Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001  
Tank Id: 3935  
Material Code: 0001  
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

J02 - Dispenser - Suction Dispenser  
E00 - Piping Secondary Containment - None  
G03 - Tank Secondary Containment - Vault (w/o access)  
H00 - Tank Leak Detection - None  
L09 - Piping Leak Detection - Exempt Suction Piping  
A00 - Tank Internal Protection - None  
D01 - Pipe Type - Steel/Carbon Steel/Iron  
B00 - Tank External Protection - None  
F00 - Pipe External Protection - None  
C01 - Pipe Location - Aboveground  
I04 - Overfill - Product Level Gauge (A/G)

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.

Tank Type: Steel/Carbon Steel/Iron  
Tank Status: In Service  
Pipe Model: Not reported  
Install Date: 04/17/1929  
Capacity Gallons: 5000  
Tightness Test Method: NN  
Date Test: Not reported  
Next Test Date: Not reported  
Date Tank Closed: Not reported  
Register: True  
Modified By: ACDANIEL

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.  
 HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001  
Tank Id: 26360  
Material Code: 0001  
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

I04 - Overfill - Product Level Gauge (A/G)  
G03 - Tank Secondary Containment - Vault (w/o access)  
H00 - Tank Leak Detection - None  
A00 - Tank Internal Protection - None  
C00 - Pipe Location - No Piping  
D02 - Pipe Type - Galvanized Steel  
F00 - Pipe External Protection - None  
B00 - Tank External Protection - None

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.

Tank Type: Steel/Carbon Steel/Iron  
Tank Status: In Service  
Pipe Model: Not reported  
Install Date: 12/01/1922  
Capacity Gallons: 4000  
Tightness Test Method: NN  
Date Test: Not reported  
Next Test Date: Not reported  
Date Tank Closed: Not reported

Federal Waste Generator Description: Not a generator, verified  
State District Owner: NY  
Large Quantity Handler of Universal Waste: No  
Recognized Trader Importer: No  
Recognized Trader Exporter: No  
Spent Lead Acid Battery Importer: No  
Spent Lead Acid Battery Exporter: No  
Current Record: Yes  
Non Storage Recycler Activity: Not reported  
Electronic Manifest Broker: Not reported

List of NAICS Codes and Descriptions:  
NAICS Codes: No NAICS Codes Found

Facility Has Received Notices of Violations:  
Violations: No Violations Found

Evaluation Action Summary:  
Evaluations: No Evaluations Found

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

"12/06/05: This spill transferred from J.Kolleeny to S.Kraszewski.  
02/06/06: This spill transferred from S.Kraszewski to Q.Abidi.  
03/17/06: SK Reviewed Site Assessment Report completed on Nov. 30, 2000 by State Environmental Services, Inc. One 30K tank, which stored #2 Fuel Oil was removed. Six post-excavation samples were taken from the pit and submitted for laboratory analysis. About 900 tons of soil was removed and disposed of. All soil samples were tested for VOCs and SVOCs. None of the samples detected any VOC contaminants. All samples recorded exceedances of the same SVOC compounds: Benzo(a)anthracene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(g,h,i)perylene, Chrysene, Dibenzo(a,h)anthracene. The concentrations ranged from 1950 ppb to 498 ppb, which are relatively low. Four of the six samples had SVOC exceedance concentrations of 1000 ppb or less. No samples were taken from the fill lines or fill port. Report lacks a site plan with area of excavation and sample locations. No lab analysis summary table provided either. SK spoke with Chris Sawyer from NYCHA Fuel Oil Remediation. I informed him that they would need to take soil samples from the former fill lines and fill port area. Chris said that Harborview Houses would be included when performed additional soil borings. Sent Chris Email requesting additional soil borings along the fuel lines and next to the fill port. - SK 04/04/06: This spill Transferred from Q. Abidi to Koon Tang. 07/03/09: J.kann - spill transferred to J.Kann. Site assessment report submitted on 2/5/07. Investigative work plan submitted in March 2009. Additional wells to be installed to evaluate groundwater at the site, which is acceptable. One comment was sent on 7/3/09 to GF - A second round of groundwater sampling is proposed one month after the initial sampling is performed. What is the reasoning behind this? Typically two or more months is used. 09/15/09: J.kann - Sampling to be performed two months after initial sampling. Work Plan approved via email on 7/6/09. 2/4/11: J.kann - SAR received on 12/3/10 and edoced. 5/24/12: J.Kann - SAR under review. NYCHA requests closure. Will review entire file for Chelsea Houses. 6/13/12: J.kann - requested in an email of 5/30 that NYCHA gauge the wells at the site before I present to the closure panel. NYCHA sent well gauging data and photo on 6/12 indicating that a product sheen is present in MW5. A response email was sent to NYCHA on 6/13. 10/17/12: J.Kann - requested a follow-up from NYCHA regarding whether or not there is measurable product in MW-5 and/or if a absorbent sock is still present. 5/17/13: J.kann - followed up with NYCHA. They will go out and gauge MW-5 the weeeek of May 20. 8/26/13: J.Kann - visited site on July 31st. Observed the removal of sock and gauging of on site wells. No product in all wells. Sock visibly clean (photo). NYCHA indicated that the sock has been clean for several months. Based on observations, the spill will be considered for closure. 8/27/13 J.Kann - completed review of file. Spill closed. Following summarizes site: -30,000 gallon UST removed in 8/2000. -890 tons of contaminated soils removed in 2000 -investigation done in 2006 along fill lines and by fill port (DEC request) -some PAHs detected in grab groundwater sample in 2006 -5 permanent wells installed in 2010 -All gw under TOGS with the exception of MW-5 (3 minor VOC compound exceedences) -Slight sheen subsequently detected in MW-5. Absorbant sock placed in well. -Minor impacts on sock in 2012. -No oil detect on absorbant sock in 2013. -Confirmed no product sheen in well during site visit of 7/31/13. NFA. Email sent to NYCHA on 8/27/13 requesting wells be decommissioned."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was ZHAO/DO 12/19/02 - AUSTIN, DDO - TTF LETTER SENT 1/11/06- DEC Piper spoke w/ Eugene Degan, (PRev. Owner Rep 845.294.7509) regarding tank test. He could not be sure though he thinks the tanks are still empty. He will look into this. Piper then contacted new owner Dov Hertz, Extell Group. 212.712.0633. He knows nothing and will have previous owner get info. Galden Frankel performed Phase I and II on property. Left message at GF requesting call back. 1/18/06- DEC Piper spoke w/ property manager, Rob Scharf 212.712.6111. Stewart Dean Co. -212.695.3180. He will fax info. DEC Piper to review and inform Rob of additional work if warranted. 2/6/06- DEC Piper spoke w/ Rob S. I explained to him that he was still in violation of PBS code. I have received analytical suggesting that there was no release at the site. The tank test results indicated a dry ullage leak. The tank is empty and still needs to be removed or closed iin place. As per Rob, he will be sending in the new application this week. I instructed him to include a line item that that due to the razing of the building, that they will remove the tank when the activities have been completed. Afterwards, he will need to update the PBS records to insicate that the tank has been removed. Upon review of a limited phase II investigation of the site performed by Galden Frankel, of the six soil samples taken from various locations throughout the site, no elevated constituents were detected. However, three GW samples were collected. The results indicate 1,040 ppb of MtBE and slightly elevated levels of PERC and its byproducts. 5/15/06- DEC Piper. Referred to Remediation. 5/31/06 - reviewed file: MTBE was detected without other VOCs usually present in a petroleum release. The MTBE is likely the leading edge of an off-site impact. Low level of CVOCs are also detected. These CVOCs are only detected in GW with no soil contamination or other sources on site. Spill is closed, no NFA issued since no remediation was ever conducted at site. - KST"

DEC Memo: "DEC Piper spoke w/ Charles Rose. Assistant to the principal. As per conversation, they were getting ready for winter and noticed a leak. When the janitor inspected found approx 200 gal in vaulted area. Spill is contained and in vault. PTC to respond today and pump out remaining oil and oil on floor. No drains, sewers effected. PTC to contact DEC upon completion of emergency cleanup. School is not in session and no children are present. Odors present in basement only and not in school. 9/11/06- DEC Piper spoke w/ Sister Katheleen, PTC had cleaned up emergency spill. Piper spoke w/ PTC, tank was above ground on concrete. Concrete was in good shape. School is going to replace tank. 6 drums of oil soaked speedy dry removed. Closed."  
Remarks: "TANK IS LEAKING IN THE TANK ROOM OF SCHOOL: CREW ENROUTE TO PUMP OUT TANK AND CLEAN UP SPILL: NO DRAINS EFFECTED:"

Riggi showed that approximately 354K still owed to AG for past cleanup costs. Due to same ownership (Citigas) prior costs may be included in Consent Order. Vought submitted CAP for below requirements to DEC Urda. Riggi and Nyhoff also approved submission of Final ISR and closure of spill as any new funds spent by the DEC need a new PIN number since settlement already reached with old responsible party. Vought called Snyder, summarized consent order and left message to return call. 03/21/07-Vought-Left message for AG Nyhoff to call Vought with status of PIN. Vought and DEC Urda spoke with AG Nyhoff and as per Nyhoff default judgement was made against former owner of property resulting in lean of approximately 354K. 3/26/07-Vought-Received ISR from Nyhoff. Vought left message for Nyhoff to return call with which party was found responsible (Alex Goffman or Westside Tripple Auto Repair). 4/23/07-Final ISR submitted to DEC Austin for review and spill closed by Vought. DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was SUN Notes:by Rorriguez called ray lara of petroleum tank cleaners. he stated that there was a overflow of 30 gallons of oil to the address. The tank gauge was not working. Cleaning the spill right now. Ray Zolker from Hess. 800-437-7265. left a message for him to call. 12/05/2002 Tipple at od desk was called by Hess to request spill numbers 0209070 and 0209079 ( since both numbers were issued for the same incident) be referenced to as one number. Tipple closed out # 0209079 and referenced the spill to 0209070. GAUGE ON TANK NOT WORKING 800-437-7265. 212-964-7712. RAY ZOICKER (HESS). 12/20/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. -QA 12/21/06: Called Mr. Rubin (Super of Co op building) at (212)242-7191 he said this spill is cleaned up long time ago. He said to call property Manager regarding documents of the spill. Called Ms. Yvonne (Property Manager) at (212)319-5000 and talked about the information of the spill. She said this spill is cleaned since long time ago. She will send me closing confirmation letter to close the spill. -QA 01/03/06: Called Ms.Yvonne and said to take end point soil sample to find out the contamination in soil of spill area. -QA 02/05/07: Called Ms. Yvonne at (212)319-5000 and reminded her to take soil samples for closing this spill. -QA 06/11/07: Mr. Issac Mungra (Eastmond Company) sent me a report of one soil sample on dated May 30, 2007, which he took 2 ft. under the pipe line in the garden. He also sent a diagram in which he has shown the location of the sample. Soil sample is clean. -QA 06/21/07: I visited Spill site, checked fill port, vent line in the garden area and inside the basement. I didn't see any odor or any stain in the area. I have not found any sign of contamination in this area. This spill is clean (see photos in e-doc). After discussion with Mr. Jon Kolleeny (supervisor), I closed this spill. -QA "

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead\_DEC Field was SANGESLAND Sent TTF letter to consultant: Maria Ramirez, GZA, 65 Willowbrook Blvd, Wayne, NJ 07470 11/5/2003 Sangesland spoke with Maria Ramirez at GZA. She says the building is converting to natural gas and the 10,000 gal tank will be abandoned in place. Tank is below the basement floor under an electrical utility room. They cleaned out the tank and found holes in the top 1/3 of the tank. They will take borings through the bottom of the tank to determine if the area is contaminated. 12/4/2003 e-mail message from Maria Ramirez said the soil borings through the bottom of the tank would take place around 12/12/03. 12/11/2003 Sangesland reviewed a submittal from Maria Ramirez of GZA dated Nov 19, 2003. This outlined the the work discussed above and stated that 4 holes will be drilled through the bottom of the tank and samples will be collected for testing (if possible-it may be in cement). If the samples are clean, the tank will be abandoned in place with foam. 12/22/2003 Sangesland spoke with Fran Schultz of GZA about this site. They made 4 holes in the bottom and sides of this tank and hit cement. Water is entering the tank. To date approx 700 gal of water has entered the tank. They believe the water is from a broken water main. Sangesland asked GZA to test the water for VOC and SVOC. GZA said they would also test for Floride and Clorine to determine if this water is city tap water or groundwater. If the water samples come back clean, then GZA will prepare an arguement that the tank is in a subbasement vault. All records of the building (blueprints) are gone (they were in 7 World Trade Center). There are lots of utilities nearby. The tank is being abandoned in place. GZA will request closure of the spill number.

**BASEMENT OF (Continued)**

**S104502515**

3/15/2004 Sangesland reviewed a report from Maria Ramirez of GZA. Based on the description of the tank location (below ConEd electrical equipment), the drilling of holes through the bottom and sides of the tank (all into cement), results of water tests on the water that came into the tank after drilling (no petroleum but did have Floride & Chlorine). Based on all of this information, the DEC will allow GZA to go ahead with abandonment of the tank. After proper abandonment is complete, GZA will submit a final report with a request for spill closure. 11/14/05 - Larry Alden - Reviewed file and concur with assessment of Sangesland (3/15/04). Reviewed PBS# 2-606121, which showed that 10,000-gallon tank was closed in-place on 7/8/04. With absence of any contamination, and tank subsequently closed, this spill can be closed."

Remarks: "failed a tightness test but could not isolate a specific pipe - test was performed as part of a closure."

DEC Memo: "sharif sent a ttf ltr On 2/24/05. 06/21/05-SR: Spoke with Stuart Smoller of Andrews Building Corp. who is the managing agent now for the building. They are going to convert the oil heating system to gas burn heating system. So, tank will be abandoned and documentation will be sent to DEC. 10.06.05 //Sharif- rec'd tank test failure report from Eastmond and Sons Boiler. The fillline and the return line failed. Apparently, oil leaked through the pipeline and contaminated the surrounding environment. Needs subsurface investigation around the tank. Tried to contact Mr. John Wellmann of Andrews Corp.212-529-5688\* 276. He is on vacation. 12/21/05 Sharif//I spoke with Rene Lewis of EastMond. He said they pumped out the tank, cleaned it and later on they found oil water mix coming into the tank. So they installed a monitoring well to identify if any oil has escaped from the tank to the surrounding environment. They checked the well again and found only water coming into the well, a sample was taken from the well. Contaminated soil around the return line was removed and manifest will be sent to DEC along with closure report. 03/15/06 Sharif Rahman- Rec'd waste disposal manifest, analytical

DEC Region: 2  
DER Facility ID: 422874  
DEC Memo: "9/6/12-Vought-Primary off-hours responder. Called Anthony Milanese (East Coast Petroleum Ph:(718)402-5107) Fax:(718)402-4336) and left message to return call to Vought. Vought received call back from and spoke to Milanese and tank is a 20,000-gallon #2 AST. Vought spoke to John and leak was dry leak and tank was emptied and potential source was removed. No visible signs of oil. Entire system failed test and failure was due to faulty manway gasket and gasket and inspected and possibly repaired and tank retested. Milanese will callback with owner info for TTF letter and PBS# as no PBS registration in database and building may have alternate address. Vought received callback from Milanese who noted that AST was in contact with the concrete as well and that the fillport was capped to prevent deliveries until repair is completed. Milanese also noted that site was registered under PBS #2-056227 and that mailing address on PBS Registration was correct address for owner. Spill assigned to DEC Demeo as site is TTF for PBS site. Vought prepared TTF letter with cc to East Coast for signature by Demeo and mailing address of letter was: Penn Tower, LLC 132 West 31st Street New York, NY 10001 Attn: Toby Tenenbaum Ph:(212)564-1521 Demeo signed letter and Vought added to E-docs, sent to East Coast via Fax and original mail to Penn Tower. Spill assigned to DEC Demeo as TTF at PBS site. 4/7/15 TJD File review. As stated above the cause of reported tank test failure was a dry leak due to a failed manway gasket with no discharge of petroleum associated with reported event. Hillman Consulting has provided a closure letter detailing the work performed - the 20K AST was taken out of service and subsequently removed by Riteway Tank Cleaners in August 2012. As per Hillman letter report as part of a Phase 1 Site Assessment a site inspection of the former tank vault was performed and the integrity of the tank vault was confirmed no cracks, holes or other potential subsurface passages were observed. No petroleum staining was observed inside the vault. As the initial report was for a dry leak and the tank has been removed - no further action is required. All documentation has been uploaded to DECDOCS. Spill closed."

 Update By: BXANDERS  
 Site Description:

"Location: The site is located at 514 - 520 West 28th Street in New York City, New York County and has an area of approximately 0.51 acres. It is between 10th and 11th Avenues and is bounded to the north by West 28th Street and the south by West 27th Street. Commercial structures are adjacent to the east and west boundaries. Site Features: Presently, the site is undergoing redevelopment. Prior to remediation and redevelopment, the two lots that made up the site contained a vehicle rental company and a scrap yard. Current Zoning and Land Use: The site is zoned commercial (C6-3) and is located in a commercial and residential area of the West Chelsea section of the Borough of Manhattan. Past Use of the Site: The site has been occupied by several residential structures, laundry cleaning, metal works, manufacturing, motor freight storage, automobile repair and a scrap yard. Site Geology and Hydrogeology: Prior to remediation, subsurface material present below the site included historic fill from prior developments that may have been used to stabilize soil or to elevate the existing ground. The fill included concrete, brick, cinders, and other construction debris mixed, silt, sand and gravel and was generally present from 1-10 feet below ground. Below the fill the shallow subsurface soil at the site consists of sands and silts, glacial till intermixed with lean clay. Depth to bedrock ranged from 15 to 25 feet below grade. The surface geology of Manhattan generally includes very thin layers of unconsolidated glacial deposits underlain by bedrock. Groundwater at the site is encountered at approximately 8 to 11 feet below ground surface. Regional groundwater flow direction is westerly toward the Hudson "

Env Problem: "Soil: Investigations found no evidence of significant VOC

contamination in soil. Trimethylbenzenes and xylenes were present in one of the 21 soil samples at concentrations above their unrestricted use SCOs, but well below residential use SCOs. PAHs were observed in about half of the samples at concentrations indicative of historic fill. Metals are also present in soil at concentrations typical of historic fill and urban background. However, mercury concentrations ranged from non-detect to 69.6 parts per million (ppm). The unrestricted use SCO for mercury is 0.18 ppm; restricted residential is 0.81 ppm. The entire site has been excavated beyond the site boundary on all side and to bedrock over about two-thirds of the site. The remaining soil meets unrestricted SCOs for all constituents. Groundwater: Cis-1,2-dichloroethene (DCE) was found in groundwater samples from two wells near the north-west corner of the site at concentrations up to 260 ppb. DCE has been documented in up-gradient groundwater and is not due to an on-site source. Soil Vapor: The presence of chlorinated VOCs in soil vapor and groundwater presents the possibility of vapor intrusion to future on-site buildings. The maximum concentrations of tetrachloroethene (PCE) and trichloroethene (TCE) were detected along the west boundary at the respective concentrations of 308 micrograms per cubic meter (ug/m3) and 828 ug/m3. The site has been excavated to below the water table and the new on-site building will have a water vapor barrier USTs Two USTs were exhumed in August 2013 and disposed of off-site. Two more wells were removed during the site remediation activities."

Health Problem:

"The site is fenced and covered by concrete, people will not come into contact with site related soil and groundwater contamination unless they dig below the surface. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains its water from a different source not affected by this contamination. Volatile organic compounds may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air or buildings, is referred to as soil vapor intrusion. Because the site is vacant, the inhalation of site related contaminants due to soil vapor intrusion does not represent a concern for the site in its current condition. "

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was

KOLLEENY TYREE REMOVED A 550-GALLON STEEL SINGLE-WALLED EMERGENCY GENERATOR DIESEL TANK. SOIL HAD PETROLEUM ODOR AND SHEEN. CONTAMINATED SOIL WAS OVER-EXCAVATED AND STOCKPILED; POST-EXCAVATION SAMPLES WERE TAKEN. J. KOLLEENY OF DEC SPOKE WITH LAURIE JODICE OF TYREE ON 4/12/01; SHE WILL FORWARD COPY OF CLOSURE REPORT WHEN AVAILABLE. ACCORDING TO LJ, MOST CONTAMINATION WAS REMOVED AND THE SOIL LEFT IN THE PIT WAS RELATIVELY CLEAN. THE TANK LOCATION WAS VERY CLOSE TO WHERE O'BRIEN-KREITZBERG IS INSTALLING AN SVE SYSTEM TO REMEDIATE GASOLINE CONTAMINATION. KOLLEENY WILL FOLLOW UP TO ENSURE THAT RESIDUAL CONTAMINATION FROM THE EMERG. GEN. TANK (IF ANY) IS ADDRESSED, EITHER BY THE SVE SYSTEM OR IN SOME OTHER WAY. This spill is referred to spill # 9512583 and is closed today by II (01/10/05)."

Remarks: "WHEN TANK WAS REMOVED THERE WAS AN ODOR OF PETROLEUM. [SEE DEC NOTES.]"

DEC Memo: "Prior to Sept. 2004 data translation this spill Lead\_DEC Field was KOLLEENY URS did site investigations and initially proposed installing a dual-phase extraction system to address soil and GW contamination. However, site facility had inadequate electrical service to support a high-vacuum DPE system, so in early 2000 they proposed installing an SVE system for soil and ORC injection for dissolved-phase GW contamination. DEC approved plan in May 2000; work begun on SVE system in late 2000. However, when ORC injection wells were installed in Feb. 2001, free product was found in injection wells (under building, which is on pillars). URS performed IRM on wells. SVE system started up in Oct. 2001 and operated until June 2002, when it was shut down due to break in conveyance piping. URS did add'l investigation to delineate free product, and in April 2003 they proposed installing a GW recovery system to address free product and dissolved-phase GW contamination, and expanding SVE system. DEC approved this plan in July 2003. URS submitted a Design Analysis Rpt for remedial plan in Feb. 2004; DEC approved DAR in June 2004. 7/21/05: DEC reviewed Documentation for Letter of Agreement submitted by URS with SVE/Air Stripper Data Sheets and supporting calculations, and issued a letter on 7/21/05 authorizing discharges of treated vapors from the expanded SVE system and treated air stripper off-gas from the groundwater recovery system. - J. Kolleeny 03/14/07: Reviewed System Performance Monitoring Report for October 2006 through January 2007 by URS Corp., dated Feb. 12, 2007. Soil vapor extraction (SVE) and groundwater extraction & treatment (GWET) systems were started up on Oct. 25, 2006. SVE system consists of one horizontal extraction well and two horizontal ventilation trenches; GWET consists of 3 groundwater extraction wells. Franklin Co. is contractor operating/maintaining the systems. Performance monitoring data indicate that contaminants are being extracted from soil and groundwater and the systems should continue to operate. GW monitoring event in June 2006 showed free product in two wells (injection wells IW-6 and IW-12), and dissolved-phase contamination in two wells (IW-10, with 8,843 ppb, and IW-13, with 5,872 ppb total VOCs, resp.). In Jan. 2007 GW event, only two wells were sampled, BW-4 and MW-4, both ND; other wells were dry or inaccessible. Changed spill priority status to P2. - J. Kolleeny On 3/14/07, new gasoline spill was reported (#0613411). Delivery overfill event, 4 ft. of product found in well (extraction well GEW-01, according to Jane Staten of URS),

and UST manway was full of gasoline also. Franklin Co., who reported spill, have arranged for vac truck to pump out manway and well. Any residual impacts will be addressed by remedial systems and tracked under this spill number. - J. Kolleeny 07/23/07: Reviewed System Performance Monitoring Report for Feb. thru April '07 by URS, dated 6/8/07 (in eDocs). Report summarizes performance data for on-site SVE and GW treatment systems, plus GW monitoring data. PID monitoring of SVE vapor effluent gave reading of 621 ppm on 4/18/07, corresponding to benzene concentration of 12.4 ppm - above discharge limit in Stip Agreement. System was shut down and carbon was changed out, system re-started on 5/4/07. Vapor effluent sampling of GW system air stripper was in compliance. GW was sampled on Jan. 4, 2007; only two wells in sampling program were sampled, others were either inaccessible or dry. Results showed were ND for two wells sampled, however, this was before result spill 0613411, which report states was caused by a break in gasoline fill line; Franklin Co. installed a direct fill on tank, by-passing damaged fill line. Sampling of GW extractions wells in Feb. and March '07 showed big increased in recovered contaminants in March: GEW-1 went from 210 ug/L total VOCs to 30,900 ug/L; GEW-2 went from 20 ug/L to 800 ug/L, and GEW-3 went from 985 ug/L to 32,070 ug/L total VOCs, suggesting impacts from fill line break, and indicating system is recovering elevated levels of contaminants from GW. Report concludes SVE and GWE systems must continue to operate. - J. Kolleeny 08/17/07: Reviewed System Performance Monitoring Report for May-July '07 by URS, dated 8/7/07 (in eDocs). Report notes that benzene concentrations in SVE system effluent have increased, due to recent spill(s) of fresh gasoline from damaged fill line to active UST; even though benzene level has not exceeded discharge limit, as precaution Franklin Co. will change out the vapor phase carbon. Report also notes that due to presence of free product in GW recovery wells, they've had to shut down GWET system so product doesn't foul carbon. I sent email to Afsar Samani of DDC, cc's to Jerry Aliberti of DDC, Jane Staten & Harvey Roberts of URS, stating: I have reviewed System Performance Monitoring Report for May-July 2007, dated August 7, 2007. Report notes that, due to presence of large quantities of free product in on-site groundwater extraction wells (from recent spills related to damaged fill line to active gasoline UST), groundwater extraction and treatment (GWET) system has been shut down. I am concerned that without GWET system operating to exert hydraulic control over local groundwater flow, dissolved-phase groundwater contaminant plume, and perhaps free product as well, may migrate off-site, potentially impacting neighboring property. Therefore, I request that DDC and URS take whatever steps are feasible to expedite recovery of free product at site, so that GWET system can be re-activated as soon as possible. Also, discussed this in email exchange with Jane Staten, who stated: URS is scheduled to visit site with vac truck this coming Tuesday. If we feel effort is successful, we will continue with weekly visits until it is determined they are no longer necessary or effective. - J. Kolleeny 11/19/07: Reviewed URS's System Performance Monitoring Report for August-October 2007, dated 11/12/07 (in eDocs). Report states that GWET system had been shut down because free product was getting into system and causing discharge to sewer to exceed NYCDEP standards, but now they've restarted system just using GEW-2 and GEW-3, since GEW-1 seems to be well that's pulling in product. Report states that benzene vapor discharge from SVE system is in compliance, but effluent had high PID reading on 10/30/07, so they changed out

carbon. GW samples were collected from several monitoring, vent & injection wells on 8/2/07, and from GWET wells on 8/31/07; results show high levels of VOCs in several wells, including extraction wells and MW-6. Well gauging consistently shows 3+ feet of product in MW-7, small amts. of product in several other wells. URS is conducting vac truck visits every 2 weeks to recover product. I called Jane Staten of URS and asked why wells MW-3 & MW-5 weren't sampled, she thinks one or both are under an emergency generator; she'll look into it and get back to me. I asked if MW-6 can be used as a GW extraction well; she said it's only a 1-inch diameter well because it was installed by Geoprobe, under elevated part of building. I asked if spill buster pump could be installed in MW-7, she said she would look into it. Also asked if URS field personnel could check sump on top of new UST to see if it's still collecting product during fuel deliveries, Jane said she'd ask them to check. - J. Kolleeny 12/26/07: On 12/19/07, sent email to Jane Staten of URS asking if their field personnel had checked tank top sump for presence of product; on 12/26/07 Jane replied: Our field technician checked tank sumps at Midtown South on 11/29/07. One sump was dry and other contained a little water. There was no evidence of gasoline. Based on this, I closed spill case 0705553. - J. Kolleeny 03/20/08: Reviewed System Performance Monitoring Report for Nov. '07 through Jan. '08 by URS, dated 2/8/08 (in eDocs). Report presents O&M data for SVE & GWET systems, concluding that systems are removing elevated levels of contaminants from soil and GW, and will continue operating. Also notes that product levels from spill involving new UST's sump and/or fill port in March '07 (sp. nos. 0705553, 0702185, 0702402) are decreasing, showing effectiveness of GWET and periodic vac truck visits. However, report was submitted prior to new reported spill 0712091 (2/15/08), where large product thicknesses were suddenly and inexplicably observed in well GEW-01 and several monitoring wells, which caused temp. disruption in operation of GWET system, since product was getting into air stripper. (Tracking of that spill is ongoing.) Report states that SVE system was shut down for 2 weeks during monitoring period to change out vapor phase carbon. GW sampling was performed on 11/5/07, but samples were only collected from BW-5, MW-3, MW-4, VW-2 and VW-4; VW-4 had total VOCs of 737 ug/L, up from 44 ug/L in Aug. '07; some wells with hi TVOCs in Aug. weren't sampled in Nov. (like IW-13); plume fig. for Nov. '07 shows free product in GEW-01, MW-7 and MW-8, not clear why MW-6 wasn't sampled (gauging table indicates it had 0.05 ft. of product on 11/15/07, but wasn't gauged on 11/05/07. All product data is made irrelevant by spill 0712091. - J. Kolleeny 03/28/08: Received email from Jane Staten of URS on 3/27/08, with attached table showing well gauging data from 1/17/08 to 3/14/08 (in eDocs). Data show product in GEW-01 has decreased, from 3.18 ft. on 2/25/08 to 0.0 ft. on 3/3/08, to 0/15 ft. on 3/14/08; however, product in MW-6 seems not to be going away, with 3.75 ft. on 3/14/08; MW-7 went from 0.30 ft. on 2/25/08 to 0.07 ft. on 3/3/08 to 0.44 ft. on 3/14/08. Jane also reported that spill buster pump in GEW-01 is operating and URS has instructed contractor to restart GW extraction pumps. - J. Kolleeny 06/11/08: At direction of my supervisor Vadim Brevdo, closed spill 0712091 at this site (for free product [gasoline] detected in GW extraction well and monitoring wells) to consolidate with this spill (9512583), under which remediation of subsurface petroleum contamination at this site is being tracked. See Caller Remarks, DEC Remarks and documents in eDocs in spill no. 0712091 for further info about that spill and response

actions. - J. Kolleeny 09/11/08: Reviewed System Performance Monitoring Reports for Feb.-April '08 and May-July '08 (both in eDocs). Both reports state that SVE and GWET systems at site are removing elevated levels of contaminants from soil and GW, and that free product thickness msmts continue to decrease, showing effectiveness of GWET system and periodic vac truck visits. Worst wells for free product have been GWE-1, MW-6 and MW-7; as of last gauging event on 7/22/08, GWET had no measurable product, MW-6 had 0.04 ft., and MW-7 had 0.18 ft. As of 7/29/08 GW sampling event, worst wells for dissolved phase contam are GEW-2 with 960 ug/L total VOCs (mostly BTEX) and VW-04 with 936 ug/L total VOCs (mostly MTBE). - J. Kolleeny 01/20/09: Reviewed System Performance Monitoring Report for Aug. - Oct. 2008, dated 12/5/08 (in eDocs). Rpt states that SVE and GWET systems at site are removing elevated levels of contaminants from soil & GW. As of Oct. '08 sampling event, worst dissolved-phase well was GEW-1, which had 14,455 ug/L total VOCs (last reporting period, had free product); 2nd worst dissolved-phase in GEW-2, with 634 ug/L total VOCs. Rpt also states that product thickness msmts continue to decrease, showing effectiveness of GWET system and vac truck visits, but data do not support this. Six wells had free product in Oct. '08, with worst wells being MW-6 and MW-7; those wells started August with almost no product (0.04 ft. and 0.13 ft., resp.) but on 8/29/08 jumped up to 1.96 ft. and 1.06 ft., resp., and stayed around these thicknesses for rest of reporting period, ending with 1.96 ft. and 1.44 ft., resp., on 10/20/08. Rpt states that URS visited site 8 times during period to recover free product with peristaltic pump, recovering about 12.5 gallons of product. I sent email to Jane Staten of URS: I've been looking through Midtown South monitoring report for Aug.-Oct. '08 (dated 12/5/08), and noticed that Table 9 - GW Elevation/Product Thickness Measurements seems to show significant rebound of product thicknesses in MW-6 and MW-7 starting on 8/29/08. Do you have any thoughts or ideas about what could have caused this? Were thicknesses in these two wells steadily decreasing before this reporting period, or do these appear to be typical fluctuations for these wells? Also, have we already discussed why URS is using peristaltic pump to recover product rather than vac truck - is it primarily for cost considerations, or does it have to do with recharge rates for wells or something along those lines? - J. Kolleeny 01/22/09: Received email from Jane Staten of URS responding to my email of 1/20/09: Based on water/product levels we have recorded, product thickness appears to be affected by water levels, i.e., lower the water, greater the product thickness. We are using peristaltic pump for couple of reasons. First, there is access problem at site. Vac truck is too big to use driveway so it sits on street and hose runs up driveway. According to our field personnel, it is difficult for truck to find spot to 'sit' and when hose runs up driveway, it causes police grief because they have to drive around it. Second, wells are only 1-inch in diameter. Vac truck uses small hose which is lowered into well and well is almost immediately evacuated. Same process occurs with peristaltic pump, i.e., small tube is lowered into well and well is evacuated, so vac truck really provides no advantages. Cost was not a consideration. - JK 03/24/09: Reviewed System Perf Monitoring Rpt for Nov.'08 - Jan.'09 by URS, dated 3/4/09 (in eDocs). Rpt states that effluent of GWET system exceeded NYCDEP limits for discharge to sanitary sewer, system was shut down. Franklin Co. will install liquid-phase carbon unit to polish GW prior to discharge to sewer, sometime in 2nd Quarter '09.

Rpt further states that GW and SVE systems removed elevated contam concentrations from soil and GW, and that approx. 6 gals of product was recovered from 5 on-site wells using peristaltic pump. GW samples were collected from wells VW-04, GEW-01, GEW-02 and GEW-03 on Jan. 5, '09; remaining wells were not sampled because they were dry or exhibited free product or had an obstruction. Of wells sampled, worst contam was in GEW-01 with 17,140 ug/L total VOCs (up from 14,455 ug/L in Oct.'08) and GEW-03 with 12,244 ug/L total VOCs (had free product in Oct.'08). Free product thickness continued to increase in MW-7, with 2.73 ft. on 1/5/09 and 2.64 ft. on 11609.- JK 08/11/09: Reviewed Syst Perf Mon Rpt for Feb.-April '09 by URS, dated 5/27/09 (in eDocs). Rpt states GWET system was shut down during rpt period due to effluent exceeding NYCDEP discharge stds; rpt says Franklin Co. has installed activated carbon units to polish GW prior to discharge, and GWET system will be re-started in June '09. SVE system operated without interruption during rpt period, removing elevated contam concentrations from vadose zone. Approx. 7 gals of free product were recovered via peristaltic pump. GW samples were collected from 14 wells in April '09; hottest wells were GEW-1 with 24,980 ug/L total VOCs, MW-8 with 24,454 ug/L TVOCs, GEW-3 with 7,735 ug/L TVOCs, and IW-15 with 3,334 ug/L TVOCs. Free product thickness fluctuated ranging from 0 to 0.56 ft in MW-06, from 0.91 to 3.53 ft in MW-07, and from 0.01 to 0.68 ft in MW-09. Four other wells showed traces of product. - JK 12/16/09: Reviewed Syst Perf Mon Rpt for May-July '09 by URS, dated 9/9/09 (in eDocs). Rpt states GWET system was re-started on 6/3/09 and removed elevated levels of contaminants. SVE system operated without interruption during rpt period, but removed fewer contaminants from vadose zone during this rpt period. URS attributes this to construction activities related to removal/replacement of 4,000-gal gasoline UST. System's vapor discharge was in compliance. Approx. 5 gals of free product were recovered via peristaltic pump. GW sample was collected from GWET-1 on 7/9/09, result showed 151 ug/L total VOCs; other wells either had product or were obstructed by construction activities, so were not sampled. Wells MW-6 and MW-7 had most free product, averaging 0.28 ft and 0.69 ft, resp. during rpt period. - J. Kolley 12/17/09: Reviewed Syst Perf Mon Rpt for Aug.-Oct.'09 by URS, dated 11/24/09 (in eDocs). Rpt states SVE system operated throughout rpt period, removing more contaminants from vadose zone since construction activities associated with removal/replacement of 4k gasoline UST were completed. Vapor discharge was in compliance. GWET system removed elevated contam levels during this rpt period. Approx. 3 gals of free product were recovered via peristaltic pump from wells MW-7 and MW-9; overall product levels seem to be decreasing. GW samples were collected from 3 wells on 10/19/09; other wells either had product or were dry, so were not sampled. Well MW-6 had 38,573 ug/L total VOCs, and IW-15 had 25,628 ug/L TVOCs. - J. Kolley 04/13/10: Reviewed Syst Perf Mon Rpt for Nov.'09 - Jan.'10 by URS, dated 3/3/10 (in eDocs). Rpt states SVE and GWET systems operated throughout rpt period, removing contaminants from subsurface and GW. Vapor discharges were in compliance. GWET system removed elevated contam levels during this rpt period. Approx. 2.4 gals of free product were recovered by peristaltic pump from wells MW-7 and MW-9; MW-7 had 0.19 ft of product on 1/6/10 and 0.22 ft product on 1/19/10. Influent to GWET system from 3 extraction wells was sampled on Nov. 4 & Dec. 2, 2009 and on Jan. 16, 2010: GEW-01 had total VOCs of 8,946 ug/L, 5,537 ug/L and 54,490 ug/L, resp; GEW-02 had tVOCs of 130 ug/L, 122 ug/L

S105054624

and 1,530 ug/L, resp.; and GEW-03 had 7,263 ug/L, 5,710 ug/L and 2,729 ug/L, resp. GW sample taken from IW-15 on 1/6/10 had 12,885 ug/L tVOCs (down from 25,628 ug/L in Oct.'09) and sample from MW-6 had 29,410 ug/L tVOCs (down from 38,645 ug/L in Oct.'09). Other wells either had product or were dry, so weren't sampled. - JK 09/23/10: Reviewed Syst Perf Mon Rpt for Feb.-April 2010 by URS, dated 6/23/10 (in eDocs). Rpt states that SVE system operated throughout rpt period; GWET system was off briefly on two occasions but restarted immediately during maintenance visits. Both systems removed elevated levels of VOCs from subsurface, and vapor discharges were in compliance. Well gauging showed only traces of product (0.01 ft) in wells GEW-01 and GEW-03; no measurable product was collected by system. GW samples collected in April 2010 showed decreases in extraction wells vs. Jan. 2010 event (tho still elevated, in 1,000-2,000 ug/L total VOC range), but 2 mon wells that haven't been sampled in a while had high levels of VOCs: MW-6 had 9,051 ug/L tVOCs, MW-8 had 5,731 ug/L tVOCs. System operation and GW Mon will continue. - J. Kolleeny 01/10/11: Reviewed Syst Perf Mon Rpt for May-July 2010 by URS, dated 9/1/10 (in eDocs). Rpt states that on-site GWET & SVE systems are continuing to remove contaminants from subsurface; treated water and vapor discharges were in compliance with stds. Well MW-07 saw rebound in free product thickness, with 0.94 ft on 6/10/10 and 0.32 ft on 7/26/10; well MW-09 had trace of product in early May 2010, no product detected in June or July. About 2 gals of free product were removed from wells MW-07 and MW-09 using a peristaltic pump. GW sampling on 8/10/10 showed worst dissolved contam in well MW-06, which had 46,126 ug/L total VOCs (up from 9,051 ug/L in April 2010, extraction well GEW-1, which had 4,168.5 ug/L tVOCs (up from 1,634 ug/L in April 2010), and extraction well GEW-3, which had 1,399 ug/L tVOCs (down from 1,533 ug/L in April 2010); well MW-08 was obstructed and was not sampled. System operation and GW monitoring will continue. - J. Kolleeny 05/30/11: Reviewed Syst Perf Mon Rpt for August-October 2010 by URS, dated 2/16/11 (in eDocs). Rpt states that on-site GWET & SVE systems are continuing to remove contaminants from subsurface; treated water and vapor discharges were in compliance with stds. Rpt also states that URS is implementing several system modifications to improve performance, including conversion of existing horizontal ventilation well (VW-10 thru VW-13) to also function as an extraction well, and conversion of existing extraction well SVE-01A to also function as a ventilation well, to allow for increased flexibility in configuring system to extract from one or both sides of contaminated area. Well MW-07 had less free product during August & September, but rebounded to 1.63 ft on 10/21/10; well MW-09 had no measurable product during most of monitoring period but had 0.01 ft on 10/21/10. About 1.5 gals of free product were removed from wells MW-07 and MW-09 using a peristaltic pump. GW sampling on 10/21/10 showed worst contam in well MW-06 with 23,516 ug/L total VOCs (down from 46,126 ug/L in Aug. 2010) and well MW-08 with 2,677 ug/L tVOCs (was not sampled in Aug. 2010, but had 5,731 ug/L in April 2010); extraction wells GEW-1 had 870 ug/L tVOCs (down from 4,169 ug/L in Aug. 2010) and GEW-3 had 329 ug/L tVOCs (down from 1,399 ug/L in Aug. 2010). System operation and GW monitoring will continue. - J. Kolleeny 08/25/11: Reviewed Syst Perf Mon Rpt for November 2010 thru January 2011 by URS, dated 6/18/11 (in eDocs). Rpt states that on-site GWET & SVE systems are continuing to remove contaminants from subsurface, and that URS has completed several system modifications to improve contaminant recovery and

system operation. Treated GW and recovered soil vapor discharges were in compliance with stds. Only well MW-07 had measurable free product, with 1.62 ft on 1/5/11 and 0.12 ft on 1/19/11; approx 1.5 gals of product were removed by peristaltic pump. GW sampling on 1/5/11 showed worst wells were MW-06 with 23,062 ug/L total VOCs (down a little from 23,516 ug/L in Oct. 2010), MW-8 with 5,083 ug/L tVOCs (up from 2,677 ug/L in Oct. 2010) and IW-10 with 3,368 ug/L tVOCs (was not sampled in Oct. 2010). System operation and GW monitoring will continue. - J. Kolleeny 12/02/11: Reviewed Syst Perf Mon Rpt for Feb.-April 2011 by URS, dated 9/7/11 (in eDocs). Rpt states that on-site GWET & SVE systems are continuing to remove contaminants from subsurface; treated GW and recovered vapor discharges were in compliance with stds. Only well MW-07 had measurable LNAPL, with 0.60 ft on 4/4/11 and 0.21 ft on 4/27/11; approx 1.75 gals of product were removed by peristaltic pump. GW sampling on 4/4/11 showed decreases in contam in worst wells: MW-06 had 9,198 ug/L total VOCs (down from 23,062 ug/L in Jan. 2011), MW-8 had 2,923 ug/L tVOCs (down from 5,083 ug/L in Jan. 2011); however, GEW-1 had 1,591 ug/L tVOCs (was not sampled in Jan. 2011 but had 870 ug/L in Oct. 2010). Rpt includes tank inventory / comparison with DEC PBS records; these show that four 550-gal gasoline USTs were removed in mid-1990s or earlier, but location of these USTs is unknown. URS will continue to evaluate UST history and how it may have impacted on-site soil & GW. System operation and GW mon will continue. - JK 03/14/12: Reviewed Syst Perf Mon Rpt for 3rd Quarter 2011 by URS, dated 12/20/11 (in eDocs). Rpt states that on-site GWET & SVE systems continue to remove contam from subsurface. Only well had measurable LNAPL, but levels increased, with 0.78 ft on 6/6/11 and 0.65 ft on 7/18/11; approx 1.5 gals of product were removed by peristaltic pump. GW sampling on 7/18/12 showed worst contam in MW-6 with 12,569 ug/L total VOCs (up from 9,198 ug/L in April 2011), and MW-8 with 3,513 ug/L tVOCs (up from 2,923 ug/L in April 2012); well GEW-1 had 107 ug/L tVOCs, down significantly from 1,591 ug/L in April 2011. Rpt includes tank inventory and states that URS will continue to evaluate UST history and how it may have impacted on-site soil & GW. System operation and GW mon will continue. - J. Kolleeny 07/06/12: Received email from Kevin Shanahan of URS Corp: Jon, Next week we will be sending you/posting a rpt for Midtown South site which contains a work plan to collect soil samples at site. Purpose of soil sampling is to determine if SVE system was successful in remediating unsaturated soil. When you review rpt you may want to look at photo DSC05412 (attached) [in eDocs image folder as UST\_AreaAfterBackfilling ] to better understand limitations with drilling near new tank system. We are calling for 12 boring locations beneath building and one south of tank (foreground). - J. Kolleeny 07/12/12: Reviewed Syst Perf Mon Rpt for 4th Quarter 2011 by URS, dated 3/22/12 (in eDocs). Rpt states that treated GW and recovered soil vapor discharges were in compliance with stds. Free product was detected in well MW-7 at thicknesses ranging from 0.15 ft to 0.24 ft, and on one occasion in well MW-9 at 0.01 ft; approx 1.25 gals of product were removed by peristaltic pump. GW sampling on 10/10/11 showed worst contam in MW-6 with 7,294 ug/L total VOCs (down from 12,569 ug/L in July 2011), and MW-8 with 3,822 ug/L tVOCs (up a little from 3,513 ug/L in July 2011); injection well IW-15 had 932 ug/L tVOCs (had not been sampled since Jan. 2011, when it had 156 ug/L tVOCs), and GEW-1 had 114 ug/L tVOCs (up slightly from 107 ug/L in July 2011). Rpt includes UST inventory, states that URS will continue to evaluate UST history and

