Spike, Matrix Spike and/or Matrix Spike Duplicate for batches 104629, 104633 had recoveries outside QC limits. Please refer to the applicable Form 5/7 for the recoveries.

The RPD between the QC sample and the Method Replicate had recoveries outside QC limits in batch 104633. Please refer to the applicable Form 6/9 for the recoveries.

The serial dilution for batch 104629 is outside QC limits for one or more analytes. Please refer to the applicable Form 6/9 for the recoveries.

Wet Chemistry Analysis:

Samples AD37079-002, -004 were analyzed for Reactivity using SW-846 7.3. SW-846 7.3 is not a NELAP accredited parameter.

TCLP Volatile Organic Analysis:

The Method Blank Spike for batch 108348 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries. Please refer to Form 4 to see which samples are associated with the Method Blank Spike.

The spiking compounds were diluted out of the Matrix Spike and/or Matrix Spike Duplicate for batch 108348. Please refer to the applicable Form 3 for the recoveries.

The MSD RPD for batch 108348 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

TCLP Base Neutral/Acid Extractable Analysis:

The Method Blank Spike for batch 107136 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries. Please refer to Form 4 to see which samples are associated with the Method Blank Spike.

The MSD RPD, Matrix Spike and/or Matrix Spike Duplicate for batches 107103, 107136 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

TCLP Pesticide Analysis:

Sample WMB107108(MS) has a surrogate recovery outside QC limits. Please refer to the applicable Form 2 for the recoveries.

TCLP Herbicide Analysis:

The MSD RPD, Matrix Spike Duplicate for batch 107119 had recoveries outside QC limits. Please refer to the applicable Form 3 for the recoveries.

TCLP Metals Analysis:

Data conforms to method requirements.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hardcopy data package and in the computer-readable data has been authorized by the Laboratory Manager or his designee, as verified by the following signature.

RE: Borehole Clearances
Using GPR & EMI
MTA Jamaica Bus Terminal Parking Lot
165-18 Tuskegee Airmen Way
Jamaica, NY 11433

Dear Kristine Garbarino,

In accordance with your authorization, Radar Solutions International (RSI) conducted a geophysical investigation at the above-referenced site in Jamaica Queens, New York on March 27th, 2023. This investigation was conducted to assist AECOM in safely drilling ten (10) borehole locations. In this endeavor RSI used Ground Penetrating Radar (GPR) and Electromagnetic Induction (EMI) to locate any utilities and obstructions with the objective of ensuring that ten (10) borehole locations could be safely drilled and without hindering upcoming operations. For this investigation, the RSI crew on site was Geophysicist Cameron Russ, and the AECOM site contact was Environmental Engineer Michal Kosciarz.

Methods Overview & Explanation

For this survey RSI employed two geophysical methods: Ground Penetrating Radar (GPR) and Electromagnetic Induction (EMI). The GPR system used was a Sensors & Software NOGGIN® 250 MHz system, and an EMI tool, the Radio Detection RD 8200, which is used for detecting live electric lines or inducing and tracing out other types of utility lines.

The twin-tool ensemble used for this survey allows for multiple lines of evidence to confirm the presence or absence of utilities in many cases and affords multiple opportunities to detect utilities if one method cannot resolve the feature often the other method detects it, thus reducing the likelihood of false-negatives where a utility is present but not detected.

With this combination of geophysical tools, a 10-foot x 10-foot rectangular grid were scanned, which encompassed the proposed borehole locations and the nearby surrounding areas which helps to provide context for more effective interpretation. Both GPR and EMI were used to ensure the finalized drilling location was clear of utilities. Once a finalized boring location was determined that location was marked on the ground with blue spray-paint in a crosshair pattern. The

recommended locations were recorded using a Trimble Geo7x Mobile field GPS unit, which in conjunction with an external antenna and RTK corrections can provide real-time positional accuracy in the range of 1-3 centimeters. In addition to the GPS photos were taken of each location and can be provided if necessary.

