#### LIRR

### PROPOSED ROUTE SUMMARY

The proposed Q8 would maintain mostly the same routing, but would be shortened and realigned at its western end, serving the future accessible New Lots Av 3 train station instead of Gateway Center. This would improve Queens-Brooklyn interborough service, providing a more direct connection to East New York and the 3 train with fewer turns. Service along Fountain Av to Gateway Center would still be provided by the proposed B13 (as part of the Brooklyn Bus Network Redesign). Bus service changes in Brooklyn are still being reviewed and will be finalized as part of the Brooklyn Bus Network Redesign Proposed Final Plan.

To match stop spacing on other Limited routes, Q8 stops would be spaced slightly further apart than Local routes to improve speed and reliability, but still within walking distance.

Frequencies will be increased on weekdays to provide all-day 10 minutes-or-better service. No span changes are being proposed at this time.

### Route Improvements

- Interborough route
- More direct routing
- New connections
- Improved stop spacing
- Improved frequency
- Improved ADA access
- NYC DOT Priority Corridor