S105054624

how it may have impacted on-site soil & GW. System operation & GW mon will continue. Rpt seems to be missing several data tables (e.g., GW data table, well gauging data table). I sent email to Kevin Shanahan of URS requesting that rpt be re-issued with missing tables. - JK 07/17/12: Received email from Leng Ung of URS with attached pdf of revised 4th Quarter 2011 system performance monitoring rpt, with all data tables included (in eDocs). - J. Kolleeny 07/17/12: Reviewed Syst Perf Mon Rpt - 1st Quarter 2012 by URS, dated 7/11/12 (in eDocs). Rpt states that vapor and water discharges from SVE and GWET systems were in compliance with discharge limits. Free product was detected in one well, MW-7, at thicknesses up to 0.36 ft; 1.25 gals of product were recovered by peristaltic pump. GW sampling on 1/9/12 showed worst dissolved contam in wells MW-6, with 7,160 ug/L total VOCs (down a little from 7,294 ug/L in Oct. 2011) and MW-8, with 2,060 ug/L tVOCs (down from 3,822 ug/L in Oct. 2011). Rpt states that URS will continue to operate SVE and GWET systems, but that systems are starting to show reduced benefit, with contam concentrations in recovered media reaching asymptotic conditions. Based on low vapor recovery by SVE system, URS recommends collecting confirmation soil samples from treatment area to determine if further soil remediation is needed. Rpt includes work plan for confirmation soil borings, proposing 13 borings laid out in a grid. I contacted Kevin Shanahan of URS and asked that work plan be revised to include historical soil data and that boring locations be modified to target specific areas where soil contam was detected in past; asked that confirmation soil boring work plan be revised and re-submitted as brief, separate document (rather than revising and re-submitting as part of 1st quarter 2012 monitoring rpt). He agreed to revise and re-submit work plan as requested. - JK 08/06/12: On 8/3/12, received revised Proposed Work Plan for Confirmation Soil Sampling by URS, dated 7/31/12 (in eDocs). Plan proposes 7 soil borings in area of known vadose zone soil impacts, to evaluate remedial progress by SVE system and need for continued operation of SVE system. I sent letter (in eDocs) to Afsar Samani of DDC, cc's to Mehrzad Asbagh of DDC, Kevin Shanahan & Harvey Roberts of URS, approving plan but requesting two addtl soil borings and drilling of one proposed boring as close as possible to former boring SB-10. - J. Kolleeny 09/10/12: Reviewed System Performance Monitoring Rpt - 2nd Quarter 2012 by URS, dated 8/30/12 (in eDocs). Rpt states that SVE and GWET systems operated continuously thru quarter, and that vapor & water discharges from SVE and GWET systems were in compliance with discharge limits. Free product was detected in well MW-7, at thicknesses up to 0.34 ft; 1.5 gals of product were recovered by peristaltic pump. GW sampling on 4/23/12 showed MW-6 had 6,835 ug/L total VOCs (down from 7,160 ug/L in Jan. 2012), MW-8 had 2,497 ug/L tVOCs (up from 2,060 ug/L in Jan. 2012), GEW-1 had 133 ug/L tVOCs (up from 60 ug/L in Jan. 2012). Rpt concludes that URS will continue to operate remedial systems; however, systems are showing indications of reduced benefit, with concentrations of recovered soil vapors and GW sampling results reaching asymptotic conditions. Rpt notes that DEC approved confirmation soil sampling plan in Aug. 2012 and that sampling is scheduled for 3rd quarter 2012. - J. Kolleeny 06/06/13: Reviewed System Performance Monitoring Rpt - 3rd & 4th Quarters 2012 by URS, dated 1/16/13 (in eDocs). Rpt states that SVE system was found off on arrival on 7/6/12 because the electrical switch had been turned off; system was restarted during same visit; and GWET system was off on arrival on 8/29/12 due to an air stripper alarm; air stripper was

MIDTOWN SOUTH PRECINCT (Continued)

S105054624

cleaned, alarm re-set and system re-started. Vapor discharges from both systems were in compliance with discharge limits. Free product was detected in well MW-7, from 0.05 ft to 0.42 ft; product was recovered with peristaltic pump on 12 visits, URS will continue product recovery at least monthly. GW sampling on 7/16/12 and 10/10/12 showed significant dissolved impacts persist in wells MW-6 and MW-8: MW-6 had 8,675 ug/L total VOCs in July 2012 (up from 6,835 ug/L in April 2012) and increased to 9,795 ug/L in Oct. 2012; MW-8 had 4,007 ug/L tVOCs in July 2012 (up from 2,497 ug/L in April 2012) and increased to 6,944 ug/L in Oct. 2012. Soil sampling in Oct. 2012 showed significant residual vadose zone soil contam in boring S-09 near north end of easternmost horizontal SVE well, with 151,920 ug/kg total VOCs; two other borings had significant contam in saturated zone (S-04 with 218,380 ug/kg tVOCs and S-05 with 194,330 ug/kg tVOCs). Rpt states that URS will investigate whether SVE system can be modified to more effectively target remaining area of soil contam. URS will continue to operate both SVE and GWET systems, and will evaluate options to improve systems' effectiveness; twice monthly product recovery and quarterly GW sampling will continue. - J. Kolleeny 09/25/13: Reviewed System Performance Monitoring Rpt - 1st & 2nd Quarters 2013 by URS, dated 7/17/13 (in eDocs). SVE and GWET systems operated throughout rpt period, and vapor discharges were in compliance with discharge limits. Free product was detected in well MW-7 from 0.04 to 0.6 ft; product was recovered with peristaltic pump on 8 visits. GW sampling on 1/8/13 and 4/3/13 showed MW-6 had 58 ug/L total VOCs in Jan. 2013 (anomalous decrease from 9,795 ug/L in Oct. 2012) and rebounded to 7,156 ug/L in April 2013, while MW-8 had 6,656 ug/L tVOCs in Jan. 2013 (down from 6,944 ug/L in Oct. 2012), and decreased to 1,025 ug/L tVOCs in April 2013. Rpt concludes that soil & GW impacts at site are decreasing but remain high enough to warrant further remedial actions. URS will continue quarterly GW sampling, manual product recovery and operation of SVE & GWET systems, and will continue to evaluate options to improve and/or replace remedial systems to more effectively address remaining areas of contam. - J. Kolleeny 01/30/14: Reviewed System Performance Monitoring Rpt for 3rd & 4th Quarter 2013 by URS, dated 1/17/14, rcvd on 1/28/14. SVE & GWET systems operated throughout rpt period; vapor discharges were in compliance with discharge limits. Well gauging on 8 visits during rpt period showed up to 0.21 ft of LNAPL in well MW-7 and up to 0.04 ft in MW-9; -1.75 gals of product were recovered from MW-7 and -1.25 gals were recovered from MW-9, using a peristaltic pump. GW sampling in July 2013 showed well MW-6 had 10,623 ug/L total VOCs (up from 7,156 in April 2013) and well MW-8 had 6,044 ug/L tVOCs (up from 1,025 ug/L in April 2013). GW sampling in Oct. 2013 showed well MW-6 had 4,621 ug/L tVOCs and well MW-8 had 1,708 ug/L tVOCs. Based on persistence of product and high VOC levels at site, rpt makes proposals to better evaluate site conditions and improve effectiveness of on-site remedial systems. Specifically, URS recommends: (1) advance 3 new soil borings to evaluate current soil conditions, (2) over-drill existing monitoring wells MW-6, MW-7, MW-8 and MW-9 (1 diameter wells) and replace with 4 diameter wells for improved product recovery and to allow for future remedial actions (e.g., placement of absorbent or ORC socks, extraction by vac truck, and/or surfactant injections to desorb contaminants from soil), (3) install 5 new 4 diameter mon wells to better delineate areas of product and dissolved contam, (4) install add'l 6 diameter GW extraction well in area of greatest contam, (5) redevelop 3 existing

MAP FINDINGS

MIDTOWN SOUTH PRECINCT (Continued)

S105054624

extraction wells to improve GW recovery, and (6) possibly inject surfactants to enhance soil remediation. Based on results of 3 new soil borings, URS may implement proposed modifications to on-site SVE system. Once product in wells MW-7 & MW-9 has been addressed, URS proposes to shut down existing GW extraction wells GEW-1, GEW-2 & GEW-3 and operate only new extraction well GEW-4 to determine its radius of influence; after review of resulting data, add'l extraction wells will be brought on-line. After speaking with Kevin Shanahan of URS about proposals, I sent letter (in eDocs) approving proposals to Afsar Samani of DDC, cc's to Marcy Asbagh of DDC, Kevin Shanahan and Harvey Roberts of URS, noting that before doing any surfactant injections, work plan must be submitted for DEC review/approval. - J. Kolley 09/29/14: Reviewed System Performance Mon Rpt for 1st & 2nd Quarter 2014 by URS, dated 6/25/14 (in DecDocs). Rpt states that SVE system vapor discharge and air stripper off-gas were in compliance during mon period, based on both PID screening and sample analysis by lab. GW recovery wells GEW-1, GEW-2 & GEW-3 continue to operate and recover GW. In addition, URS visited site 10 times during rpt period to gauge wells and recover LNAPL; well MW-7 had product every visit except 4/23/14, with thicknesses up to 0.21 ft, and they recovered ~2.25 gals during period. Rpt states that, as proposed by URS and approved by DEC, URS will overdrill existing one-inch wells MW-6, MW-7, MW-8 & MW-9 and replace with 4-inch wells, plus they will install five add'l wells in this area to better delineate product plume. GW sampling was performed in January and April 2014. Jan. 2014 results showed well MW-6 had 5,142 ug/L total VOCs (up from 4,621 ug/L in Oct. 2013) and MW-8 had 5,908 ug/L tVOCs (up from 1,708 ug/L in Oct. 2014). April 2014 results showed well MW-6 declined to 4,453 ug/L tVOCs; MW-8 was not sampled due to vehicle parked over well. Operation of SVE and GWET systems, GW sampling and LNAPL recovery will continue at site. - J. Kolley 09/30/14: Reviewed Request for Soil Vapor Extraction System Shutdown by URS, dated 9/10/14 (in DecDocs). Rpt notes that monitoring of on-site SVE system s vapor influent indicates that system has reached limit of effectiveness and is no longer recovering measurable quantities of HC vapors. Rpt also notes that soil data indicate system has effectively treated vadose zone soil contamination and that remaining soil impacts at site are located mainly in saturated soil zone, which is not targeted by SVE system. Ergo, URS requests approval to suspend operation of SVE system and prepare system for long-term shutdown. System will remain on-site and URS will evaluate future site data to determine if resuming system operation is warranted. In meantime, other remedial activities at site operation & modification of GWET system, product recovery, GWET system performance monitoring, and quarterly GW sampling will continue. I sent letter (in DecDocs) approving system shutdown to Afsar Samani of DDC, cc's to Merhzad Asbagh of DDC, Kevin Shanahan and Harvey Roberts of URS. - J. Kolley 03/12/15: Reviewed System Performance Monitoring Rpt for 3rd & 4th Quarter 2014 by URS, dated 1/9/15 (in DecDocs). Rpt states that operation of on-site SVE system terminated on 10/1/14. As for GWET system, results of PID monitoring of air-stripper vapor effluent were ND during rpt period, and lab analysis of effluent air sample was ND for benzene, so system vapor discharge was in compliance. Sampling of GWET system GW influent showed system is recovering low levels of dissolved VOCs (up to 90 ug/L total VOCs). Well gauging and product recovery were performed 8 times during rpt period; product was detected in well MW-7 each time,

**MIDTOWN SOUTH PRECINCT (Continued)**

**S105054624**

with greatest thickness of 0.36 ft; about 2 gals total product recovered. GW sampling was performed in July and Oct. 2014; results showed well MW-6 had 3,234 ug/L tVOCs in July 2014 (down from 4,453 ug/L in April 2014) and increased to 4,406 ug/L tVOCs in Oct. 2014; well MW-8 had 4,264 ug/L tVOCs in July 2014 (not sampled in April 2014; had 5,908 ug/L tVOCs in Jan. 2014) and decreased to 1,046 ug/L tVOCs in Oct. 2014. Rpt states that URS will over-drill existing 1-inch wells MW-6, MW-7, MW-8 & MW-9 and replace with 4-inch wells, and will install 5 add'l mon wells in this area to better delineate LNAPL plume. Also, an add'l GW extraction well will be installed within dissolved-phase plume, existing extraction wells will be re-developed, and URS may apply surfactants to subsurface to enhance soil remediation. Qtrly GW monitoring, GWET system operation and manual product recovery efforts will continue, and URS will evaluate need for surfactant applications or other remedial actions; they will prepare/submit work plan prior to doing any add'l remedial actions.

- JK 03/12/15: I emailed Kevin Shanahan of AECOM to note that 3rd & 4th quarter 2014 rpt does not include any SVE system monitoring data for 3rd quarter (system was permanently shut down on Oct. 1st, 2014). He sent table with SVE monitoring data for Aug.-Sept. 2014 (July 2014 data were included in System Shutdown Request Letter rpt). Table in DecDocs as brief. - JK 05/21/15: Reviewed System Performance Monitoring Rpt for First Quarter 2015 by URS, dated 4/10/15 (in DecDocs). Rpt states that URS is planning to add a 4th GW extraction well to GWET system, install add'l monitoring wells, and re-install some wells with larger diameter casings to enhance remediation and monitoring at site. PID screening and lab sampling of GWET system's air stripper vapor effluent showed air discharge is in compliance. Recovery of free product from well MW-7 with peristaltic pump was performed 4 times during quarter, for total of ~1 gal removed; highest product thickness measured was 0.18 ft. During GW sampling in Jan. 2015, well MW-8 was not sampled because access to well was obstructed. Sampling results for 1/13/15 showed well MW-6 had 2,665 ug/L total VOCs (down from 4,406 ug/L in Oct. 2014), well MW-9 had 11,316 ug/L tVOCs (not sampled in April, July or Oct. 2014), and extraction well GEW-1 had 148 ug/L tVOCs (up from 47 ug/L in Oct. 2014). Sampling of influent to GW treatment system on 1/7/15 showed influent from GEW-1 had 165 ug/L tVOCs, GEW-2 had 6 ug/L tVOCs, and GEW-3 had 56 ug/L tVOCs. Rpt states that URS will continue quarterly GW monitoring/sampling, continue manual LNAPL recovery, continue operation of GWET system & proceed with enhancements to system (install'n of new extraction well and re-development of existing extraction wells), proceed with installing new mon wells and replacing several narrow-diameter wells, and continue to evaluate need for surfactant injections or other remedial actions to address residual free product and saturated soil zone contamination. - J. Kolleeny 07/23/15: Reviewed System Performance Monitoring Rpt for 2nd Quarter 2015 by URS dated 6/2/15 (in DecDocs). Rpt covers period 1/29/15 to 4/29/15 as 2nd qtr 2015. Rpt states that URS plans to add a 4th GW extraction well to GWET system, install add'l monitoring wells, and re-install some wells with larger diameter casings to enhance remediation & monitoring at site. PID screening and lab sampling of GWET system's air stripper vapor effluent showed air discharge is in compliance. LNAPL was removed from well MW-7 3 times during quarter using a peristaltic pump; well had up to 0.32 ft of LNAPL; ~0.75 gals were recovered. GW influent samples from GWET system extraction wells show system is recovering low levels of VOCs.

**MIDTOWN SOUTH PRECINCT (Continued)**

**S105054624**

GW sampling in April 2015 showed well MW-6 had 3,445 ug/L total VOCs (up from 2,665 ug/L in Jan. 2015), well MW-8 had 248 ug/L tVOCs (up from 148 ug/L in Jan. 2015), well MW-9 had only 0.8 ug/L tVOCs (down from 11,316 ug/L in Jan. 2015; this well has periodically had LNAPL, most recently in March 2014). URS will continue quarterly GW monitoring & sampling, manual LNAPL recovery, and operation of GWET system (proceeding with system enhancements in 3rd quarter 2015); in addition, URS will proceed with installing new mon wells and replacing several narrow wells, and will continue to evaluate need for surfactant injections or other remedial actions to address residual free product and saturated soil zone contamination. - J. Kolleeny 10/30/15: Received email from Kevin Shanahan of URS/AECOM: Jon, Envirotrac is performing routine O&M for existing GW pump & treat system. They are also constructing system enhancements over next few months. Today we were informed that GW extraction pump in GEW-02 is broken. GEW-02 is lowest producing well at site, is located outside of plume and is being replaced by new extraction well GEW-04 in November. We wanted to make you aware that GW extraction at GEW-02 is no longer happening and that new extraction well should be drilled and functional by end of year. I sent email reply: Kevin, Thanks for letting me know. I agree it doesn't make sense to try to repair or replace pump in GEW-02, considering its location outside plume and its historically low yield. Please continue to keep me posted and let me know when new extraction well GEW-04 has been installed. - J. Kolleeny 11/23/15: During quarterly DDC Consent Order Status Meeting on 11/19/15, Harvey Roberts of URS related that a local citizen had contacted NYPD and URS to complain about noise generated by on-site GW recovery system. URS had modifications made to system, resulting in decrease of ~15 decibels (a significant noise decrease); however, citizen continued to make complaints. Mr. Roberts conducted a test in which he turned off system and asked citizen if there was any difference in noise, citizen said no difference, suggesting system may not be source of noise perceived as bothersome. When Roberts pointed out that system had been off when he had asked for noise evaluation, citizen remained skeptical and continued to maintain that system is source of noise problem. At meeting, I asked if system GW influent contains significant levels of dissolved contaminants. Kevin Shannahan of URS/AECOM responded that VOC levels in system influent are very low. I suggested shutting down GWET system until new recovery well is installed in heart of plume, since system is currently recovering minimal hydrocarbons and shutting it temporarily might resolve noise complaints. URS/AECOM said they would look into shutting down system. On 11/23/15, I received email from Harvey Roberts: Jon, Per your suggestion at last week's Quarterly Status Meeting, URS has instructed Envirotrac, Midtown South Pct remediation system operator, to shut treatment system while they modify system. Envirotrac plans to shut system tomorrow during its regularly scheduled O&M visit. System operation will resume in late Jan. 2016 when modifications have been completed. I sent email reply: Harvey, Thanks for letting me know. I'm assuming that latest GW data show contaminant plume confined to site. If there is a sampling event before system modifications have been completed in Jan. 2016 and GW data show that plume is migrating off site, it may be necessary to re-start system before mods are completed, to re-establish hydraulic control. - JK 12/10/15: Reviewed System Performance Monitoring Rpt for 3rd Quarter 2015 by URS, dated 9/1/15 (in DecDocs). Rpt seems to cover period from 4/29/15 thru 7/29/15 as 3rd qtr of 2015. Rpt states

S105054624

that URS will add a 4th GW extraction well to GWET system, install add'l monitoring wells, reinstall several existing wells with larger diameter casings, and take steps to reduce noise emanating from system. PID screening & lab sampling of system's vapor discharge showed compliance with DEC stds. URS visited site 4 times during rpt period, detecting LNAPL in well MW-7 each time, at thicknesses up to 0.83 ft. ~1 gal of LNAPI was recovered. GW sampling on 7/20/15 showed well MW-6 had 3,178 ug/L total VOCs (down from 3,445 ug/L in April 2015), well MW-8 had 1,665 ug/L tVOCs (up from 248 ug/L in April 2015), well MW-9 had 2,398 ug/L tVOCs (up from 0.8 ug/L in April 2015). Rpt notes that well MW-9 last had LNAPL in March 2014, and that GW samples from MW-9 have shown highly fluctuating tVOCs. Rpt states that, in addition to system mods & well install'ns mentioned above, URS will continue to evaluate need for surfactant injections or other remedial actions to address saturated soil contam. URS will continue quarterly GW monitoring & LNAPL recovery efforts. - JK 03/21/16: Reviewed System Performance Monitoring Rpt for 4th Quarter 2015 by URS, dated 12/2/15 (in DecDocs). Rpt covers period from 7/30/15 to 10/28/15 as 4th qtr 2015. PID screening & lab sampling of GWET system's vapor discharge showed compliance with DEC stds. URS visited site 3 times during rpt period, detecting LNAPL in well MW-7 each time, up to 0.94 ft in thickness; ~1 gal of LNAPL was recovered. GW sampling on 10/7/15 showed well MW-6 had 3,378 ug/L total VOCs (up from 3,178 ug/L in July 2015), well MW-8 had 1,222 ug/L tVOCs (down from 1,665 ug/L in July 2015), well MW-9 had 5,541 ug/L tVOCs (up from 2,398 ug/L in July 2015). Rpt states that on 10/28/15, GW pump in extraction well GEW-02 malfunctioned; URS contacted DEC and it was agreed that since well is outside main plume and has historically had low yield, it would not be worth repairing or replacing pump; system continues to operate with two recovery wells, GEW-01 and GEW-03, until new recovery well GEW-04 is installed and brought on line. URS will install 4th recovery well, install add'l monitoring wells and replace several existing 1-inch wells with 4-inch wells (according to approved plan). They will also continue to evaluate need for surfactant injections, and will continue quarterly GW monitoring & LNAPL recovery efforts. - J. Kolleeny 05/31/16: Reviewed System Performance Monitoring Rpt for 1st Quarter 2016 by URS, dated 4/7/16 (in DecDocs). Rpt covers period from 10/29/15 to 1/18/16 as 1st qtr 2016. Based on PID screening of GWET system's vapor influent/effluent, it appears system discharge complied with DEC stds (system was shut down on 11/24/15, prior to quarterly air sampling, in prep for reinstall'n of wells and modifications to GWET system). In Nov. 2015, well MW-7 had 0.28 ft of LNAPL; during Dec. 2015 & Jan. 2016, well was not gauged as access to well was obstructed at those times. Approx 0.25 gal of LNAPI was recovered from MW-7. GW sampling was performed on 1/18/16; wells MW-6, MW-7 & MW-8 were not sampled because they were in process of being reinstalled as larger wells. Well MW-9 had 3,988 ug/L total VOCs (down from 5,541 ug/L in Oct. 2015); well GEW-1 had 53 ug/L tVOCs (up from 40 ug/L in Oct. 2015). Rpt states that subcontractor EnviroTrac is in process of implementing remedial system modifications approved by DEC, including install'n of add'l delin wells and an add'l GW extraction well; this work is expected to be completed in early 2016, at which point operation of GWET system will resume. URS will continue quarterly GW sampling and manual product recovery. - J. Kolleeny 09/07/16: Reviewed System Performance Monitoring Rpt for 2nd & 3rd Quarters 2016 by URS, dated 8/11/16 (in DecDocs). Rpt covers period from Jan.

**MIDTOWN SOUTH PRECINCT (Continued)**

**S105054624**

19 thru July 22, 2016 as 2nd & 3rd quarters of 2016.) Rpt summarizes recent modifications at site that were proposed by URS and approved by DEC in Jan. 2014 - they over-drilled & replaced 1-inch wells MW-6, MW-7 & MW-8 with 4-inch wells (MW-9 could not be over-drilled as planned, so new well MW-15 was installed nearby), installed four new wells MW-10, MW-11, MW-13 & MW-14 (proposed well MW-12 was not installed due to subsurface obstruction, MW-13 was moved to west to compensate), installed add'l extraction well GEW-4; in addition, they plan to redevelop extraction wells GEW-1 and GEW-3 to ensure proper functioning (GEW-2 consistently show no contam, so it won't be redeveloped.) GWET, shut down since 11/24/15, was re-started with new extraction well on 8/3/16. During rpt period, free product was detected in well MW-7/7R (0.03 ft in MW-7 in March, 0.08 ft in MW-7R in April 2016) and in well MW-15 (0.02 ft in April 2016). Absorbent socks were placed in MW-7R and MW-15 in April, and were replaced in June 2016 as both socks were 100% saturated. GW sampling in April 2016 showed well MW-6R had 18,434 ug/L total VOCs, well MW-8R had 1,981 ug/L tVOCs, well MW-10 had 1,410 ug/L tVOCs, and well MW-11 had 8,359 ug/L tVOCs. GW sampling in July 2016 showed MW-6R decreased to 7,150 ug/L tVOCs, MW-8R decreased to 1,591 ug/L tVOCs, MW-10 increased to 1,959 ug/L tVOCs, and MW-11 decreased to 2,892 ug/L tVOCs. URS will continue manual product recovery, quarterly GW sampling, and operation/monitoring of GWET system; they'll also continue to evaluate need for surfactant injections or other actions to address residual LNAPL and saturated soil contam, and will submit a work plan for DEC approval before implementing any add'l remedial actions. - JK 03/24/17: Reviewed System Performance Monitoring Rpt for 4th Quarter 2016 by URS, dated 12/22/16 (in DecDocs). Rpt discusses 2016 modifications to GW extraction & treatment system at site (mainly install'n & operation of add'l extraction well GEW-4). URS estimates total gals of GW collected by each well during rpt period as: GEW-1 ~9,233 gals, GEW-3 182 gals, GEW-4 3,840 gals. Extraction wells GEW-1 and GEW-3 operated from 9/27 thru 10/6, and were then shut off to determine influence of GEW-4 when pumping on its own. GW samples from extraction wells taken by EnviroTrac (subcontractor) on 10/11/16 showed GEW-1 had 240 ug/L total VOCs, GEW-3 had 5,725 ug/L tVOCs, GEW-4 had 5,917 ug/L tVOCs. Samples collected by URS on 10/5/16 showed GEW-1 had 224 ug/L tVOCs, GEW-3 had 60 ug/L tVOCs, and GEW-4 had 23,293 ug/L tVOCs. Rpt states these data indicate that new well GEW-4 was installed in area with highest dissolved impacts as intended. Samples of vapor effluent from air stripper and GW discharge to NYC sewer were in compliance. No free product was detected in 3 site visits this quarter, but absorbent socks in wells MW-7R & MW-15 were replaced on each visit. GW sampling on 10/5/16 showed well MW-6R had 4,581 ug/L tVOCs (down from 7,150 ug/L in July 2016), well MW-8R had 1,201 ug/L tVOCs (down from 1,591 ug/L in July 2016), well MW-10 had 2,819 ug/L tVOCs (up from 1,959 ug/L in July 2016), well MW-11 had 348 ug/L tVOCs (down from 2,892 ug/L in July 2016). Rpt states that GW & soil contam in saturated & smear zones remain high enough to warrant continued remediation, and small amts of free product remain in a small area of site. URS concludes that data from newly installed wells have better delineated GW impacts, showing plume is limited to 40 ft by 50 ft area. URS will continue quarterly GW monitoring, continue manual product recovery, optimize GWET system ops, and continue to evaluate need for surfactant injections or other remedial action. They also propose to remove wells that are consistently dry from GW monitoring program

MAP FINDINGS

S105054624

(IW-3, IW-10, IW-13, IW-15, VW-02 & VW-04), and to decommission a number of 1-inch injection wells (IW-1 thru IW-5A, IW-11, IW-12, IW-14, IW-16 thru IW-18), which are often dry and/or are located near existing monitoring wells. I sent email (in DecDocs) to Jerry Aliberti of DDC, cc's to March Asbagh of DDC, Kevin Shanahan and Harvey Roberts of URS/AECOM, approving these recommendation. - J. Kolleeny 06/15/17: Reviewed System Performance Monitoring Rpt for First Quarter 2017 by URS, dated 3/30/17 (in DecDocs). Rpt covers period from Oct. 2016 thru Jan. 2017. During this period, extraction wells GEW-1 & GEW-3 were not operating & did not recovery any GW; GEW-4 recovered 15,320 gals (155 gpd). Sampling of influent to GWET system in Nov. & Dec. 2016 and Jan. 2017 showed total VOCs ranged from 726 ug/L to 2,3339 ug/L in GEW-1, from 1,029 ug/L to 3,285 ug/L in GEW-3, and from 1,441 ug/L to 3,282 ug/L in GEW-4. Sampling of system discharge to NYC sewer system showed effluent was in compliance with NYCDEP discharge criteria. GW samples collected from extraction wells on 1/17/17 showed no VOCs in GEW-1 or GEW-2, GEW-3 had 9.5 ug/L of MTBE, and GEW-4 had 8,147 ug/L tVOCs. URS visited site 3 times during quarter to gauge wells & recover LNAPL, but no LNAPL was detected in any wells; however, absorbent socks in MW-7R & MW-15 continue to collect LNAPL. Socks were replaced in Nov. 2016. GW sampling on 1/17/17 showed well GEW-4 had 8,147 ug/L tVOCs (down from 23,293 ug/L in Oct. 2016), well MW-6R had 104 ug/L tVOCs (down from 4,581 ug/L in Oct. 2016), well MW-10 had 289 ug/L tVOCs (down from 2,819 ug/L in Oct. 2016), well MW-11 had 257 ug/L tVOCs (down from 348 ug/L in Oct. 2016); wells MW-8R & MW-15 were not sampled due to vehicles parked over wells. URS will continue quarterly GW monitoring, product recovery by absorbent socks (or other methods as appropriate), operation of GWET system, evaluation of need for surfactant injections or other remedial actions to address residual LNAPL and saturated zone soil impacts, and will decommission 11 injection wells DEC approved for removal from GW monitoring program. - JK 07/24/17: Reviewed System Performance Monitoring Rpt for Second Quarter 2017 by URS, dated 6/13/17 (in DecDocs). Rpt covers period from 1/19/17 thru 4/27/17. Rpt states that GWET system operated in compliance with benzene air emission limit, based on weekly PID screening of sir stripper influent & effluent showing no detections and on quarterly samples of vapor influent & effluent showing no VOCs detected. During this quarter, system operated using only new extraction well GEW-4, which recovered 14,130 gals of GW (143 gpd). Monthly GW samples from extraction wells showed that on Feb. 23, 2017, GEW-1 had 924 ug/L total VOCs, GEW-3 had 1,621 ug/L tVOCs, GEW-4 had 1,862 ug/L tVOCs; on March 29, 2017, GEW-1 had 852 ug/L tVOCs, GEW-3 had 1,517 ug/L tVOCs, GEW-4 had 1,906 ug/L tVOCs; on April 27, 2017, GEW-1 had 698 ug/L tVOCs, GEW-3 had 1,458 ug/L tVOCs, GEW-4 had 1,929 ug/L tVOCs. Monthly samples of effluent from GWET showed system discharge was in compliance with NYCDEP criteria. Quarterly GW sampling on 4/13/17 showed well GEW-4 had 9,799 ug/L tVOCs (up from 8,147 ug/L in Jan. 2017), well MW-6R had 130 ug/L tVOCs (up from 104 ug/L in Jan. 2017), well MW-10 had 115 ug/L tVOCs (down from 289 ug/L in Jan. 2017), well MW-11 had 509 ug/L tVOCs (up from 257 ug/L in Jan. 2017). No measurable LNAPL was reported for this quarter, but LNAPL continued to be recovered by absorbent socks installed in wells MW-7R and MW-15; socks in MW-15 were replaced each month during this quarter. URS will: continue quarterly GW monitoring, continue product recovery by absorbent socks and/or other methods as appropriate, optimize GWET system for more continuous

MAP FINDINGS

MIDTOWN SOUTH PRECINCT (Continued)

S105054624

pumping to maintain/increase GW capture zone, evaluate need for surfactant injections or other actions to address residual LNAPL & saturated zone soil impacts, decommission eleven injection wells, repair leak in carbon vessel T-501 or replace unit, heat trace & insulate exposed section of discharge pipe from GWET to DEP sewer system. - J. Kolley 01/08/18: Reviewed System Performance Monitoring Rpt for Third Quarter 2017 by URS, dated 9/15/17 (in DecDocs). Rpt covers period from 4/28/17 to 7/26/17. Based on PID readings and air sampling data, on-site GWET system operated in compliance with benzene air discharge limit. During quarter, extraction well GEW-1 recovered 5 gals, GEW-3 recovered 0 gals, GEW-4 recovered 10,523 gals (117 gpd). GW influent samples from extraction wells showed that on 5/26/17, GEW-1 had 94 ug/L total VOCs, GEW-3 had 349 ug/L tVOCs, GEW-4 had 1,770 ug/L tVOCs; on 6/30/17, GEW-1 had 77 ug/L tVOCs, GEW-3 had 857 ug/L tVOCs, GEW-4 had 1,835 ug/L tVOCs; on 7/26/17, GEW-1 had 164 ug/L tVOCs, GEW-3 had 672 ug/L tVOCs, GEW-4 had 1,452 ug/L tVOCs. Treated GW discharge from GWET system complied with NYCDEP criteria. There were no system shutdowns this quarter. Three well gauging events showed no LNAPL detected in any wells this quarter (absorbent socks were removed from MW-7R & MW-15 on 5/24/17 to see if LNAPL would collect, but no measurable product was observed). GW sampling on 7/26/17 showed well GEW-4 had 11,327 ug/L tVOCs (up from 9,799 ug/L in April 2017), well MW-6R had 384 ug/L tVOCs (up from 131 ug/L in April 2017), well MW-7R had 16,886 ug/L tVOCs (not sampled in April 2017, Jan. 2017 or Oct. 2016 due to LNAPL in well), well MW-9 had 2,540 ug/L tVOCs (not sampled previous 3 quarters), well MW-10 had 151 ug/L tVOCs (up from 115 ug/L in April 2017), well MW-11 had 316 ug/L tVOCs (down from 509 ug/L in April 2017), well MW-15 had 65,257 ug/L tVOCs (not sampled due to LNAPL in Jan. & April 2017, or Oct. 2016), well GEW-1 had 92 ug/L tVOCs (up from 10 ug/L in April 2017). URS will continue quarterly GW monitoring, use absorbent socks for LNAPL recovery from affected wells, optimize GWET system, evaluate need for surfactant injections, turn on pump in well GEW-1, decommission 11 injection wells, replace liquid-phase carbon adsorbers, insulate exposed section of discharge pipe from GWET to DEP sewer system. - JK 04/05/18: Reviewed System Performance Monitoring Rpt for Fourth Quarter 2017 by URS, dated 1/23/18 (in DecDocs). PID monitoring & lab sampling of GWET system air stripper's vapor influent & effluent showed no VOCs detected in either, so system's benzene discharge is in compliance. Monthly sampling of GWET system's treated water discharge showed compliance with NYCDEP discharge criteria. GWET system recovered 37,950 gals of GW during rpt period (7/26 - 10/31/17). Monthly sampling of GW influent from each extraction well (on 8/31, 9/28 & 10/31/17) showed total VOCs ranged from 13 ug/L to 607 ug/L in GEW-1, from 16 ug/L to 886 ug/L in GEW-3, and from 149 ug/L to 1,309 ug/L in GEW-4; highest VOC levels were seen in Aug. 2017, with decreases in Sept. & Oct. 2017 partly attributable to increased capture zone after bringing GEW-1 back on line. Well gauging showed no LNAPL detected in any wells this quarter. GW sampling on 10/30/17 showed well GEW-1 had 143 ug/L tVOCs (up from 92 ug/L in July 2017), well GEW-3 had 8 ug/L tVOCs (up from 6 ug/L in July 2017), well GEW-4 had 5,736 ug/L tVOCs (down from 11,327 ug/L in July 2017), well MW-6R had 191 ug/L tVOCs (down from 384 ug/L in July 2017), well MW-7R had 11,243 ug/L tVOCs (down from 16,886 ug/L in July 2017), well MW-8R had 220 ug/L tVOCs (not sampled in July 2017, had 5 ug/L tVOCs in April 2017), well MW-9 had 78 ug/L tVOCs (down from 2,540 ug/L in July 2017), well MW-10 had

**MIDTOWN SOUTH PRECINCT (Continued)**

**S105054624**

1,346 ug/L tVOCs (up from 151 ug/L in July 2017), well MW-11 had 3,693 ug/L tVOCs (up from 316 ug/L in July 2017), well MW-15 had 57,704 ug/L tVOCs (down from 65,257 ug/L in July 2017). Rpt states that following DEC's 3/24/17 approval, 7 injection wells were decommissioned on 10/2/17 (4 other injection wells approved for decommissioning could not be located & are presumed paved over during past construction work). Rpt states that URS will continue quarterly GW monitoring, continue manual product recovery from affected wells using absorbent socks, continue to optimize GWET system, continue to evaluate need for surfactant injections or other actions to address product & saturated soil contam, and will repair flow meters/totalizers for GEW-1 & GEW-4. - J. Kolleeny 06/05/18: Reviewed System Performance Monitoring Rpt for First Quarter 2018 by URS, dated 3/13/18 (in DecDocs). Rpt covers period from 11/01/17 thru 1/31/18. PID screening & lab sampling of GWET system air stripper discharge showed virtually no VOCs detected in vapor stream, no benzene in effluent, so discharge was in compliance with DEC stds. Monthly sampling of GWET system's treated water discharge showed compliance with NYCDEP discharge criteria. GWET system (extraction wells GEW-1 & GEW-4) recovered total of 80,692 gals of GW during rpt period, going by summing flows from extraction wells, or going by discharge flow meter, system recovered 61,786 gals of GW; URS states that discharge flow meter is more likely accurate, and speculates that mineral deposition in piping from extraction wells or in flow meters could cause erroneous readings; contractor (EnviroTrac) is scheduled to disassemble and clean piping system in Feb. 2018. Monthly sampling of GW influent from each extraction well showed total VOCs ranged from 6 ug/L to 20 ug/L in GEW-1, from 9 ug/L to 51 ug/L in GEW-3, and from 123 ug/L to 683 ug/L in GEW-4; highest tVOCs for each extraction well were from Jan. 2018 sampling event. Gauging of wells showed a sheen in MW-7R on 1/31/18 (absorbent sock was replaced), and MW-15 had 0.03 ft of LNAPL on 12/28/17 and 0.01 ft on 1/31/18; socks were replaced both times. GW sampling on 1/31/18 & 2/1/18 showed well GEW-3 had 14 ug/L tVOCs (had 8 ug/L in Oct. 2017), well GEW-4 had 6,829 ug/L tVOCs (up from 5,736 ug/L in Oct. 2017), well MW-6R had 119 ug/L tVOCs (down from 191 ug/L in Oct. 2017), well MW-8R had 103 ug/L tVOCs (down from 220 ug/L in Oct. 2017), well MW-9 had 93 ug/L tVOCs (up from 78 ug/L in Oct. 2017), well MW-10 had 1,028 ug/L tVOCs (down from 1,346 ug/L in Oct. 2017), well MW-11 had 17,814 ug/L tVOCs (up from 3,693 ug/L in Oct. 2017). Wells MW-7R & MW-15 were not sampled due to LNAPL; well GEW-1 could not be accessed. Rpt states that URS will continue quarterly GW monitoring, continue manual product recovery from affected wells using absorbent socks, continue to optimize GWET system, and continue to evaluate need for surfactant injections or other actions to address product & saturated soil contamination. - J. Kolleeny 10/11/18: Reviewed System Performance Monitoring Rpt for 2nd Quarter 2018 by URS dated 7/31/18 (in DecDocs). Rpt covers 2/1/18 thru 4/25/18. Rpt states that screening of air stripper vapor discharge showed no PID readings, and lab sampling of vapor influent & effluent on 4/11/18 showed no benzene (or other VOCs) detected, so GWET system was in compliance with air stds. Sampling of system's treated GW discharge showed compliance with NYCDEP criteria. Only extraction wells GEW-1 and GEW-4 operated this quarter. Monthly sampling of GW influent from each extraction well showed total VOCs ranged from 18 to 29 ug/L in GEW-1, from 29 to 147 ug/L in GEW-3, and from 30 to 2,522 ug/L in GEW-4. Well gauging on 4/6/18 showed a petroleum sheen in wells MW-7R