Summary of Results

Weather conditions at the time of scanning were 45-55 degrees Fahrenheit with partially overcast skies. Detected utilities with positive identification were marked out using the appropriate Dig-Safe colors. Where GPR anomalies were present near the proposed location the recommended locations were moved to ensure clearance from any possible utilities. At this site GPR did not detect utilities proximate to the boring locations, and the borings were moved here to attempt to avoid refusal from rocks under the surface.

At the bottom of this report a summary of our results is provided in tabular format. This summary is constructed from a combination of the observations, measurements, and notes of the field technician along with site photos and GPR data. Attached to this report is Figure 1 depicting final drilling locations. The final borehole locations can be provided to AECOM in georeferenced formats such as: .dxf .shp .csv. xls per their request.

We appreciate this opportunity to work with AECOM again. Please do not hesitate to call should you have further questions and comments regarding this report, and we look forward to working again with you in the future.

Sincerely,

RADAR SOLUTIONS INTERNATIONAL, Inc.

Cameron Russ
Vice President & Geophysicist

TABLE 1:

Core Identifier	Proposed Location	Recommended Location(s)	Comments
Scanned March 23 rd , 2023			
B-1	5X,5Y	7.5X,2.5Y	Proposed location rescanned one time to avoid underground electric line and other subsurface features. Boring location moved to area most clear of GPR anomalies.
B-2	5X,5Y	2.5X,2.5Y	Proposed location moved away from electric line detected along 7Y.
B-3	5X,5Y	9X,0Y	Proposed location rescanned three times to avoid underground electric line and other subsurface features. Boring location moved to area most clear of GPR anomalies.
B-4	5X,5Y	5X,8Y	Proposed location moved away from electric line detected just outside the grid along -1X.
B-5	5X,5Y	N/A	Area looks clear of utilities and other GPR anomalies.
B-6	5X,10Y	8.5X,5Y	Proposed location moved to area most clear of GPR anomalies detected at 4X,9Y.
B-7	5X,5Y	2.5X,2.5Y	Proposed location moved to area most clear of GPR anomalies.
B-8	5X,5Y	2.5X,2.5Y	Proposed location rescanned and moved to avoid underground electric line and blocking parking lot entrance. Boring location moved to area most clear of GPR anomalies.
B-9	5X,5Y	N/A	Proposed location looks clear of GPR anomalies. Possible low voltage electric line detected along 2X.
B-10	5X,5Y	2.5X,6Y	Moved boring location away from large anomaly at 7X,3Y.

RE: Subsurface Investigation for Potential USTs
Using GPR, EM-61 & EMI
MTA Jamaica Bus Terminal Parking Lot
165-18 Tuskegee Airmen Way
Jamaica Queens, NY 11433

Dear Kristine Garbarino,

In accordance with your authorization, Radar Solutions International (RSI) conducted ground penetrating radar (GPR), electromagnetic time-domain survey (EM-61), and EM Induction (EMI) surveys at the above-referenced site on May 3rd, 2023. The purpose of this geophysical survey was to determine the location and depth of any possible USTs, and other obstructions. RSI personnel on site were Vice President & Geophysicist Cameron Russ and the AECOM site contact was Environmental Engineer Michal Kosciarz.

Survey Control

For this survey, RSI employed the use of three geophysical methods; Ground Penetrating Radar (GPR), Electromagnetic Time-Domain Surveyor (EM-61), and Electromagnetic Induction (EMI). The GPR system used, was a Sensors & Software PulseEKKO® coupled with dual 500 MHz antennas, which achieved a penetration depth of 6-8 feet. To locate metallic anomalies a Geometrics EM-61 was used, which will collect data up to 12 feet below grade. To perform the EMI a Radio Detection RD8200 was used for detecting live electric lines or inducing and tracing out other types of utility lines (i.e. water lines).

