B&T 1045	Senate	Klein, Jeffrey	Doyle, John	9/3/10	A complaint received about dumping by MTA Bridges and Tunnels workers near Exit 9 at the Throgs Neck Bridge in Bronx. Staffer asked us to send a team to clean the area (loose debris, overgrown vegetation, etc.).	Conferred with Throgs Neck General Manager who explained the area specified is "off property." Note: they did see DOT (personnel, trucks and equipment) working in this area recently. There was also a "tree planting" (also not Bridges and Tunnels) that was being performed in this area. Told staffer that if he wants to come out and show us the location, we would be happy to meet with them to discuss further, but we believe that this debris and overgrown vegetation is not our responsibility.	9/3/10

B&T 1069	Senate	Klein, Jeffrey	Doyle, John	10/4/10	Contacted us regarding paving of the Ring Road behind the Bronx-Whitestone Bridge facility building, which has been flooded frequently and is muddy from the heavy rains.	Explained Ring Road does not belong to us. However, our current work on the Bronx approach reconstruction project calls for paving a section in the vicinity of the lower garage after the job is finished (because of our work here we are obligated to fix it in the small area that we've impacted). Overall, though, conditions on the road had become so bad this past spring (mostly due to heavy rains and flooding) that we had asked our contractor to temporarily repave a portion of the road under the approach continuing up past the golf course entrance (even though we were not obligated to do so). The community recognized this effort and was appreciative. There is still a flooding issue on the road as the drainage inlets go to a mostly clogged storm drain that is on Parks Department property.	10/6/10

NYCT9527	PCAC		Wells, Jan S.	11/2/10	Request on behalf of a Metro-North rider for installation of a MetroCard vending machine at the Harlem 125th Street Metro-North station.	No spare vending machines currently in the system; unlikely that this request can be accommodated in near future as service demands at NYCT stations experiencing overcrowding require that these locations be given priority when spares become available. Moreover, in addition to the cost of installing a MetroCard Machine, the cost of installing a station controller and dedicated phone line would make the installation of a machine at the requested location very costly.	11/2/10