**MIDTOWN SOUTH PRECINCT (Continued)**

**S105054624**

and MW-15; both wells contain absorbent socks which are not yet fully saturated. GW sampling on 4/16 & 4/15/18 showed well GEW-1 had 452 ug/L total VOCs (not sampled in Jan. 2018 due to obstruction; had 143 ug/L tVOCs in Oct. 2017), well GEW-3 had 6 ug/L tVOCs (down from 14 ug/L in Jan. 2018), well GEW-4 had 15,533 ug/L tVOCs (up from 6,829 ug/L in Jan. 2018), well MW-6R had 3 ug/L tVOCs (down from 119 ug/L in Jan. 2018), well MW-8R was ND (had 103 ug/L tVOCs in Jan. 2018), well MW-9 had 15 ug/L tVOCs (down from 93 ug/L in Jan. 2018), well MW-10 had 3,079 ug/L tVOCs (up from 1,028 ug/L in Jan. 2018), well MW-11 had 12,695 ug/L tVOCs (down from 17,814 ug/L in Jan. 2018); wells MW-7R and MW-15 were not sampled due to presence of sheen (~0.001 ft of LNAPL). Rpt states that URS will continue quarterly GW monitoring, continue manual product recovery from affected wells using absorbent socks, continue to optimize GWET system, and continue to evaluate need for surfactant injections or other actions to address product & saturated soil contamination. - J. Kolleeny 12/20/18: Reviewed System Performance Monitoring Rpt for Third Quarter 2018 by URS dated 11/5/18 (in DecDocs). Rpt covers 4/26/18 thru 7/26/18. Rpt states that system air stripper vapor influent & effluent PID readings were all zero, except on 7/20/18 when effluent measured 0.10 ppmv; 2% estimated benzene concentration would be 0.002 ppmv, which is well below emission limit of 2.0 ppmv. Lab analysis of vapor influent/effluent collected on 8/15/18 showed no benzene or other VOCs detected, so GWET system was in compliance with air stds. Sampling of system's treated GW discharge showed compliance with NYCDEP criteria. Only extraction wells GEW-1 and GEW-4 operated this quarter; GEW-1 recovered 72,207 gals of GW, GEW-4 recovered 3,941 gals. Rpt states that no measurable LNAPL or sheen was observed in any wells this quarter; absorbent socks in wells MW-7R & MW-15 were 75% saturated and replaced on 7/30/18. GW sampling on 7/30/18 showed well GEW-1 had 230 ug/L total VOCs (down from 452 ug/L in April 2018), well GEW-3 had 16 ug/L tVOCs (up from 6 ug/L in April 2018), well GEW-4 had 20,027 ug/L tVOCs (up from 15,553 ug/L in April 2018), well MW-6R was ND (had 3 ug/L tVOCs in April 2018), well MW-8R had 59 ug/L tVOCs (was ND in April 2018), well MW-9 had 64 ug/L tVOCs (up from 15 ug/L in April 2018), well MW-10 had 3,732 ug/L tVOCs (up from 3,079 ug/L in April 2018), well MW-11 had 9,378 ug/L tVOCs (down from 12,695 ug/L in April 2018). Rpt states that wells MW-7R and MW-15 were not sampled due to product (?). Rpt states that URS will continue quarterly GW monitoring, continue manual product recovery from affected wells using absorbent socks, continue to optimize GWET system, evaluate need for add'l wells to south of MW-10 & MW-11 to better delineate plume, and continue to evaluate need for surfactant injections or other actions to address product & saturated soil contamination. - J. Kolleeny 03/07/19: Reviewed System Performance Monitoring Rpt for Fourth Quarter 2018 by URS dated 1/16/19 (in DecDocs). Rpt covers 7/27/18 thru 10/23/18. On-site GWET system air stripper vapor influent & effluent PID readings were all zero this quarter. Lab analysis of system vapor influent & effluent samples collected on 10/23/18 showed influent had 57 ppbv total volatiles (all MTBE), and effluent was ND; no benzene was detected, system was in compliance with DEC air stds. System's treated GW discharge was in compliance with NYCDEP criteria. Extraction wells GEW-1 and GEW-4 operated this quarter; GEW-1 collected 59,684 gals, GEW-4 collected 4,473 gals. Gauging of wells showed product sheen in well MW-15 in Oct. 2018; absorbent socks have been placed in MW-15 and MW-7R. GW sampling on 10/10/18 showed well MW-7R had 2,921 ug/L total VOCs (was

**MIDTOWN SOUTH PRECINCT (Continued)**

**S105054624**

not sampled for past several quarters due to LNAPL), well MW-9 had 92 ug/L tVOCs (up from 64 ug/L in July 2018), well MW-10 had 3,176 ug/L tVOCs (down from 3,732 ug/L in July 2018), well MW-11 had 2,758 ug/L tVOCs (down from 9,378 ug/L in July 2018), well GEW-1 had 160 ug/L tVOCs (down from 230 ug/L in July 2018), well GEW-4 had 19,134 ug/L tVOCs (down from 20,027 ug/L in July 2018). Rpt states that URS will continue quarterly GW monitoring, continue manual product recovery from affected wells using absorbent socks, continue to optimize GWET system, evaluate need for add'l wells to south of MW-10 & MW-11 to better delineate plume, and continue to evaluate need for surfactant injections or other actions to address product & saturated soil contamination. Also, URS will lower pump on set-point for P-104 in extraction well GEW-4 from 12 ft to 14 ft bgs, and will monitor & record pump cycle frequencies and durations before and after adjusting set-point. - J. Kolleeny 06/17/19: Reviewed System Performance Monitoring Rpt for First Quarter 2019 by URS dated 5/2/19 (in DecDocs). Rpt covers 10/24/18 thru 1/31/19. On-site GWET system air stripper vapor influent & effluent PID readings were all zero this quarter, and no VOCs were detected in lab samples of system vapor influent & effluent samples, so system vapor discharge was in compliance with DEC air standards. System's GW effluent was in compliance with NYCDEP criteria. During rpt period, GW extraction well GEW-1 recovered 48,419 gals and GEW-4 recovered 4,712 gals, which is less than previous quarter due to frequent high water alarm shutdowns. EnviroTrac cleaned air stripper influent strainer and reduced flow from EQ tank to air stripper. Problem seems to be resolved, as system operated without shutting down from 1/3/19 to 1/31/19 (end of rpt period). No measurable LNAPL was detected this quarter, but sheen was observed in MW-15 in Jan. 2019 and absorbent socks in both MW-15 and MW-7R were partly saturated with LNAPL. GW sampling on 1/14/19 showed well MW-7R had 1,168 ug/L total VOCs (down from 2,921 ug/L in Oct. 2018), well MW-10 had 1,149 ug/L tVOCs (down from 3,176 ug/L in Oct. 2018), well MW-11 had 70 ug/L tVOCs (down from 2,758 ug/L in Oct. 2018), well GEW-1 had 185 ug/L tVOCs (up from 160 ug/L in Oct. 2018), well GEW-4 had 3,242 ug/L tVOCs (down from 19,134 ug/L in Oct. 2018). Rpt notes that all wells have shown significant decrease in tVOCs over last several quarters. Based on data, URS will continue: quarterly GW monitoring, manual product recovery from affected wells using absorbent socks, optimizing GWET system, performing scheduled quarterly & semiannual system maintenance, and evaluating need for surfactant injections or other actions to address product & saturated soil contamination. - JK 08/21/19: Reviewed System Performance Monitoring Rpt for Second Quarter 2019 by URS dated 8/1/19 (in DecDocs). Rpt covers 2/1/19 thru 4/23/19. On-site GWET system air stripper vapor influent & effluent PID readings were zero this quarter except on 3/6/19, when influent was 0.1 ppmv and effluent was 0.2 ppmv. Based on PID reading and assumption that benzene is 2% of effluent, benzene was well below air discharge standard. Lab sampling of GWET air influent/effluent showed influent had 67 ppbv total volatiles, including 34 ppbv of benzene, but effluent air was ND. System's GW effluent was in compliance with NYCDEP criteria. Due to problems with flow meter on one GWE pump, gals of GW recovered/treated this period is estimated to be ~75,045 gals; NYCDEP flow meter showed 79,656 gals during rpt period. Well gauging data table indicates well MW-15 had 0.001 ft of LNAPL (trace or sheen) on 2/14/19 and on 4/17/19; absorbent sock was 75% saturated on 4/17/19 and was replaced. GW sampling on 4/16-17/19 showed well

MIDTOWN SOUTH PRECINCT (Continued)

S105054624

GEW-1 had 335 ug/L tVOCs (up from 185 ug/L in Jan. 2019), well GEW-4 had 3,545 ug/L tVOCs (up from 3,232 ug/L in Jan. 2019), well MW-6R had 9 ug/L tVOCs (was ND in Jan. 2019), well MW-7R had 2,315 ug/L tVOCs (up from 1,168 ug/L in Jan. 2019), well MW-9 had 123 ug/L tVOCs (up from 4 ug/L in Jan. 2019), well MW-10 had 2,340 ug/L tVOCs (up from 1,149 ug/L in Jan. 2019), well MW-11 had 3,427 ug/L tVOCs (up from 70 ug/L in Jan. 2019). Rpt notes that water table was 1 ft lower in April than in Jan. 2019, suggesting that increases in tVOCs in GW were due to release of contaminants trapped in soil pore spaces. Based on data, URS will repair & recalibrate flow meters in GWE wells or replace units, and will continue: quarterly GW monitoring, manual product recovery from affected wells using absorbent socks, optimizing GWET system, performing scheduled quarterly & semiannual system maintenance, and evaluating need for surfactant injections or other actions to address product & saturated soil contamination. - JK 11/12/19: Received phone call from Kevin Shanahan of URS/AECOM, who reported that subcontractor at site discovered a hole in side of vapor-phase carbon unit that treats air stripper off-gas; system has been shut down. Kevin said options are to repair unit, replace unit, or discharge directly to atmosphere without vapor treatment. I said if they choose to go with no treatment, I would need to see a proposal with supporting data showing that system's untreated vapor influent meets air discharge standards. Kevin agreed with this. - J. Kolleeny 11/13/19: Received email from Kevin Shanahan of URS/AECOM: Jonathan, As we discussed yesterday, GWET remediation system at Midtown South Police Precinct was turned off on Nov. 11, 2019 during a routine O&M inspection. Our subcontractor EnviroTrac turned system off after observing a hole in side of vapor-phase granular activated carbon (VGAC) tank and carbon discharged to floor of treatment system enclosure. Attached photo illustrates hole in VGAC tank. URS and EnviroTrac are currently evaluating actions necessary to return remediation system to operation. These actions may include repairing VGAC unit, replacing VGAC unit, or removing unit from air stripper emission flow. URS is reviewing historical system data and if it seems that best option is to eliminate VGAC unit from air stripper emission flow, we will send you a letter with that recommendation and request your approval. Please contact me if you have any comments or questions. - J. Kolleeny 11/26/19: Reviewed Request to Discontinue Air Emissions Treatment (Revised) by URS, dated 11/25/19 (in DecDocs). Rpt states that on 11/12/19 VGAC unit that treats air stripper off-gas for on-site GWET system was found to be damaged (has a hole in side, black carbon has apparently been spewed from hole). URS evaluated options: repair VGAC unit, replace unit, or discharge untreated system off-gas directly to atmosphere. URS recommends last option, proposing to connect air stripper directly to system s discharge stack and discontinue air emissions treatment. In support of this proposal, URS provided lab analytical data for system vapor samples showing both benzene and total VOC concentrations in system influent (i.e., untreated air stripper off-gas) to be below benzene discharge standard (2,000 ppbv at 200 cfm air flow) since at least 2009. URS states that when remedial system is reactivated, air emissions will be monitored weekly with a PID and sampled quarterly for lab analysis to ensure compliance with regulatory limit. I sent letter (in DecDocs) to Jerry Aliberti of DDC, cc's to Carlos Maldonado of DDC, Kevin Shanahan & Harvey Roberts of URS, approving this proposal, but requiring that after system has been reactivated and running for several hours, a vapor discharge sample should be

**MIDTOWN SOUTH PRECINCT (Continued)**

**S105054624**

collected for lab analysis to confirm compliance with air discharge standard, and that even if discharge meets standard, if any nuisance odors are reported, system should be shut down and refitted with air emissions treatment. - J. Kolleeny 12/10/19: Reviewed System Performance Monitoring Rpt for Third Quarter 2019 by URS, dated 11/5/19 (in DecDocs). Rpt covers period from 4/24/19 to 7/31/19. PID screening of air stripper off-gas (effluent after vapor phase carbon adsorption treatment) gave readings of 0.0 ppm; air samples collected on 7/18/19 had benzene at 40.3 ppbv in influent and 0.97 ppbv in effluent, well below benzene discharge std., so GWET is in compliance. NYCDEP discharge flow totalizer showed 98,084 gals of GW pumped during 99-day period; flow meters for individual extraction wells totaled 70,530 gals during this period. One system shutdown occurred during rpt period: system was off when EnviroTrac (O&M contractor) arrived at site on 7/18/19, apparently due to power outage caused by thunderstorm on previous day. Rpt states that no measurable product or sheen was observed in wells during 3rd quarter 2019; absorbent sock in well MW-7R was last replaced in Aug. 2018, sock in well MW-15 was last replaced in April 2019. GW sampling on 7/17/19 showed well GEW-1 had 147 ug/L total VOCs (down from 335 ug/L in April 2019), well GEW-4 had 2,049 ug/L tVOCs (down from 3,545 ug/L in April 2019), well MW-6R had 37 ug/L tVOCs (up from 9 ug/L in April 2019), well MW-7R had 1,962 ug/L tVOCs (down from 2,315 ug/L plus sheen in April 2019), well MW-9 had 79 ug/L tVOCs (down from 123 ug/L in April 2019), well MW-10 had 600 ug/L tVOCs (down from 2,340 ug/L in April 2019), well MW-11 had 7,913 ug/L tVOCs (up from 3,427 ug/L in April 2019), well MW-15 had 33,749 ug/L tVOCs (had 0.001 ft of product in April 2019 so was not sampled; same in Jan. 2019 and Oct. 2018). URS will continue quarterly GW monitoring, continue product recovery using socks or other appropriate methods, optimize GWET system to maintain/increase GW capture zone, perform scheduled quarterly & semiannual maintenance tasks, and continue to evaluate need for surfactant injections or other actions to address residual product and saturated zone soil contamination. - J. Kolleeny 02/03/20: Reviewed System Performance Monitoring Rpt for Fourth Quarter 2019 by URS, dated 1/13/20 (in DecDocs). Rpt covers Aug. 1st thru Oct. 31st, 2019. Rpt states that PID screening and lab sampling of GWET system's air effluent (from air stripper) showed it was in compliance with DEC air discharge stds (PID screening was 0.0 ppm; lab analysis on 10/25/19 showed air influent was ND for all VOCs, effluent had 0.483 ppbv of benzene and 3.562 ppbv of tVOCs). NYCDEP discharge flow totalizer showed 59,388 gals of GW were pumped during 92-day period; this is lower than previous quarter, which URS attributes to issues with high-level alarms in EQ tank and air stripper sump, which shut down pumping operations. Rpt states that system was off upon arrival on O&M visits numerous times this quarter due to high-level alarms. Sampling of GWET system water effluent showed it was in compliance with NYCDEP discharge criteria. Rpt states that well gauging on 10/16/19 showed 0.18 ft of LNAPL in well GEW-1; product was sampled for fingerprint analysis, which indicated it most closely resembled motor oil. There are no motor oil tanks at site and no known releases of motor oil at site. GW sampling on 10/16 and 10/17/19 showed well GEW-4 had 4,804 ug/L total VOCs (up from 2,049 ug/L in July 2019), well MW-6R had 67 ug/L tVOCs (up from 37 ug/L in July 2019), well MW-7R had 1,214 ug/L tVOCs (down from 1,962 ug/L in July 2019), well MW-8R had 483 ug/L tVOCs (not sampled in Jan., April or July 2019), well MW-9 had 108 ug/L tVOCs (up from 79

**MIDTOWN SOUTH PRECINCT (Continued)**

**S105054624**

ug/L in July 2019), well MW-10 had 759 ug/L tVOCs (up from 600 ug/L in July 2019), well MW-11 had 6,936 ug/L tVOCs (down from 7,913 ug/L in July 2019), well MW-15 had 45,067 ug/L tVOCs (up from 33,749 ug/L in July 2019). Rpt concludes that soil & GW contamination remain sufficiently high to warrant continued remediation; minor quantities of free product are still present in a limited area. Extent of dissolved plume is ~50 x 35 ft. URS will continue quarterly GW monitoring, activate spill buster in GEW-1 or install absorbent sock to address LNAPL, continue product recovery from affected wells using socks or other appropriate methods, optimize GWET system to maintain/increase GW capture zone, perform scheduled quarterly & semiannual maintenance tasks, and continue to evaluate need for surfactant injections or other actions to address residual product and saturated zone soil contamination. Rpt states that shutdown of GWET system in Nov. 2019 due to hole found in vapor-phase carbon treatment unit, and DEC approval of system operation w/o vapor treatment, will be discussed in next quarterly rpt. - J. Kolleeny 04/14/20: Reviewed System Performance Monitoring Rpt for First Quarter 2020 by URS, dated 3/31/20. Rpt covers period from Nov. 2019 thru Jan. 2020. Rpt notes that in Nov. 2019, on-site system's GAC unit (treating air stripper off-gas) was found to be damaged. System was shut down, and URS proposed to modify system to discharge to atmosphere without treatment, providing supporting data showing vapor stream meets DEC standards. DEC approved this proposal in Nov. 2019. EnviroTrac completed system modifications and system was re-started on 2/25/20. Info regarding system modifications and re-start will be in next quarterly rpt. A system vapor discharge sample was collected after re-start on 2/26/20, as required by DEC, and benzene was in compliance with discharge standard. Rpt notes that no monthly GW samples were collected from GWET wells and no system water discharge sample was collected this quarter because system was shut down. Rpt states that free product was detected in well GWET-1 in Nov. 2019 (0.34 ft) and Dec. 2019 (0.12 ft); product was ID'ed as resembling motor oil; active tanks at site store gasoline & fuel oil, there are no known releases of motor oil at site. On 3/4/20, EnviroTrac initiated product recovery from GWET-1 using a Spill Buster pump. URS speculates that presence of product in GWET-1 may be related to change in water table elevations due to system shutdown (altho product was first detected in GWET-1 in Oct. 2019, prior to shutdown). GW sampling on Jan. 20 & 21, 2020 showed well MW-6R had 3 ug/L total VOCs (down from 67 ug/L in Oct. 2019), well MW-7R had 643 ug/L tVOCs (down from 1,214 ug/L in Oct. 2019), well MW-8R had 5 ug/L tVOCs (down from 483 ug/L in Oct. 2019), well MW-9 had 2 ug/L tVOCs (down from 108 ug/L in Oct. 2019), well MW-10 had 29 ug/L tVOCs (down from 759 ug/L in Oct. 2019), well MW-11 had 55 ug/L tVOCs (down from 6,936 ug/L in Oct. 2019), well MW-15 could not be sampled (blocked by vehicle), well GWET-3 had 5 ug/L tVOCs (down from 6 ug/L in Oct. 2019), well GWET-4 had 151 ug/L tVOCs (down from 4,804 ug/L in Oct. 2019). Rpt states that decreases in contam levels in 1st quarter 2020 are likely related to shutdown of GWET system (?). URS will continue quarterly GW monitoring, continue product recovery from well GWET-1 using Spill Buster (or absorbent socks, depending on thickness), and continue system O&M & optimization. - J. Kolleeny 08/05/20: Reviewed System Performance Monitoring Rpt for Second Quarter 2020 by URS dated 7/20/20. Rpt covers period from 2/1/20 thru 4/29/20. Rpt states that EnviroTrac completed modifications to GWET system to allow air stripper off-gas to bypass damaged carbon unit & discharge to

**S105054624**

atmosphere, and restarted system on 2/25/20. An air sample taken 2/26 showed benzene in system exhaust is well below discharge limit. (Sample had 21.8 ppbv benzene, 349.9 ppbv total VOCs.) A quarterly air discharge sample collected in April was not analyzed when lab determined that sample container leaked so results would be invalid. Monitoring of system air emissions will continue weekly w/PID and quarterly with sampling for lab analysis. According to NYCDEP totalizer, GWET system treated & discharged 25,726 gals of GW from 2/25/20 to 4/29/20. Free product was detected only in recovery well GWET-1 this quarter, ranging from 0.11 to 0.23 ft. URS did not perform any product recovery this quarter, but on 3/4/20 EnviroTrac recovered product using Spill Buster pump (amt unknown). Product was ID'ed in Oct. 2019 as resembling motor oil. GW sampling on 4/20-21/20 showed well MW-7R had 1,079 ug/L total VOCs (up from 643 ug/L in Jan. 2020), well MW-10 had 145 ug/L tVOCs (up from 29 ug/L in Jan. 2020), well MW-11 had 39 ug/L tVOCs (down from 55 ug/L in Jan. 2020), well MW-15 had 33,469 ug/L tVOCs (not sampled in Jan. 2020 because blocked by vehicle), well GWET-4 had 2,681 ug/L tVOCs (up from 151 ug/L in Jan. 2020); well GWET-1 was not sampled due to LNAPL, well MW-9 because dry, MW-13 because blocked by equipment; other wells sampled were either ND or have very low tVOCs consistent with previous quarter. URS will continue quarterly GW monitoring, continue product recovery from GWET-1 (and any other wells with product) using Spill Buster or absorbent socks, and continue system O&M & optimization. - J. Kolleeny 12/14/20: Reviewed System Performance Monitoring Rpt for Third Quarter 2020 by URS dated 11/3/20. Rpt covers period from May thru July 2020. Off-gas from on-site remedial system's air stripper was sampled in June & July 2020 and benzene was in compliance with discharge limit (2.25 ppbv in June, ND in July). According to NYCDEP Discharge Flow Totalizer, system pumped 29,756 gals of GW during rpt period. Sampling of system GW influent showed total VOCs ranged up to 3,112 ug/L in GEW-1, up to 2,767 ug/L in GEW-3, and up to 4,136 ug/L in GEW-4. Sampling of system's water discharge showed it was in compliance with NYCDEP criteria. Semiannual redevelopment of extraction wells was performed on 6/26/20. Free product was detected in well GEW-1 this quarter (0.06 to 0.12 ft); this well has had measurable product detected every month since Oct. 2019. A Spill Buster pump was installed in this well in March 2020; during this quarter ~3 inches of product accumulated in storage drum, indicating product is being recovered by system. A product sample collected/analyzed in Oct. 2019 indicated product most closely resembled motor oil. Rpt speculates that appearance of product may be related to water level changes due to recent system shutdown. GW sampling on 7/20/20 showed well GEW-4 had 3,237 ug/L total VOCs (up from 2,681 ug/L in April 2020), well MW-7R had 3,425 ug/L tVOCs (up from 1,079 ug/L in April 2020), well MW-10 had 1,199 ug/L tVOCs (up from 145 ug/L in April 2020), well MW-11 had 152 ug/L tVOCs (up from 39 ug/L in April 2020), well MW-15 had 31,134 ug/L tVOCs (down from 33,469 ug/L in April 2020); other wells sampled were either ND or had very low tVOCs. Well MW-9 was dry and MW-13 was blocked by equipment, so those wells could not be sampled. Rpt states that URS will continue quarterly GW monitoring, collection of LNAPL from GEW-1 via Spill Buster, manual product recovery with absorbent socks or other methods as needed, system OM&M and optimization, and evaluation of need for supplemental remedial actions. - J. Kolleeny 03/16/21: Reviewed System Performance Monitoring Rpt for Fourth Quarter 2020 by URS dated 2/9/21. Rpt covers period from August thru Oct. 2020.

S105054624

Sampling of on-site remedial system's off-gas on 10/29/20 showed it had 0.0147 ppmv of benzene, in compliance with std of 2.0 ppmv. Extraction wells GEW-1 and GEW-4 operated during this quarter; NYCDEP Discharge Flow Totalizer indicated system pumped 18,039 gals of GW during 91-day rpt period. Monthly sampling of system GW influent showed total VOCs in GEW-1 ranged from 505 ug/L to 1,049 ug/L in GEW-1, from 748 ug/L to 800 ug/L in GEW-3, and from 1,425 ug/L to 1,654 ug/L in GEW-4. System GW effluent was in compliance with NYCDEP discharge stds. Free product was detected in GEW-1 this quarter, ranging from 0.06 to 0.12 ft. Based on measurements of product storage drum, Spill Buster recovered ~3.6 gals of product this quarter. Qtrly GW sampling showed well MW-7R had 3,352 ug/L total VOCs (down from 3,425 ug/L in July 2020), well MW-8R had 18 ug/L tVOCs (down from 37 ug/L in July 2020), well MW-10 had 96 ug/L tVOCs (down from 1,199 ug/L in July 2020), well MW-11 had 59 ug/L tVOCs (down from 152 ug/L in July 2020), well MW-15 had 33,787 ug/L tVOCs (up from 31,134 ug/L in July 2020), extraction well GEW-4 had 2,005 ug/L tVOCs (down from 3,237 ug/L in July 2020); extraction well GEW-1 had 0.06 ft of LNAPL and was not sampled. Rpt concludes that GWET system continues to be effective in reducing GW contamination at site. URS will continue quarterly GW monitoring, collection of LNAPL from GEW-1 via Spill Buster, system OM&M and optimization, and evaluation of need for supplemental remedial actions possibly including surfactant injections. - J. Kolleeny 06/07/21: Reviewed System Performance Monitoring Rpt for 10/30/21 thru 1/27/21 by URS dated 5/13/21. Sampling of on-site remedial system's off-gas on 1/27/21 showed in had 0.00107 ppmv of benzene, in compliance with std of 2.0 ppmv. Extraction wells GEW-1 & GEW-4 operated during this rpt period. System's flow-thru meter, which reflects total volume of GW pumped, indicated that 10,764 gals of GW were pumped from 10/30/20 to 1/27/21 (~120 gpd or 0.08 gpm); however, rpt states that data from this meter have been questionable since April 2018. NYCDEP discharge flow totalizer recorded total of 70,811 gals of GW pumped thru 12/30/20 (62 days, ~1,142 gpd or 0.79 gpm), after which it stopped working. Influent to GWET system was sampled on 11/23/20, 12/22/20 and 1/27/21; results showed total VOCs in GWET-1 ranged from 105 to 123 ug/L, tVOCs in GWET-3 ranged from 174 ug/L to 2,206 ug/L, and tVOCs in GWET-4 ranged from 178 ug/L to 2,823 ug/L. System GW effluent was in compliance with NYCDEP discharge stds. Free product was detected in GEW-1 this rpt period, ranging from 0.09 to 0.16 ft. Based on measurements of product storage drum, Spill Buster in GEW-1 recovered only ~1.6 gals of product this period. Product has been ID'ed as resembling motor oil, but there have been no known releases of motor oil at site. GW sampling on 1/6/21 showed well MW-10 had 878 ug/L total VOCs (up from 96 ug/L in Oct. 2020), well MW-11 had 4,242 ug/L tVOCs (up from 59 ug/L in Oct. 2020), well GEW-4 had 1,665 ug/L tVOCs (down from 2,005 ug/L in Oct. 2020). Well GEW-1 was not sampled due to presence of LNAPL, wells MW-7R, MW-8R & MW-15 could not be sampled because they were blocked by vehicles, MW-9 was dry, and MW-13 was blocked by equipment. Rpt concludes that GWET system continues to be effective in reducing GW contam at site. URS will continue quarterly GW monitoring, collection of LNAPL from GEW-1 by Spill Buster, system OM&M and optimization, and evaluation of need for supplt'l remedial actions possibly including surfactant injections. - JK"

DEC Memo: "This site is already an active longterm remediation site - Spill #9512583 As part of this remediation effort, there are existing monitoring wells on the site that are tested periodically. Today, the geologist found 4 ft of gasoline product floating on the water table in a well that previously had nothing. The manway was checked and found to be full of gasoline as well. This was clearly an overflow from a recent delivery. Franklin and/or URS is working the long term cleanup of the site and has arranged for a vac truck to clear out whatever is possible right now. On a long term basis, the existing

and Harvey Roberts of URS (DDC consultant handling long-term remediation of this site under DDC consent order), with cc to Afsar Samani of DDC, stating: I've been informed by our Spill Response staff that spills are continuing to occur related to damaged fill line to gasoline UST at Midtown South. Initial spill (0613411) occurred in March '07 when gasoline was found in tank sump and nearby monitoring well. According to URS's system performance reports, Franklin Co. determined that tank's fill line was damaged, and they installed direct fill to tank to bypass damaged line. Do you know if Franklin plugged up old fill port when they installed direct fill? It appears that fuel deliveries continue to be made to old fill line, and product keeps showing up in tank sump and monitoring wells. On May 23rd, spill 0702185 was reported by NYPD because sump was filled with gasoline and Veeder Root alarm was going off. Today, another spill was called in (0705553) because of product in sump. Please take necessary steps to have old fill port blocked so it cannot be used anymore (or repaired so it won't leak) as soon as possible, and please also check out entire tank system to make certain it is damaged fill line that's problem, and that there are no other leaks in system. Please get back to me on this and let me know what actions have been taken to address this situation. Afterwards, spoke again with Ryan Piper, who suggested tank be taken out of service and emptied until problem is solved. Sent email to Afsar Samani of DDC, cc's to Jane Staten & Harvey Roberts of URS: In light of ongoing problems with gasoline UST at Midtown South Precinct, I strongly suggest that tank be taken out of service and emptied until problem(s) with tank and piping has/have been addressed. If this is not practical because police have no alternative location to fuel their vehicles, then please take whatever steps are necessary to immediately rectify problem(s) with tank system. NYCDDC is conducting remediation at this site using SVE and groundwater extraction & treatment systems, and these ongoing spills of fresh gasoline to subsurface will set back remedial efforts for months, or more likely, years, so it is in DDC's interest to resolve this situation promptly. In addition, these releases are a violation of Environmental Conservation Law, as you are aware, and if they continue to occur, our spill responders may be inclined to call Environmental Conservation Officers to site to issue summons. On 8/16/07, received email from Afsar Samani of DDC: Harvey informed me that vac-truck is scheduled to remove product from sump today. Also, NYPD subcontractor is going to be scheduled to repair fill line. URS is looking into this and will make all necessary action to make sure tank and fill port is tight. Then, received email from Jane Staten of URS: I just spoke with Lt. Pete Polanco for an update on problems with gasoline tank at Midtown South Precinct. According to Lt. Polanco, NYPD tank contractor inspected fuel fill line this morning and found no problems with integrity of line. Therefore, Lt. Polanco believes that product in tank sump was caused by fuel delivery vendor. NYPD are expecting fuel delivery vendor at site this afternoon to discuss problem and also to remove gasoline currently in sump. I will keep you posted. I then sent email to Afsar Samani, with cc's to Jane Staten & Harvey Roberts of URS, Jerry Aliberti of DDC and Lt. Peter Polanco of NYPD: Thank you for your response. Please be advised that no fuel deliveries should be made to gasoline tank at Midtown South until tank system has been tested to insure integrity of all elements of system. Documentation of tightness test results, and of any repairs made to fill line since problem was discovered in March 2007,

**MIDTOWN SOUTH PRECINCT (Continued)**

**S105054624**

must be submitted to NYSDEC before fuel deliveries can resume. This situation is high priority and NYPD should arrange for tightness testing immediately. Then, received phone call from Lt. Polanco of NYPD, who said repairs to damaged fill line were done in June and fill line was tightness tested and passed, and he believes current problem is due to fuel delivery vendor not hooking up vapor recovery line (truck is parked in street long distance from fill port, so there's long length of delivery hose). He said product will be removed from sump and fill line will be tested again. I asked him to submit documentation of repair work and tightness testing, and sent him email with my address. Then, I was cc'd on email from Afsar Samani of DDC to Lt. Polanco of NYPD: We were informed by following correspondence from NYSDEC that gasoline tank over at Midtown South Police Precinct should not receive any more deliveries until a tightness test has been scheduled. Please let DDC know when you can arrange for your subcontractor to perform a tightness test on this tank. This is very crucial to remedial effort that URS is performing to clean up site on behalf of DDC. - J. Kolleeny 08/21/07: Received fax on 8/20/07 from Lt. Polanco of NYPD fuel control unit, with letter from Energy Tank & Environmental Services dated 7/16/07 describing repairs to and pressure testing of fill line to gasoline UST (in eDocs). Sent same-day email response to Lt. Polanco, cc's to Afsar Samani & Jerry Aliberti (DDC), Jane Staten & Harvey Roberts (URS): Thank you for faxed description of repair work to fill line of gasoline UST at Midtown South and diagram of site, tank and fill port, provided by Energy Tank & Environmental Services, Inc. However, these items do not completely satisfy my request for documentation of tank repairs and testing of fill line, and they raise additional questions. Page that describes repairs and subsequent pressure testing of line is dated 7/16/07. Is that date when repairs were done? I would like to see dated invoice for repair work in addition to this description. Description states that problem was with primary fill line, and that secondary line was intact, which allowed product to go into containment sump and not into ground. However, in March when this problem was first discovered, URS field personnel reported 5 feet of fresh gasoline in groundwater extraction well that had never had gasoline in it before, so somehow product did get into ground. If repairs were done on 7/16/07, why was gasoline again reported in containment sump on top of tank on August 15th (spill number 0705553)? You mentioned that this was caused by delivery person not hooking up vapor recovery line, yet our Petroleum Bulk Storage staff say this would not result in product appearing in sump. I would greatly appreciate it if you could provide additional documentation of repair work, and if NYPD would schedule a tightness test of all lines going into and out of tank, as well as a hydrostatic test of tank's containment sump. I would like to be informed in advance when these tests have been scheduled, so that I can attend. - J. Kolleeny 09/14/07: Visited site 9/10/07 to observe hydrostatic test of tank sump and tightness test of fill line. Mike Suppe of Fenley & Nichol on hand, said sump held water, more or less (slight drip along electric conduit extending from this sump to next sump at end of tank), for over 2 hours. He said no way to test fill line (it's about 2-3 feet long from remote fill port) without physically removing it, but he will test entire tank system. In discussions of how product could turn up in sump, I mentioned that Lt. Polanco said it had to do with delivery person not hooking up vapor recovery line. Mike wasn't clear on how that would cause

MIDTOWN SOUTH PRECINCT (Continued)

S105054624

product to appear in sump. I called Lt. Polanco, who said by not hooking up vapor recovery during delivery, excessive back pressure was created, so when delivery hose was disconnected, product would back up and spill into overflow bucket, then drain to sump. Mike Suppe said this isn't possible, since any fuel spilled into spill bucket would drain back into fill line, then into tank (not sump). Mike suggested that temporary fill, which was used while remote fill line was awaiting repair, had not been properly capped once NYPD switched back to using remote fill, and poor threading on top of direct fill extension cylinder and improperly screwed-on cap for this extension, may have resulted in product spilling out capped off temporary fill, again related to back pressure from not hooking up vapor recovery (see photos in eDocs image folder). NYPD now has on-site a long hose to be used for vapor recovery, and reportedly there have not been any more problems with product appearing in sump after deliveries. Spoke with Mike Suppe on 9/11/07, who said tank system passed test. I discussed whole situation with Jane Staten of URS, who forwarded to me email from Harvey Roberts of URS (in eDocs) indicating temporary direct fill was installed by NYPD, not Franklin Co. as stated in URS's system performance reports for site. While this may explain why product was appearing in sump, none of this adequately explains how product escaped into ground and turned up in groundwater extraction wells and monitoring wells (for site cleanup under spill no. 9512583). Mike Suppe indicated if damaged fill line was unknown for a long time, sump could've filled up with gas during deliveries and overtopped inner rim of sump, and from there it could seep into ground. URS will continue to gauge nearby wells for product levels, and see if they continue to decrease. Harvey Roberts email also calls into question when exactly NYPD had repairs done to fill line. I contact Lt. Polanco again and asked for more detailed documentation of repair work, indicating date(s) and nature of work done. He said he would work on getting me that info. - J. Kolleeny 09/17/07: Received fax from Lt. Polanco, a revised version of earlier fax with statement by Energy Tank & Environmental Services regarding repair work on fuel fill line. Statement is still dated 7/16/07; it now states that they uncovered line on 7/5/07, reconnected and tested line on 7/6/07, reporting that line held pressure during backfilling, they then witnessed a fuel delivery on 7/9/07 with no leaks observed, so they re-surfaced area. - J. Kolleeny 01/04/08: On 12/19/07, sent email to Jane Staten of URS: I recently asked you to ask your field personnel to check if gasoline is still showing up in tank-top sump after fuel deliveries at this site. Do you know if they've checked on this? On 12/26/07, received email reply from Jane: Our field technician checked tank sumps at Midtown South on 11/29/07. One sump was dry and other contained a little water. There was no evidence of gasoline. Based on no new reports of gasoline appearing in tank top sump, it appears problem(s) that caused this and related spills has (have) been addressed; OK to close spill. - J. Kolleeny "

DEC Memo: "02/19/08: This spill case transferred from V. Zhune of Spill Response staff to J. Kolley. On Feb. 13, URS (Franklin?) personnel at site noted 10 ft. of fresh free product in a groundwater extraction well (GEW-1), and several ft. of product in nearby monitoring wells. Product was bailed down to less than a foot. On Feb. 15th, URS returned to site and measured 5 ft. of product in GEW-1, and noted that spill buster in well was not operating. Nearby well MW-6 had 3 ft. of product. I instructed Jane Staten of URS to call in a new spill. Contacted Lt. Pete Polanco of NYPD who said they had arranged for Fenley & Nicol to perform a tank system tightness test on Saturday, Feb. 16th. I asked that the results be faxed to me when available. On Tuesday Feb. 19th, received test results by fax from Lt. Polanco, tank system tested tight (results in eDocs). Contacted Jane Staten of URS, who said their field staff visited site on Monday Feb. 18th, found no product in GEW-1, 3 ft. of product in MW-6, and 0.02 ft. in MW-7. She suggested I ask NYPD to look into their inventory records, especially delivery versus tank volume

records, for deliveries between Feb. 6 and Feb. 13. I sent email to Lt. Polanco asking him to look into these records and let me know. - J. Kolleeny 02/21/08: Received email reply from Lt. Polanco of NYPD: We did an analysis with the last few deliveries. We determined that during the period of Feb 6 through Feb 13, 3167 gallons was used and we were able to account for 3146 gallons. Therefore we have an unaccounted loss of less than 1%. We passed the tank tightness test. So the question still remains where is this product coming from? Obviously it is not from my fuel site. As of today MTS Precinct is empty and will not be having a delivery for 1 week. Can URS check their wells tomorrow and see if any product appears in the next 7 days? Let me know what you want us to do. I also received email from Jane Staten of URS with detailed timeline of events, in response to my request: Following is a timeline of events concerning the new spill at Midtown South: Feb 13 (Wednesday) Franklin visits site to perform weekly O&M and verbally reports that there is 10 feet of product in well GEW-01; there was a reported kink in the GEW-01 Spill Buster discharge line and when it was fixed, the pump evacuated the product in the well URS visits site to perform monthly product recovery using a vacuum truck and records free product in MW-06 (3 ft), MW-07 (2 ft), and IW-15 (couple of inches); all product evacuated from wells Feb 15 (Friday) URS visits site to gauge wells and finds product in GEW-01 (4.2 ft), MW-06 (2.6 ft), and MW-07 (0.3 ft) URS calls in spill to NYSDEC Spill Hotline; assigned #0712091 Received email from Franklin that product storage tank in GW treatment shed is full and that they scheduled a vacuum truck to remove product Feb 16 (Saturday) NYPD performs tightness test on tank system Feb 18 (Monday) URS visits site with vacuum truck and measures product in MW-06 (3 ft) and MW-07 (0.02 ft); no product detected in GEW wells; all product evacuated from wells; 35 gal product removed from product storage drum in GW treatment shed I do not understand what happened to the 4 feet of product in GEW-01 between Friday and Monday. I asked Franklin if they sent a vacuum truck to the site during that time to remove product from the product storage drum and the answer was 'no.' So that means that the Spill Buster pump in GEW-01 would have remained idle over the weekend. While that is a mystery, the bigger mystery is the source of the gasoline since the tank system tested tight and NYPD records indicate less than a 1% discrepancy in fuel inventory records. - J. Kolleeny 03/20/08: On 2/26/08, sent email to Jane Staten of URS, asking if their field personnel have been back to site and gauged wells for product levels? Jane wrote back: We were at site on Monday with vacuum truck and there was 2.4 feet of product in MW-06, 0.3 feet in MW-07, 0.03 feet in MW-08, and 3.18 feet in GEW-01. Spill buster pump in GEW-01 did not appear to be working so we contacted Franklin. Franklin's regular O&M day for Midtown South is Wednesday, so I'll probably receive their report tomorrow or Thursday. URS will continue to bring vacuum truck to site to remove product until it appears that situation is under control. I'll keep you posted. On 3/20/08, I sent email to Jane Staten asking for updated info on product in wells and status of spill buster pump in GEW-01. - J. Kolleeny 03/28/08: Received email from Jane Staten of URS on 3/27/08, with attached table showing well gauging data from 1/17/08 to 3/14/08 (in eDocs). Data show product in GEW-01 has decreased, from 3.18 ft. on 2/25/08 to 0.0 ft. on 3/3/08, to 0/15 ft. on 3/14/08; however, product in MW-6 seems not to be going away, with 3.75 ft. on 3/14/08; MW-7 went from 0.30 ft. on 2/25/08 to 0.07 ft. on 3/3/08 to 0.44 ft. on 3/14/08. Address: 239 10TH AVENUE  
City,State,Zip: NEW YORK, NY 10001  
Program: BCP  
Site Code: 488150  
Acres: 0.130  
HW Code: C231086  
SWIS: 3101  
Town: New York City  
Record Added Date: 10/21/2013  
Record Updated Date: 01/13/2014  
Update By: BXANDERS  
Site Description:

"Location: The site is located at the northwest corner of the intersection of West 24th Street and 10th Avenue. The site is approximately 0.13 acres in size. Site Features: The site currently is occupied by a non-operating gasoline service station, including a recently vacated 1-story commercial building last used as a convenience store. Current Zoning and Land Use: The subject property is zoned as M1-5, which allows for commercial and mixed-use buildings. The intended use of the site is for residential and commercial. The site is bounded directly adjacent by an 11-story residential building to the north, a car wash and mixed-use (residential and commercial) building to the south, and across 10th Avenue 4- and 6-story mixed-use buildings and a 20 story residential building. The site is approximately 100 feet away from the High Line Park, which overlooks the site to the east, separated by a one-story art gallery. Past Use of the Site: The site was operated as a small portion of a gas light fixture manufacturing facility that occupied the eastern third of the block in the 1890s. The site then operated as a gasoline filling station from at least 1930 until recent decommissioning in 2013. Since 1988 the site had 8 spill numbers assigned to it, out of which one spill number still remains open. In 1998 twelve 550-gallon gasoline USTs, three 4,000-gallon gasoline USTs, one 275-gallon fuel oil UST, and two fueling pump islands were removed and 1,853 tons of impacted soil was removed. Post excavation soil sampling results identified concentrations of volatile organic compounds (VOCs) exceeding NYSDEC Recommended Soil Cleanup Objectives

(RSCOs). Petroleum impacted groundwater was also detected on-site which still remains. Site Geology and Hydrogeology: The geologic conditions at the site consists mainly of fine to medium grained sands mixed with gravels, boulders, construction debris and interbedded layers of silt down to 25 feet below grade (fbg). The Site s topography is generally flat and the surface elevation is approximately 43 feet above mean sea level. Groundwater occurs within the unconsolidated soils at depths ranging from approximately 7 to 10 fbg; based on historical gauging data, there appears to be an appreciable degree of seasonal variation in the direction of groundwater flow at the site, periodically fluctuating between south, southwest and west. "

Env Problem: "Nature and Extent of Contamination: Based upon investigations conducted to date, the primary contaminants of concern for the site include petroleum hydrocarbon related volatile organic compounds (VOCs) compounds. Soil: Per 1998 lab results for the end point soil samples collected from 10 feet below grade (SW-7) the highest benzene concentration was detected as 44.5 ppm which exceeded the soil cleanup objective (SCO) for commercial use (to 44 ppm). Other SCO exceedances were ethylbenzene at 198 ppm (restricted residential SCO = 41 ppm), xylene at 1,990 ppm (industrial SCO=1000 ppm), toluene at 479 ppm (resrricted residential SCO=100 ppm) and MTBE at 124 ppm (restricted residential SCO= 100 ppm). Groundwater: Since 2001 twelve (12) monitoring wells have been installed on and off-site (3 on site and 9 off-site) related to the current open spill. Per August 2012 (latest available) monitoring data the highest on-site concentrations detected were: benzene (32 ppb), ethylbenzene (139 ppb), xylene (80.5 ppb) and MTBE (18.3 ppb). Groundwater standards have been exceeded for all of the above analytes. Site related soil vapor and indoor air samples never been analyzed. Special Resources Impacted/Threatened: The site is located in the urban area and Fish and Wildlife Impact Analysis is not warranted. "

Health Problem: "Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available."