Within the 500-foot x 200-foot investigative area, GPR data were collected along transects spaced 1.25-feet apart and 10-feet apart in parallel and perpendicular directions respectively. While EM-61 data were collected along transects spaced 2.5-feet apart in one direction.

The three-method ensemble used for this survey allows for multiple lines of evidence to confirm the presence or absence of utilities. In many cases when one method cannot resolve the feature, often the other method detects it, thus reducing the likelihood of false-negatives where a utility is present but not detected.

Methodology

Ground Penetrating Radar (GPR)

The GPR method operates by transmitting low-powered microwave energy into the ground using an ultra-wide band (UWB) transceiver antenna. The GPR signal is then reflected back to the antenna by materials with contrasting electrical impedance, which is primarily determined by dielectric and conductivity properties of the material, its magnetic permeability, and its physical properties. The greater the contrast in the real dielectric permittivity (RDP) of two materials, the greater the reflection amplitude. The highest-amplitude reflections occur where metal and/or reinforced concrete is encountered. High-amplitude reflections also occur at lithologic or mineralogic changes, such as between a concrete slab and gravel fill layer, or where there is a sudden change in water content. Reflections observed on GPR records can be non-unique, meaning that a similar reflector can be caused by different objects. Objects, such as rebar, utilities, and USTs that have a discrete length and width typically produce hyperbolic reflections that appear similarly on the radargram. By mapping the horizontal continuity of targets, depths, and reflective amplitude, it is possible to differentiate between targets, especially, if depth-slice imaging is performed on the data.

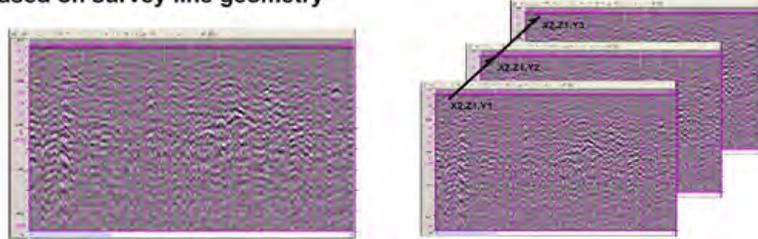

For this survey, RSI used Sensors & Software PulseEKKO® portable digital radar system coupled with dual 500 MHz antennas. To acquire GPR data, once the antenna is switched on, the antenna and cart with a survey wheel encoder is moved along the ground at a normal walking pace to ensure good coupling of the radar antenna with the ground.

A cross-section of the subsurface is generated wherever the antenna is moved. The horizontal scale on each GPR record is determined by the antenna speed as it is moved by the operator. The vertical scale of these radar “cross-sections” is determined by the recording interval, which was 60 ns for the 500 MHz antennas, which represents the maximum two-way travel time in which data is recorded. This recording interval was selected to be greater than the anticipated maximum two-way travel time during which real GPR reflections might be observed. GPR travel times were converted to approximate depths using an estimated soil velocity and the depths of buried targets plotted.

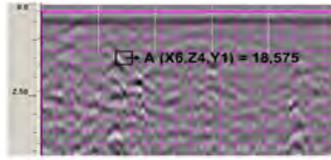

GPR data were processed by assembling individual lines (files) into a 3D volume and visually inspecting the data, and by using GPR-Slice® to image the 3D volume as plan-view depth slices. This state-of-the-art 2D and 3D GPR imaging software quantifies GPR results by digitizing the amplitude of reflection from each GPR record, looks for horizontal correlation of features across adjacent and nearby parallel lines, assembles them into a 3D image, then contours the data at each time/depth interval specified by the user. Below is a schematic showing how this imaging process works.

GPR-SLICE[®] PROCESSING

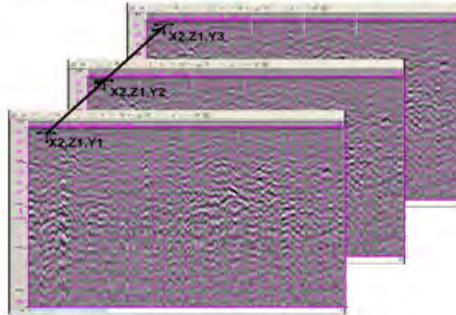

1. Break Each Radargram into Cells, with user defined dimensions of X_i (horizontal distance) and Z_i (depth range). Assign a Y_i value based on survey line geometry

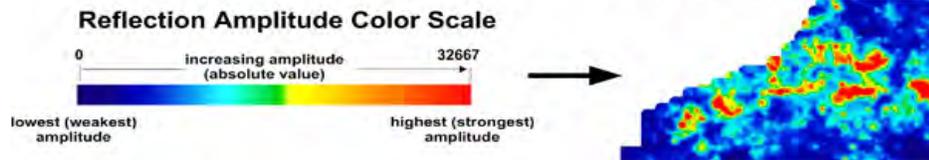

2. Assign an Amplitude of Reflection Value for Each Cell with an X_i and Z_i for each Y_i Radargram

3. Look for Horizontal and Vertical Correlation of Amplitude Values, as well as Cross-Correlation with Adjacent Y_i values with same X_i and Z_i . Create 3D Array of $A(x_i, Y_i, Z_i)$. Contour $A(x_i, Y_i, Z_i)$.

4. Colorize and Display Amplitudes of Reflection as Plan-View Depth-Slices

EM-61

GPR and EM-61 are frequently used concurrently to locate buried utilities and foundations. For this site, RSI will use an **EM-61 time-domain metal detector**, with receiving coils of 1 by 0.5 meters, which has a detection limit of up to 12 to 15 feet (3.5 meters) according to the manufacturer.

EM-61 data is collected along lines oriented parallel to the long axis of the site and spaced 2.5 feet apart for total coverage of the area of investigation. The EM-61 technology inputs an electrical current of finite duration and amplitude and measures the induced electrical field (in millivolts) induced in buried metal. The larger the amplitude of the induced response, especially at the later time-gates, the greater the metal mass. The EM-61 detects all types of metal, including copper, bronze, iron, and steel, to depths of 12 to 15 feet. The larger the metal mass, the more readily it is detected at depth.

Data collected from the EM-61 is downloaded from the field computer and contoured, with buried metal being assigned such “hot” colors as red or magenta. The EM-61 works particularly well in finding shallow metal, foundations and footings, and other reinforced concrete structures. Please note that while the EM-61 instrumentation can theoretically operate within 5 feet of parked cars, the data will nevertheless be contaminated by above-ground sources. Also, the primary limitation of this technology is that deeper metal may be obscured by shallower metal. For this reason, EM-61 readings cannot be accurately obtained on reinforced concrete slabs.

EM Induction (EMI)

RSI used an EM Induction tool, in this case a Radio Detection RD8000 (i.e. a sophisticated pipe and cable locator), to detect any live (60-cycle) electrical conduits and those non-electrical utilities to which we can clamp a transmitter. This sophisticated pipe and cable locator has been used with great success at other locations.

The EM induction tool can operate in 4 different modes: **Receiver only mode**, detecting 60 cycle power (or harmonics thereof), **Direct Contact/Clamp-on** mode, where the transmitter hooks the positive lead directly to the pipe or cable while the negative lead is grounded, **Direct-coupled/ Inductive mode**, where an inductive clamp is placed around the pipe or cable, and **Remote Beacon mode**, where a transponding beacon is placed on a fiberglass rod and threaded through non-conductive pipes and traced from the surface using a receiving antenna.