IN CONCRETE. OIL WEEPING OUT OF CONCRETE. CENTER OF TANK BEING USED TO SUPPORT CEILING (1ST FLOOR OF BLDG), AND IS SAGGING IN THE CENTER. COULD NOT FIND PBS REGISTRATION. 10/20/98 CALLED JOE BERMAN FOR UPDATE. See also Spill 9815385 2/7/06 - Austin - Spill transferred from Mulqueen to Patel for site inspection/possible closure - end 02/21/06-Hiralkumar Patel. Data from Spill# 9815385 Spill date: 03/27/1999

----- Caller  
remarks: driver filling tank and vent alarm not operating, spill from vent to sidewalk - spill contained and cleanup crew enroute DEC remarks: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was ROMMEL 10/28/03 closed - to be investigated and remediated under spill 9808374. Rommel

----- From  
Property Shark, Owner of the Property Stephen J Swain Early Lear President 400 East 52ND Street New York, NY 10022 and notice address: Joel S Berman 1140 6TH Ave Fl 17 New York NY 10036-5803 From Reverse phone directory phone number for Stephen is (212) 308-1062. this number is not working number. Spoke with Mr. Gomez, super at building. as per him building owner is Mr. Joel Berman. Right now owner is in California for two weeks. Super will give my number to owner as he denied giving owner's number. Phone number on report for Mr. Berman is out of service. 03/03/06-Hiralkumar Patel. Got Mr. Berman's number (212-583-0005) from super. Left message for Mr. Berman. Received call from Mr. Berman. as per him, they don't have any records on oil spill. and he doesn't know anything. he told me that the building is on solid concrete. as he is from law firm he was talking legal language. he is blaming DEC for harassment. 03/08/06-Hiralkumar Patel. spoke with super and property has 3000 gal of tank. they have permit from fire department. got pbs registration certificate from super. PBS# 2-603898. as per PBS certificate, this tank was installed on Nov. 1st 1998 and spill happened on Oct. 7 1998. from PBS registration, mailing address for owner is: General Partner of 115 W 27th Street Co 1140 Ave of the Americas 17th Floor New York, NY 10036 From Reverse PHone Directory, the address for phone number 212-583-0005 is as follow which was confirmed by Mr. Berman also. send letter at this address: 780 Third Ave New York, NY 10017-2024 Berman's FAX no.: 212-583-0072 03/09/06-Hiralkumar Patel. CSL sent out to Berman by mail and by fax. (forgot to send pbs registration form and instruction) 03/14/06-Hiralkumar Patel. Received fax from Mr. Berman. ...The company has no record of the petroleum release which we believe was no more than a minor ordinary oil delivery spill which occurred when our supplier/delivery company inadvertently overfilled the tank. the fill port is outside the building and whatever minor amount spilled would have been on the sidewalk. we have no notice of any violation. if you could please supply me with a copy of the violation, including the name of the delivery/supplier company, it may be helpful in resolving this matter expeditiously Discuss with Jeff. he is suggesting to take site visit. Left message for Mr. Berman. visited site. spoke with Mr. Gomez, super at site. there is no odor in boiler room as well as in tank vault. tank is partially buried in concrete and tank is enclosed in concrete vault. but concrete vault is opened at one side. water was flowing out from tank vault. few oil stains on concrete floor in boiler room, but very little. poor concrete floor in boiler room. water was standing all over floor. little shine on top of water in sump. no leaking from boiler. suggested following to Mr. Berman

afterwards: - repairing of floor in boiler room. - keeping area clean and dry - replacing old corroded pipings to/from tank. - closing tank vault as it is being used as secondary containment. they can keep small window at elevated level to get access to tank. and as this tank in concrete vault, tank test every five years. - updating PBS records with current address, phone number and product information, as PBS records shows #2 oil in use. but as per super they are using #4 oil all the time. - submitting tank test results and copy of invoices for every work done. as i discussed with Mr. Berman, he is agree to all above suggestions. the company who did tank test will replace those pipings. he will submit tank test results and copy of invoices for any work done. i asked him to call me with contractor's name and number who will work to close tank access and repairing of floor. Got copy of work proposal from Petroleum to Owner. Spoke with Joe Ostrowski (718-624-4842) and he told me that the whole system failed in tank test. now they are waiting to get permission from owner for isolation test. Mr. Joe doesn't know how bad the leak was as the person, who did tank test, was not there. Left message for Mr. Berman. Spoke with Mr. Berman. i told him about tank test failure as i spoke with Joe at Petroleum. Mr. Berman was upset as contractor gave test results directly to me without concerning hiring person. i have asked Mr. Berman to work out on further testing of individual parts to find out leaking portion of system. asked him to call back with date on which they plan for isolation test. 03/21/06-Hiralkumar Patel. Left message for Mr. Berman. Received call from Mr. Berman. he was blaming me for harrasing him. he told me that Petroleum has done individual test and found problem at vent pipe. i have asked him to send me copy of report. he will call back tomorrow. 03/24/06-Hiralkumar Patel. REceived certified mail receipt. 04/06/06-Hiralkumar Patel. Received letter from Mr. Berman. received contract copies which was signed by Joe Ostrowski from Petroleum and by Mr. Berman. as per contract copies, petroleum has proposed following work: - will open manhole cover on one 3000 gal fuel oil storage tank - pump out all existing fuel, water and sludge from bottom and sides of tank. - pressure test all lines-suction, return, vent and fill to make sure they are not leaking. - men will enter tank and squeegee clan all remaining sludge and residue - examine tank shell for signs of deterioration and make a full report to person in charge. - if a line fails test, we will then plug up bad lines and perform tank only tank test to make sure tank is good. - all sludge will be disposed of to a legal facility - seal tank making a watertight closure. - excavate concrete, remove old fill line and vent line - install 40 ft of new 3 fill line from tank top to outside the building wall. - install 50 ft of new 2 vent line with vent alarm - re-cement area. 04/07/06-Hiralkumar Patel. Received letter from Mr. Berman. this includes copy of tank test results. result shows tank only passed in test. 04/18/06-Hiralkumar Patel. Spoke with Mr. Berman. he has got bill from Petroleum. once he pay it, he will get final report and will forward it to Department. Mr. Berman will be out of office for this whole week now. 05/02/06-Hiralkumar Patel. REceived tank test results which shows whole system passed the test. based on site visit and tank test result, case closed."

Spiller Company: 001  
Contact Name: WALTER SEELIG  
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was VOUGHT 10/20/03. Contaminated soil letter sent to Walter Seelig (High Ridge Enterpr.). Also see spill # 9008960. YK. 11/21/03 Rommel Met Brian McCabe, senior geologist, on site. Soil samples collected from 8 to 16 feet below grade were contaminated. Groundwater (15 to 18 feet) was also sampled during the investigation and were impacted by BTEX and MTBE. They will excavate what soil they can and install a minimum of three monitoring wells (one outside by remote fills). Spill 9008960 reported TTF of 4000 gallon gas UST 11/14/1990 STIPULATION SIGNED RD 2/18/04. 3/18/04-Vought-Spoke with Rob Ferguson (631-586-4900). Subsurface Investigation report sent to DEC on 2/3/2004. Ferguson will send small CAP upon receiving subsurface

**HIGH RIDGE ENTERPRISES (Continued)**

**S104275619**

investigation report review. Ferguson requires review of subsurface investigation as per STIP. Vought requested that another copy of the Subsurface investigation be sent to DEC. 4/1/04-Vought-Spoke with Tom Melia (F&N) and he requested that he be point of contact. Spill transferred from Rommel to Vought. 4/6/04-Vought-File review by Vought: Contaminated soil letter sent from DEC Krimgold to High Ridge Enterprises. Site meeting minutes (Fenley & Nicol Brian McCabe)-11/25/03. Site meetin on 11/24/03. In attendance were DEC Rommel, F&N McCabe, F&N Melia and F&N Hole. The results of the sampling indicated that the contamination is located in the northern portion of the building. The effected area extended from the north end od the 4000 gallon tank excavation to the front of the building, approximately thirty five feet and from the center for the 550-gallon tank excavation west to the side of the building, approximately twenty feet. DEC recommended additional soil excavation without compromising structural intergrity and required 1)installation of one well inside the building after backfilling completed 2)installation of two wells on sidewalk at the location of the former remote fills and twenty feet west of the bay door. Letter from Fenley & Nicol(Thomas Melia) to DEC(Rommel)-12/18/03. The new owner of the building indicated that his intended use for the building is as an art gallery . During building remodeling excavation was performed and tanks were discovered under floor. Two gasoline USTs (one 4000-gallon and one 550-gallon) were removed and were in separate lcoations fifteen to twenty feet apart. Upon removal of the bottom slab the soil encountered was saturated with liquid phase hydrocarbon . Depth to water expected to be 18' below grade. F&N proposes delineation of soil and groundwater contamination, installation of wells and additional soil excavation. See also Spill #9008960 reported in 1990 for tank test failure and administratively closed on 3/4/03. Letter from DEC Rommel-12/4/03. Letter approving installation of wells on the sidewalk on the south side of West 29th Street between 10th and 11th Avenues and requesting expediting of sidewalk permits. Letter from F&N(Melia) to DEC Rommel-12/18/03. At this time we are continuing our efforts to delineate the extent of the contamination... . Three monitoring wells installed (one inside and two outside building). At this time the owener of ther property feels that it would be too far costly to excavate the contaminated soil without jeopardizing the structural integrity of the building, and would prefer that we install an air sparge/soil vapor extraction (As/SVE) system to remediate the hydrocarbon impact . Please indicate your approval below. No approval indicated by DEC Rommel. Stipulation Agreement-1/15/04. Stip with deadline of 2/13/04 sent to: Walter Seeling High Ridge Enterprises, Inc. P.O. Box 2542 York, Pa. 17405. Subsurface Investigation Report (F&N-Melia 631-586-4900x190) -3/19/04. Investigation consisted of six soil borings, six temporary groundwater monitoring points and three monitoring wells. The central and eastern units are currently vacant and undergoing renovations for use as an art gallery . Depth to groundwater is 8-9' and flows northwest. Soil analyticals show 35ppb benzene(SP-1 at 12'), 882ppb benzene(SP-2 at 12'), 14ppb (SP-3 at 12'), 4900ppb benzene(SP-4 at 12'), 817ppb benzene(SP-5 at 12'). Groundwater analyticals show 2.5 ppb benzene(TW-1), 1459ppb benzene(TW-2), 45ppb benzene(YW-3), 2109ppb benzene(TW-4), 254ppb benzene(TW-5), 11ppb benzene(TW-6), 1200ppb benzene(FN-1), 206ppb benzene(FN-2), 4.2ppb benzene(FN-3). Report recommends Air Sparge/Soil Vapor extraction system. NYSDEC requires: 1)signing of Stipulation before any further correspondence

1) presence or absence of free product and interim remedial recovery if present  
2) surrounding area site plan including property usage  
3) additional wells east of FN-2 and well north of FN-2 to calculate required radius of influence for system design.  
4/6/04-Vought called F&N(Milea) to repeat Stipulation requirement and left message to return call to DEC.  
4/7/04-Vought-Received faxed copy of STIP already implemented by DEC Kunkel on 2/18/04 (Copy of original not in file).  
4/8/04-Vought-Sent letter to High Ridge requiring well installation north of FN2 and east of FN2, submission of monitoring well data and surrounding property sketch.  
4/16/04-Vought-Wells will be installed next week (tentatively). Wells for pilot test will also installed.  
Mailing address is: High Ridge Enterprises P.O. Box 2542 York, Pa. 17405  
4/18/04-Vought-Received message from David Oloke (F&N-631-586-4900x144) that he is new project manager for site.  
Vought called David and two additional well installed (one north of FN2 and one east of FN2). All onsite wells were sampled. No free product in new wells. Four vapor wells installed and air sparge well will be installed. DEC will receive pilot test report by 7/15/04.  
6/23/04-Vought-Spoke with David and initial results faxed on 6/9/04. .5 of free product in well in 1 vapor well sent for fingerprinting.  
EFR not effective. DEC requires recovery of free product and submission of pilot test.  
9/2/04-Vought-File review by Vought: Groundwater results (F&N)-6/23/04. Groundwater analyticals show 1.2ppb benzene(FN5), 1.8ppb benzene(FN4), 14ppb benzene(FN3), 26ppb xylene(FN3), 474ppb benzene(FN2), 621ppb MTBE(FN2), 8ppb toluene(FN2), 2065ppb benzene(FN1), 47170ppb MTBE(FN1), 4106ppb toluene(FN1) and 2761ppb xylene(FN1). Addendum to the direction beneath the site was found to be toward the north. Property uSubsurface Investigation Report (F&N)-7/14/04. On 5/7/04 two additional monitoring wells were installed. On June 4, 2004 the AS/SVE pilot tests were conducted . One inch of floating product was detected in P2. The results of the AS pilot test indicated that the introduction of air pressure into the formation below the contaminant zone is a viable remediation technique . Report recommends commencement of an interim remedial measure to recover product from P-2 via weekly EFR. Report also recommends installation of another well to replace P2. Vought called David from F&N to approve of workplan. Well installation will be included with final remedial action plan. Vought sent letter approving of proposed workplan (installation of well at P2 and IRM) and included requirement of determination of groundwater flow direction and surrounding property sketch.  
9/3/04-Vought-Received fax from Oloke (F&N). The groundwater flow sage of downgradient sites to the north are a parking garage and an art studio. Vought called Oloke and approved workplan as per 9/2/04 letter. Vought called Oloke and he will begin drafting RAP for submission to DEC.  
9/29/04-Vought-Spoke to David F&N and he will be sending RAP in overnight.  
10/1/04-Vought-Reviewed RAP received by DEC on 10/30/04. Site is currently occupied by a masonry block structure which is subdivided into three sections. An art gallery occupies the western unit. The central and eastern units are currently vacant and are undergoing renovations for use as an art gallery. RAP proposes weekly recovery of free product from FN2 via a peristaltic pump until well is converted to a 2 product recovery well designated at FN6. Two additional wells will be installed in the interior of the building. Monthly groundwater monitoring and quarterly sampling. Five air sparge and four SVE wells will be installed in the interior of the building. Remedial system will be installed on the roof of the

**S104275619**

building. Daily monitoring for the first week, weekly monitoring for the first month, monthly maintenance visits and effluent sampling, quarterly effluent sampling and groundwater sampling. Vought sent letter approving of RAP. 10/28/04-Vought-Spoke to David(F&N) and FN1 must be reinstalled due to it was a bent well. Wells will be installed during the next few days. 9/27/05 - SPILL TRANSFERRED FROM VOUGHT TO OBLIGADO 11/9/05 - Obligado - Review System Startup Report. AS/SVE system consists of 5 HP compressor and 3.5 hp blower and 5 air sparge wells and four soil vapor extraction wells. Effluent air stack results show 31.4 ug/m3 for benzene. Operation and maintenance schedule proposes monthly SVE effluent monitoring and Quarterly Status Reports. System started in May 2005. Due to noise generation, the system only runs from 9pm to 6am. Quarterly Status Report - Groundwater analyticals show 4.7 ppb benzene (FN3), 50.1 ppb MTBE (FN2), 78.3 ppb MTBE SVE5, 1.7 ppb MTBE SVE3. Benzene effluent show 46.74 ug/m3. 5/15/06 - Obligado - Called David Oloke. Asked that he send recent Quarterly Status Reports. 5/22/06 - Obligado - 2Q06 Quarterly Status Report, submitted by Fenley Nicol, Inc. Ground water analyticals show 9 ppb benzene 35 ppb MTBE in FN3 and and 3.7 ppb benzene in FN4. Benzene effluent below STIP limits. There is duplicated data on Table 2 Air Sampling Results, probably a cut and paste error, call Dave Oloke, he said he will look into it at send a new table with the electronic copy. Report recommends continuing system operation. 6/23/06 - Obligado - Called David Oloke. Asked for the corrected Table. He said he will email it to me. 10/23/06 - Obligado - Called David Oloke. Left message requesting most recent quarterly status report. David Oloke call me back and said he would send the report shortly and he would correct the typo on Table 2. 1/30/07 - Obligado - Review 3Q06 monitoring report. Typo in 2Q06 table has been fixed in cumulative table. AS/SVE system online and working at 100% maximum capacity. Air samples collected monthly. Benzene in gw exceeds standard at 4 ppb. in 2 wells. All effluent below STIP guidance. Benzene detected in VES/AS effluent at 4.86 ug/m3 in 6/06. Recommends continued operation of the system. Review 4Q06 monitoring report - AS/SVE system operating at 100% capacity 9 hours per day. All effluent samples below STIP guidance. BTEX effluent at 361.71 ug/m3 during 10/27/06 Report recommends continued operation of system. GW results show minor exceedences of Benzene - max concentration at 8 ppb in FN3. However gw monitoring does not include FN1 where highest contamination was found. 9/13/07 - Obligado - Review 1Q07 monitoring report. According to the report, the AS/SVE system is running at 100% capacity. System is still pulling vapors, at a flow rate of 50 cfm and a concentration in March 07 of 111.30 ug/m3 BTEX. Benzene (12.8 ug/m3) was below the STIP limit. Recommends continued operation of AS/SVE system. 10/26/07 - Obligado - Review 2Q07/3Q07 monitoring report. Benzene detected during quarterly monitoring at MW3 and MW4 slightly above standards. Analytical results of air stream were below the max benzene STIP Limit. Recommends continued operation of the AS/SVE System. 9/3/08 - Obligado - Review 1Q08 monitoring report. AS/SVE running for 9 hours a day at 100% capacity. Effluent collected monthly. Benzene detected slightly above standards in MW2,3,4,and5. System effluent ND for BTEX. 6/3/09 - Obligado - Review 1Q09 monitoring report. Requests to shut down system for a 1 year post remedial monitoring period to determine if system was effective and monitor for rebound. Sent a letter to Seeling cc to David Oloke approving system shut down temporarily but requiring sampling of monitoring wells MW1, MW6, and

**S104275619**

MW7 beneath the building as required by approved RAWP. Required 90 days to submit an update report on system shutdown and additional sampling. 12/3/09 - Obligad - Met with David Oloke on site. The AS/SVE system was down as proposed. According to David they were unable to collect ground water samples from the three sampling points. According to David the water he collected was too silty. He recommended doing an exposure assessment to close the spill number or to install the well in an alternate location in the building entrance. I told him I would review the spill file to determine if that location was acceptable. 12/22/09 - Sent email to Mr. Oloke - The Department has determined that the proposed location is cross-gradient and outside the of the source area, and would not provide the necessary data to confirm the site remediation was successful. As such, the Department reiterates its requirement in the June 2, 2009 letter, to sample the 3 monitoring wells FN1, FN6, and FN7 (as originally proposed in the approved RAWP) and submit a Monitoring Report within 90 days of this notice. If sufficient ground water can not be obtained from these sampling points (after exhausting all available well sampling and well development techniques), than a Remedial Investigation Work Plan (RIWP) to install a new monitoring well in the gallery in between FN1, FN6, and FN7 must be submitted within 90 days of this notice. The RIWP should contain an implementation schedule. 10/9/10 - Obligado - Email from David Oloke I would like to inform you that we're scheduled to be onsite to install one groundwater monitoring well on the sidewalk directionally towards the source area beneath the building in order to determine the current groundwater quality beneath the site. We scheduled for Monday 25 through Wednesday 27. 1/14/11 - Obligado - Email from David Oloke We are set to go back to High Ridge, 524 West 29th Street in Manhattan on Monday 1/17/11 to install the groundwater monitoring well for spill inactivation. The client is making plans to be onsite as well . 1/19/11 - Obligado Email from David Oloke We core drilled through the foundation wall and could not get the well rods to the desired depth due to refusal. So we back to square one. Our client spoke with the tenant again yesterday to see if he will allow us access into the building. 4/1/11 - Obligado - I sent email to David Oloke related to potential alternative methods for obtaining ground water samples at the site since the diagonal well method was not successful, such as snaking new tubing into the existing system wells, and high vaccuum extraction to obtain ground water samples from the sparge wells. I asked Mr. Oloke to look into these options, as well as any other methods and report back the findings to the DEC. 3/12/12 - Obligado - I reviewed a Site Status Report. They collected samples from MW1, MW6, and MW7 under the gallery slab using the vacuum extraction technicque. Samples were collected in June and November of 2011. During the most recent sampling event in NOvember, the maximum VOCs was 117.3 ug/L in MW-7. MW1 had 63.42 ug/L total VOCs, and MW6 had 59.75 ug/L VOCs. Several compounds were slightly above standards. The greatest exceedence was 36 ug/L napthalene in MW7, which is above the standard of 10 ug/L. In NOvember they turned on the AS/SVE system and allowed it to run for four weeks. At the end of the four weeks , air samples were collected and all the targeted VOCs were ND. Based on the above, they requested closure. Ground water contamination has been greatly reduced. The AS/SVE system reached asymptotic recovery rates. Additional remediation is not warranted nor feasible. After discussion with DEC Hussein and Ketani, this spill is closed. A spill closure letter ahs been sent to Walter

 Site Description: "Location The site is located at 538-542 West 29th Street in the Chelsea neighborhood of Manhattan, and is identified on the Manhattan Borough Tax Map as Block 700, Lots 55, 56, and 57. The proposed BCP site includes all three tax lots. The site is located on southern side of West 29th Street and is bound by West 29th Street to the north, mixed-use residential/commercial buildings followed by the elevated High Line and Tenth Avenue to the east, a multi-story residential apartment building followed by West 28th Street to the

south, and a multi-story mixed-use residential and commercial building followed by Eleventh Avenue to the west. The No. 7 subway southern extension runs north-south below Eleventh Avenue, which is about 200 feet to the west of the proposed BCP site. Site Features The site occupies a footprint of about 9,900-sqaure-feet (0.227 acres) and is currently improved with one three-story commercial building (Lot 55), one three-story mixed-use commercial and residential building (Lot 56), and one two-story warehouse (Lot 57). The buildings are currently vacant. Current Zoning and Land Use According to the New York City Planning Commission (NYCPC) Zoning Map 8b, dated January 22, 2015, the site is located in a C6-3 commercial district. C6-3 includes a wide range of high bulk commercial uses. Buildings in this district are often corporate headquarters, large hotels, department stores, and entertainment facilities in high-rise mixed buildings. The existing zoning is consistent with the proposed commercial-use development. The surrounding area is primarily commercial and residential, but also includes manufacturing buildings, subway tunnels, public parks, churches, schools and day care centers. One sensitive receptor, Bright Horizons Day Care at Hudson Yards, is located within the immediate area (less than mile) of the site, about 100 feet to the north at 529 West 29th Street. The nearest ecological receptor is the Hudson River, located about 1,300 feet west of the site. As a result of the City Environmental Quality Review (CEQR) process, Block 700, Lots 55, 56, and 57 were assigned an E-Designation (E-142) on June 23, 2005 by the New York City Department of City Planning (NYCDCP) as part of the High Line/West Chelsea Rezoning (CEQR No. 03DCP069M). The E-Designation requires coordination with the New York City Office of Environmental Remediation (OER) to obtain a Notice to Proceed (NTP) or a Notice of No Objection (NNO) prior to obtaining building permits. The E-Designation addresses environmental requirements for hazardous materials (Hazmat), noise (window wall attenuation and alternative means of ventilation), and air quality during development. Past Use of the Site The site and surrounding area have been developed since the early 1800 s. The site was developed prior to 1890 with two unspecified use buildings which were demolished between 1899 and 1922. Lot 57 was formerly used as a lumber storage yard (1909-1944) and various auto repair facilities over a span of about 50 years (1945-1994). In 1995, the Lot 57 was purchased by Gotham Seafood Corporation, a seafood wholesaler. Sanborn maps indicate that Lots 55 and 56 were improved with mixed use-residential and commercial developments from about 1890 to 2005. Certificates of Occupancy (CO) provided by the New York City Department of Buildings (NYCDOB) identified an auto repair shop within Lot 56 in 1924 and 2012. In addition, available CO s for Lot 55 dated 1970 and 1987 identified manufacturing and a heating plant with potential fuel storage. Currently, all of the lots are vacant. Adjoining properties were historically used for residential, commercial, industrial and manufacturing operations. Site Geology and Hydrogeology Historic fill material was encountered immediately beneath the building foundation slabs and extends to depths varying from about 7.5 to 10 feet below grade surface (bgs) at 540 West 29th Street (Lots 56), and from about 3 to 12 feet bgs at 542 West 29th Street (Lot 57). Historic fill material was encountered below the cellar slab at 538 West 29th Street (Lot 55) at depths ranging from 3 to 5 feet below cellar grade. The historic fill predominately consists of brown fine- to medium-grained sand with varying amounts of gravel, concrete,

asphalt, charcoal, slag, ash, wood, brick, and glass. The layer of historic fill is typical for this area of New York City. The fill layer is underlain by native soils typically consisting of reddish-brown to olive, fine- to medium grained silty sand with varying amounts of gravel and silt. Petroleum impacts, evidenced by odors, staining, and/or photoionization detector (PID) readings above background levels, were apparent in two soil borings (SB03 and SB06) at depths ranging from about 0 to 10 feet bgs and 14 to 15 feet bgs, respectively. Groundwater was encountered at depths ranging from 3.2 feet below cellar grade at 538 West 29th Street (Lot 55), 9.2 to 11 feet bgs at 540 West 29th Street (Lot 56) and from 8 to 11.51 feet bgs at 542 West 29th Street (Lot 57). Based on the well gauging results, groundwater appears to flow west toward the Hudson River, which is relatively consistent with regional topography."

DER Facility ID: 75604  
DEC Memo: "According to the NYSDEC records, on August 5, 1998, the on-site 2,000 gallon UST failed a tank tightness test and was issued Spill #98-05607. After review of information received from the client, it has been determined that after the UST failed tank tightness testing, the UST was cleaned, sandblasted, and relined with an epoxy lining, and the associated piping was replaced in September 1998. On July 10, 2003, the 2,000 gallon UST failed a tank tightness test was issued Spill #03-03799. It appears that soil borings were performed to determine the extent of the UST leak/spill. Upon reviewing data received from the NYSDEC Spills Database, the NYSDEC notes section determined the soils were slightly above TAGM guidelines due to levels consistent with old coal ash fill materials and was granted closure status on September 2, 2003. The UST was emptied and taken out of service, and an 1,080 gallon steel registered AST was installed in a small cellar area near the north bay door area. On September 28, 2005, EnviroTrac contacted the NYSDEC regarding Spill #98-05607 to determine what is needed to close the Spill. It was determined that since Spill #98-05607 was prior to Spill #03-03799 which is closed, and was the same tank and area, it should be closed as well. "

Remarks: "TANK TO BE EVACUATED, CLEANED, AND LINES TO BE TESTED."

 DEC Memo: "02/03/06 Feroze talked with Mr. Minick (owner) 212-604-9898. He informed that there was a leak in the tank, they have closed the leak and pumped the oil out. It is above ground tank, floor is made of concrete. An environmental company is working for them. TTF is sent to : Mr. Minick 440 west 22nd Street New york, NY 10011. 02/10/06 Mr. Minick called and told me that they will close the tank by PTC. He will submit DEC the documents soon. 03/02/06 Feroze,: Mr.Minick told me that PTC has taken soil sample. He will submit soil analysis result and tank closer report to DEC soon.It was 275 gallon tank. 03/10/06 Feroze received a certificate and soil analysis result. The result shows that VOC and SVOC are within acceptatble limit. They also submitted a manifest for removal of contaminated soil. The spill is closed."

DEC Region: 2  
DER Facility ID: 272958  
DEC Memo: "Sangesland spoke with Roux Assoc. Tank excavation with some spillage around tanks. (Tanks had been previously abandoned in place). Now tanks are being pulled. Sangesland asked for several end point soil samples taken from tank grave after removal. Test for VOC & SVOC. 3/16/2005 Sangesland reviewed a report from Roux Assoc. dated 3/9/05 On 2/18/05 Roux collected 6 post-ex samples. One per each side & 2 bottom VOC's - All samples contained low levels of VOC's, but they were ALL BELOW RSCO Stds. SVOC's - Some minor Hits on PAHs consistant with historical fill levels. Results show some contaminants exceed regulatory standards. Samples taken on removed (waste) soils showed much higher VOC & SVOC levels. Roux conclusion says that the contamination source has been removed and the site should be closed out. Based on the soil sampling work performed on the site and the report prepared by Roux Assoc., the NYSDEC agrees with the conclusion and the spill case is closed with: No Further Action - Does Not Meet Standards "

Remarks: "REMOVING TANK, JUST AN ODOR IN THE SOIL: NOT SURE HOW TO MOVE FORWARD WITH PROJECT."

DEC Memo: "O'Dowd Notes(KMF): Amoco will submit affidavit of work done, any contamination noted and passing tank test results. Will have to look up PBS# to see if any old USTs were here and if a site assessment was done. 8/21/95 2X4K failed UST-2000 Ullage Test. 8/22/95 Spoke to Jerry Kasper, Crompco. 1X4K has the extractor valve and 1X4K doesn't. Leak was above the liquid line. Problem believed to be with extractor valve. 5/3/2002-VOUGHT-See spill #0201270 at same location. This spill closed by Vought."  
Remarks: "TANKS WERE INSPECTED AND BOTH FAILED"

 DEC Memo: "Prior to Sept. 2004 data translation this spill Lead\_DEC Field was SANGESLAND Question on proper address of this building. Originally called in as 525 W 25th. Later called 543-545 West 25th St. 5/22/02 - Sangesland spoke with Mark Robbins of Hydro Tech (631-462-5866) cell # 516-996-5559 Property owner Jack Fuchs - Whitehall Business Archives, Inc. 40 Worth Street, NY, NY 10013 Hydro Tech was pulling a buried 3,000 gal #2 oil tank from a parking lot. 15 ft to nearest neighbor, south end of tank is at the sidewalk line. They discovered 10 large holes in the tank. The pit has product in it. Hydro will vac out the hole and will excavate out contaminated soil to clean endpoints. If all contamination can not be excavated a remediation plan will be prepared and submitted. 7/2/2002 - Mark Robbins of Hydro Tech submitted a report which outlines the removal of a UST and the over excavation of the tank pit area. Sidewall endpoint samples were all below TAGM levels for VOC and SVOC's except for a handful of slight exceedences. No bottom soil samples were taken because of the presence of ground water. Hydro Tech recommends the installation of a monitoring well in the north side of the excavation area. The well

should be monitored for the presence of separate-phase and dissolved phase product. DEC instructs Hydro Tech to install a monitoring well on the site, develop the well and sample for VOC's and SVOC's. The DEC will require 2 rounds of Clean samples taken at least 3 months apart in order to close out. 10/29/2002 - Sangesland reviewed submittal from Hydro Tech Environmental. Water sample taken from monitoring well on site showed no product and sample was clean for everything except a minor hit 1.1 ug/l of Benzene. SVOC all below detect. 4/11/2003 - Sangesland reviewed a submittal from Hydro Tech dated Feb 28, 2003. This report shows the second round of GW sampling. All results were ND, therefore the spill can be closed out. Spill Closed."

submittal of an Investigation Summary Report followed by a Remedial Action Plan. The Department set a deadline of 12/10/04 for signing the Stipulation Agreement. The Stipulation Agreement was signed by Penske on 12/10/04 and implemented by the Department on 12/27/04. -On 12/21/04, Sun sent a letter to Richard Saut of Penske informing him that the Department has approved the Remedial Action Plan (RAP)/HypeAir Work Plan prepared by his Consultant, Groundwater & Environmental Service (GES) for the subject site; specifically two in-situ chemical oxidation events at the site via HypeAir air and Hydrogen peroxide injection system. The Department requires that due to the proximity of existing utility corridors, temperature, pH, pressure, oxidation-redox potential (ORP), conductivity and dissolved oxygen (DO) shall be monitored on all the monitoring wells. Any potential accumulation of vapors during the injection activities shall be avoided. (Sun) 02/21/06: Sun received 4th Quarter 2005 Site Status Update Report. Review of this report is pending. (Sun) 02/27/06: The Department approves the GES s request for two (2) additional injection events to be completed in April and May 2006; specifically two in-situ chemical oxidation (Chem-Ox) events at the above referenced site utilizing a hydrogen peroxide, ozone, and persulfate injection system (HypeAir). (Sun) 07/23/07-Sun: On 07/23/07 the Department approves the GES s request for performing enhanced product recovery through the injection of surfactant into MW-5. The Department also approves a series of high intensity targeted (HIT) remediation events using high vacuum extraction at monitoring wells MW-3, MW-4, and MW-5 to reduce residual hydrocarbons impacts on-site for 8-hour events for approximately four (4) months. (Sun) 08/09/07-Sun: On 7/18/07 Joe Sun of DEC was informed by Kevin Heaphy of Parson Brinckerhoff Americca (PB) that the MTA will be using this site (Lot 60) and the adjacent Fed Ex lot for a mocking pit to build the initial shaft for Tunnel boring machine to be used for the No. 7 subway extension project. In general, the site is slated to be used as a staging area for the project. A meeting was held on 8/9/07 to discuss project among all the key parties, including DEC, MTA, NYCT, Developer, Parson Brinckerhoff (PB), Penske, property owner (Michael Silvermintz)and Penske s consultant, GES. The meeting concluded that PB will first review the GES s investigation and remediation reports and then will discuss with GES and MTA project team to assess if other viable remedial action plans (RAP) can be implemented to expedite the cleanup process. Any new proposed RAP will be submitted to DEC for review and approval. (Sun) 08/23/07-Sun: Sun received 2nd Quarter 2007 Site Status Update Report. Based on laboratory analytical results, a 64% reduction of disslved benzene, toluene, ethylbenze, and total xylenes (BTEX) concentrations has been observed on and off-site since initiating hydrogen peroxide and ozone injections at the site. (sun) 08/30/07: Sun received the following email from Heather Cloud of GES Joe, Penske and GES submitted all historical documents to Kevin Heaphy for his review. He reviewed the documents and we had a follow up call with him and the MTA this past Monday (8/27). During the call, Kevin brought up a suggestion of relocating the wells off-site or installing remote access points in the sidewalk. As discussed at the NYSDEC meeting, we told Kevin that that locating the wells offsite was not an option, and installing remote access points in the sidewalk could not be sufficient for our liquid level measurements and groundwater sampling activities. Additionally, there is a high pressure gas main in the sidewalk, so we would not be able to drill

safely in this area. They did not have any additional suggestions or ideas beyond relocating the wells. (Sun) Since they did not have any additional suggestions, it was decided that GES is going to proceed with our approved work plan. We are actually scheduled to conduct our surfactant injection on September 5 and the high vacuum extraction events on the 6th and 7th. Once we get the data back from the first event, we will evaluate the effectiveness and move forward from there. (Sun) 11/19/07-Sun: Sun received the following email from Heather Cloud of GES, Hi Joe, We conducted the Surfactant Injection at MW-5 on September 5, 2007 followed by a high vacuum extraction event on September 7, 2007 to remove and recover residual product at MW-5. Since conducting the injection event, we have not seen any product at MW-5. Groundwater data at MW-5 prior to the injection (July 3, 2007) was 489 ppb BTEX (144 ppb benzene). Following the injection (October 12, 2007), groundwater data at MW-5 was 87 ppb BTEX (66 ppb benzene). Since the injection event, we have conducted 2 high vacuum extraction events on MW-3 and MW-4. These events were completed in September and October. Between the 2 high vacuum extraction events, we have recovered 5 pounds of mass and 1,300 gallons of water. We were at the site today and are at the site tomorrow to complete our 3rd high vacuum extraction event on MW-3, MW-4, and MW-5. The 3rd QTR Site Status Update Report is currently being reviewed by the client, so you should have it shortly. (Sun) 02/15/08-Sun: DEc received the following email from Andrew Cullen of Penske, All, After much review, we have come to the conclusion that we will make an attempt to meet the requirements of the contractor and complete the necessary remediation work required by the NY DEC on two Saturday's per month. However, I need all the parties to understand that our agreement specifically states we need 2 to 3 days per month to perform the necessary remediation. Limiting us to only two days per month may cause the remedial efforts to go past our original estimates. Moreover, MTA also agreed to reimburse Penske for any premium costs associated with work that must be scheduled outside of normal working hours (i.e. Monday to Friday 8:00am to 5:00pm) . If at any time we find the contractor is not cooperating, our remedial efforts will require more than 2 days per month, or any invoices for premium costs or damage by the contractor are not paid in accordance with our agreement, we will alert the appropriate parties. I do not anticipate this happening, but given the events that have lead us to this point, I feel compelled to remind everyone of the terms and conditions of our agreement. (Sun) 03/04/08-Sun: Sun sent the following email to all the parties invloved, Penske may have to conduct remedial efforts more often than 2-3 days a month if project demands. The required frequency and nature of remedial efforts will depend on results of on-going remediation to be received in future. If current extraction method does not produce acceptable (to the NYSDEC) results, DEC reserves its rights to require Penske to undertake more aggressive remedial efforts. NYSDEC is not a party to any of the agreements between Penske and MTA, and reserves all rights under the existing Laws and Regulations. (Sun) 03/25/08-Sun: Sun received the 4th Quarter 2007 Site Status Update Report. (Sun) 07/03/08-Sun: Sun received from Heather Cloud of GES on the current site status: We are currently conducting quarterly groundwater monitoring and sampling. Our next groundwater sampling event is scheduled for this month. - Based upon the recent groundwater data, we are not seeing a reduction in the BTEX concentrations. See attached groundwater analytical tables. Therefore, the high vacuum

extraction events don't appear to be overly effective at this time. We are currently evaluating alternate options to address the dissolved phase impacts. We are looking at potentially injecting sodium percarbonate or other potential oxidizers. The total BTEX concentrations are primarily comprised of benzene. We have seen great success in reducing benzene levels with sodium percarbonate at other sites. Also, this type of technology is not intrusive at all. With the MTA project going on, we are limited with the technologies that we can go with. - The 1st QTR QMR is currently being reviewed by Penske. You should have this report within the next week or so. (Sun) 8/4/08 - Carlson: Case reassigned to Carlson. Reviewed 1st Quarterly 2008 report. Wells sampled on 1/3/08. Maximum BTEX concentration 5,425 ppb (MW3), maximum MTBE concentration 64 ppb (MW3). Report notes that VEFR is not effective. Sent letter requiring submission of a new RAP and additional delineation by 9/12/08. 9/11/08 - Carlson: Approved extension to 11/14/08 for submission of a new RAP. Scheduled site visit for 9/25/08 to discuss potential locations for an additional delineation well. 9/30/08 - Carlson: Performed site visit on 9/25/08. Met with Heather Cloud of GES, Richard Saut of Penske, Charles Stives of Liro Engineering, as well as representatives from MTA and NYCT. Five monitoring/remediation wells have been destroyed during recent activities. A location was identified for the installation of an additional monitoring well. RAP due 11/14/08. 10/6/08 - Carlson: Reviewed update report dated 9/23/08. Wells sampled on 4/26/08. Maximum BTEX concentration 3,537 ppb (MW3). They are pilot testing sodium percarbonate. 3/20/09 - Carlson: Reviewed Site Status Report dated 2/25/09. Delineation well discussed during 9/30/08 site visit was not installed. Destroyed wells were not replaced. Sodium percarbonate solution was injected into MW-1, MW-2, and MW-4 on 9/20/08. Wells were sampled on 10/25/08. Decreased concentrations were found in MW1 and MW2, but BTEX increased in MW4. Spoke to Heather Cloud at GES. She will submit workplan. Received Remediation and Delineation Work Plan dated 2/10/09. 4/16/09 - Carlson: Meeting held with Penske. Mark requested the addition of another boring. 4/23/09 - Carlson: Meeting held MTA. Access to most of the site not possible for 1 year because the TBM is in operation. Access to the sidewalk can be arranged. MTA will submit a construction timeline. 5/4/09 - Carlson: Received phone message from Sal McCabe - construction timeline will be submitted. 5/7/09: Received update report. Received email from Christopher Ward - mw5 has been located and will be abandoned (under future muck bin). 5/15/09 - Carlson: Received email. MW5 will be abandoned tomorrow. 7/1/09 - Carlson: Received cc of penske access request to sample wells on 7/25 7/2/09 - Carlson: Paul matthews of mta responded - requested sampling be delayed for one month. 7/2/09 - Carlson: I replied saying one month delay is ok. Construction timeline was not submitted as requested at the last meeting. 7/6/09 - Carlson: Received cc of penske access request to sample wells on 8/22/09. 9/18/09 - Carlson: Left voice message for Chris Ward to followup on case status. 11/5/09 - Carlson: Received cc of letter requesting access from MTA to sampling wells. Left voice message for Chris Ward to see if they were given access - need to get phone number for MTA contact Paul Matthews. 11/10/09 - Carlson: GES received access from MTA to sample wells. 2/12/2010: Received cc of letter from GES to MTA - access requested to sample wells on 2/20/2010. Spoke to Chris Ward. Update report will be submitted. 5/26/2010 - Carlson: Received cc of access request by GES to MTA to sample wells on 6/12/2010. 6/25/2010

- Carlson: Received cc of access request by GES to MTA to sample wells on 6/12/2010. Left message for MTA Philip McGrade to followup on status of construction. 6/29/10 - Carlson: Spoke to Paul Matthews at MTA (212-616-4462). TBM is still in operation 5 days/wk 24hr/day. No construction on weekends when GES samples wells. Remedial work on Saturdays would be very difficult due to access on site. Project completion scheduled for 2013. 7/27/2010 - Carlson: Meeting held with Penske on 7/27. NYSDEC to organize meeting with MTA to discuss access/remedial plan. 8/24/2010 - Carlson: Meeting held with MTA and Penske on 8/24. Penske to reinstall wells on a weekend. Wells to be covered with roadplates. Contractor will remove roadplates prior to remedial activity at the site. Penske/MTA/NYSDEC to perform site visit to confirm locations of new wells. 9/22/2010 - Carlson: Site meeting held to discuss well installation locations and procedures. GES will prepare updated site plan. 3-11-11. - Breen: Consultant, GES, sent in Site Status Update Report on CD today. Heather Cloud is Operations Manager. Sarken Dressler is the Staff Hydrogeologist. Report for 9610811 is on the same CD. 6/6/12 - Carlson: Reviewed Site Status Update Report dated 4/30/12. Wells sampled on 2/25/12. Wells destroyed in 2008 were not replaced. Max BTEX only 588 in MW-4. Max MTBE only 3 ppb in MW-8. Called MTA Philip McGrade at number in file. Voice mail indicated this is not his number anymore. Left message at this number for help getting status of MTA 7-line extension project at this site. 6/8/12 - Carlson: Left message for Phil McGrade (646 252 8315) to follow up on 7 train extension project. 7/11/12 - Carlson: See new spill 1201147 at site - MTA found a diesel/#2 fuel oil in tank shaft location. Tank was removed. 9/14/12 - Carlson: Reviewed 2nd quarter 2012 update report. Existing wells show low concentrations. Destroyed wells were never replaced. Continue to followup on status of 1201147. Need to contact MTA to get status of MTA project. 11/19/12 - Carlson: Spoke to Paul Matthews at MTA - he isn't involved in project anymore. New contact is Steve Asquith 646-252-8326. Left message for Steve Asquith. 11/26/12 - Carlson: Spoke to Steve Asquith (917-217-4765). He is arranging access with Penske/GES. Send him my email address, he will cc me on correspondence with penske/GES; 11/27/12 - Carlson: Emailed Steve Asquith (sasquith@mtacc.info) - please cc me on correspondence with Penske/GES as discussed during yesterdays phone conversation. 12/11/12 - Carlson: Site meeting with Heather Cloud (GES) and Dave Mariani (Skanska). Well locations were marked out. Wells will be installed in January. 9/17/2013 - Carlson: Received FOIL request from Michael Silvermintz (michaelsilvermintz@gmail.com, 646-831-1443). Forwarded to DEC Silva for processing. 9/23/13 - Carlson: Received phone call from Steve Cambruschini - new owner will purchase this property and redevelop. They intend to sign a new stip. They plan on excavating impacted soil. He will email me for a FOIL request of file. Need to get contact info of new owner to send new stip. 10/10/13: received phone call from Christopher McMahon requesting FOIL review. Sent email to email Gloria Silva for FOIL review. Also, I requested he send me contact info for new owner so I can send new stipulation agreement. 10/28/2013 - Carlson: Reviewed 3rd Quarter 2013 Site Status Report. Monitoring wells gauged and sampled on 9/28/2013. Sheen (0.04ft) in MW-3R. Maximum BTEX concentration 1,410 ppb (MW-3R). 10/29/2013 - Carlson: Issued new Stipulation Agreement to 293 Tenth Ave. Corp, c/o Michael Silvermintz. Signed Stip due by 11/12/2013. RAWP due 30 days after effective date of the Stipulation. 2/21/14 - Carlson: Reviewed RAWP dated January 2014. Site to be