Mode #1 (Receiver only mode) only detects active electric lines or anything else that emits a 60-cycle signal. Telephone, cable, fiberoptic, gas, and any other plastic utility with a 60-cycle tracer wire (or tape) can also be detected using this mode. The disadvantage of this mode is that if a utility trends beneath rebar and the rebar mat is not grounded or the soil is conductive, false readings can occur, especially if the receiver's gains are turned up high. **Also, if the electrical cable is located within a heavily reinforced concrete duct bank, or within an oil-filled insulated pipe, it may be shielded, and hence, not detectable.**

Mode #2 (Direct Contact/Clamp-on) is the best method for directly tracing pipes, although, its success is contingent upon having a good ground and the pipe's outer surface being conductive enough to induce a signal down it. In some instances, such as gas transmission lines, pipe segments are isolated from each other with insulators so that self-potential (i.e. naturally-occurring energy from the earth's field) does not build up along the pipeline. Also, cast iron, especially when rusty, may not transmit a current well. Also, this mode cannot be used for PVC, asbestos concrete, clay, and plastic pipes, as they do not transmit current at all.

Mode #3 (Direct-coupled/ Inductive mode) is another reliable way of inducing a current down a pipe. This, like Mode #2, relies on the pipe being conductive enough to induce a signal through it. If a pipe is not accessible, but its trend is known in one location, then it may be possible to induce a current by having the transmitter broadcast a signal. The success of this mode relies on the pipe being sufficiently conductive, and the soil being sufficiently resistive, so signal travels down the pipe and not into the soil.

Mode #4 (Remote Beacon mode) is typically used for detecting non-conductive pipes. It can only be used for non-conducting pipes, such as vitrified clay, asbestos concrete, PVC, plastic, and occasionally reinforced concrete. This method only works, however, if there is direct access to one end of the utility, and if it is located no more than 8 feet below grade.

Summary of Results

Attached to this report are Figures 1 through 4 outlining results determined in the field and from post processing of geophysical data. Figure 1 are the contoured EM-61 results, which will show the presence of metal utilities and any potential USTs Figures 2a-2j are representative depth slice images, which is a computer-generated model of the subsurface features. A depth slice is compiled in a 3D volume, but in this report each layer is shown in 2D. Figure 4 shows the visual inspection of GPR data, which determines the depth and trend of GPR anomalies that may be potential obstructions. Figure 5 is a composite of all geophysical datasets.

- Contoured EM-61 results (Figure 1) detected multiple utilities across the site noting the location of the site lighting and drainage. Detected across this site are metallic anomalies that may be potential UST's located at: (1041745.6033111, 197217.12723907), (1041703.5617232, 197191.72081185), (1041734.4123848, 197153.91362848), due to the high mVolt value detected by the EM-61. Other metal anomalies were detected at this site (noted by purple shading) which could be buried debris or metal anomalies within the fill. It should be noted that multiple vehicles and other metal site features (i.e. guard rails, lights) were present at this site, which will interfere with the ability of the EM-61 to detect subsurface features and may create false positives.
- Representative depth slice images (Figures 2a -2j) detected multiple linear features (noted by magenta lineaments) across the investigative area, which could be abandoned utilities. Depth slice imaging of the GPR data did not detect any features that are typical of a UST, but did detect what appears to be a former foundation at (1041859.6297761,

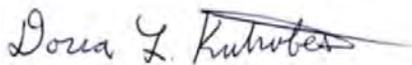

197176.29548104). It should be noted more vehicles were entering and parking within the investigative area, thus limiting the ability of the GPR to collect data in occupied parking spaces. RSI can not detect any features below an occupied parking spot.

- Figure 3, the visual inspection of GPR data, detected other possible utilities across the site denoted in black dashed lines. The most notable utility detected at this site, are the pair of potentially unknown utilities at trending from a potential buried slab at (1041858.1174888, 197177.5053109) to another possible buried slab at (1041841.7847856, 197305.14236195). No anomalies were detected through the visual inspection that would indicate the presence of a tank; however, the presence of the potential buried slab would limit the effective of the GPR to detect features below this possible slab at (1041858.1174888, 197177.5053109).
- The composite geophysical results (Figure 4) show a correlation between the visual inspection and depth slice imaging in regards to the flat feature at (1041858.1174888, 197177.5053109). Further ground truthing would be needed to determine the origin of the anomaly at (1041858.1174888, 197177.5053109). Please note that due to the presence of vehicles and guard rails, these features impact the efficacy of the EM-61 to detect subsurface features around these locations. Additionally, the presence of parked vehicles inhibits the ability of the GPR and EM-61 to locate features under them. Please dig with caution as there are an abundance of unknown features detected from this geophysical survey.