**1000382741**

excavation, dewatered, and redeveloped. Site will be excavated in former tank area to 11 ft below grade (4 ft below gw table). Excavation will be dewatered in order to extend below groundwater table. Hotspots encountered will be overexcavated, to the extent feasible. Two downgradient wells will be reinstalled in southern portion of property that will not contain a basement. Endpoint samples will be collected as per DER-10. Issued approval letter. 3/31/14 - Raphael Ketani. As of today, I am taking over case management from Ms. Carlson. The contact person is Chris McMahon at Langan Engineering, River Drive Center 1, 619 River Drive, Elmwood, NJ, 07407, (201) 794-6900. The proposed development of the site is as a 7 story combined commercial and office building. 4/9/14 - Raphael Ketani. I made an unannounced site visit. The site contained triple stacked office trailers on the West 26th Street side of the site. Standing from the outside, I could see that there was a lot of activity and equipment on site from the MTA construction next door for the 7 Train tunnel construction. So, I didn't enter the bounds of the site. However, I did take pictures of the site from the outside. I could see that workers were still finishing the brick work outside the MTA building that had been constructed above the tunnel shaft. 4/10/14 - Raphael Ketani. I tried to contact Steve Asquith (917) 217-4765 of the MTA to let him know that I was the new DEC project manager, but I could only leave a message. Later, I contacted Mr. McMahon (201) 794-6900. He told me that the MTA plans to be done with their work and off of the site by the second week in May 2014. Mr. McMahon added that the new owner intended to first demolish the former Fed Ex building that is adjacent to the east of the site during July 2014. Excavation of the entire site will take place to 14 feet below grade. Endpoint samples will be taken as per the plan included in the approved RAWP. I told Mr. McMahon that Langan should follow the soil contamination as much as possible before taking endpoint samples. This way, the samples will be low or non-detect with regard to any analytes and the whole process will go smoothly. Mr. McMahon stated that groundwater was about 8 or 9 feet below grade and asked about sampling the groundwater after the MTA leaves. I told him that this wont be necessary as Langan will dig out all of the contamination below the water table. Mr. McMahon stated that the beginning of redevelopment is planned for either September or October of 2014. I asked Mr. McMahon to send me the endpoint sampling map with a cover letter describing what will take place regarding the endpoint sampling and sample processing. I added that, later, the DEC will need the letter of acceptance from the facility that will receive the soil. Also, I stated, the DEC will need a letter from the facility that will accept the contaminated water that is collected. Mr. McMahon stated that once they know where everything will go, then he will send these letters. After this point, I said, the DEC will need a schedule describing the excavating, endpoint sampling, sample processing, foundation construction and so forth. Mr. McMahon said that he will send this to the DEC. At the end of our conversation, Mr. McMahon asked about the request by the owner for a change in the Stipulation Agreement whereby Penske is let off of the hook. I told Mr. McMahon that this is something Lou Oliva, Region 2 Chief Counsel, will have to work out with Penske. With that, the conversation ended. Mr. Asquith (917) 217-4765 called me back. He said that Skanska, the construction company building the ventilation shaft, is presently cleaning up the site. They told him that they expect to be off of the site by the end of April 2014. 5/2/14 - Raphael Ketani. I reviewed

**1000382741**

the First Quarter 2014 Site Status Update Report dated 4/29/14 that was submitted by GES. Groundwater sampling took place on 3/15/14 for wells MW-1, MW-2, MW-3R, MW-4, MW-6 to MW-8 and MW-10. MW-9R was not sampled as MTA equipment was over it. There was 0.02' of product in MW-3R. All of the analyses were for just BTEX. MW-1 had results from non-detect to just above the TOGS 1.1.1 standards. MW-3R had the results 660 ppb total xylenes, 913 ppb ethylbenzene, 95.5 ppb benzene, 13.1 ppb toluene. MW-4 results were 237 ppb ethylbenzene, 215 ppb benzene, 18.4 total xylenes, 10.7 ppb toluene. MW-10 had 2 non-detects and 2 very low hits. For MW-2, MW-6 to MW-8, the results were either entirely non-detect or mostly non-detect with one very low hit. MTBE varied in concentration from mostly non-detect to 8.98 ppb. Quarterly sampling is planned for June 2014. 5/19/14 - Raphael Ketani. Today I received a copy of the signed Stipulation Agreement from 293 Tenth Avenue Corporation. It was signed by Michael Silvermintz, President of the corporation, on 5/2/14. I hand delivered the Stip to the Region 2 legal division. According to the schedule in the approved Remedial Action Work Plan dated 1/24/14, the remedial activities are anticipated to take 4 months beginning in October 2014. Later, I was informed that the DEC needed the original signature page in order to make the executed Stipulation Agreement. I contacted Mr. McMahon (201) 794-6900 and asked him to have his client send the original signature page with Mr. Silvermintz' original signature as soon as possible by regular mail. Mr. McMahon agreed to do this. 6/13/14 - Raphael Ketani. The Stipulation Agreement with the original signature of the president of 293 Tenth Avenue Corporation, Mr. Silvermintz, was given to me today. 6/17/14 - Raphael Ketani. The Stipulation Agreement was submitted to the Region 2 legal division for processing. 6/23/14 - Raphael Ketani. The Stipulation Agreement was signed by Venetia Lannon, Region 2 Director, and the original was sent to Mr. Silvermintz. 8/1/14 - Raphael Ketani. I reviewed the second quarter 2014 groundwater monitoring report for the site. The document was titled Site Status Update Report and dated 7/31/14. On 6/21/14, groundwater sampling took place at 6 onsite wells. Groundwater elevations were from 6.04' bgs at MW-8 to 6.71' bgs at MW-6. Flow was to the south. The wells sampled were MW-1, 2, 4, 6, 7 and 8. Wells MW-3R, 9R and 10 were inaccessible at the time. Well MW-5 had been abandoned some time ago. The VOC results for wells MW-1, 2, 6 and 7 were entirely non-detect for BTEX and MTBE. The sample from MW-8 had hits just above and just below the TOGS 1.1.1 standards. The results for MW-4 had 260 ppb of benzene and 424 ppb of ethylbenzene. In addition, a sample was taken from IW-2R on 3/21/13 and had 3530 ppb of benzene. Why this well was not sampled again was not explained. The contamination in the groundwater at MW-4 needs to be addressed. IW-2R needs to be sampled again. Also, wells MW-3R, 9R and 10 need to be made available for sampling, given that their loss is significant as there are not many wells for sampling. Additionally, I checked the property database ACRIS for the current ownership information. The property is still owned by 293 Tenth Avenue Corporation at 5 Rosewood Lane, Wesley Hills, NY, 10901. The property block and lot are 697 and 56. There is a UCC1 with 540 West 26th Street Property Debt Investors IIA, LLC at 10 East 53rd Street, 37th Floor, NY, NY, 10022. 8/4/14 - Raphael Ketani. A letter was sent today to Mr. Silvermintz of 293 10th Avenue Corporation. In the letter, I stated that the work plan was overdue and that 293 10th Ave was in violation of the Stip. I added that if the work plan is not received by August 22, 2014, then the Department will take legal

**1000382741**

action. 8/28/14 - Raphael Ketani. Mr. McMahon (201) 794-6900/cell (201) 218-2339 had called and left a message that he wanted to talk to me about the site. I tried to return his call, but could only leave a voice message. 9/8/14 - Raphael Ketani. I spoke to Mr. McMahon (201) 794-6900/cell (201) 218-2339 today about future monitoring work at the site. He said that, right now, the owner is having trouble with the tenant of the building on the other lot. He refuses to move. So, the excavating has been pushed back to March 2015. Mr. McMahon stated that the MTA had destroyed all but two wells on the truck leasing site. He proposed that groundwater sampling be stopped as all of the contamination will be removed by the excavating. The excavating will include the areas of MW-2 and IW-2R, the two most contaminated locations. I asked Mr. McMahon whether end point samples will be taken. He said that the sides of the pit and the bottom will be sampled as per the guidance in the DEC regulations. I told him that the DEC will need manifests for all of the material that is removed. He said that we will get copies of every manifest. I told Mr. McMahon that this will be the approved plan of action for the foreseeable future. With that, the conversation ended. Later, Mr. McMahon sent me an e-mail clarifying and memorializing the excavation plan in more detail. He included 3 figures with the e-mail. 7/9/15 - Raphael Ketani. As I hadn't received any information about the spill case in some time from Mr. McMahon, I sent him an email requesting an update. Mr. McMahon sent a response email today: Progress at the site has been advancing; however, our schedule may have been a bit aggressive when we last spoke. The existing building demolition is nearing completion and we are working with the NYC TA to clear up a couple of issues regarding the building plans and the influence with their neighboring building and subway tunnel. Those issues are supposed to be resolved within the next two weeks and the site will pull their building and start construction immediately thereafter. I actually had put it in my mind to give you a heads up today or tomorrow that construction was going to begin shortly to give you a little advance notice if you were interested in visiting during construction/remediation. My client is VERY eager to start the project and has already signed a lease for 80% of the building that carries very heavy penalties for not meeting certain deadlines that are driving the project forward at this point. I am certain that barring further issues with TA that we will be mobilizing to the site within weeks. 7/10/15 - Raphael Ketani. I responded today by email to Mr. McMahon [(201) 398-4535/cell (201) 218-2339/cmcmahon@langan.com] and stated that the Department requires a report showing the work that had taken place to demolish the building, copies of all manifests for all materials that are removed from the site, copies of manifests for asbestos and asbestos contaminated material disposal - the receiving facility must be permitted for asbestos and the Department needs a copy of this permit, pictures of the demolition and excavation work, end point sample results, groundwater grab sample results (if any samples are taken), manifests for all liquids, contaminated soil and clean soil removed from the site and maps showing where the end point samples were taken. 8/20/15 - Raphael Ketani. Mr. McMahon (201) 398-4535/cell (201) 218-2339 had called and left a message yesterday and I returned his call today. He stated that preliminary construction had begun at the site. However, he stated that the building that was going to be demolished was not on or part of the spill site. It was on an adjacent property. I told him that, in this situation, he didn't need

**1000382741**

to send the Department any manifests or information regarding the demolition. He added that the groundwater would be prevented from entering the site by the construction of a barrier wall around where the basement would be. A machine would be used which would auger down 10 feet below grade. The auger will have holes in it. Once the auger reaches the target depth, then concrete will be pumped down the auger and the auger withdrawn. This will leave a column of concrete. Mr. McMahon mentioned that this would be like creating a secant pile wall, except that there would be more soil left between the piles. They would auger all around the proposed basement area. Any contaminated soil and groundwater will be collected and sent to appropriate disposal sites which heat the materials as a means of disposal. I told Mr. McMahon that this sounded alright to the Department. 12/1/15 - Raphael Ketani. Melissa Ng, Senior Staff Engineer from Langan (212) 479-5490/mng@langan.com sent Ryan Piper of the Spills Unit an email requesting information regarding the site as she was writing a Phase I for another site nearby. I sent her a copy of the case notes. 12/2/15 - Raphael Ketani. Ms. Ng contacted me directly by email and requested the 1/29/14 Remedial Action Work Plan for the site. I sent her the plan. 12/11/15 - Raphael Ketani. As there have been no updates since 8/20/15, I sent an email to Mr. McMahon [(201) 398-4535/cell (201) 218-2339/cmcmahon@langan.com] requesting information regarding the demolition of the building and the excavating of the site. 6/23/16 - Raphael Ketani. As there have been no reports submitted or progress updates, I sent an email to Mr. McMahon requesting an update, soil and groundwater analytical data, disposal manifests and pictures. Mr. McMahon responded to my email. He stated the following: The majority of the material at the site has been removed in conjunction with the remedial efforts at the site associated with the foundation construction. To date, we have collected 29 post-excavation soil samples and have a single sample that remains to be collected. Of the 29 samples, we have results for 27 of them. Based on a preliminary review of the results, there have been no exceedances of the CP-51 criteria. As of today, trucking is still occurring occasionally at the site. All petroleum impacted material has been shipped to the Bayshore facility in Keasby, NJ for treatment. We have yet to receive the manifests from the foundation contractor, but they were requested last week. I anticipate that it will take a few weeks to compile them. I have provided a link below for you to access recent pictures (6/17/16) of the site and I'd be happy to speak with you regarding the project.  
<http://clients.langan.com/ph/default.aspx?postTransaction=1231963216>  
Mr. McMahon [(973) 560-4861/cmcmahon@langan.com] included a list of 15 pictures which were available at the internet link. Two pictures, 6801 and 6804, showed cylindrical objects sticking up in groups of 3 or 5 with some showing rebar sticking out of them. I sent an email to Mr. McMahon asking him what these structures were. He replied by email that they are concrete and steel filled caissons, which are drilled foundation elements that provide support to the building, several dozen were installed as part of the building foundation construction. The purpose of the picture is to show the waterproofing going beneath the pile caps and grade beams at the site. 9/19/2016 - Colton McPartland. Scanned paper file for DEC Raphael Ketani and placed on computer desktop for future bulk upload once naming convention is received from DEC Jane Obrecht. 9/22/16 - Raphael Ketani. I spoke to Mr. McMahon today by phone. He stated that the foundation has been constructed. Twenty three thousand cubic yards of

**PENSKE TRUCK LEASING CO L P (Continued)**

**1000382741**

soil was removed. The contaminated soil was taken to Bayshore for burning and recycling. Thirty post-excavation soil samples were taken. The results were non-detect for VOCs with only a small number of SVOCs. The last groundwater sample was completely non-detect. Samples taken from the dewatering system were clean. Another groundwater sample will be collected very soon. Two 550 gallon tanks were removed and will be registered. Two wells will be installed outside the foundation footprint. A private school will be constructed in the lower part of the building. 2/27/17 - Raphael Ketani. As no communications nor reports had been received in many months regarding the remediation of the site, I sent an email to Mr. McMahon [(973) 560-4861/cmcmahon@langan.com] requesting the documents. A due date of 3/17/17 was set for the submission of the remediation report and the PBS registration. 4/12/17 - Raphael Ketani. I sent an email to Mr. McMahon informing him that the reports were overdue and requesting their immediate submission. Mr. McMahon called me today regarding my email today. He stated that the report was delayed because they wanted to collect a second round of groundwater samples. They did collect the samples and found that one sample had 230 ppb of benzene. So he will recommend quarterly sampling to the client. He added that he had most of the documentation for the report and that it is in draft form right now. I asked him when the DEC might receive the report. He stated that he believed Langan could send it by the end of next week. With that, the conversation ended. 6/16/17 - Raphael Ketani. As the analytical results report was never sent, I sent an email to Mr. McMahon stating that 293 Tenth Avenue Corporation was in violation of the Stipulation Agreement. I added that we required the submission of the report by June 30th, 2016 or else fines and legal action can and may be taken. 6/21/17 - Raphael Ketani. Mr. McMahon (973) 560-4900 called to apologize for not sending the analytical results report. He said that the DEC will receive the report next week. He added that the latest groundwater sample was taken on 6/6/17 from the one remaining well which is outside the secant/foundation wall. He sent me an email with the VOC and SVOC analytical results table. All of the analytical results had decreased significantly, except for benzene. It was 230 ppb in the previous sample and was now 240 ppb in the current sample. He said that he didn't understand why only benzene remained high. He added that the earlier low analytical results for benzene were due to groundwater being pumped from the site. The pumping system was turned off during late 2016 and after this the benzene concentration rose. I told Mr. McMahon that, as a result of the cessation of pumping, the water table at the well may have also risen into some more contaminated soil and, thus, more oil dissolved in the groundwater. However, I could not explain why benzene would be affected, but not the other analytes. Mr. McMahon stated that the well will be sampled 3 months from now in order to see what the long term concentration trend is. I told him that would be fine. With this, the conversation ended. 6/30/17 - Raphael Ketani. I reviewed the Langan Engineers June 2017 DRAFT Remedial Action Report. The site will be developed by constructing a 7 story tall building which will house various facilities, including a multifloor private school. Six USTs containing gasoline and diesel were removed from the site. As a deep foundation was required for the building, a deep pit was dug which included removing 219 tons of petroleum contaminated soil. Initially, a groundwater monitoring well array was installed and elevated concentrations of various analytes were detected in the samples. Site

**1000382741**

investigations took place during 2002, 2003 and 2004. Wells MW-1 to MW-10 were installed both on and off site. Vacuum extraction events and LNAPL recovery took place. This resulted in the collection of 174.63 gallons of product. Injection wells IW-1 to IW-4 were installed during December 2004. Hydrogen peroxide, ozone, sodium persulfate, sodium percarbonate and surfactant were injected from 2005 to 2008. The vacuum events were completed during 2007 and 2008 and recovered 4,827 gallons of oil contaminated groundwater. Also, 8.80 lbs. of product were collected in the vapor phase. Quarterly monitoring took place from October 2003 to March 2013. During March 2013, 12 wells were sampled. About 0.01 feet of product was found in MW-3R. BTEX was present in all of the on site water samples and in the off site sample from MW-8. LNAPL thickness varied from 0.01 feet to 0.18 feet and historically appeared in MW-1, MW-4 and MW-5 during monitoring events which took place from 2004 to 2006. The site was remediated in accordance with the January 2014 RAP. Soil and fill were excavated to 11 feet below grade. A total of 364 tons of non-hazardous soil and fill and 11,378 tons of petroleum contaminated soil and fill were removed. The materials were sent to Capital Development in Bangor, Pennsylvania and Bayshore Soil Management in Keasbey, New Jersey. Grace Preprufe 300R, Grace Preprufe 160R and Grace Bituthene 4000 vapor barrier sheeting with a minimum thickness of 20 mil was installed as part of the foundation construction. Grace Preprufe 300R vapor barrier with a thickness of 46 mil was installed beneath the cellar slab, elevator pit slab, first floor slab and on the interior of the elevator pit sidewalls. Grace Preprufe 4000 vapor barrier with a thickness of 62 mil was installed on the exterior elevator pit sidewalls. Grace Preprufe 160R vapor barrier with a thickness of 32 mil was installed on the exterior of the western foundation sidewall and Grace Bituthene 4000 vapor barrier with a thickness of 62 mil was installed on the exterior of the northern, eastern and southern foundation sidewalls. A Health and Safety Plan (HASP), Community Air Monitoring Plan (CAMP), Soil Materials Management Plan (SMMP), Stormwater Pollution Prevention Plan (SPPP) and groundwater dewatering were conducted during the remediation of the site. Utilities and easements were located prior to any invasive work. Excavated soil and fill were screened for contamination. Suspect contaminated soil was stockpiled on site and covered prior to delivery to the disposal facilities. Each dirt hauling truck was inspected for contaminated soil on the undercarriage and tires prior to leaving the site. If contaminated material was present, then it was removed before the truck entered the street. The USTs were encountered at about 7.5 feet below grade in the eastern part of the site. They were 42 inches in diameter and 87 inches long. AARCO removed the two 550 gallon gasoline USTs on 9/26/15. About 630 gallons of mixed liquid was collected and disposed of at Tyree Services Corp. in Farmingdale, NY. Residual sludge and water was drummed and taken to Triumvirate Environmental in Astoria, Queens, NY. The USTs were cleaned and cut up and sent to TNT Scrap in Brooklyn, NY. Thirty soil end point samples (PE-1 to PE-30) were taken from the sidewalls and the bottom of the tank graves from 3/31/16 to 6/28/16. The samples were sent to York Analytical Labs for processing via methods 8260B and 8270C. The analytical results were compared to the CP-51 standards. Five groundwater dewatering samples were collected before treatment from 6/22/16 to 8/11/16 and sent to the lab. The samples were processed via methods 8260B and 8270C. On 7/27/16, two permanent monitoring wells were installed (LMW-1 and LMW-2) to the

MAP FINDINGS

**PENSKE TRUCK LEASING CO L P (Continued)**

**1000382741**

south of the southern cellar foundation and soilcrete walls. The borings were drilled to 15 and 16 feet below the ground surface. Each well was constructed with a 10 foot long 10 slot screen. Post remediation monitoring was conducted using 5 onsite wells. Wells MW-6 to MW-8 were situated upgradient and across West 26th Street from the site. LMW-1 and LMW-2 were sampled on 8/11/16, 3/16/17 and 6/6/17. MW-6 to MW-8 were sampled on 6/1/17. Table 1 indicated that the results for the PE series of soil end point samples were almost entirely non-detect for VOCs and SVOCs. Table 2 showed that the influent water sample results for Discharge 1, 2 and 5 were almost entirely non-detect for VOCs and SVOCs. The results for Discharge 3 and 4 were more limited, but still showed that there were no detections. The groundwater sample results for LMW-1, LMW-2, and MW-6 to MW-8 were displayed in Table 3. LMW-1 had consistent very low to high (max. 240 ppb) analyte exceedences, but, with the exception of a sample from LMW-2 (3/16/17) and one from MW-8 (6/1/17), the VOC results for the other samples and the SVOC results for all of the samples were almost entirely non-detect. 7/6/17 - Raphael Ketani. I reviewed the Langan Engineers FINAL Remedial Action Report dated 7/5/17. The contents of the FINAL report appeared to be the same as in the DRAFT report. I approved the report without comment. 10/25/17 - Raphael Ketani. I sent an email to Mr. McMahon [(973) 560-4861/cmcMahon@langan.com requesting the latest groundwater analytical data. 12/8/17 - Raphael Ketani. I sent an email to Mr. McMahon requesting the latest groundwater data. 12/14/17 - Raphael Ketani. Mr. McMahon sent me the 12/5/17 and 12/6/17 groundwater sample analytical data for the site. Samples were taken from MW-1, MW-2, MW-6, MW-7 and MW-8. Locations MW-6 to MW-8 were upgradient and across the street to the north. MW-2 was in the southwestern quarter of the site. MW-1 was in the southeastern quarter of the site, but almost in the center of the site. The VOC exceedences for the samples from MW-2 and MW-6 to MW-8 were either none or no more than 19.2 ppb. However, the MW-1 12/5/17 sample had 10 VOC exceedences. Most of the exceedences varied from 6.3 ppb to 73.1 ppb, but benzene was 238 ppb. Mr. McMahon called me on the phone and we discussed the results. We agreed that the benzene result for MW-1 stood out. I commented that it was too high to close the case with. We looked at the historical trend for benzene from MW-1. The decreasing trend was noted. I asked Mr. McMahon whether any treatment solutions has been injected into MW-1. He stated that Langan had not done this. I told him that the Department will require that another round of groundwater sampling take place in order to see whether the decreasing trend continues and whether the benzene concentration has decreased further. He agreed to do more sampling. I also asked him to include a Kendall-Mann trend graph in the next monitoring report. With that, the conversation ended. 3/28/18 - Raphael Ketani. Yesterday, I received Table 1 and Figure 2 for the March 2018 groundwater sampling results. The samples were collected on 3/6/18 and 3/9/18. The VOC results were almost entirely non-detect for the samples from LMW-2 and LMW-6 to LMW-8. Though most of the VOC results for the sample from MW-1 were non-detect, there were still 9 exceedences of the TOGS 1.1.1 standards. The highest exceedences were for total xylenes at 63.7 ppb and benzene at 228 ppb. However, with both analytes, a decreasing concentration trend continued to be present. The SVOC results for all of the samples were almost entirely non-detect.

-----  
----- I reviewed the case file. The

Remarks: information in the case file described the removal of 6 USTs and many tons of oil contaminated soil in the process of digging out the site for a deep foundation. Chemical treatments to remove additional contamination also took place at various times in the past. Based upon this information and the decreasing concentration trends which were evident from the latest versions of Table 1 and Figure 2, I determined that the gross contamination had been removed. Any residual contamination would not be a threat to the public or the environment. Therefore, I closed the spill case effective today and sent a spill closure letter to Peter Rosenthal and Eric DeSimone of Savanna at 430 Park Avenue, 12th Floor, NY, NY, 10022, Mr. McMahon (cmcmahon@langan.com) and Steven Ciambuschini of Langan. "CALLER RESPONDED TO ABOVE LOCATION TO REMOVE FUEL TANKS. UPON REMOVAL SOME SOIL CONTAMINATION DISCOVERED. TANKS REMOVED AND SOIL EXCAVATION IN PROGRESS. NO CALL BACK REQUESTED."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 DEC Memo: "TTF letter was sent to A B C Realty 152 W 57th Street 12th Floor New York, NY 10019 Attn: William Harra TTF in edocs. 03/09/11-Hiralkumar Patel. 3:00 PM:- visited site as inspecting property at 535 W 23rd street, a property two doors west from the subject site. met Fraser (917-921-8309), building super. site has building on slab and a photo gallery is located on groundfloor. Fraser mentioned that the tank is located somewhere underneath the gallery floor. he mentioned that after the tank system failed the test, tank was drained using supply line connection in boiler room. boiler room is sub-grade and west of the tank location. inspected boiler room wall adjoining the tank location and found no oil staining or seeping. fill port found sealed. Fraser mentioned that management is planning to remove tank and install new tank at the same location. currently, site is using temp. tank. 6/7/11 Spoke to Seth Freedland, attorney representing the tenant, which is an art gallery. Phone: (212)344-1400 ext.202. He requested that they delay the work for the spill closure until July 2011. I would consider it, but would require a plan to do the investigation. He will contact the condo association and e-mail me

From: Seth D. Friedland Sent: Tuesday, June 07, 2011 12:46 PM To: 'bkfalvey@gw.dec.state.ny.us' Cc: Seth D. Friedland Subject: 521 West 23rd Street, NYC -- DEC Spill No. 1010869 - PBS No. 2-304158 Brian: Thanks for taking the time to discuss the above matte this morning. As mentioned, I represent the Steven Kasher Gallery which is the ground level tenant at the condominium building which is the subject of the above PBS case. Our client operates a gallery at the location, and the tank is suspected of being buried under the gallery floor. To accommodate our client s business requirements and to avoid undue disruption of our client s operations, as discussed, I would like to coordinate the proposed tank closure work to be performed during the month of July on a date or dates to be selected. You indicated that you would be amenable to the work being done in July. I will coordinate with the building manager and its consultant in order to propose the schedule of work and let you know. Should you have any questions, of course, please let me know. Thanks again for your assistance. Regards, Seth D. Friedland Friedland Laifer & Robbins, LLP 62 William Street, Third Floor New York, New York 10005 Tel. 212.344.1400 x. 202 Fax 212.344.8735 email: sfriedland@friedlandlaifer.com This message and any attachments are solely for the use of the intended recipient(s). Lovato of Advanced Site Restoration. Phone: (646)235-4800 and (212)809-1110. Contractor for gallery owner. Tank passed and lines failed ttt. I told him he needs to delineate contamination. He will send work plan. bf 8/14/12 PBS inspection today. Tank is still in use based on the petrometer which shows that there are approximately 1400 gallons of fuel in the tank. NOV issued and sent to William Harra at the above address. PBS settlement conference scheduled for 9/19/12. bf 9/19/12 Nopbody appeared for the PBS conference scheduled for today. bf 9/25/12 Today, received e-mail response from Riteway, contractor for the facility: Hi Brian, I sent this package back on Sept 27, 2011. I did not follow up with you and thought that you had closed it. I just received another violation from the client dated 8/14/2012 inspection #31107. Please let me know if you need anything else. From: David Chan [mailto:david@petroleumtek.com] Sent: Tuesday, September 27, 2011 3:34 PM To: 'Brian Falvey' Subject: spill 1010869 Hi Brian, Please find the closure report and supporting documentation for spill # 1010869. If you have any questions please do not hesitate to ask. Best regards, Dave Chan Riteway Tank Maintenance Corp. 700 Hicks Street Brooklyn, NY 11231 718-855-7272 phone 718-855-7244 fax david@petroleumtek.com -----end----- 10/1/12 On 9/25/12 received the following e-mail from David Chan of rite-way that also included attachments: site sketch, analytical sample results, closure requerst letter, and ttt tank only test report. -----start----- Hi Brian, I sent this package back on Sept 27, 2011. I did not follow up with you and thought that you had closed it. I just received another violation from the client dated 8/14/2012 inspection #31107. Please let me know if you need anything else. -----end----- On 9/28/12, received the following e-mail from David Chan which included the same attachments as the 9/25/12 e-mail: -----start----- Hi Brian.... -----end----- Tank failed because of hole in vent line. Submitted photos show the vent line with a corrosion hole and no visual contamination. Four samples were taken and were below DER- 10 allowances. A tank system test is required to close the spill case. today, responded to Mr. Chan's e-mail with the following: -----start----- David, The spill case can not be closed until the Department receives a passing tightness test for the whole system. The owner needs to correct the following registration information: 1. The product stored is #4 oil not #2 oil. 2.The tank overfill prevention is registered as a gauge. A gauge used for overfill prevention is only applicable to aboveground tanks. 3. The tank spill prevention is a catch basin. It is registered as none. 4. Pipe secondary containment is blank. The information correction application is attached. There is no fee for this application transaction and an original copy must be submitted (fax or e-mail copies will be returned unprocessed). Brian -----end----- bf 11/13/12 received the following e-mail from David Chan: Dear Brian, Please find the final tank and system test verifying the integrity of the system for the spill closure. I am following up with the owner with regards to their PBS. Please let me know if you need anything else for the closure. Thank you in advance. Best regards, David Chan Riteway Tank Maintenance Corp. 700 Hicks Street Brooklyn, NY 11231 718-855-7272 phone 718-855-7244 fax david@petroleumtek.com 11/27/12 Based on sampling results, case closed. bf" "Bill is the realitor of the building."

TIPPLE SIERRA REALTY COPR. PLANS TO ISOLATE AND RETEST MIKE DELPERCIO FROM LIEBLICH AT 718-585-5200 DOING WORK 11/15/2000 SITE VISIT REQUESTED UPON ARRIVAL AT SITE THE EXCAVATION REVEALED 8 +- OF PRODUCT IN THE DIRT EXCAVATION, THE FILL LINE WAS REMOVED, AND THE TANK WAS STILL IN SERVICE. THEY WERE TOLD TO CLEAN THE PETROLEUM, ISOLATE AND RETEST THE TANK, REMOVE FROM SERVICE IMMEDIATELY IF IT DID NOT TEST TIGHT. KEEP THE DEC APPRISED OF THE PROGRESS. 1/9/03 Roux env. cleaning tank to observe if there is any additional product. wells have shown no product.// will update DEC when info is gathered 9/28/04 tipple called Josh Levine....Clean wells soon, and I would like to witness the last baling next quarter. 10/20/05 - Raphael Ketani. I spoke to Joshua Levine at Roux (rooo) Associates ((631) 232-2600)regarding the site. He said Sierra Realty Management is the owner of the property. He said the UST was punctured repeatedly and used as a receptacle for collecting the oil and water. Once it was no longer usefue, it was abandoned in place with foam. A new AST was put in it's place. Mr. Levine will call me back regarding the status of the site. There is no PBS case for the site, even though they abandoned one tank and installed another. I will send them a letter instructing them to register the two tanks and close the abandoned one. 10/25/05 - Perry Parker of Sierra Realty called me today to tell me that the 10,000 gal. active tank had been registered and that the 11,200 gal. one had been closed. Mr. Parker sent me the paper work showing the tank closure and registration. The PBS case is #2-045187. 12/2/05 - Raphael Ketani. Joshua Levine called to say that the 11,200 gal. tank was abandoned in place and that the owners got a certificate from the FDNY. He wanted to set up a conference call with Perry Parker to discuss what contamination was found and where the owners go from here. He suggested 12/5 at 3 PM. I agreed. 12/5/05 - Raphael Ketani. I had the conference call with Joshua Levine and Perry Parker. Mr. Levine gave me a chronological run-down of how the remediation and oil recovery went since the inception of the spill. Mr. Levine mentioned that no product had been seen in the monitoring wells on 6/11/04 and 7/20/04. However, on 10/04 about a foot of product was found and bailed. On 12/04 Roux went back and bailed product. Mr. Levine added that on 11/11/05, about 30 inches of oil was found in well MW-2, which is at the location of the former UST. All of the other wells had been dry or didn't have product. I asked Mr. Levine how much product had been recovered. He said about 500 gals. I told Mr. Levine a system or method has to be used to continue to recover product. He agreed and said he would send me a letter stating how they will recover the remainder of the oil and proceed with the method. 1/23/06 - Raphael Ketani. I called Mr. Levine regarding any progress in finding a redesign that will allow for more oil recovery. He said that they will redrill MW-2 and enlarge it from a 1 diam. well to a 2 diam. well. He said that Zebra Environmental will do the drilling on 1/27/06. 4/3/06 - Raphael Ketani. Today I received a progress report letter dated March 30, 2006, from Roux Associates, Inc. Several inches of #6 oil is still appearing in MW-2A and MW-5. They will try to recover more oil later. 03/21/07 - Spoke with Mr. Levine of Roux. I requested submission of the Final Spill Closure report to evaluate merits of spill closure Mr. Levine is requesting. V. Brevdo 02/01/08 - Mr. Lavine of Roux telephoned and advised that he is sending spill closure work plan and it is dated 02/01/08 which will describe hot spots soil excavation and free product recovery surrounding the closed in place 11,000 gallon No. 6 oil UST. prepared by ROUX and dated July 21, 2008 indicates the following: The excavation and offsite disposal of localized petroleum impacted soil and free product adjacent to the abandoned 11,000-gallon No. 6 oil UST within the subbasement of 875 Sixth Avenue, Manhattan, New York has been completed. Excavation sidewall and bottom end-point samples were collected from two separate excavations. No soil samples exceeded the TAGM 4046 RSCOs for VOCs and only one SVOC, chrysene, was detected in excess of the RSCOs from three of the 10 end-point samples. A total of 45 drums of petroleum-impacted soil and rock was excavated and disposed of offsite as nonhazardous waste. In addition, seven drums of free product/water mixture were disposed offsite as non-hazardous waste. The excavations were backfilled with 6 cubic yards of clean offsite sand. Free-product has been removed to the extent practicable. No free product has returned to the two monitoring wells, MW-2A and MW-5, since the February 2008 excavation and restoration. There is no indication of offsite migration of free product since the historic spill was contained within the bedrock depression directly surrounding the UST. The post-remediation water sample collected from MW-2A contained no exceedances of the AWQSGVs. This Spill Closure Report provides documentation of the remedial activities conducted to close out NYSDEC spill number 0006542. On behalf of Sierra Realty, Roux Associates has requested closure of NYSDEC spill number 0006542. Based upon review of the Spill Closure Summary Report and taking into consideration aforementioned findings, I decided it is appropriate to close spill. Spill is closed on August 21, 2008 (VB) "

DEC Memo:

"Prior to Sept. 2004 data translation this spill Lead\_DEC Field was SANGESLAND Sangesland responded to the site of a reported contaminated soil location. Owner of the site is excavating what was a parking lot in order to install footings for a new building. Upon excavation, the southwest corner of the property at 160 west 22nd St was found to have petroleum contaminated soil. After contacting DEC rep Mark Tibbe, it was determined that the property directly to the south (161 west 21st st) was a taxi company with an ongoing state PIN cleanup project. Mr. Tibbe stated that the parking lot at 160 west 22nd st did have 3 monitoring wells associated with the ongoing clean up. AKRF rep Mimi Sotiriou (212-340-9790) stated that all contaminated soil would be dug out, sorted, and shipped out with manifest for proper disposal. Since the contamination was only in the extreme southwest corner of 160 west 22nd st, directly adjacent to the property line of the taxi company and within 15 feet of the remediation equipment, it was clear where the source of the contamination was from. 11/1/2000 AKRF sent a letter to DEC stating that 228.75 tons of contaminated soil was removed from the site. AKRF stated that Petroleum contaminated soil was removed from along the southwest border of the property until no petroleum-like odors were observed.... ..Soil was transported to Mt. Hope Recycling of Wharton, New Jersey Since all contaminated soil was removed from this site, this spill number was closed out. IT SHOULD BE NOTED THAT EXISTING CONTAMINATION FROM THE PROPERTY AT 161 WEST 21ST STREET MAY HAVE AN IMPACT ON THE NEW BASEMENT WALL INSTALLED ON THE SOUTHWEST CORNER OF 160 WEST 22ND STREET. Spill closed 1/2/2001 "

Spiller Name: KEN MARKS  
Spiller Company: ANN'S CAB  
Spiller Address: 161 WEST 21ST STREET  
Spiller Company: 001  
Contact Name: Not reported  
DEC Memo: "10/10/95: This is additional information about material spilled from the translation of the old spill file: GASOLINE ODOR. see also 8701176, 8701597 (SP97155), 9400302, 9403442, 0006798. (also addresses 160 W 22nd St, 166 W 22nd St) 3/18/04 Received phonecall from Kevin Kleaka, Impact Environmental. Excavation is planned for next Tuesday, 3/23. RAP was previously approved by M. Tibbe. DEC had requested 5day notification. Requested project manager return phonecall (631-269-8800 or cell 516-805-8892) when reassigned.(KMF) 3/22/04 Transferred from Tibbe to Foley. Rommel 3/23/04 Spoke to K. Kleaka, Impact Env. Excavation to begin tomorrow. Tanks have been out since approx 1992-1994. 3/31/05 Spoke to Scott Underhill, URS (518-378-8766). He was hired by Bank of NY to conduct a third party peer review. The bank is putting up funding for the development of the property. 4/5/05 Received update from K. Kleaka, Impact Env. In 3/04, they excavated 340tons of gasoline impacted soil. On 2/14/05, endpoint sampling from 8 locations was conducted and analyzed by 8021. On 3/15/05, additional endpoints were collected from 3 locations and analyzed by 8021. Additional excavation to mitigate residual soil contamination on the northwestern portion of the site will be conducted in 4/05. Construction of building is now to include a second sub-level which will require removing 3-5 feet of bedrock (bedrock is at 17'bgs). GW is at 11-14'bgs. 4/13/05 Spoke to K. Kleaka, Impact Env. They have excavated down to bedrock across most of the site. Not much water is accumulating and have not had to dewater. Will schedule site visit and discuss possible modifications to the RAP. 5/17/05 Site visit conducted with owner, Impact, URS and Bank of America. Currently chipping away at bedrock which is about 17'bgs. All soil removed. Almost no groundwater infiltration which is surprising since perched GW was detected at 11-14'bgs. Requested a water sample from the puddle in the NW corner of property. They are contemplating an ORC application. I recommended that if the GW was clean from the bedrock surface, that they not go ahead with ORC. If it is contaminated, they will do ORC pour and will need to monitor effectiveness. Well locations possible along W 21st. Inspected backyard of 166 W 22nd St which is about 8'bgs. Access for equipment, especially for bedrock drilling, would be very difficult but may be able to obtain perched gw samples. 6/6/05 Received results for three grab samples taken from the standing water on site, collected on 5/18/05. BTEX ranged from ND to 2005ppb and MTBE from 128ppb to 1080ppb. Owner requested that the ORC application be eliminated from the RAP. 6/8/05 Email to K. Kleaka and K. Lalezarian. Required that the ORC application be completed along with effectiveness monitoring. Impact to submit revised RAP. 9/9/05 Received revised RAP via email. During the period from 3/24/05 to 5/20/05, 3983 tons of petroleum impacted soil was excavated. It is expected that removal of all source materials will reduce the concentrations found on the perched watertable. However, to address the residual impacts, Impact Env. proposed ORC for bio-enhancement. It will be spread as a dry mixture and the natural formation will provide the water to activate the release. A 6mil vapor barrier and passive vent system will be installed. A MW will be installed along W 21st St. GW samples will be collected before and after the application, analyzed for VOCs and

S102148346

taking field measurements for DTW, pH and DO. Due to physical constraints, no wells are to be installed at 166 W 22nd St. 9/9/05 Approved revised RAP. As discussed with K. Kleaka, the ORC will be applied in a slurry in dry areas and directly mixed with accumulated water in the wet areas. 5/18/06 K. Kleaka, Impact Env, indicates a closure report will be submitted next week. 5/25/06 Reviewed site closure report. The remediation activities completed on the site included the removal and disposal of 3,982.92 tons of petroleum impacted soil and construction fill, confirmatory endpoint soil sampling, certified laboratory analysis, bio-remediation of perched groundwater, and the installation of a vapor barrier in conjunction with a passive subslab ventilation system. After detecting contaminants in soil, all soils were removed to the bedrock surface. 450lbs of ORC was introduced following the detection of VOCs on the perched groundwater. Concentrations of total VOCs in perched water ranged from 165ppb to 3556ppb. MW-1 was installed in order to monitor the effectiveness of the bio-remediation. However, the well did not produce any water and therefore could not be sampled. It appears that the actions taken are protective of human health and the environment." Not reported

 DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was SAWYER 4/22/03 SAMUEL- RCVD TANK CLOSURE & SITE ASSESSMENT REPORT. CONTACT PERSON:- HUGH J FREUND 212 705 7000- ATTORNEY FOR THE MARY BOONE GALLERY (R.P) 2/9/06- DEC Piper spoke w/ LEE WESTCHOTT at Whitman CO. As per conversation there was free floating product discovered at the property. There is a monitoring well network. It has been recently sampled and Lee will forward a summary status report to the dept. including analytical summaries within the next month. Case referred to Koon Tang. 06/08/06: This spill transferred to S.Kraszewski. - SK 08/14/06: Received a voicemail from Ira Whitman, concerning the status of the site. He gave no callback number. SK reviewed the Tank Closure Report from Fall 2001. It is evident that high levels of VOCs were detected around the fuel oil UST. Lower exceedances were also found around the gasoline USTs and the Oil/Water separator. No mention if GW was encountered; the site lies next to the Hudson River so GW is probably shallow. No MWs were installed during the investigation. Must know the GW condition above all else at this point. - SK 08/15/06: Called Ira Whitman

(732-553-4333) after he left a voicemail. He is no longer the consultant involved with this site, in fact he believes that no firm is involved at all. He was involved on a site project adjacent from this one: Dynamic Delivery was the contractor involved with the clean-up. He said this site already received an NFA. I said, based on the report, the GW condition must be established. He said it might be worth-while to review the reports from the neighboring site, which is also downgradient from this one (closer to the Hudson.) He said to contact a John Houshmand, of Clark Construction, who discovered the tanks during renovation work on the property. - SK 08/18/06: Left a message for John Houshmand (917-553-4333). - SK 08/22/06: John Houshmand called back. He gave me the contact info for Mary Boone, owner of the gallery. Gallery: 212-753-2929, Cell: 917-861-2929. She is not the property owner of the site, she only rents the space. According to John, contractor for the building and several others nearby, after the abatement of the gasoline tanks, fuel oil tank and sump pit the entire area was covered in concrete and established as the Mary Boone Gallery. He also mentioned the adjacent site which supposedly has GW wells and may be useful in characterizing the GW condition for this site. I told John I would look into this other site and get back to him, since he regularly deals with the owner. - SK 08/29/06: I discussed the site situation with JK. The site needs a GW investigation, unfortunately there is no access to the interior so the MWs need to be placed on the sidewalk next to the former gasoline USTs and oil/water separator pit. Also, a soil boring next to the gasoline fill port will be needed. I called John Houshmand (917-553-4333) and explained what work would need to be done. I also asked him for the property owner's contact info since it is not on file. He will find out, plus he asked about other consultants to do the work since The Whitman company had a falling out with Mary Boone. I said to convince her that he seems like a reputable company based on the report. Letter was sent out asking for two MWs, a soil boring and sub-slab soilgas sampling. Property owner is a Samuel Weinberg. - SK 11/09/06: Reassigned from Stephen Kraszewski to Chanda. (Chanda) 01/02/07: Kartik Chnada of DEC sent a letter to Property Owner (Mr. Samuel Weinberg), requiring that an additional investigation of GW and additional monitoring wells at the site. A work plan is mandated by 03/02/07 for approval. 01/10/07: Chanda received an e-mail from John Houshmand, Clark Construction Corp. He said that the RP will be retained Long Island Analytical Laboratories (LIAL), Inc. to perform this work. 2/27/07: Chanda received a limited subsurface investigation work plan prepared by LIAL dated on 2/26/07. 2/28/07: Chnada reviewed the limited subsurface investigation work plan. On 2/28/07, the Department conditionally approves this work plan. On 2/28/07, Chanda sent a letter to RP (Samuel Weinberg) and his consultant (John Hushmand), Michael Veraldi (LIAL), requiring that an investigation summary report be submitted to DEC for review by April 16, 2007. 4/19/07: Chnada received a phone call from Michael Veraldi, LIAL concerning the status of the site. He explained to me the cause of the delay on the investigation work report. 4/23/07: Chanda received a letter from Michael veraldi, LIAL regarding an extension to complete the approved work plan at the site. 4/24/07: Chanda sent a time extension approval letter to the RP (Samuel Weingberg) and his consultant (John Hushmand), Michael Veraldi (LIAL). An Investigation Summary Report must be submitted to the Department by May 4, 2007. (Chanda) 5/24/07: Chanda called John Hushmand (Clark Construction Corp.) and Micheael Veraldi (LIAL) regarding the investigation Summary

Report and present site status. Micheal told me all work has been done and he is waiting for analytical results. The report will be submitted to DEC for review by 5/31/07. 6/6/07: On 6/5/07, Chanda received a Limited sub-surface site investigation report prepared by LIAL dated May 30, 2007. 6/8/07:Kartik Chanda of DEC reviewed the limited sub-surface site investigation report regarding this spill. The soil samples, groundwater samples and soil vapor samples showed that results is not exceed our NYSDEC and NYSDOH guideline. Chanda discussed with Joe Sun (NYSDEC) regarding the results of soil, groundwater, and soil vapor samples. Based on the information presented to the Department DEC closed this spill case. 6/11/07: Chanda sent a NFA letter to Samuel Weinberg, Weinberg Properties and his consultants (John Houshmand, and Michael Vrraldi) regarding closed this spill case. "

Remarks: "while removing tanks contaminated soil found -"

Name: 509 WEST 34TH STREET  
 Address: 509 WEST 34TH STREET  
 City, State, Zip: NEW YORK, NY 10001  
 Program: BCP  
 Site Code: 507330  
 Acres: 1.430  
 HW Code: C231094  
 SWIS: 3101  
 Town: New York City  
 Record Added Date: 05/01/2015  
 Record Updated Date: 12/04/2020  
 Update By: JCGRATHW  
 Site Description: "Location: The site is located at 509-527 West 34th Street, 435 Tenth Avenue and 447-449 10th Avenue in Manhattan. The site is comprised of five separate lots (i.e., lots 17, 20, 29, 35 and 36 of Block 706) and is 1.548 acres in size. Site Features: Lot 17 is a 0.07 acre vacant lot. Lot 20 is 0.49 acres and is entirely covered by a four-story vacant structure formerly utilized as a parking garage, photography studio, artist studio, elevator services and mixed office and warehouse space. Lot 29 is a 0.87 acre paved parking lot formerly utilized for commercial truck rental and parking. Lots 35 and 36, located in the northeast corner of the site, include two vacant buildings. Current Zoning and Land Use: The site, currently used for commercial purposes, is zoned C6-4, which is typically mapped within a major business district. There is a parking facility to the north, Hudson Park to the west, commercial development to the south and retail and multi-family residential housing to the east. Southeast of the site is a 16-story building that is utilized as a public school, office space and retail space. Past Use of the Site: Historic uses included an iron and brass foundry, a hatters fur cutting company (Lots 29, 35 and 36), an electrical conduit company (Lot 17) and a parking garage (Lot 20). Site Geology and Hydrogeology: Bedrock is present beneath the site at depths ranging from less than 2 feet to over 20 feet below grade. A fill layer comprised of sand, gravel, boulders, concrete, and brick fragments is present from grade to bedrock except in the western portion of the site the fill is underlain by a 3- to 6-foot thick native glacial silty sand layer. Groundwater is at a depth of 12 feet and flows towards the Hudson River located 1,500 feet to the west."

Env Problem:

"This section summarizes the assessment of existing and potential future environmental impacts presented by the site. Environmental impacts may include existing and potential future exposure pathways to fish and wildlife receptors, wetlands, groundwater resources, and surface water. The RI report presents a detailed discussion of any existing and potential impacts from the site to fish and wildlife receptors. During the Remedial Investigation (RI), soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), and pesticides. Soil vapor was analyzed for VOCs. As a result, the primary contaminants of concern at the site include Trichloroethene (TCE), Tetrachloroethene (PCE), Toluene, Lead, Nickel, Mercury, PCBs and Poly-Aromatic Hydrocarbons (PAHs). Surface soil, subsurface soil, soil vapor and groundwater are impacted because of historical uses including an iron and brass foundry, an electrical conduit company and a hatter s fur cutting company, which historically utilized a chemical treatment process of nitric acid and mercury to treat animal fur. Dissolved mercury, found in overburden wells near the down-gradient property line, may have migrated off-site. However, the proposed extensive excavation of all site soils and into bedrock, which is not impacted by site-related contaminants, will address the source of the mercury in the groundwater. Otherwise, site-related contamination does not appear to extend off-site in soil or soil vapor. Soil VOCs: VOCs were detected site-wide in shallow (0-2 feet) soils. Cis-1,2-dichloroethylene (cis-1,2-DCE) and trichloroethylene (TCE) were detected at concentrations exceeding NYSDEC Unrestricted Use soil cleanup objectives (UUSCOs). The cis-1,2-DCE (1.7 ppm) and TCE (4.9 ppm) exceedances were from SSB-7 (0 ft. to 2 ft.). SVOCs: Maximum concentrations of SVOCs (PAHs) exceeding UUSCOs were all detected in soil boring sample SSB-2B (0-2 ft. depth) including benzo(a)anthracene (71 ppm), benzo(b)fluoranthene (70 ppm), chrysene (62 ppm), fluoranthene (160 ppm), and pyrene (120 ppm). Metals: Metals were also detected site-wide in shallow soils (0-2 ft.). Mercury was detected in soil above UUSCOs, with a maximum concentration of 300 ppm within the footprint of the former hatter s fur cutting factory (Lot 29). Lead was detected in SSB-9 (840 ppm at 0 ft. to 2 ft.) and in SB-8 (2,100 ppm at 0 ft. to 2 ft.); both exceeded UUSCOs as did the majority of the other soil samples. PCBs: PCBs were detected sporadically throughout the Site (typically parking lots) in shallow soil samples (0-2 ft. depth) at concentrations between 0.234 ppm to 13.1 ppm with several samples exceeding the NYSDEC UUSCO. Pesticides and Herbicides: Pesticides and herbicides were detected in site-wide soils (0-9 ft. depth) including 4,4 - DDD (0.805 ppm), 4,4 DDE (0.468 ppm) and 4,4 - DDT (0.060 ppm) at concentrations above NYSDEC UUSCOs in over half of the soil samples. Groundwater VOCs: From nine groundwater samples collected at seven on-site monitoring wells, three VOCs - benzene, chloroform, and toluene were detected in samples at moderate to low concentrations exceeding NYSDEC Ambient Water Quality Standards and Guidance Values (AWQSGVs). Benzene (1.9 parts per billion [ppb]) and toluene (26 ppb) were from monitoring well SMW-02 and chloroform (10 ppb) was detected in monitoring well SMW-03. Historic underground storage tanks in the existing parking garage may be contributing to the benzene and toluene groundwater contamination. Chloroform does not appear to be site related and it is not a contaminant of concern. It is likely a byproduct of chlorination coming from chlorinated water leaking from

adjacent water lines. No chlorinated compounds were detected in the groundwater. SVOCs: Four SVOCs, primarily PAHs, benzo(a)anthracene (0.05 ppb), benzo(a)pyrene (0.09 ppb), benzo(b)fluoranthene (0.05 ppb), and chrysene (0.04 ppb) were detected in one unfiltered groundwater sample from monitoring well MW-02 at concentrations exceeding NYSDEC AWQSGVs (0.002 ppb). Metals: Of the seven metals detected from nine on-site groundwater samples, Mercury was the only analyte of concern which exceeded the NYSDEC AWQSGV of 0.70 ppb. Unfiltered Mercury samples ranged from 28.45 to 153.1 ppb, and filtered Mercury samples ranged from 15.32 to 103.2 ppb. On-site soil is the source of mercury in groundwater. PCBs: PCBs were not detected in any groundwater samples (7). Pesticides and Herbicides: Pesticides and herbicides were detected in one groundwater sample, but none exceeded NYSDEC AWQSGVs. Soil Vapor Analytical data from eleven soil vapor samples across the site found several VOCs including chlorinated compounds (CVOCs) and petroleum-related compounds. PCE was detected in all samples (2.5 ft. to 3.0 ft. deep) ranging from 2.35 micrograms per liter (ug/m3) to 114 ug/m3 and TCE was detected in all samples ranging from 3.27 ug/m3 to 511 ug/m3. Toluene ranged from 1.09 ug/m3 to 16.4 ug/m3. "

Health Problem:

"People may contact contaminated soil if they dig below the ground surface. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of the buildings, is referred to as soil vapor intrusion. Because the site is vacant, the inhalation of site-related contaminants due to soil vapor intrusion does not represent a current concern. The potential exists for the inhalation of site contaminants due to soil vapor intrusion in the event that on-site buildings are re-occupied and in any future buildings developed on the site. Environmental sampling indicates that soil vapor intrusion is not a concern for off-site buildings."

DEC Memo: "SEE ALSO 86-05564, 95-11782, 98-08740, 95-13588.  
4/12/04-Vought-Spill transferred from Tibbe to Rommel as per Rommel.  
4/19/04 Reassigned from Rommel to K Foley. 5/24/04 Tibbe received voicemail from Curt Schmidt, Fleming Lee Shue (212-675-3225).  
Replacing AKRF. 5/27/04 Added diesel and #2FO to material spilled to address spills #9808740 and 9511782. Spoke to C. Schmidt. Will set up a site meeting next week. 555 W 23th St(spill #0306399), the Tate building, is adjacent to Mendon property which has a system installed on the first floor (no basement). 6/3/04 Set up meeting with A. Fleming for Monday, 6/7. A. Fleming (office 212-675-3225, cell 917-885-1475). 6/7/04 Met with A. Fleming. System located inside Tate has not been in operation. Arnie needs to look into system manufacturer data to see if they can make changes to the system. Wells haven't been sampled since AKRF lost the job. Will arrange to have wells sampled. 7/15/04 Received call from C. Schmidt, FLS. Wells will be sampled 7/19-7/20. FLS still looking into making changes to existing system. 9/21/04 Spoke with Mohammed Ahmed, Fleming Lee Shue (917-612-6018). He was previously with AKRF. Would like to present all data and propose NFA. He will need to FOIL the file to get AKRF data. 10/13/04 Received summary from FLS proposing closure of site. Background: Site is currently a luxury apartment building with art galleries on the ground floor. The site was historically used for freight transportation and warehouse facilities. The Hudson River is approx 0.25mi to the west. Site was mainly used as a truck rental, fueling and maintenance yard. Hertz formerly occupied the site and built a two-story garage in 1963. Hertz installed six 550gal gas USTs in the adjacent parking area located along 24th Street. Hertz also installed a gas distribution system with 4 dispensers. In 1965, Hertz installed four additional 550gal diesel USTs and a separate dispenser. One 7500gal heating oil tank was installed in the SW portion of the building. CMCR, LTD acquired the site from Hertz and also used the site as a truck rental/leasing facility. In 1985, the site was leased to Mendon Leasing Corp. Mendon reported four spills, 9511782(diesel), 9513588(gas), 9605688(gas), 9808740(#2FO). Costco Wholesale purchased the site in 1998 in anticipation of zoning that would allow a retail development at the site and closed the fuel and gas tanks in place. In July 2000, the Related Companies purchased the property and built the current apartment building that covers the site. Tank testing: In July 1990, Mendon was issued an NOV from the FDNY for failing to do the 10yr tightness testing on the six gas tanks. In March 1991, Mendon has all the gas and diesel tanks tested. The gas tanks passed but the diesel tank failed. The diesel tank was repaired and passed retest. In 1993, the heating oil tank was tested and passed. In 1995, the diesel tanks were tested again and failed. The contents were emptied in 5/96 and filled with polyurethane foam. In Feb 1997, the gas tanks were also emptied and filled with water. Previous Investigations: Several investigations were conducted between 1993 and 2001. ES Engineering did work on behalf of Greyhound Lines. ERM Northeast did work for DEC. AKRF did work for Costco and Related. Soil and GW has been impacted by on-site releases of petroleum and possibly also off-site sources. Areas within the parking lot on the north side of the former two-story garage building and inside the building, in the vicinity of the heating oil tank, contained free

**MENDON LEASING CORP (Continued)**

**S104275477**

product in soils and GW. Free product in the former parking lot ranged from 0.08 to 1.63'. Free product found inside the former garage building was as thick as 4'. Dissolved-phase VOCs were also detected in GW as high as 5408ppb. No SVOCs were detected. Soil/GW interface is located at approx 8'bgs, flowing west toward Hudson. GW is not tidal. Bedrock approx 63'bgs, sloping S-SW. Remedial Actions: In Dec 1999, four 550gal diesel USTs and six 550gal gas USTs were removed from beneath the open parking lot. The heating oil tank was removed in Oct 2000. Approx 1000 tons of grossly contaminated soils were excavated and disposed of. The free product appeared on the groundwater surface and removed with absorbant pads. The excavations were left open to monitor for free product. No additional free product was observed and excavations were backfilled. No post-ex sampling was completed. The Department issued a letter on 2/12/01 with comments. A remedial workplan consisting of an in-situ remediation for soil and GW using SVE and bioremediation was presented and approved by the Dept. In March-April 2001, six geoprobes were completed. NMW-1 showed total BTEX in GW at 275400ppb, NWM-2 at 156200ppb, and NMW-4 at 1330ppb. Insufficient GW was recovered from NMW-3 and NMW-5. NMW-6 was non-detect. In October 2000, an SVE pilot was performed. An underslab SVE system was designed and installed to remove residual VOCs and to add atmospheric oxygen to allow bioremediation to occur. Air extracted from below the slab was carbon treated before venting to the roof. A vapor barrier was installed beneath the slab. Operation of the system began August 2002 and operated thru August 2003 for 1615hrs. VOCs, carbon dioxide, oxygen and moisture levels were monitored before the input and at the output of the carbon canisters. System inspection and monitoring were conducted daily for the first two weeks and then weekly inspections were made. At startup, VOCs were measured at 20-50ppm. Concentrations dropped from the initiation in August 2002 thru November 2002 when the system was stopped for seven weeks due to equipment problems. Upon restarting the system in Jan 2003, a rebound was measured with VOCs rising to 60ppm. The system was operated for two weeks with a second 4 week idle period(1/7/03-2/25/03). After this rest period, the rebound did not occur. The system operated for a period of four weeks with a continual decrease of VOC concentration. Equipment failure again shut the system down for five weeks(3/27/03-5/1/03). A slight rebound to several ppm occurred when the system restarted. The system continued to operate thru June 2003 with day-long shutdown for maintenance with no rebounds observed. Levels of VOCs in the extracted air in June 2003 were zero. Between July 2003 and July 2004, the SVE system was out of service due to major damage in the main section of the blower. In August 2004, the SVE blower and motor were downsized to a 10HP regenerative blower capable of 200 scfm at 80 inches of water. VOCs were measured two days after startup which detected levels of VOCs in extracted air between 2 and 5ppm, indicating that no significant VOCs are being extracted from beneath the building. A total of 10 MWs exist on site. Four(MW-3, ERM-4, MW-14, MW-15) are currently located on the sidewalk. The other six(NMW-1 to NMW-6) are inside the Tate building. Max total BTEX detected in MW-14 at 1990ppb(7/16/02). Max MTBE detected in NMW-2 at 410ppb(8/8/03). By the concentrations of MTBE detected in upgradient wells, MW-14 and MW-15, there may be an off-site source. (There are two gas stations upgradient at 24th St and 10th Ave.) Concentrations of BTEX have been decreasing in source areas. It appears that removal of grossly contaminated soils and free product at the time of the UST

removal in 2001 eliminated the primary source of GW contamination. Groundwater samples to be collected 10/16/04. 11/1/04 Spoke to Mohammed Ahmed, FLS (212-675-3225). Approx 3 of free product(gasoline) was detected in MW-14 (sidegradient of tank field) on 8/17/04. One week later, there was no product detected. Sampled again on 10/14/04, no product detected. He suspects that it is from an off-site source. There is a LukOil Station at 239 10th Avenue (open spills #9810383, 9707190). Oct 2004 monitoring report to be submitted this week. 11/16/04 Received status update (FLS, 11/11/04). GW sampling conducted 10/12-10/13/04. No samples were collected from MW-15 located on the sidewalk of 24th St and NMW-1 located inside the Buia Gallery on 23rd St. MW-15 was backfilled during construction of the Tate Bldg. NMW-1 was inaccessible due to an exhibit. BTEX ranged from ND to 1086ppb(MW-14). MTBE ranged from ND to 130ppb(NMW-2). Off-site sources of contamination may be contributing to site conditions. However, it is not clear that it is not from onsite sources. 12/7/04 Issued letter requiring additional delineation around MW-14 and at former upgradient well location MW-15. Report to be submitted by 3/15/05. 12/20/04 Spoke to M. Ahmed, FLS. Will propose re-installation of upgradient MW-15, one well further upgradient (to confirm possible off-site impacts), and one west of MW-14(sidegradient). 12/29/04 Received proposal from FLS to install three additional MWs. 12/30/04 Issued letter approving workplan. 2/18/05 Received report for the installation of MW-14, 15A and 17. According to the report, there appears to be an off-site source on the northwest portion of property along W24th St. Concentrations of BTEX increased from 1086ppb to 2067ppb in MW-14. Report also states that the LukOil station may be contributing to the MTBE concentrations across the site. 3/15/05 Spoke to Mohammed Ahmed, FLS. Requested two Geoprobes across W 24th St to eliminate the Motor Freight Station and Auto Repair Shop as potential sources. 8/15/05 Spoke to M. Ahmed. A. Fleming spoke to NYSDOH at K. Tang's recommendation. NYSDOH requested subslab and indoor air samples. Results expected next week. FLS proposes to use this data to support closure. Explained that there is still dissolved which remains on the corner of the property. Agreed to wait for results to decide next steps. 11/29/05 Email to A. Fleming and M. Ahmed, FLS, provided comments on the October 17th request for spill closure. Regarding the indoor air and soil gas sampling which was performed, it is unclear if the concentrations detected within the building are due to any background interferences within the building. Directed FLS to conduct a full inventory as directed by the NYSDOH guidance for evaluating soil vapor intrusion. An additional round of indoor air samples must be taken at least 24hrs following the removal of any possible VOC sources. Results will be forwarded to NYSDOH. The Departments will determine further action for vapor mitigation, if required, following review. The groundwater data collected to date has been sporadic with five sampling rounds completed within the last three years. Quarterly groundwater sampling and monthly gauging must be completed and results submitted to the Department. Groundwater direction must be confirmed. The groundwater concentrations at MW-14 were as high as 4340ppb total VOCs in the last sampling round in January and have historically been fluctuating. MW-17, which was recently installed west of MW-14, also had readings of 2777ppb total VOCs. The Department requires additional wells be installed across W 24th street, north of MW-14 and MW-17, and west of MW-17. A proposal to remediate the contamination in this area will be required. It is

expected that the additional delineation, groundwater and indoor air sampling results, with scaled site and contour maps, will be submitted by the beginning of February. 4/20/06 Requested update from M. Ahmed of FLS. 6/30/06 DEC lead transferred from K. Foley to J.A. Maisonave. - JAM 7/06/06 Requested update from A. Flemming of FLS. Mr. Flemming and I spoke about the history of the site. He still believes the impacts to groundwater at wells MW-14 and MW-17 are from off-site contamination (possibly Lukoil site on 10th Ave and 24th Street). These wells are supposedly up-gradient side of the site. I requested Arnie send me the latest data on the site including groundwater sampling and indoor air sampling data. - JAM 7/25/06 Spoke with A. Flemming a number of times. I do not believe a second round of indoor air sampling was conducted, however a vapor barrier is in place. They conducted site-wide groundwater sampling in May 06. Mr. Flemming believes the latest GW results show that off-site sources are contributing to the GW contamination along W24th Street. He will submit a report of the wells that were sampled (not all were sampled because they were inaccessible). I requested that he state his justification for spill closure in the groundwater sampling report. 10/16/06 Received a call from Steve Panter of Fleming Lee Shue (212) 675-3225. He said the report is ready and will be submitted this week. - JAM 11/14/06 Received the report dated October 20, 2006 via email. The report summarizes all the groundwater analytical data since April 2003. FLS makes the argument that off-site sources are contaminating the sidewalk wells. A summary of all the off-site sources is included as well as a two part technical explanation for the difference between groundwater contamination in the sidewalk MWs and on-site MWs. The first part is a multivariate analysis, and the second is a comparison between Benzene and MTBE. The report is uploaded into edocs. - JAM 11/22/06 Received SVE System Data and Indoor Air Quality Data Summary Report from FLS. Report uploaded to eDocs. 01/22/07 Issued a letter to Greg Gushee The Related Companies, Inc. 60 Columbus Circle New York, NY 10022 with the NYSDEC's position on the FLS report. Chris Magee in Central Office reviewed the report and based on the material presented he does not concur with FLS' conclusion that off-site sources are contributing to the contamination found in the sidewalk wells. The letter states that The Related Companies, Inc. is responsible to monitor and remediate the site. Groundwater must be gauged and sampled quarterly and based on the results the NYSDEC will determine if a remedial strategy is necessary. The letter is uploaded into edocs. - JAM 8/21/07 Reviewed FLS letter submitted to the DEC on April 13, 2007 in response to DEC comments sent on 1/22/07. FLS believes that contamination found in off-site wells on West 24th Street stems from a different source. I sent the letter to Chris Magee in Central Office for review. - JAM 9/06/07 Sent email to Steve Panter at FLS. The email states that, the data are inconclusive and do not prove that an off-site source is affecting the groundwater in the monitoring wells in the sidewalk... The Department cannot approve spill closure at this time. A round of groundwater samples should be collected from all wells to obtain up-to-date groundwater quality data. Results should be submitted with appropriate recommendations for further monitoring and/or remedial activities if necessary. - JAM 1/18/08 Received an email from Jim Harrington in Central Office. Steve Panter from FLS contacted Mr. Harrington stating that they will do another round of sampling but he wants assurance that after the next round of GW sampling the spill case will be closed. Mr.

Harrington said he will review the spill case and material forwarded by Mr. Panter. Afterwards, he will contact Region 2 staff for further discussion before responding to Mr. Panter. - JAM 9/22/08 Reviewed the Groundwater Sampling Report/Spill Closure Request submitted by Flemming Lee Shue dated May 12, 2008. All on- and off-site monitoring wells were sampled in February 2008. Groundwater monitoring results show no significant change in contaminant levels in any of the on-site or off-site wells. The sidewalk wells continue to show exceedences for VOCs in groundwater (i.e. 748ug/L total VOCs in well MW-14 and 829ug/L total VOCs in MW-16) however, the exposure risk from these contaminants is low. The groundwater monitoring report is uploaded to eDocs. Senior technical staff in Central Office supports closure of this spill without meeting recommended objectives because of the low risk of exposure. This spill case was closed and a NFA letter was issued. NFA uploaded to eDocs. - JAM"

Remarks: "CALLER FOUND .7 FEET OF GASOLINE IN A TWO INCH GROUNDWATER MONITORING WELL. LOCATION IS A TRUCK LEASING COMPANY. MARK TIBBE NOTIFIED OF RESULTS. ADDITIONAL MONITORING WELLS TO BE INSTALLED AND SIX TANKS ARE TO BE PULLED."

Remarks: Hinton Region 9, on temp assignment to R2 12/31/2001 Randy Austin reported that the Transit Authority had gotten back to him after doing an inspection earlier this month in the subway tunnel in the area of this property. No problems were found. A letter dated Dec 24, 2001 from Andy Rudko of AKRF described the excavation. A phase 1 report and phase 2 letter were received Dec 26, 2001. A Site Remediation Report was submitted in 1999. Gasoline tanks and associated contam soil were removed from the SW corner of the property in 1999. Contaminated soil was also removed from the north side of the property. The entire site was excavated for construction of a high-rise. The owner is Chelsea Assoc LLC, 1050 Franklin Ave, Garden City, NY 11530. SMM."  
"PERFORMED AIR PRESSURE TEST, BROKEN FITTING, REPLACED FITTING,RETESTED& STILL FAILED, WILL DIG UP TANK."

They recovered a total of 1100 gallons - 300 gallon on floor and 800 gallon still in tank. As per Joe, tank is wrapped in concrete and oil is probably still between steel and concrete. Sump immediately next to tank - unk if oil discharged to sewer. Eastman set up temp tank. Three manholes on sidewalk of 24th Street open right to the boiler room. Building is located between 6th and 7th Avenues and spans the block between 23rd and 24th Streets. 2/10/99 Met Ralph (super) and Rudy Sorocco (Bob Sussman's associate) at the site. Oil was fairly well cleaned up. Very faint odor. They are collecting bids to remove old tank and install a new tank. They will keep me apprised of tank closure scheduling. Tank probably installed in the 20's. Sump pump is directly south of the failed tank. Sheening on standing water in sump. According to Ralph, the sump pump only goes on when the slop sink (located within 5 ft of the sump) is used. Areas of concern: There is a trench across the entire floor that appears to have a soil bottom and behind the tank seems to be soil where the leak was first |

detected. Told Rudy Sorocco that borings will be required to determine the impact to the subsurface and that this can be done in conjunction with the tank replacement. 2/12/99 Spoke to Robert Sussman. Sent him letter with requirements as well as contractors list. 3/22/99 On site, couldn't observe floor, standing water, little product (1/4abpad). As per Niel, eastman, he surmised that the tank rotted out from the bottom since there was no saddle or dunnage, He will break through in area of tank and grab soil sample, and clean out trench and grab compo soil sample and 8021 8270. 3/29/99 Spoke to Niel, he said they brought a hammer drill with a 12 reach to collect samples through the concrete floor and trench. He said the concrete floor was more than 12 thick and was clean. He said the trench was 12 of clean brick. He will submit a narrative of Eastman's findings and submit it to my attention. 01/26/04 Reassigned from Rommel to Austin 02/17/04: Reassigned from AUSTIN to KRIMGOLD. 5/7/04. J.Krimgold spoke to AL Edmond. They have no records saved regarding this site. However, confirmed that no contamination was found during floor drilling. NFA."

Remarks: "LEAKING TANK DUE TO TANK AGE ALL CLEANED UP"

K00 - Spill Prevention - None

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.

Tank Type: Steel/Carbon Steel/Iron  
Tank Status: Closed - Removed  
Pipe Model: Not reported  
Install Date: Not reported  
Capacity Gallons: 200  
Tightness Test Method: -  
Date Test: Not reported  
Next Test Date: Not reported

Name: WEST 29TH STREET  
Address: 601 WEST 29TH STREET  
City,State,Zip: NEW YORK, NY 10001  
Program: BCP  
Site Code: 558929  
Acres: 1.130  
HW Code: C231107  
SWIS: 3101  
Town: New York City  
Record Added Date: 09/07/2017  
Record Updated Date: 12/30/2020  
Update By: JCGRATHW  
Site Description: "Location: The site is located in an urban area at 601 West 29th Street, which includes the addresses 601-609 West 29th Street, 613-617 West 29th Street, 615-635 West 29th Street, and 309 11th Avenue, in the Chelsea section of Manhattan. The site is bound to the north by an auto repair shop, a New York City Department of Sanitation (DSNY) garage, a private parking facility, and West 30th Street, followed by a construction site part of the Hudson Yards redevelopment district; to the east by 11th Avenue, followed by residential and commercial uses; to the south by West 29th Street, followed by a Con Edison parking and office facility; and to the west by a private parking facility followed by 12th Avenue and the Hudson River Park. Site Features: The site consists of part of one lot (lot 12); which resulted from a three-lot merger of the former lots 12, 29 and 36, comprising approximately 61,719-SF (1.13 acres). The site is now vacant. The former Lot 12 consisted of an asphalt-paved parking lot for the Port Authority of New York and New Jersey, a one-story office and locker room structure for the DSNY, a one-story and a four-story brick building occupied by artist studios and gallery space; former Lot 29 consisted of a one-story brick and concrete building occupied by an artist studio; and former Lot 36 consisted of a demolished gasoline station with an auto repair garage. The responsible party remediated a petroleum spill at this former station (Spill project #9305598). Current Zoning and Land Use: The current zoning designation of the site is M2-3 (manufacturing district). The surrounding area is largely developed with industrial and commercial uses with residential and commercial uses located to the east. Past Use of the Site: The site was developed with a lumber yard and an auto house as early as 1890. Between approximately 1911 and 1930, former Lot 12 was additionally developed with a smelting and refining works. An asbestos distribution warehouse, freight/transportation businesses, and several gasoline tanks were on-site until the late 1970s. The current DSNY structure was constructed by 1994. Former Lot 29 was developed with an iron works between 1890 and 1899, and later replaced by a woodworking and scenery manufacturer in 1911. By 1950, the lot was occupied by Express Depot and contained gasoline tanks. Former Lot 29 remained relatively unchanged through the late 1980s when it included commercial uses; an art gallery was identified as early as 2002. Former Lot 36 was historically occupied by a lumber

yard and wagon yard until approximately 1927, when a gasoline station was located on the lot. The addition of an auto repair shop was noted in the 1950s. Former Lot 36 remained relatively unchanged through the present-day. Site Geology and Hydrology: The site lies at an elevation of approximately 10 to 15 feet above the National Geodetic Vertical Datum of 1988 and slopes slightly down toward the southwest. Groundwater is 10 to 17 feet below ground surface and is expected to flow in a westerly to northwesterly direction toward the Hudson River, located approximately 520 feet west of the Site. Historic fill material (comprised of sand and silt, with varying amounts of brick, plastic, wood, concrete, gravel, and asphalt) was observed in the soil borings between just below surface grade down to approximately 10 to 15 feet below grade. The fill material was underlain by sand and silt down to approximately 20 feet below grade."

Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were detected in on-site soils including the SVOCs including Benzo(a)anthracene , benzo(a)pyrene, benzo(b)fluoranthene, and dibenzo(a,h)anthracene and metals including lead. Remedial actions have successfully achieved soil cleanup objectives for unrestricted use in the western portion of the site, and track 4, restricted residential use in the eastern portion of the site. Residual contamination in the soil and groundwater is being managed under a Site Management Plan. "

Health Problem: "Remedial actions are complete and measures are in place to prevent people from coming in contact with residual site contamination."

Contact Name: PAUL TYREE  
DEC Memo: "11/13/2020 - Feng - Desk Duty in office. Spoke to Paul Tyree and James Ross. It is a 5,000-gallon UST in the school's basement. It failed the tank test today. The tank tester is still at the site. There is still 3,500 gallons of #2 oil still inside the tank. They are planning to pump out the tank and to investigate whether there is a leak. They are looking for subcontractor to do the pump out. They are setting up temporary tank in the basement to hold the pumped oil. And they are setting a temporary heat system for the school. So far no determination of any loss. No signs of spills. There is potential smell in the basement and not sure about the building. Briefed to Veronica Zhune and assign her the spill for further follow up. She might inspect the site tomorrow to make sure the tank is pumped out. PBS 2-608435 Paul Tyree Metro Environmental office: 631-393-6655 Cell: 516-426-5224 ptyree@mesllc.org Property Manager: Andi Metaliaj 917-513-1023 11/14/20-Zhune responded to this spill. the tank is a 5000 -gallon tank UST and failed the test . About 3500 gallons of oil #2 were pumped out by Metro Environmental. There is staining in the boiler room. Waited for Custodian to walk me 5 floors of the school to check for odors in the school. Found room #1 (first grade) second floor with slightly oil odors. Did air monitoring in the 5 floors with the PID meter. The meter indicated 1PPM in some areas of the school. Installed scrubbers in the 5 floors. 11/16/20-Zhune spoke to Ms. Perez the principal of the school. She said everything is fine.

S102672077

No odors complaint in the school. 11/23/20-Paul Tyree email- I hope all is well. I just wanted to give you a quick update on the work that was completed at Guardian Angel today. . Took soil borings, groundwater and soil samples in the court yard and boiler room . Screen soils . Air monitoring continues . Ventilation system is up and operating in the school we expected to have the analytical results in hand within 10 days business days. We will send you the report with the data and our recommended next steps no later than 48 hours after. We should have it to you by 12/3/20. 12/12/20 - Obligado - I reviewed an email provided by Paul Tyree which included a request to abandon the leaking tank in place. The email included soil sampling results, ground water sampling, and indoor air sampling results. The tank is present below a concrete covered courtyard. The tank is located adjacent to the area where oil staining was observed on the basement wall. Soil borings were advanced to a depth of 2 feet on all sites of the tank. No exceedences of CP51 soil clean up objectives were detected in any of the soil samples. One Gw sample was collected which also did not have any exceedences of GW standards. Indoor air samples were also cRollected from the basement, 1st floor, and 2nd floor. I sent the indoor air sampling results to NYSDOH to review. According to Nathan Walz there are some minor hits above background in the science and classroom that I expect will continue to decrease with time, since this is a school I would recommend that another round of samples be collected to confirm a downward trend. I forwarded the request for confirmatory indoor air sampling to Paul Tyree. 12/16/20 - Obligado - I inspected the site with Paul Tyree. No significant odors were observed in the cellar. No oil seepage into the boiler room was observed. The courtyard is completely surrounded by Church and School buildings. Removal of the UST not feasible or practical. I told Paul Tyree that they could proceed with the tank abandonment. 1/26/21-Paul Tyre from Metro Environmental Services LLC emailed the closure report dated 1/20/21. The report stated that MES properly close in place 1 x 5000 gallon UST. Soil samples were taken and analyzed for VOCs and SVOCs at an accredited laboratory. All results were below NYSDEC clean up criteria. A groundwater was obtained and submitted for analyzes. Groundwater sampling results were below NYDSDEC standards. Qualitative and Quantitative air sampling was conduct6ed and the last qualitative air sampling was below NYSDOH standards. Based on the information of the re[port this spill is closed. Spill closed."

Remarks:

"ust in vault, unknown amount"

DEC Memo: "08/09/16- Ahmed - EMIS# 249094 While prepping to build a platform in the W. 28th Street Flush facility excavation at 281 11th Avenue, coned collected soil samples. The lab results indicated 7350 ppm of lead from the soil excavated, based on the soil weight it was calculated 68lbs of lead found in the soil. Another foot of soil will be removed and the soil will be retested. Based on the discussion with Jeff and Jane, spill assigned to Ahmed. 3/30/21 - Austin - Con Ed takes soil concentrations of lead in the soils they excavate, determines total weight of the lead in the yards of soil removed, and then compares it to the RQ for lead in CBS reporting requirements. This is not a release - Spill closed - end."

Remarks: "lead found in soil. area was cleaned up and removed from location"

to Q.Abidi. called Mr. Mark Salamick at (917)559-5519 he said he will find out information about the spill and he will call me back. Mr. Mark salamick called me back and said he has never done this job he said to contact FM Ring Management Company. Called Ms. Reeba at (212)765-1655 she said, she is working on it she will find the status of the spill and she will call me back. -QA 08/04/06: Recieved fax from Ms. Reba Dickstein (F.M.Ring Associates). Called Ms.Reba she said there was a minor problem Gauge messed up so Eastmond company changed the gauge. Therefore, the problem cured. -QA 08/10/06: Recieved a closing confirmation letter by fax from Ms. Reba Dickstein (F.M. Ring associates, INC.). She mentioned in her letter that oil fill line was replaced by Eastmond company. That is a freestanding line at the ceiling of the basement. Floor of the basement is concrete floor that is in good condition and without cracks. Therefore, According to the letter of Ms. Reba Dickstein this spill is closed. -QA"

DEC Memo: "9/25/2012 - Christopher Steel of Petroleum Tank Cleaners was testing the tank and noticed a vacuum drop (a test failure). He discovered that the vent line was rusted off at the sidewalk...when he touched it, it fell off in his hand..... 12/19/12 AFrischeisen TTF letter sent and upped to eDocs. 5/5/16 TJD File review. Vent line replaced and new vent alarm installed. Passing system test performed on 10/23/12 by Petroleum Tank Cleaners. No discharge to environment from reported dry leak. All documentation uploaded to DECDOCS. No further action required. Spill closed."

Tank has been emptied and owner is obtaining price quotes for possible replacement. No spill observed. Tank is reported to be concrete wrapped AST without weep holes. TTF Spreadsheet has been updated. Spill assigned to Zhune as AH secondary. 11/3/15-Zhune spoke to Eddie Gonzalez. Eddie said All Boro removed the old oil tank. They are in the process to install the new tank. 12/19/16-All Boro Tanks Testing sent the spill closure letter dated 2/18/16. The letter states On August 26, 2016, during a fuel grade conversion the 2500 gallon AST on site was tested. The result of this test was a failure. As a result of this the management company decided to replace the fuel oil tank and contacted All Boro for that purpose. work began on breaking down the concrete containment vault surrounding the AST. Absolutely no oil was spilled as a result of this tank failure. It was reported that the condition of the steel was in very poor shape with rust and pitting in various locations. The pour concrete containment vault surrounding the tank was the only reason the tank didn't leak. All Boro removed the 2500 gallon AST and can state no |

evidence of release petroleum was found during the removal process or on the concrete tank room floor after. Also, the concrete in the oil tank room flooring was a complete slab with no cracks. ABT installed a new 2000 gallon AST in the same tank room on saddles. This new tank is in a tank room with steel fire proof door for access. The concrete floor and walls has been painted with a 2-part epoxy resin as per code. Based on the information in the letter submitted by All Boro Tank this spill is closed."

Remarks: "tank test failure"

Name: HUDSON MEWS PROPERTY - MARTY FINE PARCEL  
 Address: 403 WEST 37TH STREET AND 501-505 9TH AVENUE  
 City,State,Zip: NEW YORK, NY 10018  
 Program: BCP  
 Site Code: 416201  
 Acres: 0.259  
 HW Code: C231065  
 SWIS: 3101  
 Town: New York City  
 Record Added Date: 07/08/2009  
 Record Updated Date: 08/08/2017  
 Update By: SXDEWES  
 Site Description: "Location: The site is located at 403 West 37th Street and 501-505 9th Avenue which is between 37th and 38th Streets in the Borough of Manhattan. Site Features: Currently, the site is vacant. An entrance roadway to the Lincoln Tunnel beyond the retaining wall shared with the site, is to the west. Current Zoning: The site is zoned C1-7A, a commercial district that is predominantly residential in character. Typical retail uses include grocery stores, drug stores, restaurants and local clothing stores that cater to the daily needs of the immediate neighborhood. Past Use of the Site: Historically the site use included residential, commercial, industrial and manufacturing. As early as 1911, the site was occupied with an iron works (southwest portion of the Site), a carpenter s shop, five 5-story, two 4-story and two 3-story residential dwellings with basements and commercial space on the lower levels. By 1968, the Lincoln Tunnel approach retaining wall was installed along the western border of the site,

and the site had been redeveloped with four 5-story buildings, one 4-story building and a 1- or 2-story building which were all demolished by 2005. Site Geology and Hydrogeology: Groundwater beneath the Site ranges from approximately 11 to 15 ft below the current site grade based on gauging of four site wells during the investigation. Based on the regional topography, the anticipated groundwater flow direction beneath the Site is believed to be in a westerly direction towards the Hudson River, however, the presence of a retaining wall for the Lincoln Tunnel approach along the western Site boundary appears to disrupt that flow pattern. Groundwater elevation data collected during the investigation indicated that the groundwater flow at the Site is generally in a northwesterly direction, likely following the slope of bedrock. The generalized stratigraphy underlying the site is composed of a surficial layer of historic fill overlying natural sand, gravel and silt deposits followed by bedrock. In the southern portion of the site, the fill layer was found directly overlying bedrock. Bedrock was generally highest in the southern portion of the site and slopes to the north. Bedrock was found between approximately 8 and 24 feet below ground surface. "

Env Problem:

"Nature and Extent of Contamination: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), and pesticides. Soil: Investigations performed in 2006 and 2012 showed site soils contain elevated semi-volatile organic compounds (SVOCs) and metals indicative of historic fill. The depth of the historic fill varies across the site from three to 15 feet deep. SVOCs exceeding restricted residential soil cleanup objectives (RRSCOs) include benzo-a-anthracene, RRSCO of 1 part per million (ppm)(7 out of 16 samples) with a maximum detection of 26 ppm, benzo-a-pyrene, RRSCO of 1 ppm (7 out of 16 samples)with a maximum detection of 22 ppm, benzo-b-fluoranthene, RRSCO of 1 ppm (7 out of 16 samples)with a maximum detection of 28 ppm, and indeno(1,2,3-cd)pyrene, RRSCO of 0.5 ppm (7 out of 16 samples)with a maximum detection of 15 ppm. Metals exceeding RRSCOs include lead, (9 out of 16 samples)with a maximum detection 9,050 parts per million (ppm) vs. RRSCO of 400 ppm and barium, (2 out of 16 samples) with a maximum detection of 5310 ppm vs. RRSCO of 400 ppm. Data does not indicate any off-site impacts in soil related to this site. Groundwater: Groundwater sampling in 2006 showed one volatile organic compounds (VOC) in an on-site well near the upgradient property line; chlorobenzene was detected at 29 parts per billion (ppb) vs a standard of 5 ppb. More recent sampling in 2011 in the same area showed no chlorobenzene. Several metals were noted in groundwater samples (e.g., iron, manganese, magnesium and sodium). These metals appear to be naturally occurring and typical of groundwater in this area. Soil vapor: During the Remedial Investigation, four soil gas points were installed. Several VOCs, including benzene were detected in soil vapor. The compounds were found at low levels and are not of concern "

Health Problem:

"People may come into contact with site-related contaminants in the soil. People are not drinking the contaminated groundwater because the area is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred

to as soil vapor intrusion. Because the site is vacant, the inhalation of site-related contaminants due to soil vapor intrusion does not represent a current concern. However, the potential for soil vapor intrusion to occur on-site needs to be evaluated in the event that the site becomes occupied. Sampling indicates soil vapor intrusion as a result of this site is not a concern for off-site properties."