We appreciate another opportunity to conduct work for AECOM. Please do not hesitate to call should you have further questions and comments regarding this report, and we look forward to working again with AECOM in the future.

Sincerely,

LEGEND

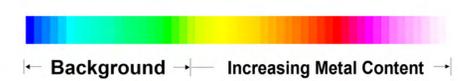

- Cleared Boring Locations
B-1 (Survey Complete 03/27/2023)
- Catch Basin
- Sight Light
- Electrical Hand Hole
- Utilities Detected by EMI:**
- Electrical (60 Hz) Live
- Gas/Propane
- Telecommunication
- Drain
- Water
- Sewer
- Unknown Utility

Depth Slice Image Legend

- Linear, High-Amplitude Reflection that may indicate buried utility; Depth (ft) as indicated on slice at which lineation first appears

Zone of High-Amplitude GPR Reflections
Reflections that could indicate an excavation or trench if linear, or UST, boulder, localized area of increased moisture, voiding and/or buried metal

Zone of Attenuation that may indicate an area of increased soil and/or ground-water conductivity

DEPTH: 5.0 ft. to 5.4 ft.

LEGEND

- Cleared Boring Locations
B-1 (Survey Complete 03/27/2023)
- Catch Basin
- Sight Light
- Electrical Hand Hole
- Parked Vehicles (During EM-61 Data Collection)
- Utilities Detected by EMI:**
 - Electrical (60 Hz) Live
 - Gas/Propane
 - Telecommunication
 - Drain
 - Water
 - Sewer
 - Unknown Utility

Visual Inspection Legend:

- Small GPR Reflector (possible diameter utility, metal scrap, large piece of rebar)
 - Cluster of Flat GPR Reflectors (possible buried slab)
 - Large, Weak GPR Reflector (possible cobble, RC or plastic pipe, boulder)
 - Large, High-Amplitude GPR Reflector (possible utility, metal scrap, boulder); Depth (ft.) as indicated RIGHT:
 - Possible Utility as Interpreted from the Alignment of GPR reflectors from line to line
 - Excavated Areas
- | Depth (ft.) |
|---------------------|
| 0.0 ft. to 0.5 ft. |
| 0.5 ft. to 1.0 ft. |
| 1.0 ft. to 1.5 ft. |
| 1.5 ft. to 2.0 ft. |
| 2.0 ft. to 2.5 ft. |
| 2.5 ft. to 3.0 ft. |
| 3.0 ft. to 3.5 ft. |
| 3.5 ft. to 4.0 ft. |
| 4.0 ft. to 4.5 ft. |
| 4.5 ft. to 5.0 ft. |
| 5.0 ft. to 5.5 ft. |
| 5.5 ft. to 6.0 ft. |
| 6.0 ft. to 6.5 ft. |
| 6.5 ft. to 7.0 ft. |
| 7.0 ft. to 7.5 ft. |
| 7.5 ft. to 8.0 ft. |
| 8.0 ft. to 9.0 ft. |
| 9.0 ft. to 10.0 ft. |

MAY 2023

High mVolts response from the EM-61
Indicating possible UST. However, the proximity
of adjacent utilities suggest these anomalies may be
associated with electric lines within this parking lot.

Possible buried foundation
(4.0 feet below grade)

Possible buried foundation
(Flat large high amplitude reflection
often associated with a buried slab
3.0 feet below grade)

Medium mVolts response from the EM-61
Indicating possible manhole or valve.