 DEC Memo:      "Sangesland sent contaminated soil letter Curt Schmidt said that Mark Tibbe knows about a major spill site just upgradient from this site. 2/5/03 - TRANSFERRED FROM SAWYER TO ROMMEL 3/1/04 Reassigned from Rommel to K Foley. Spill Remediation Plan received 12/22/03 for removal of four 260gal gas USTs, one 500gal gas UST, and one 500gal no. 2 fuel oil UST. Site under development but once contained three buildings. A former auto service and plastic manufacturing existed on site. Five USTs from NW corner were removed 9/29/03 (four 260gal gas USTs and one 500gal gas UST). Soil excavation was postponed due to safety concerns. Will excavate and direct load for disposal. A minimum of four post-ex samples will be collected at PID hot spots on each sidewall. DTW is 6'bgs and therefore a bottom sample will probably not be feasible. If there is potential for structural damage to the adjacent building, two soil samples will be collected from that sidewall. Two samples will be collected from sidewalls greater than 20' in length. Analysis by VOCs (8021) and SVOCs (8270). Spill #9704542 was previously reported for a fuel oil release from UST. Scaled site map with former tank locations/hot spots and Phase I and

II reports. There have been site investigations and proposed remediation plans submitted for 543-547 West 23rd St (spill #8605848). There is documented fuel oil and gasoline contamination of groundwater associated with sites to the east that have encroached upon the site. Mendon Leasing, 527 W 23rd file(#9605688,9808740,9511782, 9513588). 3/22/06 Reassigned from Foley to Tang. (KMF) 4/3/06: Reassigned to Andersen. Three sources of contamination: Fuel oil leak from a UST in northeast corner. Gasoline leak from five USTs in northwest corner. Gasoline groundwater contamination from adjacent Mendon Leasing site. All six tanks were removed by Fleming Lee Shue (FLS). The tank closure report was not received. Spoke with FLS and they will resend a report that was sent to Albany. 4/7/06: Received and reviewed tank closure report. Soil was excavated from three areas of contamination. Residual SVOC contamination from urban fill and VOC contamination from the adjacent spill site is present. The site will be redeveloped with a vapor barrier. NFA letter sent. "

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was VOUGHT 01/05/90: (6) MONITORING WELLS INSTALLED,OIL TANKS BEING TESTED BY CONTRACTORS(TRINITY & FENLEY & NICOL), ALL TANKS PUMPED & CLEANED, REPAIRING WATER MAIN. 10/10/2003-Vought-Spoke with LaJuana Smith (works for Clinton Housing-212-967-1644) and she is looking to resolve spill). In Nov 1996 DEC required further work from DEC. Ms Smith will call back on Wed for current site status and will possibly submit FOIL request upon her discussion with bank. 10/17/2003-Vought-File review by Vought: Community Board 4 Meeting Notice-2/21/90-Meeting held with DEC, NYFD, NYPD, DCA and NYCDEP to discuss current status and plans of site. Fax to DEC from Gaseteria-2/22/90-Pedneault Associates (516-467-8477)-Groundwater analyticals from six monitoring wells and two soil disposal piles (no site plan in file). Groundwater analyticals show 275ppb benzene(W1), 341ppb benzene(W2), 327ppb benzene(W3), 448ppb benzene(W4), 158ppb benzene(W5) and 128ppb benzene(w6). Disposal samples show 1433ppb benzene(east pile) and 188ppb benzene(west pile). Groundwater analyticals-5/21/90-Pedneault Associates-Groundwater analyticals from six monitoring wells (no site plan in file). Groundwater analyticals show 2308ppb benzene(W1), 1091ppb benzene(W2), 680ppb benzene(W3), 385ppb benzene(W4), 736ppb benzene(W5) and 810ppb benzene(w6). Subsurface Investigation-7/90-Environmental Management Services. In Jan 1990 a subsurface water line broke beneath 10th avenue near the northwest side of the site. Water entered the basement of the adjoining building along with some gasoline. DEC required installation of six monitoring wells on Gaseteria property. Gasoline

S100167794

vapors detected in sewers in building across 10th Avenue. This subsurface investigation consisted of eight soil borings and installation of two additional monitoring wells. Three pump islands serviced by 12 (550-gallon) gasoline USTs and one (2000-gallon) diesel UST. Local topography slopes to the north. Groundwater at depth of 7-9' below grade. Bedrock is 7-11' below grade and slopes downward toward the northwest and southwest corners of site. Groundwater suspected to flow northward. All wells onsite were set firmly on bedrock and there is not sufficient information available to determine specific groundwater flow. No free product detected in wells. Groundwater appears to flow from 10th Ave towards the USTs. Report recommends groundwater monitoring with possible additional delineation. No soil samples submitted for analysis nor were screened via PID. Letter from DEC to Gaseteria-7/12/90. Letter from DEC (Sigona) to Gaseteria (Oscar Porcelli) requesting subsurface investigation work plan to be approved by the DEC to investigate the presence of gasoline vapors. Plan must be received by the DEC by 7/17/90. Odor complaints in January 1990 and again in July 1990. Sigona performed site visit on 7/13/90. Fax to DEC-7/17/90. Letter from Environmental Management Services to DEC (Sigona) proposing: 1) investigation of subsurface utilities as potential pathways 2) determination of groundwater flow direction 3) groundwater monitoring 4) installation of six soil borings along western margin of station and installation of two additional monitoring wells. Letter from DEC to Gaseteria-1/5/95. Letter from DEC (Sigona) to Gaseteria (Angel Chang) requiring cleanup and removal of discharge. Letter also required immediate steps to abate seepage into basement of 403 W 40th Street. Response from Gaseteria required to DEC by 1/15/95. Letter from Gaseteria to DEC-1/20/95. Letter from Gaseteria (Chang) to DEC (Sigona) stating that Gaseteria will: 1) divert the flow of surface water away from the south wall of the building 2) install a SVE system in the basement alongside of the south wall between the concrete floor and the building foundation. Gaseteria does not believe there is a need to install new groundwater monitoring wells or to further develop existing wells.....since the problem appears to be surface related. Sample analyticals from basement of 480 10th Ave-8/96. Soil analyticals show 20664ppb ethylbenzene(sample 48334), 59164ppb xylene(sample 48334), 11000ppb naphthalene(sample 48334). Letter from DEC to Gaseteria-9/10/96. Letter from DEC(Rommel) to Gaseteria(George Esayan). DEC in possession of analyticals from Clinton Housing(403 W. 40th Street). Gaseteria required to sample two of the onsite monitoring wells for 8021/8270/lead. Letter from Clinton Housing Development Company-9/11/96. Letter from Clinton(Joseph Tuana) to DEC(Rommel) with copies of analyticals discussed above. Letter from Carl Sulfaro (attorney for Gaseteria) to DEC (Rommel)-9/20/96. Letter stating that Sulfaro authorized EMS Environmental Services to take two samples of the onsite monitoring wells. Samples will be taken 9/27/96. Groundwater analyticals-10/10/96. Analyticals from MW5 by EMS showing 42.56ppb methylene chloride, 5549ppb benzene, 107.33ppb toluene, 1024.75ppb ethylbenzene, 393.15ppb xylene and 0ppb MTBE. Letter from Clinton(Kathy Prioleau) to DEC(Rommel)-11/11/96. On 10/27/96 strong fumes entered basement of 480 10th Ave. NYFD onsite. Letter requests that DEC relay information on testing done at Gaseteria and UST inspection of Gaseteria. Letter from DEC(Rommel) to Gaseteria(Sulfaro)-11/25/96. Letter stating that requirements of fax dated 9/10/96 were not met because only one well was sampled and

8270/Lead analyses were not performed. Letter requires: 1) submittal of an investigation plan to delineate soil and groundwater contamination 2) source determination 3) installation of three additional monitoring wells 4) installation of an air sampling port on the exhaust line of the venting system and monthly sampling for benzene and THC. Letter states that action must be taken within 45 days. Letter from DEC(Rommel) to Prioleau(Clinton)-11/26/96. Letter stated that DEC was never notified of odor complaints as 11/11/96 letter stated. Also attached to letter was copy of 11/25/96 letter from DEC to Gaseteria. Letter from Gaseteria(Sulfaro) to DEC(Rommel)-1/15/97. Letter stating that Gaseteria would prefer to perform site investigation, soil removal and/or remediation as needed concurrent with excavation anticipated as part of Federal EPA UST upgrade mandate and the work is expected to take place in Spring 1997. Letter from DEC(Rommel) to Gaseteria(Roberto Porcelli)-7/29/98. Letter serving as final notification of obligations regarding petroleum contamination and vapor incidents. On 6/28/03 petroleum contaminated groundwater infiltrated basement of 480 10th Ave due to heavy rains. This is the seventh vapor complaint associated with Gaseteria since Jan 1990. Letter states that the Department is allotting 30 days for Gaseteria to satisfy all requirements in DEC letter dated 11/25/96. Deadline of 8/31/98 given by DEC. Letter from Gaseteria(Seth Friedland) to DEC(Rommel)-8/13/98. Letter stating that the June 1998 episode was caused by heavy rains and appears to be an isolated event and that Gaseteria does not agree with Departments conclusions. Letter stated that the station will be taken out of service on 9/15/98, permanently close the USTs and reinstall upgraded USTs on the northern boundary of the site. Letter from DEC(Rommel) to Gaseteria(Roberto Porcelli)-8/28/98. Letter serving as a reminder of 8/31/98 deadline. Letter from Gaseteria(Oscar Porcelli) to DEC(Rommel)-8/28/98. Letter stating that new USTs were ordered and that work will start the second week of September. Gaseteria intends to install four monitoring wells to replace those destroyed by station upgrade and will retain Environmental Management services to develop remedial plan. Letter from DEC(Rommel) to Gaseteria(Oscar Porcelli)-8/31/98. Letter confirming phone conversation where an agreement was reached that Gaseteria will comply with following requirements and complete the tank upgrade prior to 9/30/98. Letter also required that a workplan be submitted prior to 9/4/03 which included 1) complete delineation 2) soil and groundwater sampling plan for use during excavation activities 3) sampling of SVE emissions 4) installation of three monitoring wells into bedrock and 5) cleaning and proper disposal of oil in the building floor drains and all associated discharge points. Letter from Camin Cargo Control(Gaseteria's Enviro consultant) to Gaseteria-10/5/98. Letter from Camin(Patricia Badding) stating that a site investigation and report shall be prepared. Investigation with Geoprobe and subsequent installation of monitoring wells scheduled for 10/16/98. Soil samples will also be collected during excavation for new USTs. Venting system emissions will also be sampled. Cleaning and proper disposal of any oil in the building floor drains and all associated discharge points is the responsibility of Gaseteria. Letter from DEC(Rommel) to Gaseteria(Oscar Porcelli)-10/8/03. Letter acknowledging receipt of Camin 10/5/98 proposal and requiring the following by 10/13/98: 1) Site plan with proposed boring locations 2) discussion of locations 3) discussion of endpoint sampling locations from UST excavation 4) discussion of delineation procedure 5) include MTBE with analyticals

6)collect groundwater samples from Geoprobe locations. Letter from Camin(Badding) to DEC(Rommel)-10/13/03. Submission of 1)site plan with ten boring locations 2)Collection of six endpoint soil samples from UST excavation 3)excavation and disposal of contaminated soil encountered during tank installation 4)Inclusion of MTBE analyticals 5)collection of groundwater samples(if encountered). Investigation Results from Camin(Badding) to DEC(Rommel)-11/6/98. Results of eight soil borings performed. Soil analyticals show 2149ppb MTBE(SB1), 526ppb benzene(SB2), 188ppb benzene(SB4), 212ppb benzene(SB5), 4576ppb MTBE(SB6), 1458ppb benzene(SB7), 29114ppb naphthalene(SB7), 187ppb benzene(SB8). Groundwater analyticals show 1239ppb benzene(SB4), 1975ppb benzene(SB5), 5360ppb benzene(SB6). Subsurface Investigation Report Camin Badding 908-523-0616 10/16/98). Investigation report including results above of eight soil borings performed. There is approximately 2-4 inches of contaminated soil at the soil/bedrock interface in soil boring locations SB2, SB4, SB5, SB7 and SB8. Bedrock at depths of 6-11.5' below grade . A sheen was detected on all samples (groundwater). Venting system was samples on 12/11/98 via a vacuum canister attachment to vent. Removed dispenser island is the proposed location of new USTs. See analyticals above. Venting analyticals show 264ppm TPH and no other volatiles. Baseline Acquisition Assessment Report-10/10/02 Delta Environmental (Brad Fisher). Purpose was to establish baseline conditions prior to proposed lease and raze and rebuild of site by BP. One soil borings performed in 4/02 to depth of 11.5'. Two borings drilled to 24.5 via air rotary and converted to temporary monitoring wells (MW1 and MW2). Delta recommends 1)gaseteria install permanent monitoring wells to delineate contamination. It is Delta's understanding that Gaseteria will retain the environmental liability of the subject site until spill closure has been obtained . At time of assessment three USTs on site (two 6000-gallon gasoline USTs and one 6000-gallon diesel UST) and four pump islands with six dispensers. Surrounding area is multiple story apartment buildings. Groundwater is located within bedrock fractures at depths between approximately 12.5 and 13.5 ft bgs . Former USTS onsite which were CLOSED IN PLACE include two (6000-gallon) gasoline USTs in 1998 , one 6000-gallon diesel in 1999, ten 550-gallon gasoline USTs in 1998, one 550-gallon waste oil in 1998 and one 550-gallon fuel oil in 1996. Soil analyticals show 4570ppb xylenes(SB1) and 3970ppb isopropylbenzene(SB1) from depths of 10-11.5'. Groundwater analyticals show 148ppb benzene(MW1), 24800ppb MTBE(MW1) and 30.7ppb benzene(MW2). 10/21/2003-Vought-Reviewed site with DEC(Rommel). Sent Stipulation Agreement with the following requirements: 1)Groundwater delineation via installation of bedrock monitoring wells at former boring locations SB1, SB4, SB5, SB6, SB7 2)Monitoring of vapors and groundwater intrusion 480 10th Ave 3)current status of SVE system and submittal of historic and current SVE effluent samples for benzene analysis or collection of indoor air samples from 480 10th Ave. 10/24/2003-Vought-Called LuJuana Smith (212-967-1644) and left message and explained requirements of 10/21/03 letter. 10/27/2003-Vought-Received message from Steve Muller will be taking indoor air samples from 480 10th Avenue. Vought returned call to Muller (516-395-5957). 10/28/2003-Vought-returned call to Steve Muller to discuss indoor air samples. Left message to return call to DEC. Left message for LuJuana Smith to call DEC. Vought spoke with Muller and okayed PID and stated that SUMA sample as per NYSDOH guidance was not necessary until 1)closure of SVE system or 2)PID indications of petroleum vapors followed by

subsequent remediation. Vought also instructed Muller to check sumps. Vought spoke to LuJuana Smith who will be sending in FOIL Request for continuous updates on site. Vought also called Muller and gave him LuJuana's phone (212-967-1644) for access arrangements. 11/6/2003-Vought-Spoke with Steve Muller who was onsite. No PID readings and no olfactory evidence of petroleum and no groundwater infiltration into basement and no product in sump. Muller will produce summary letter and send to DEC. 11/7/2003-Vought-Received Summary Letter from Applied Geosolutions(Muller). Site visit performed on 11/6/03 and inspection of basement at 480 10th Ave. AGS observed no olfactory detection of odors or vapors consistent with hydrocarbons related to gasoline . PID readings of 4.8ppm were attributed to moisture in basement. Small amount of standing water present near leaking hose. No signs of product in sump. Vapor abatement system unoperational during site visit. Photos of basement submitted with report show no free product or petroleum impact. 11/24/2003-Vought-Received signed STIP from Adam Good(Gaseteria) with revised Corrective Action Plan. 11/26/2003-Vought-Spill transferred from Rommel to Vought. Vought received call from LuJuana Smith and she requested update. Vought faxed her copy of 11/7/03 report and letter sent to Gaseteria on 10/21/03. Vought submitted STIP for implementation to DEC Kunkel. 12/2/03-Vought-STIP implemented by Kunkel. Copy sent and faxed to Good and Muller. 12/17/2003-Vought-See closed spill 0301220 at same location. 9/14/04-Vought-New file review by Vought: Letter from Applied Geosolutions (Steven Muller 516-395-5957). On November 6, 2003 Applied Geosolutions inspected the basement of 480 10th Avenue to perform vapor monitoring and to identify the presence of groundwater . During the inspection AGS observed no olfactory detection of odors or vapors consistent with hydrocarbons related to gasoline. The air space was monitored with a portable PID indicating a measurement of 4.8 ppm... This detection is likely the result of low atmospheric pressure followed from periods of rain causing the basement to be damp. The basement floor did not indicate the presence of groundwater... . Line and Dispenser Upgrade Report (Delta Environmental Brad Fisher 914-765-8180). This Line and Dispenser Report summarizes the results of pump island and product piping upgrade assessment activities conducted by Delta Environmental and Gasoline Installations on behalf of BP Products North America . Work performed included the removing and installing new spill containment boxes beneath each dispenser, removal and replacement of propduct piping and installation of electronic line leak detection systems. Soil analyticals only show minor TAGM 4046 SVOC exceedences attributable to fill. Subsurface Investigation Workplan (Applied Geosolutions)-July 2004. Bedrock at depth of 10' below grade and groundwater at depth of 12.5-13.5' below grade. Report proposes installation of four wells via air rotary followed by groundwater sampling. Groundwater flow direction not determined as of yet. 9/14/04-Vought-Sent letter to Gaseteria approving of Subsurface Investigation Workplan. Vought received message from Lujuanna Smith (212-967-1644) and returned call. Vought spoke to Smith and no indication of vapors was noted. Ms. Smith requested info on the applicability of the BCP program for 480 10th Avenue and Vought replied that was only available if HPD was willing to take responsibility of the spill and that she should call Albany for futher information. Vought also suggested that she return the call to DEC on 11/14/04 which is when the workplan results are due to DEC. 9/17/04-Vought-Received fax from Applied Geosolutions (Muller). 466

10th Avenue-AGS is currently getting drilling quotes and will complete the Workplan within the 60 day time frame .  
1/6/05-Vought-Reviewed Subsurface Investigation Summary Report (Applied Geosolutions) dated December 2004 and received on 1/3/05. Location north of USTs not possible due to concrete with rebar. Installation of three monitoring wells. Groundwater from 7-11' bgs and flow to the west. Groundwater analyticals show 48ppb xylene(MW1), 13ppb 1,2,4-trimethylbenzene(MW1), 17ppb 1,3,5-trimethylbenzene(MW1), 26ppb naphthalene(MW1), 1400ppb MTBE(MW1), 23ppb MTBE(MW2), and 20ppb MTBE(MW3). The existing groundwater monitoring wells should be monitored on a monthly schedule and sampled on a quarterly schedule to document changes in groundwater elevation and contaminate concentration trends in order to develop and appropriate remedial strategy . DEC requires: 1)installation of monitoring wells on West 37th Street north northeast of site and downgradient from abandoned tankfield along 10th Avenue. 1/19/05-Vought-Meeting at DEC with ASR Tomasello. Will examine possibility of borings across 10th Avenue (may not be possible due to utilities) and also onsite adjacent to 480 10th Avenue. If onsite boring adjacent to 480 10th Avenue is not possible then boring will be installed on 37th Street.  
2/17/05-Vought-Spoke to Muller and site visit scheduled for 2/24 at 10am to discuss possible well installation locations.  
2/24/05-Vought-Site meeting with ASR Tomasello and no borings possible across 10th Avenue. Well will be installed onsite under canopy downgradient of abandoned tankfield. Well will also be installed on West 37th Street north northeast of site. Obligado- SITE TRANSFERRED FROM VOUGHT TO OBLIGADO 10/12/05 - Spoke with Tomasello ASR, requests to talk about closure for sp0206783. 10/17/05- Obligado - File Review: Final Subsurface Investigation Report, dated June 2005. 4 monitoring wells installed at the site. Wells were installed into Bedrock down to 25 ft bgs. 3 wells installed in December 2004, one additional well installed in March 2005. Groundwater encountered at approximately 7 to 11 feet. No product encountered. Initial gw samples in Dec. 2004 show ND for Benzene in all wells, 1400 ppb MTBE (MW-1), 23 ppb MTBE (MW@), 20 ppb MTBE (MW-3), 48 ppb Xylene (MW-1). March 2005 gw results show 140 ppb benzene (MW1), 2100 ppb MTBE (MW-1), 26 ppb benzene (MW-3), 16 ppb MTBE (MW-3). June 2005 results show 45 ppb benzene (MW-1), 11 ppb Ethylbenene (MW-1), 750 ppb MTBE (MW-1), 52 ppb benzene (MW4), 10 ppb toluene (MW-4), 170 ppb Napthalene (MW4), 55 ppb MTBE (MW4), 193 ppb xylenes (MW-4). 4Q05 Monitoring Report, dated 10/15/05. Ground water analyticals at show 20 ppb benzene (MW-1), 580 ppb MTBE (MW1), 23 ppb MTBE (MW-2), 21 ppb benzene (MW-3), 15 ppb MTBE (MW-3), 16 ppb benzene (MW-4), 52 ppb ethylbenzene (MW-4), 140 ppb MTBE (MW-4). 11/14/05 - Obligado - Site visit with ASR Tomasello. Request to see at least 2 more quarters of monitoring at a minimum. 12/8/05 - Obligado - Will do a sensitive receptor survey. Continue monitoring. Only 2 quarters of data at MW4. 3/1/06 - Obligado - PPhone call with Chris/STeve, ask that site be monitored quarterly not monthly. 4/12/06 - Obligado - review 1Q06 monitoring report. BTEX ND to 33 ppb, MTBE ND to 800 ppb. 11/21/06 - Obligado - Reviewed Closure Petition/Sensitive Receptor Survey. Sent email to ASR denying NFA stating the following: Due to historical vapor issues in the adjacent apartment, and the presence of benzene above guidance levels in ground water, the Department requires laboratory analyzed vapor samples from either the slab slab system (if operational) or indoor air samples to confirm no vapor intrusion. The Department also requires an additional round of ground water

monitoring to confirm benzene and MTBE levels are still decreasing. NYSDOH Vapor Intrusion Guidance should be followed when collecting air samples available at [http://www.health.state.ny.us/environmental/investigations/soil\\_gas/svi\\_guidance/index.html](http://www.health.state.ny.us/environmental/investigations/soil_gas/svi_guidance/index.html). Please submit the results of the additional investigation by January 21, 2007. 12/1/06 - Obligado - Steve Muller will be onsite today to collect additional data. 5/19/09 - Obligado - Meeting with DEC, ASR, GAseteria. They conducted a groundwater monitoring event and a vapor intrusion investigation in the adjacent residential building. According to report no Vapor intrusion was occurring. Ground water results found low levels of BTEX in GW, max 23 ppb and MTBE is continuing to decrease from 1400 ppb in 2004 to 250 ppb in 1Q09. They will submit a workplan for a confirmatory soil boring investigation by 7/31/09. 11/20/09 - Obligado - Reviewed a revised Investigation Work Plan. The plan proposes to install 3 monitoring wells at the site. 2 wells are proposed in the area of the former abandoned 550 USTs and one is downgradient of the dispenser island. I sent a letter to Gaseteria approving the plan. 3/22/10 - Obligado - Review the 4th quarter 2009 monitoring report. Max BTEX is 8 ug/L. Max MTBE is 140 ug/L. No LNAPI present. 6/14/10 - Obligado - I reviewed the Remedial Investigation Report. 2 Additional soil boring/monitoring wells were installed. 1 soil boring/well location was not completed due utilities in that area. Soil samples were collected from one of the 2 locations, but the other location had shallow bed rock so no soil sample was collected. No soil impacts were detected at the one location where soil was collected. Ground water results showed 13 ppb total BTEX at newly installed MW5. MW6 had no exceedences of TOGs The existing monitoring wells were sampled as well. MW4 had max MTBE at 150 ppb, and BTEX at 14 ppb, and total VOCs were 174 ppb. MW2 had 15.3 ppb BTEX and 11 ppb MTBE. This site has minimal ground water impacts the 6 wells on the site, and lack of evidence of contaminated source soils. Also a VI investigation was previously performed at the adjacent apartment building and no vapor intrusion was determined to be occurring. After discussion with DEC Tibbe, this spill has been closed. "

DEC Region: 2  
DER Facility ID: 322544  
DEC Memo: "10/31/06 - Raphael Ketani. I went to the site today. The building houses offices of various companies and some wholesale stores. There were no odors in the lobby, which is directly above the tank room. I went down the stairs to the maintenance office where the tank room and boiler room are. This was the basement. I didn't smell any odors until I was at the bottom of the stairs. There was a slight odor and the basement was warm. The vapors measured about 1100 ppb with the PID meter. The boiler room was clean and had only a few very small spots from where the oil filters are changed. As I walked to the tank room the vapors got stronger. They were about 1300 ppb to 1400 ppb. I met the super, Frank Gutierrez (718) 497-3000. He let me into the tank room. Petroleum Tank Cleaners (718) 624-4842 had already emptied the tank and had been inside. There was oil on the floor and most of it was covered with absorbent. I estimated about 300 gallons of #6 oil had spilled. I did not see any drains or sumps in the room as I walked around the tank. There was no oil outside of the tank room in any direction. The floors outside of the tank room were solid with no cracks at all. Perhaps the floor in the tank room was the same way. The vapors in the tank room were 32 ppm. I told Mr. Gutierrez to keep the tank room door closed to keep the vapors to a minimum in the basement. He said he would do this. The people from PTC had come back. They were starting to set up temporary piping for the temporary 275 gallon tanks. The PBS case is #2-240419 and shows a 3,000 gal. tank with #6 oil. 11/13/06 - Raphael Ketani. I returned a message from John Benvegna (bin-ve-na) of Legget Brashers and Graham (914) 694-5711. He said he saw the tank room just recently and the tank had been removed, the absorbent cleaned up, and the vapors were low. He asked what DEC wanted in the way of an investigation and cleanup. I told him that if he can see the tank room floor and it looks to be in as good condition as the floor outside the tank room, then no investigation will be needed. I added that all the DEC would want is power washing of the floor, good ventilation, a small report describing the cleanup and incident, and a revised PBS form. He said he will do this. 3/1/07 - Raphael Ketani. I called up Frank Cassano of Ace Atlas (718) 497-3003/(917) 376-5416 to inquire as to the status of the cleanup and remediation, but could only leave a message. 3/6/07 - Raphael Ketani. I called up Mr. Benvegna and asked him about the cleanup. He said that LBG was not involved as they worked for the insurance company and the insurance company determined that Ace Atlas was not covered. He told me to contact Carmine Casale, the building manager from, Bernstein Real Estate(212) 594-1414, ext 413. I tried calling Mr. Casale, but could only leave a message. 3/7/07 - Raphael Ketani. Mr. Cassano called me back. He said he had spoken to Mr. Salamack and had been informed that the documentation regarding the cleanup had already been sent to DEC. I told him that we had nothing in our records. He said he would get back in touch with Mr. Salamack. 3/22/07 - Raphael Ketani. I received a FAXed closure report from Mr. Salamack. The report contained the cover letter describing the problem and cleanup, diagrams of the tank and the room, site map, plot plan, manifests for soil and tank removal, and end-point sample analytical results. I reviewed the closure report. There were 5 sets of sample data. All of the VOCs, except for one hit of naphthalene, were non-detect. Each set had many SVOC hits

and some exceedences, specifically those of the benzo series and chrysene. The exceedences were typically several times the TAGM limit, but were still low concentrations. These low exceedences are more likely the result of ash and cinders that are mixed in with the fill soil that was originally in place. Based upon this closure report, I am closing the spill case."

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead\_DEC Field was VOUGHT 12/2/2002 - Sangesland on Desk Duty got the following info: T&S Trucking was subcontracted by Castle Oil to make this delivery. The original delivery was set for 4,000 gal #4 oil. At the building, no super was found, T&S called Castle, who gave T&S authority to deliver 3,000 gal. At 2,100 gal, oil shot out the vent line. After the spill, further searching of the records at Castle showed this building got a delivery for 3,500 gallons on Friday. According to Jim Carey (718-579-3410) at Castle Oil, approx 20-25 gal shot out the vent line and onto the adjacent building and sidewalk (no dirt, or drains were impacted). In addition, approx 50 gallons spilled from the top of the tank (manway? broken gauge opening?) Spill pooled around the tank in the basement. Area around the tank was filled with boxes of clothing which has absorbed a major portion of the oil. No sump or drains are impacted. 11AM- Castle Oil has hired Petroleum Tank Cleaners (718-624-4842) to do the clean up. Issac of PTC will send a crew over ASAP. 11:45AM- Sangesland spoke with Felix Silva building super (212-448-9498) He said PTC just pulled up and was unloading gear. Robert from Castle Oil is on site and said the spill was only from the vent line. Oil spilled out of the vent line and poured 20-30 gal down an adjacent gateway directly into the basement. He said the tank and tank room are separate and did not appear to be impacted. 3PM Issac at PTC says the job is 80% done. All oil was removed from basement floor. Floor was painted cement, so the floor was easy to clean up. PTC will return tomorrow with a steam cleaner to finish up on the sidewalk and the basement wall. 12/3/2002 PTC says all work was done. Spill Closed - OK'd by Vought"  
Remarks: "delivered too much fuel. cleanup crew enroute."

 DEC Memo: "8/15/2016: Rashad 270 West 38th Street has alternate addresses of 554-568 8 Avenue and 270-278 West 38th Street. PBS registration number 2-603535 found for site. There is a 10,000 gallon #6 fuel oil UST. Spoke to Victoria she said the tank failed with a dry leak and the cause of the failure is most likely due to the vent line. The vent line was partially replaced and the connection where the old pipe and new pipe connect is the cause of the failure. As per PBS the mailing address is: 270 Realty LLC C/O The Expansion Group, Inc 250 West 57th Street New York, NY 10107 TTF will be mailed to address and emailed to Protest. Spill assigned to DEC Piper for follow up. 8/30/16- DEC Piper spoke with Elliot Small- cell 917-670-1415 , esmall1291@aol.com, repairs have been made. Tank and system passed retest. Documentation received. Based on work and passing results, this spill is closed. See dec docs for documentation. "

As per NYC building records 256 West 38 street has an alternate address of 256-260 West 38 Street. According to PBS#2-405469, there is a 4,500 gallon #2 fuel oil aboveground on saddles, legs, stilts, rack or cradle. There is no last test date or next test date, the registration expires on 6/28/16, PBS has been cross referenced to this case. 8/06/2015: Rashad No documents found in D2. No additional spill reports found. Previous Owner information per PBS report: EEGO West 38 FEE, LLC 600 Madison Ave. 11 Floor New York, NY 10022 212-600-2116 8/10/2015: Rashad Called Rob Hill to discuss spill case, Rob indicated that all lines were tested and good and the tank was bad . Rob also indicated they were not contracted directly, we have requested the failed tank test report from Rob. Rob Hill email: roberthill@petroleumTEK.com, fax: 718-855-7244. Received email from Rob Hill Please see the following attachment for the tank test performed at 256 W 38 St, NYC in July of 2012. I will forward you a copy of the second tank test shortly. If you have any questions or concerns feel free to contact me at 718-855-7272. Tank test report |  |

APT BUILDING TTF (Continued)

S112148825

was dated 7/2/2012 and indicated ullage (dry) portion leak on. Report was uploaded to D2. TTF letter drafted to send to new owner: ARC NY25638001, LLC C/O American Realty Capital 405 Park Avenue, 12th Floor New York, NY 10022 9/4/2015: Rashad TTF letters were prepared and sent to ARC and EGGO, documents uploaded to D2. 10/15/2015: Rashad Received call from Zena from CTSI asking what needs to be done to close case. I informed her that a passing tank test will be needed and visual confirmation that no staining is present since it is an aboveground tank. 10/19/2015: Rashad Received call from Zena (212-971-7016), she indicated she had phase 1 report and will be emailing it. Zena emailed page from phase 1 report which indicated no visual or olfactory evidence of a release, her email: Attached is a section of the phase I report for 256 west 38th street. Please take a look and let me know if it can be used to close this spill case. I responded: Unfortunately I cannot close the spill without a passing system tightness test (includes tank and associated piping). The spill will be closed once a passing tightness test is received. Please let me know if you have any additional questions. 10/29/2015: Rashad Received call from Rob Hill (riteway), he asked what is needed to close the spill, I informed him that I only need a passing tightness test to close the spill. 11/19/2015: Rashad Received email from Zena: This e-mail is regarding spill # 1203417 for 256 west 38th street. I've attached the following items: A recent tank test Pass, The FDNY permit, The Petroleum Bulk Storage Certificate, The repair report and pressure test from Eastmond September 2012, Photos from a visual inspection. We are hoping to close this case as soon as possible. Please let me know if the attached information is sufficient enough to do so, or if any other information is needed. Attached is a document that contains a passing tank test from 11/7/2015 (it includes tank and piping). Also included is FDNY permit, PBS registration, invoice from repairs done in 2012 and passing tank test from 10/10/2012. 3 site photos were also attached of tank. All have been uploaded to D2. Based on passing system tests on aboveground tank and no staining or odors, no complaints or new spill cases in past 3 years, case will be closed. Sent email to Zena: I am preparing the closure letter, what is the name and address of the person/company I should address it to? Sahar responded: Thank you so much Rashad, Could address to the following: Mariellen Sereduke - Senior Real Estate Manager CBRE - Asset Services 333 W. 34th Street, Lower Level - New York, NY 10001 T 212 564 3092 - F 212 643 0490Mariellen.Sereduke@cbre.com - www.cbre.com. Letter was emailed and mailed to address provided, it was also uploaded to D2."

Site Description: "Location: The site is located at 511 West 21st Street in Manhattan, NY. The property is bounded by West 21st Street to the south and West 22nd Street to the north between 10th Avenue and 11th Avenue in Manhattan. The property has frontage on the north side of West 21st Street and the south side of West 22nd Street. Site Features: The site is approximately 0.45 acres in size, is currently an active construction site and there are no site occupants. The property is flat with average elevation approximately 10 feet above mean sea level and the elevated High Line Park runs along the eastern property boundary. Current Zoning and Land Use: The area is zoned for manufacturing and commercial use, and the City's zoning code for the site is M1-5. Past Use of the Site: The site has been used for manufacturing by a gas meter company and also as a service station. Most recently it has been used by a television cable company for vehicle parking and maintenance, storage and offices. Site Geology and Hydrogeology: The site is underlain by 13 to 17 feet of man-made/historic fill. Native soils beneath the fill layer consist of organic silty clay of estuarine origin as well as sand and silt of glacial origin. The depth-to-bedrock varies from approximately 33 feet below grade at the northern end of the site to 65 feet below grade at the southern end of the site. The depth-to-groundwater at the site is approximately 6 to 7 feet below sidewalk grade and the local groundwater flow direction is to the southwest."  
Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern included metals, semi-volatile organic compounds (SVOCs), and volatile organic compounds (VOCs) in soil and /or groundwater. Remedial actions have successfully achieved soil cleanup objectives for commercial use. A Site Management Plan (SMP) will be implemented to manage remaining contamination in the future. An environmental easement will limit the future use of property, restrict the use of groundwater and require compliance with

Health Problem: the SMP. All engineering controls (e.g., soil cover/cap) of the remedy will be operated and maintained under the SMP."  
"Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination that remains on-site."

Remedial actions have successfully achieved soil cleanup objectives for commercial use. A Site Management Plan (SMP) will be implemented to manage remaining contamination in the future. An environmental easement will limit the future use of property, restrict the use of groundwater and require compliance with the SMP. All engineering controls (e.g., soil cover/cap) of the remedy will be operated and maintained under the SMP."

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination that remains on-site."

Site Code: 475372

Site Description: "Location: The site is located at 511 West 21st Street in Manhattan, NY. The property is bounded by West 21st Street to the south and West 22nd Street to the north between 10th Avenue and 11th Avenue in Manhattan. The property has frontage on the north side of West 21st Street and the south side of West 22nd Street. Site Features: The site is approximately 0.45 acres in size, is currently an active construction site and there are no site occupants. The property is flat with average elevation approximately 10 feet above mean sea level and the elevated High Line Park runs along the eastern property boundary. Current Zoning and Land Use: The area is zoned for manufacturing and commercial use, and the City's zoning code for the site is M1-5. Past Use of the Site: The site has been used for manufacturing by a gas meter company and also as a service station. Most recently it has been used by a television cable company for vehicle parking and maintenance, storage and offices. Site Geology and Hydrogeology: The site is underlain by 13 to 17 feet of man-made/historic fill. Native soils beneath the fill layer consist of organic silty clay of estuarine origin as well as sand and silt of glacial origin. The depth-to-bedrock varies from approximately 33 feet below grade at the northern end of the site to 65 feet below grade at the southern end of the site. The depth-to-groundwater at the site is approximately 6 to 7 feet below sidewalk grade and the local groundwater flow direction is to the southwest."

Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern included metals, semi-volatile organic compounds (SVOCs), and volatile organic compounds (VOCs) in soil and /or groundwater. Remedial actions have successfully achieved soil cleanup objectives for commercial use. A Site Management Plan (SMP) will be implemented to manage remaining contamination in the future. An environmental easement will limit the future use of property, restrict the use of groundwater and require compliance with the SMP. All engineering controls (e.g., soil cover/cap) of the remedy will be operated and maintained under the SMP."

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination that remains on-site."

Updated By: JXPEREZM  
Site Code: 475372

Site Description: "Location: The site is located at 511 West 21st Street in Manhattan, NY. The property is bounded by West 21st Street to the south and West 22nd Street to the north between 10th Avenue and 11th Avenue in Manhattan. The property has frontage on the north side of West 21st Street and the south side of West 22nd Street. Site Features: The site is approximately 0.45 acres in size, is currently an active construction site and there are no site occupants. The property is flat with average elevation approximately 10 feet above mean sea level and the elevated High Line Park runs along the eastern property boundary. Current Zoning and Land Use: The area is zoned for manufacturing and commercial use, and the City's zoning code for the site is M1-5. Past Use of the Site: The site has been used for manufacturing by a gas meter company and also as a service station. Most recently it has been used by a television cable company for vehicle parking and maintenance, storage and offices. Site Geology and Hydrogeology: The site is underlain by 13 to 17 feet of man-made/historic fill. Native soils beneath the fill layer consist of organic silty clay of estuarine origin as well as sand and silt of glacial origin. The depth-to-bedrock varies from approximately 33 feet below grade at the northern end of the site to 65 feet below grade at the southern end of the site. The depth-to-groundwater at the site is approximately 6 to 7 feet below sidewalk grade and the local groundwater flow direction is to the southwest."

Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern included metals, semi-volatile organic compounds (SVOCs), and volatile organic compounds (VOCs) in soil and /or groundwater. Remedial actions have successfully achieved soil cleanup objectives for commercial use. A Site Management Plan (SMP) will be implemented to manage remaining contamination in the future. An environmental easement will limit the future use of property, restrict the use of groundwater and require compliance with the SMP. All engineering controls (e.g., soil cover/cap) of the remedy will be operated and maintained under the SMP."

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination that remains on-site."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was ROMMEL 12/9/03 TJD Reassigned Demeo greater than greater than greater than Rommel. 11/23/05- Obligado - Spill transferred from Tang to Obligado 11/29/05 - Obligado - From Caller Remarks: UNDER GROUND PRODUCT LINE WAS FOUND TO BE LEAKING. CONTACT PERSON WAS NOTIFIED OF THIS WITH THE RECOMMENDATION TO EXCAVATE AND REPAIR . No files were found to document repairs or tests. Review PBS records - PBS# 2-285919 listed for site. Site has one 2000 gallon #2 fuel oil AST, two 4000 gallon gasoline USTs, one 550 gallon and two 275 gallon other ASTs. Time Warner Facility Manager Phone # (212) 598-7357 11/30/05 - Obligado - call Time Warner at number listed above. No answer. 12/15/05 - Obligado - called again, no answer. Called Dave Greffinius (consultant for neighboring property) to see if he was able to get any facility information for Time Warner building. 12/19/05 - Obligado - voice mail from Greffinius (12/15). Gave contact names and a phone number for Time Warner Facility: Frank Soto, Barry Rosenblume, and Tom Lonst (212) 379-2852 12/20/05 - Obligado - tried calling above listed number, appears to be a wrong number. 12/28/05 - Obligado - Site visit. Contact information for manager - Terrence Charlton (212) 598-7358. Called, spoke with secretary, Terrence Charlton on vacation, will call back next Tuesday. 1/3/05 - Obligado - Called Terrence Charlton. He does not know anything about spill. He will contact the Operations Manager - Britt Wenzel. Tell him the DEC requires information regarding the tank failure, if repairs were made, if soil/gw was impacted, if tanks were retested. 1/4/05 - Obligado - Received phone call from Abbas -

engineer from Time Warner. Gave him my contact info with instructions to send/fax any files he had regarding this spill number. 1/19/05 - Obligado - Call Abbas Family (718-474-3400) to inquire about documents. Left message. Abbas called back, he will send the information the beginning of next week. 3/31/06 - Obligado - Review documents sent by Abbas, received by Department on 1/25/06. Documents installation of new fill box in 1999 and 2002, and passing tightness tests in 2004 and 2005. Documents do not shed any light on spill incident reported by Crompco on 12/15/00. Call Mr. Abbas and he said he will research the file for more information. He requested a spill report. I will email the spill report so he can find pertinent information. 5/5/06 - Obligado - Received additional documents. 5/11/06 - Reviewed documents. Corrosion in fill port pipe, caused leak to soil, soil excavated to 2 ft bgs. No mention of endpoint soil sampling. Send letter to Time Warner requiring soil boring investigation and collection of gw sample from below line where leak occurred. 5/16/06 - Obligado - Delivery confirmation on 5/13/06 6/6/06 - Obligado - Received Limited Subsurface Investigation Report, submitted by Fenley and Nicol Environmental. Three soil borings advanced. Refusat at SB1. Soil impacts above TAGM at SP-2@10 ft, SP-3@5 ft, and SP-3@10 ft. Greatest contamination at SP3 with 93,000 ppb MTBE and 2,242 ppb benzene. Recommends lateral and vertical extent of impact be delineated including offsite sampling. After delineation a Remedial Action Workplan will be submitted. 6/20/06 - Obligado - Phone conversation with Kristin Dillner 631-586-4900. She will email a workplan for additional delineation. Obligado - received workplan approved with minor changes. Required one soil boring to be moved closer to former remote fill area and collection of 3 ground water samples. One from previous soil boring area above, one from remote fill area, and one inbetween the dispensers. 8/7/06 - Obligado - Received Limited Subsurface Investigation Report, submitted by Fenley and Nicol Environmental. Six soil borings, 3 ground water samples collected from temporary well points. Ground water impacts detected at all 3 gw sampling points. Greatest soil and ground water impacts detected west of dispensers and southwest of UST field (TW1/SB4). GW results in ppb from TW1 show 7327 benzene, 41,697 toluene, 2783 ethylbenzene, ~23500 total xylenes, 321,467 MTBE. 8/21/06 - Obligado - Phone conversation with Kristin Dillner from F&N. Told her that permanent monitoring wells needed to be installed, the plume would need to be delineated, and a RAP submitted. I told her I would send Abbas a Stipulation agreement this week. 8/28/06 - Obligado - Sent STIP to Azzaro. Due date for signature is 9/25/06. CC to Dillner and Abbas Family. 90 days for ISR and 60 days for RAP. 8/31/06 - Obligado - Received delivery confirmation of Stip Agreement. 10/10/06 - Obligado - Signed STIP received by Department on 9/26/06. CAP has been modified and signed by RP. Called Abbas to schedule a meeting to discuss. 11/1/06 - Obligado - Had a meeting with Sal Azarro, Manfred Bohms, Abbas Family. Discussed scope of work. UST excavation will probably take place in May 2007. They can proceed with monitoring well installation in meanwhile. I will send them another CAP with modifications based on discussions. 11/22/06 - Obligado - Email from Abbas with another revised CAP. After review the CAP looked acceptable. I attached it to the STIP and emailed it as a final version back to Abbas requesting signature by 12/2/06. 11/27/06 - Obligado - Signed STIP received by Department. 12/4/06 - Obligado - Stipulation Agreement executed by Oliva 1/17/07 - Obligado - Called Manfred Bohms to discuss the status of project. He said 4

wells were installed, 2 onsite and 2 in the sidewalk. He is trying to gain access to the other sidewalk wells to sample. He will need a 2 week extension and will send an email request. 2/27/07 - Obligado - Received a letter from Abbas Family of Water Gorman engineers. The letter documents ground water results from 4 monitoring wells that were installed. Requests to collect samples from sidewalks in front of adjacent buildings. Upon the sampling and testing of the groundwater from the neighboring premises they will submit investigation report. 3/16/07 - Obligado - Abbas Family asked to get access to wells in sidewalks in front of 521 and 510 w. 21st street to do ground water sampling and gauging. Since this would help to allow a more accurate picture of ground water conditions in the area I sent a letter to Guy Roberts and to the owner of Sorage USA and asked for them to grant access to Time Warner to do the work. 4/17/07 - Obligado - Email from Greffinius from Delta stating they would grant access but asked to be copied on analytical results. 4/18/07 - Obligado - Spoke with Jessica from Gannette Fleming. She said they will be doing a tidals study on using the wells in the sidewalk and they would not be collecting samples. I forwarded this information to Greffinius. Additioanlly, Jessica said I should expect a report by May 31 and UST excavation in June. 5/9/07 - Obligado - Received a phone call from Andy Rudko of AKRF, 646-388-9526, who is working for a party looking to purchase the site from Time Warner and had some questions. I didn't give him any details, but that Time Warner signed a Stipulation agreement and I am waiting for an investigation for well installations. 5/14/07 - Obligado - Spoke with Abbas Family. He said project has been delayed because the new facility where Time Warner Cable will be moving to in Brooklyn is not ready yet. He will send a letter stating the same. They surveyed all the wells to get a ground water flow map. 5/18/07 - Obligado - Received a progress reprot letter. Delays have been incurred at new Time Warner facility in Brooklyn. So Time Warner will vacate the 21st street faciility by the end of August. At that time the USTS and piping will be removed. Called Abbas, asking him when I will receive a report of all the investigation activities. He said 3-4 weeks. I told him I needed the report sooner than that. He will talk to Time Warner to expedite the report. 7/19/07 - Obligado - Reviewed documents entitled Investigation Summary Report , dated February 27, 2007, Update on CAP s Milestone and Monitoring Well Survey Report , dated June 11, 2007, and Monitoring Well Survey and Tidal Study , dated June 8, 2007. The documents summarize investigation activities performed to delineate soil and ground water contamination. After review of documents sent a letter to Time Warner requiring the following by Nov 1, 2007. 1) Quarterly Ground Water Monitoring - Collection of ground water samples for laboratory analysis from monitoring wells GF-MW1 through GF-MW4 and monitoring wells R-MW-1, R-MW-3, and either R-MW2 or R-MW-9. 2) Additional Delineation - Due to the extremely high concentrations of BTEX and MTBE in ground water, the Department requires installation and sampling of 3 additional monitoring wells to delineate the areal extent of the contaminant plume. One monitoring well must be installed in the north sidewalk of 21st street approximately 45 ft west of GFMW-2 to determine the down-gradient extent of plume and the extent to which the plume from Time Warner site is impacting other properties. One monitoring well must be installed north of GFMW-1 to delineate the areal extent of plume in the cross-gradient direction. One monitoring well must be installed northeast of GF-MW-4 to establish up-gradient background

ground water conditions. 3) Summary of UST Removal - Documentation of the UST system and contaminated soil removal and endpoint sampling results must be submitted to the Department. 4) Remedial Action Plan - A Remedial Action Plan (RAP) should be submitted to the Department. The RAP must contain a plan to remediate residual soil and ground water contamination subsequent to source removal. The RAP must also include an Operation, Maintenance, and Monitoring Plan. If the property is to be redeveloped for a different use, the RAP must state the future intended use of the site and include a Vapor Intrusion Mitigation Plan. 7/19/07 - Obligado - Received call from Abbas Family. He received the letter and he said they would do the work. He asked if they need to do ground water remediation. I told him yes. He said the deadline might be hard to meet but he would let me know later. 10/19/07 - Obligado - PBS Violation hearing with DEC Urda and Falvey, Scott Furman (Time Warner attorney), Tradewinds Contractors, and Abbas Family. During removal of USTs Brian Falvey visited the site for a PBS Inspection and found several PBS violations. Tank removal was put on hold due to violations, however they did continue to move some contaminated soil found in area of dispenser product lines. They found 2 additional USTs, that will be properly closed. Prior to any excavation, I will visit the site to inspect. A site visit is tentatively scheduled for Thursday November 1. The 4000 gallon USTs were encased in concrete and according to the attorney the tank vault is clean, but I will inspect. They will also core through the dispenser island concrete vaults. 12/4/07 - Obligado - Met on site with Scott Furman and Paul Woodel. The gasoline USTs have been removed as well as some contaminated soil. Endpoint samples only showed one hit for MTBE on eastern sidewall. Bottom was a concrete slab, but I couldn't see it because when they previously cored through the bottom the gw infiltrated up the whole and filled the bottom of the excavation. According to Scott Furman, at no time during work did they notice any sheen or petroleum smell from the water. And the tanks were in good condition. He said they would excavate a little more on the east to try and get clean side walls, then back fill. They showed me two additional excavations in the back of the building, one for a 550 UST of unknown contents, and the other was a suspected UST location which they didn't find any USt. From the 550 USt they took sidewall samples and only found several PAHs, but it appeared to be levels similar to urban fill. After looking at the data I approved backfilling those 2 excavations. The major contamination is in the area around the dispenser and the vent lines, with elevated MTBE and BTEX, in the southwestern corner of the site and the sidewalk. Moving forward they will 1) excavate a little more on eastern sidewall of tank excavation then backfill, 2) install 2 additional wells to delineate the southwest gw plume area, 2) additional excavation to remove as much contaminated soil as site constraints allow around vents and dispensers 3) propose a plan for gw water treatment they may due treatment at time of excavation since soils and gw will be exposed. Since the new tenant plans to build a hotel in 1 years time, timely remediation is required, so we agreed that chem ox might be the best strategy for ground water. They will submit a memo summarizing our discussions. 12/17/07 - Obligado - Received Memo from Woodell via email, detailing above meeting minutes. The memo proposes excavation and chemical injection with regenox. I sent an email to Paul concurring the planned course of action. 1/8/08 - Obligado - Conference call with Paul Woodel and Mark Furman. They are planning to use regenox as chemical oxidant followed

by injection of advanced ORC to enhance bioremediation subsequent to chemical oxidation. They will submit a formal RAP today. 1/11/08 - Obligado - Approved RAP. Sent email with RAP approval letter. 1/15/08 - Obligado - Email from Woodel : We have begun the tasks described in the work plan. The holes in the north room have been backfilled. Today I was on site to scrape back the east wall of the gasoline UST excavation in the south room. We took it back an additional 2-3 feet and I collected another sidewall sample. This excavation is also being backfilled. We anticipate that the first test pit between the 2 former dispenser islands will be dug on Friday. 1/28/08 - Obligado - Email update from Woodel - LBG has supervised the excavation of the 2 test pits described in the workplan. Impacted soil and pockets of free-phase product were encountered in the western pit and were removed. The eastern pit contained impacted soil at the water table but there was no free product and no apparent source zone above the water table. Both pits have been extended to their practical limit (interior walls, sewer lines, column footers, etc.). We plan to backfill the level at the water table with stone on Tuesday and apply the chemical-oxidation product Tuesday and Wednesday. 5/14/08 - Obligado - Review UST Closure Report. 2 3000 gallon gasoline USTs, 1 550 gallon 2ASTs, 2 product dispensers, associated piping and 1 oil water separator were removed. Endpoint samples were collected from UST excavations. East wall of gasoline UST excavation had MTBE above TAGM. The waste oil UST excavation indicated residual SVOCs and chromium typical of urban fill throughout the city. Test pits TP1 and TP2 were excavated and 78 tons of contaminated soil was removed and disposed off-site and waste manifests were included. Endpoint sampling from test pits show that gross contamination present at and below the water table. No evidence of the specific source of the contamination was obvious. Contamination above TAGM and limited free-phase product appears to have accumulated around the buried concrete and structural components of the buildings. Test pits were backfilled with gravel and chemical oxidation products were applied to the subsurface to promote remediation. Three treatment sumps were installed with 4 diameter slotted screen set 3 ft into water. 1120 lbs of RegenOx and 150 lbs of ORC were mixed and applied to the gravel backfill on January 31, 2008. On Feb 29, 180 lbs of RegenOx and 75 lbs of ORC were applied. 3 borings and 2 wells were installed at the site. 1st round of sampling will be completed March 10, 2008. Review 1Q08 Monitoring Report - 5 wells were gauged and sampled. Based on most recent results Max contamination at S3 (former GFMW4) with 2570 ug/L BTEX and 33,000 ug/L MTBE. According to the report, the whole building will be torn down in the summer of 2008. When this occurs LBG will supervise additional soil removal. LBG will inform the NYSDEC of future remedial activities. 9/25/08 - Obligado - review 2Q08 report. Elevated concentration still present in wells. Effectiveness of RegenOx not yet apparent. Max MTBE at 48,000 ug/L. According to report building is still scheduled to be demolished. LBG will inform the DEC of any redevelopment or additional remediation 7/7/09 - Obligado - Review 1Q09 Update Report - S3 and GFMW4 have been destroyed, so there is no monitoring wells in the source area. Downgradient well GFW-1 still has significant impacts. S3 and GFMW4 before destroyed had the max concentrations. Send a letter requiring the installation of additional monitoring wells. Require work plan submission within 30 days. 10/29/09 - Obligado - Review Investigation Work Plan, submitted 8/13/09. The workplan proposes 3 additional wells as requested, however, one of the upgradient is over 100 feet

away and to far north. This well won't provide and meaningful data. SEnt letter requiring relocation of well to the east of the tanks and also revise soil sampling plan so soil sampling begins above the water table. Also requested that they revise the implementation schedule. 6/7/10 - Obligado - I reviewed the revised Investigation Work Plan. The soil sampling plan was modified and the location of the upgradient well was moved to a more appropriate location. I sent a letter via email for approval of the three wells. 8/12/2010 - Obligado - I reviewed the July 2010 Update Report. The report documented the installation of 3 additional monitoring wells and quarterly sampling. Only one soil sample, MW8, had soil impacts with 980 ug/kg MTBE. Maximum BTEX concentrations were found at MW8 with 4100 BTEX. Maximum MTBE also detected at MW8 with 3400 ug/L. the report recommends continued monitoring. I emailed Paul Woodell at LBG and requested a BTEX plume map on future reports. 10/11/11 - Obligado - I emailed Paul Woodell to inquire about the status of the monitoring. I received a phone call from Sean Groszkowski of LBG ((914) 694-5711) who is now managing the project. He said they are planning to do another chemox event using REgenOx. I asked him to send me a work plan as well as any monitoring reports since July 2010. 11/9/11 - Obligado - I reviewed a plan to do additional chemical injections at the site. They plan to do injections via geoprobe. They proposed 10 injection points using Regenox and ORC advanced. I gave approval to proceed with the additional injections. I also had a conference call with Sean Groszkowski (LBG), Scott Furman (time Warner attorney), and repsentatives of a potential purchaser, Arnie Fleming (consultant) and Karen of Kramer LEvin (attorney). We discussed the pending injections and the planned purchase and redevelopment. A purchaser plans to redevelop the property as an office building. They will use and reinforce the existing structure, as well as add several floors. The building will not have basement. They will install a vapor barrier and SSDS. The planned start for the work is 6 to 9 months. I recommended Time Warner to try and treat the soil and ground water as aggressively as possible prior to starting the development. They concurred. The injections are scheduled to begin tomorrow (11/10/11). 11/16/11 - Obligado - I spoke with Sean. The injections went well. All the material was accepted. They plan to sample again in December. According to Sean I will receive a report documenting baseline sampling in early December. 1/17/12 - Obligado - Meeting with Time Warner, LBG, FLS, DEC, and the site developer. They will continue with current strategy but DEC will require additional remedial actions if not effective. 1/19/12 - Obligado - DEC, LBG, Albanese, meet on site to go over injection locations. We discussed potential remedial options for soil under footings. We also discussed installation of a well immediatley down gradient of footers in TP2 to monitor effects of residaul source on gw concentrations. According to LBG, multiple refusals were encountered in downgradient plume area. DEC recommended evaluating alternate injection approaches. 1/27/12 - Obligado - I sent a letter to Time Warner ccing all parties in meetings describing DEC requirements: 1) additional well downgradient of footer area 2)evaluate alternate remedies for residual source 3) alternate injection strategy in plume area due to refusals. 3/5/12 - Obligado - I received 4th Quarter 2011 report. The report documents baseline sampling on October 28, 2011, 1st chemical injection on November 10 and 11, 2011, fourth quarter sampling on December 27, 2011, and the 2nd chemical injection on December 28 and Jan 3 2012. The report

documents a spike in BTEX concentrations following the 1st chemical injection, which may represent release of adsorbed contaminants from the soil. They will continue monitoring. 5/8/12 - Obligado - I emailed Sean Growzkowski to inquire when I would receive 1st Quarter sampling results. He indicated 1 to 2 weeks. 7/16/12 - Obligado - I received the 1st Quarter Sampling report. MW10 was installed downgradient of the excavated area. Gross contamination was present in soil. 38000 ug/L BTEX and 53,000 ug/L MTBE found in MW10 groundwater. 42 ppm BTEX and 27 ppm MTBE was found in soil. I sent an email to LBG with a cc to FLS and Albanese requiring a remediation plan within 30 days to indicate whether they plan to continue with chemox or try alternate methods. 7/17/12 - Obligado - recieved an email from LBG Sean Groqzkowski including 2nd Quarter 2012 data which showed significant ground water improvement in MW10. BTEX reduced 98%. LBG requesting determination on need for new plan to be delayed until review of 3rd Quarter 2012 data. 7/24/12 - Obligado - sent an email deferring requirement for new plan until review of the 3rd quarter data. 12/17/12 - Obligado - received and reviewed 3rd Quarter results. BTEX concentrations rebounded to over 15,000 ug/L, including 5,400 ug/L benzene. I sent a letter to Time Warner requiring a new RAP within 60 days. 12/24/12 - Obligado - DEC receives notification letter of BCP application from Sive Paget. BCP Site No. C231080. 04/29/2013 - Spill transferred from Obligado to Perez-Maldonado. Property Owner applied to the BCP (Site #C231080) to address environmental issues at the site. Spill administrative closure pending to implementation of a remedial program to address contamination in connection with this spill. 11/15/2013 - Remedial Investigation Work Plan have been approved. Remedial investigation ongoing under the BCP program(511 West 21st Street Site, Site ID C231080). (Perez) 03/31/2015 - BCP Site (511 West 21st Street Site, Site ID C231080) Remedial Action Work Plan (RAWP) have been approved. 04/03/2016 - Field work in connection the approved RAWP ongoing. (Perez) 03/30/2017 - Construction of the on-site BCP remedy completed on October 2016 and CoC issued on December 2016. Post-remedy groundwater sampling event scheduled for the first quarter of 2017. (Perez) 10/02/2018 - The vast majority of the source of groundwater contamination (soil with contamination levels above protection groundwater soil cleanup objectives) has been removed. On- and off-site groundwater will be monitor under the Brownfield Cleanup Program project 511 West 21th Street (C231080). There are no pathways considered complete or potential exposure to any identified sensitive receptors. Based on available documents, case closed. NFA letter sent to RP. "

Remarks: "UNDER GROUND PRODUCT LINE WAS FOUND TO BE LEAKING. CONTACT PERSON WAS NOTIFIED OF THIS WITH THE RECOMMENDATION TO EXCAVATE AND REPAIR."

Tuesday. 1/3/05 - Obligado - Called Terrence Charlton. He does not know anything about spill. He will contact the Operations Manager - Britt Wenzel. Tell him the DEC requires information regarding the tank failure, if repairs were made, if soil/gw was impacted, if tanks were retested. 1/4/05 - Obligado - Received phone call from Abbas - engineer from Time Warner. Gave him my contact info with instructions to send/fax any files he had regarding this spill number. 1/19/05 - Obligado - Call Abbas Family (718-474-3400) to inquire about documents. Left message. Abbas called back, he will send the information the beginning of next week. 3/31/06 - Obligado - Review documents sent by Abbas, received by Department on 1/25/06. Documents installation of new fill box in 1999 and 2002, and passing tightness tests in 2004 and 2005. Documents do not shed any light on spill incident reported by Crompco on 12/15/00. Call Mr. Abbas and he said he will research the file for more information. He requested a spill report. I will email the spill report so he can find pertinent information. 5/5/06 - Obligado - Received additional documents. 5/11/06 - Reviewed documents. Corrosion in fill port pipe, caused leak to soil, soil excavated to 2 ft bgs. No mention of endpoint soil sampling. Send letter to Time Warner requiring soil boring investigation and collection of gw sample from below line where leak occurred. 5/16/06 - Obligado - Delivery confirmation on 5/13/06 6/6/06 - Obligado - Received Limited Subsurface Investigation Report, submitted by Fenley and Nicol Environmental. Three soil borings advanced. Refusat at SB1. Soil impacts above TAGM at SP-2@10 ft, SP-3@5 ft, and SP-3@10 ft. Greatest contamination at SP3 with 93,000 ppb MTBE and 2,242 ppb benzene. Recommends lateral and vertical extent of impact be delineated including offsite sampling. After delineation a Remedial Action Workplan will be submitted. 6/20/06 - Obligado - Phone conversation with Kristin Dillner 631-586-4900. She will email a workplan for additional delineation. Obligado - received workplan approved with minor changes. Required one soil boring to be moved closer to former remote fill area and collection of 3 ground water samples. One from previous soil boring area above, one from remote fill area, and one inbetween the dispensers. 8/7/06 - Obligado - Received Limited Subsurface Investigation Report, submitted by Fenley and Nicol Environmental. Six soil borings, 3 ground water samples collected from temporary well points. Ground water impacts detected at all 3 gw sampling points. Greatest soil and ground water impacts detected west of dispensers and southwest of UST field (TW1/SB4). GW results in ppb from TW1 show 7327 benzene, 41,697 toluene, 2783 ethylbenzene, ~23500 total xylenes, 321,467 MTBE. 8/21/06 - Obligado - Phone conversation with Kristin Dillner from F&N. Told her that permanent monitoring wells needed to be installed, the plume would need to be delineated, and a RAP submitted. I told her I would send Abbas a Stipulation agreement this week. 8/28/06 - Obligado - Sent STIP to Azzaro. Due date for signature is 9/25/06. CC to Dillner and Abbas Family. 90 days for ISR and 60 days for RAP. 8/31/06 - Obligado - Received delivery confirmation of Stip Agreement. 10/10/06 - Obligado - Signed STIP received by Department on 9/26/06. CAP has been modified and signed by RP. Called Abbas to schedule a meeting to discuss. 11/1/06 - Obligado - Had a meeting with Sal Azarro, Manfred Bohms, Abbas Family. Discussed scope of work. UST excavation will probably take place in May 2007. They can proceed with monitoring well installation in meanwhile. I will send them another CAP with modifications based on discussions. 11/22/06 - Obligado - Email from Abbas with another revised CAP. After review

**TIME WARNER CABLE (Continued)**

**U003074535**

the CAP looked acceptable. I attached it to the STIP and and emailed it as a final version back to Abbas requesting signature by 12/2/06. 11/27/06 - Obligado - Signed STIP received by Department. 12/4/06 - Obligado - Stipulation Agreement executed by Oliva 1/17/07 - Obligado - Called Manfred Bohms to discuss the status of project. He said 4 wells were installed, 2 onsite and 2 in the sidewalk. He is trying to gain access to the other sidewalk wells to sample. He will need a 2 week extension and will send an email request. 2/27/07 - Obligado - Received a letter from Abbas Family of Water Gorman engineers. The letter documents ground water results from 4 monitoring wells that were installed. Requests to collect samples from sidewalks in front of adjacent buildings. Upon the sampling and testing of the groundwater from the neighboring premises they will submit investigation report. 3/16/07 - Obligado - Abbas Family asked to get access to wells in sidewalks in front of 521 and 510 w. 21st street to do ground water sampling and gauging. Since this would help to allow a more accurate picture of ground water conditions in the area I sent a letter to Guy Roberts and to the owner of Sorage USA and asked for them to grant access to Time Warner to do the work. 4/17/07 - Obligado - Email from Greffinius from Delta stating they would grant access but asked to be copied on analytical results. 4/18/07 - Obligado - Spoke with Jessica from Gannette Fleming. She said they will be doing a tidals study on using the wells in the sidewalk and they would not be collecting samples. I forwarded this information to Greffinius. Additioanly, Jessica said I should expect a report by May 31 and UST excavation in June. 5/9/07 - Obligado - Received a phone call from Andy Rudko of AKRF, 646-388-9526, who is working for a party looking to purchase the site from Time Warner and had some questions. I didn't give him any details, but that Time Warner signed a Stipulation agreement and I am waiting for an investigation for well installations. 5/14/07 - Obligado - Spoke with Abbas Family. He said project has been delayed because the new facility where Time Warner Cable will be moving to in Brooklyn is not ready yet. He will send a letter stating the same. They surveyed all the wells to get a ground water flow map. 5/18/07 - Obligado - Received a progress reprot letter. Delays have been incurred at new Time Warner facility in Brooklyn. So Time Warner will vacate the 21st street facility by the end of August. At that time the USTS and piping will be removed. Called Abbas, asking him when I will receive a report of all the investigation activities. He said 3-4 weeks. I told him I needed the report sooner than that. He will talk to Time Warner to expedite the report. 7/19/07 - Obligado - Reviewed documents entitled Investigation Summary Report , dated February 27, 2007, Update on CAP s Milestone and Monitoring Well Survey Report , dated June 11, 2007, and Monitoring Well Survey and Tidal Study , dated June 8, 2007. The documents summarize investigation activities performed to delineate soil and ground water contamination. After review of documents sent a letter to Time Warner requiring the following by Nov 1, 2007. 1) Quarterly Ground Water Monitoring - Collection of ground water samples for laboratory analysis from monitoring wells GF-MW1 through GF-MW4 and monitoring wells R-MW-1, R-MW-3, and either R-MW2 or R-MW-9. 2) Additional Delineation - Due to the extremely high concentrations of BTEX and MTBE in ground water, the Department requires installation and sampling of 3 additional monitoring wells to delineate the areal extent of the contaminant plume. One monitoring well must be installed in the north sidewalk of 21st street approximately 45 ft west of GFMW-2 to determine the

EPA ID Number

**TIME WARNER CABLE (Continued)**

**U003074535**

down-gradient extent of plume and the extent to which the plume from Time Warner site is impacting other properties. One monitoring well must be installed north of GFMW-1 to delineate the areal extent of plume in the cross-gradient direction. One monitoring well must be installed northeast of GF-MW-4 to establish up-gradient background ground water conditions. 3) Summary of UST Removal - Documentation of the UST system and contaminated soil removal and endpoint sampling results must be submitted to the Department. 4) Remedial Action Plan - A Remedial Action Plan (RAP) should be submitted to the Department. The RAP must contain a plan to remediate residual soil and ground water contamination subsequent to source removal. The RAP must also include an Operation, Maintenance, and Monitoring Plan. If the property is to be redeveloped for a different use, the RAP must state the future intended use of the site and include a Vapor Intrusion Mitigation Plan. 7/19/07 - Obligado - Received call from Abbas Family. He received the letter and he said they would do the work. He asked if they need to do ground water remediation. I told him yes. He said the deadline might be hard to meet but he would let me know later. 10/19/07 - Obligado - PBS Violation hearing with DEC Urda and Falvey, Scott Furman (Time Warner attorney), Tradewinds Contractors, and Abbas Family. During removal of USTs Brian Falvey visited the site for a PBS Inspection and found several PBS violations. Tank removal was put on hold due to violations, however they did continue to move some contaminated soil found in area of dispenser product lines. They found 2 additional USTs, that will be properly closed. Prior to any excavation, I will visit the site to inspect. A site visit is tentatively scheduled for Thursday November 1. The 4000 gallon USTs were encased in concrete and according to the attorney the tank vault is clean, but I will inspect. They will also core through the dispenser island concrete vaults. 12/4/07 - Obligado - Met on site with Scott Furman and Paul Woodel. The gasoline USTs have been removed as well as some contaminated soil. Endpoint samples only showed one hit for MTBE on eastern sidewall. Bottom was a concrete slab, but I couldn't see it because when they previously cored through the bottom the gw infiltrated up the whole and filled the bottom of the excavation. According to Scott Furman, at no time during work did they notice any sheen or petroleum smell from the water. And the tanks were in good condition. He said they would excavate a little more on the east to try and get clean side walls, then back fill. They showed me two additional excavations in the back of the building, one for a 550 UST of unknown contents, and the other was a suspected UST location which they didn't find any USt. From the 550 USt they took sidewall samples and only found several PAHs, but it appeared to be levels similar to urban fill. After looking at the data I approved backfilling those 2 excavations. The major contamination is in the area around the dispenser and the vent lines, with elevated MTBE and BTEX, in the southwestern corner of the site and the sidewalk. Moving forward they will 1) excavate a little more on eastern sidewall of tank excavation then backfill, 2) install 2 additional wells to delineate the southwest gw plume area, 2) additional excavation to remove as much contaminated soil as site constraints allow around vents and dispensers 3) propose a plan for gw water treatment they may due treatment at time of excavation since soils and gw will be exposed. Since the new tenant plans to build a hotel in 1 years time, timely remediation is required, so we agreed that chem ox might be the best strategy for ground water. They will submit a memo summarizing our discussions. 12/17/07 - Obligado -

**TIME WARNER CABLE (Continued)**

**U003074535**

Received Memo from Woodell via email, detailing above meeting minutes. The memo proposes excavation and chemical injection with regenox. I sent an email to Paul concurring the planned course of action. 1/8/08 - Obligado - Conference call with Paul Woodel and Mark Furman. They are planning to use regenox as chemical oxidant followed by injection of advanced ORC to enhance bioremediation subsequent to chemical oxidation. They will submit a formal RAP today. 1/11/08 - Obligado - Approved RAP. Sent email with RAP approval letter. 1/15/08 - Obligado - Email from Woodel : We have begun the tasks described in the work plan. The holes in the north room have been backfilled. Today I was on site to scrape back the east wall of the gasoline UST excavation in the south room. We took it back an additional 2-3 feet and I collected another sidewall sample. This excavation is also being backfilled. We anticipate that the first test pit between the 2 former dispenser islands will be dug on Friday. 1/28/08 - Obligado - Email update from Woodel - LBG has supervised the excavation of the 2 test pits described in the workplan. Impacted soil and pockets of free-phase product were encountered in the western pit and were removed. The eastern pit contained impacted soil at the water table but there was no free product and no apparent source zone above the water table. Both pits have been extended to their practical limit (interior walls, sewer lines, column footers, etc.). We plan to backfill the level at the water table with stone on Tuesday and apply the chemical-oxidation product Tuesday and Wednesday. 5/14/08 - Obligado - Review UST Closure Report. 2 3000 gallon gasoline USTs, 1 550 gallon 2ASTs, 2 product dispensers, associated piping and 1 oil water separator were removed. Endpoint samples were collected from UST excavations. East wall of gasoline UST excavation had MTBE above TAGM. The waste oil UST excavation indicated residual SVOCs and chromium typical of urban fill throughout the city. Test pits TP1 and TP2 were excavated and 78 tons of contaminated soil was removed and disposed off-site and waste manifests were included. End point sampling from test pits show that gross contamination present at and below the water table. No evidence of the specific source of the contamination was obvious. Contamination above TAGM and limited free-phase product appears to have accumulated around the buried concrete and structural components of the buildings. Test pits were backfilled with gravel and chemical oxidation products were applied to the subsurface to promote remediation. Three treatment sumps were installed with 4 diameter slotted screen set 3 ft into water. 1120 lbs of RegenOx and 150 lbs of ORC were mixed and applied to the gravel backfill on January 31, 2008. On Feb 29, 180 lbs of RegenOx and 75 lbs of ORC were applied. 3 borings and 2 wells were installed at the site. 1st round of sampling will be completed March 10, 2008. Review 1Q08 Monitoring Report - 5 wells were gauged and sampled. Based on most recent results Max contamination at S3 (former GFMW4) with 2570 ug/L BTEX and 33,000 ug/L MTBE. According to the report, the whole building will be torn down in the summer of 2008. When this occurs LBG will supervise additional soil removal. LBG will inform the NYSDEC of future remedial activities. 9/25/08 - Obligado - review 2Q08 report. Elevated concentration still present in wells. Effectiveness of RegenOx not yet apparent. Max MTBE at 48,000 ug/L. According to report building is still scheduled to be demolished. LBG will inform the DEC of any redevelopment or additional remediation 7/7/09 - Obligado - Review 1Q09 Update Report - S3 and GFMW4 have been destroyed, so there is no monitoring wells in the source area. Downgradient well GFW-1 still has significant impacts. S3 and GFMW4

before destroyed had the max concentrations. Send a letter requiring the installation of additional monitoring wells. Require work plan submission within 30 days. 10/29/09 - Obligado - Review Investigation Work Plan, submitted 8/13/09. The workplan proposes 3 additional wells as requested, however, one of the upgradient is over 100 feet away and to far north. This well won't provide and meaningful data. SEnt letter requiring relocation of well to the east of the tanks and also revise soil sampling plan so soil sampling begins above the water table. Also requested that they revise the implementation schedule. 6/7/10 - Obligado - I reviewed the revised Investigation Work Plan. The soil sampling plan was modified and the location of the upgradient well was moved to a more appropriate location. I sent a letter via email for approval of the three wells. 8/12/2010 - Obligado - I reviewed the July 2010 Update Report. The report documented the installation of 3 additional monitoring wells and quarterly sampling. Only one soil sample, MW8, had soil impacts with 980 ug/kg MTBE. Maximum BTEX concentrations were found at MW8 with 4100 BTEX. Maximum MTBE also detected at MW8 with 3400 ug/L. the report recommends continued monitoring. I emailed Paul Woodell at LBG and requested a BTEX plume map on future reports. 10/11/11 - Obligado - I emailed Paul Woodell to inquire about the status of the monitoring. I received a phone call from Sean Groszkowski of LBG ((914) 694-5711) who is now managing the project. He said they are planning to do another chemox event using REgenOx. I asked him to send me a work plan as well as any monitoring reports since July 2010. 11/9/11 - Obligado - I reviewed a plan to do additional chemical injections at the site. They plan to do injections via geoprobe. They proposed 10 injection points using Regenox and ORC advanced. I gave approval to proceed with the additional injections. I also had a conference call with Sean Groszkowski (LBG), Scott Furman (time Warner attorney), and repsentatives of a potential purchaser, Arnie Fleming (consultant) and Karen of Kramer LEvin (attorney). We discussed the pending injections and the planned purchase and redevelopment. A purchaser plans to redevelop the property as an office building. They will use and reinforce the existing structure, as well as add several floors. The building will not have basement. They will install a vapor barrier and SSDS. The planned start for the work is 6 to 9 months. I recommended Time Warner to try and treat the soil and ground water as aggressively as possible prior to starting the development. They concurred. The injections are scheduled to begin tomorrow (11/10/11). 11/16/11 - Obligado - I spoke with Sean. The injections went well. All the material was accepted. They plan to sample again in December. According to Sean I will receive a report documenting baseline sampling in early December. 1/17/12 - Obligado - Meeting with Time Warner, LBG, FLS, DEC, and the site developer. They will continue with current strategy but DEC will require additional remedial actions if not effective. 1/19/12 - Obligado - DEC, LBG, Albanese, meet on site to go over injection locations. We discussed potential remedial options for soil under footings. We also discussed installation of a well immediatley down gradient of footers in TP2 to monitor effects of residaul source on gw concentrations. According to LBG, multiple refusals were encountered in downgradient plume area. DEC recommended evaluating alternate injection approaches. 1/27/12 - Obligado - I sent a letter to Time Warner ccing all parties in meetings describing DEC requirements: 1) additional well downgradient of footer area 2)evaluate alternate remedies for residual source 3) alternate

**U003074535**

injection strategy in plume area due to refusals. 3/5/12 - Obligado - I received 4th Quarter 2011 report. The report documents baseline sampling on October 28, 2011, 1st chemical injection on November 10 and 11, 2011, fourth quarter sampling on December 27, 2011, and the 2nd chemical injection on December 28 and Jan 3 2012. The report documents a spike in BTEX concentrations following the 1st chemical injection, which may represent release of adsorbed contaminants from the soil. They will continue monitoring. 5/8/12 - Obligado - I emailed Sean Growzkowski to inquire when I would receive 1st Quarter sampling results. He indicated 1 to 2 weeks. 7/16/12 - Obligado - I received the 1st Quarter Sampling report. MW10 was installed downgradient of the excavated area. Gross contamination was present in soil. 38000 ug/L BTEX and 53,000 ug/L MTBE found in MW10 groundwater. 42 ppm BTEX and 27 ppm MTBE was found in soil. I sent an email to LBG with a cc to FLS and Albanese requiring a remediation plan within 30 days to indicate whether they plan to continue with chemox or try alternate methods. 7/17/12 - Obligado - recieved an email from LBG Sean Groqzkowski including 2nd Quarter 2012 data which showed significant ground water improvement in MW10. BTEX reduced 98%. LBG requesting determination on need for new plan to be delayed until review of 3rd Quarter 2012 data. 7/24/12 - Obligado - sent an email deferring requirement for new plan until review of the 3rd quarter data. 12/17/12 - Obligado - received and reviewed 3rd Quarter results. BTEX concentrations rebounded to over 15,000 ug/L, including 5,400 ug/L benzene. I sent a letter to Time Warner requiring a new RAP within 60 days. 12/24/12 - Obligado - DEC receives notification letter of BCP application from Sive Paget. BCP Site No. C231080. 04/29/2013 - Spill transferred from Obligado to Perez-Maldonado. Property Owner applied to the BCP (Site #C231080) to address environmental issues at the site. Spill administrative closure pending to implementation of a remedial program to address contamination in connection with this spill. 11/15/2013 - Remedial Investigation Work Plan have been approved. Remedial investigation ongoing under the BCP program(511 West 21st Street Site, Site ID C231080). (Perez) 03/31/2015 - BCP Site (511 West 21st Street Site, Site ID C231080) Remedial Action Work Plan (RAWP) have been approved. 04/03/2016 - Field work in connection the approved RAWP ongoing. (Perez) 03/30/2017 - Construction of the on-site BCP remedy completed on October 2016 and CoC issued on December 2016. Post-remedy groundwater sampling event scheduled for the first quarter of 2017. (Perez) 10/02/2018 - The vast majority of the source of groundwater contamination (soil with contamination levels above protection groundwater soil cleanup objectives) has been removed. On- and off-site groundwater will be monitor under the Brownfield Cleanup Program project 511 West 21th Street (C231080). There are no pathways considered complete or potential exposure to any identified sensitive receptors. Based on available documents, case closed. NFA letter sent to RP. "

Site ID: 142539  
 Spill Date: 1993-02-21  
 Spill Cause: Tank Overfill  
 Spill Source: Unknown  
 Spill Class: C3  
 Cleanup Ceased: 1993-02-23  
 SWIS: 3101  
 Investigator: MCTIBBE  
 Referred To: Not reported  
 Reported to Dept: 1993-02-21  
 CID: Not reported  
 Water Affected: Not reported  
 Spill Notifier: Other  
 Last Inspection: Not reported  
 Recommended Penalty: False  
 Meets Standard: True  
 UST Involvement: False  
 Remediation Phase: 0  
 Date Entered In Computer: 1993-08-31  
 Spill Record Last Update: 1998-05-22

Program: BCP  
Site Code: 359020  
Acres: 1.020  
HW Code: C231049  
SWIS: 3101  
Town: New York City  
Record Added Date: 02/01/2006  
Record Updated Date: 12/20/2012  
Update By: JAQUINN  
Site Description: "Location: The Site is located at 555 West 34th Street, also known as 400 Eleventh Avenue, between 10th and 11th Avenues in Manhattan, New York City, New York County. Site Features: The property is identified as Block 706, Lot 1 in New York City s tax records and consists of a 37,800 square-foot (1.020 acre) rectangular-shaped vacant parcel. The surrounding urban area consists primarily of retail and commercial business. The Amtrak Railroad tunnel (and easement) runs through the northwest corner of the site. Current Zoning/uses: This site was designated as C6-3 on the NYC Zoning Map 8b which is a general central commercial district. This site is also an e-designation requiring NYCDEP approval. In January 2005, this site was rezoned as part of the City-led Hudson Yards District to allow for commercial and residential uses. The NYC MTA constructed a permanent entrance in the middle of this BCP site for the 34th Street Station of the No.7 Subway Extension. Historic Use: From 1890 to 1962, the site was used for commercial, residential, and manufacturing including a wagon house, black smith shop, electrical supplies and a warehouse. In 1973, the most recent business that covered the entire site was a 2-story commercial communications facility including numerous petroleum underground storage tanks (USTs). Six petroleum spills have occurred at this site between 1990 and 2007. Site Geology and Hydrogeology: The site is approximately 25 feet above mean sea level. Groundwater is 17 feet to 32 feet below ground surface. Surface water and groundwater flow is towards the Hudson River which is approximately 1,500 feet to the west of the site. The subsurface soil profile consists of urban fill overlying sand and silt deposits. Bedrock is located between 15 and 25 feet below grade. Between 2007 and 2012, all soil above bedrock was removed and replaced with clean fill. 12/19/12-DEC signed the Certificate of Completion for this site."  
Env Problem: " Remediation at the site is complete. Prior to remediation, the primary contaminant of concern was low level petroleum (diesel/gasoline) in soil and in shallow groundwater."  
Health Problem: "No site-related contaminants of concern were identified beyond the boundaries of the site, therefore no exposure pathways exist."  
Dump: False

DEC Memo:

"need to contact either jeff bohlen at envirotrack (631-471-1500) or Jerome Kung at verizon (212-338-6754) to determine what work is being done on the site. No letter has been sent yet. 06/21/05-SR// Spoke with jeff Bohlen(516-807-8983). He will forward all necessary documents to DEC. 10.07.05 Sharif is currently reviewing the subsurface investigation report submitted by Envirotrac. 3/20/06- DEC Piper reviewed tank closure report. As per report and database, there are two historic spills at the property, 9007995 and 9314833. In 1994, two 4K gasoline UST's were removed, and two 3K gasoline UST were installed. Samples collected from the limits of the excavation detected petroleum impacted soils in the vicinity of these USTs. Additionally, 8- 550 gal USTs are located in the basement of the property. These tanks were allegedly closed along w/ the two 4K gal USTs. SVOC's were detected exceeding NYSDEC TCLP guidance values. Spills 9007995 and 9314833 were closed on 8/6/96 after receipt of tank closure reports for the 2 4K USTs and 8- 550 USTs. In June-August 2005, seven (7) MWs were installed on site. Lab analytical revealed VOC's , SVOC's, and metals above TAGM 4046. Note: the groundwater was determined to be slightly to moderately saline. From Jan 6- 11, 2006, Envirotrac removed the two 3K gasoline USTs that

were installed in 1994 and constructed of double wall fiberglass. A total of six (6) endpoint samples were collected from the excavation. With the exception of the West sidewall in which 226 ppb of benzene was detected, no other VOC's were detected above TAGM 4046. Additional excavation was performed in the area of the two- 4K UST remote fills and the two- 3K UST remote fills. Analytical results suggest that VOC's were not present above TAGM 4046, however SVOC's were. In addition to the sampling performed in reference to the UST's, soil samples were collected at the base of the Truck Elevator Shaft where it was determined that VOC's and SVOC's were detected above TAGM 4046, due to a bad seal. To minimize any future impact, the seals were replaced and vegetable oil was used in place of pet. based hydraulic oil. As per the report, the property is currently in negotiations to be sold. This party reportedly plans on razing the building and excavating to bedrock. ~45 feet bgs. In the meantime Envirotrac recommends quarterly sampling of the MW network. Referred to K. Tang 3/21/06 - reviewed the tank closure report. Soil and GW contamination is minimal, max GW VOCs is ~200 ppb and only one side wall sample is slight above TAGM 4046. Spill closed. - KST"

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead\_DEC Field was TIPPLE 9/20/2004 Sangesland spoke to John Leddy to find out if this case could be closed out. Leddy said he was subcontracted to do the testing. He has NOT done any repairs and has NOT been hired to retest the tanks again. Sangesland called Angel (building super???) and got no answer 07/14/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Contacted to John Leddy he said he will find the data and he will send it to me. -QA 07/19/06: Contacted Mr. Jerry William of Controlled Combustion Company. He said there is not any waste Manifest record and no soil sampling. They removed older tank and they have put in a new tank. He will fax me the supporting documents to close the spill. -QA 07/20/06: Reviewed letter from Mr. Jerry William (General Operational Manager), Controlled Combustion Co. Inc. They removed the old oil tank and they installed a brand new 10,000 gallon oil tank. He mentioned in his letter that there were only very small oil stains on the floor, which were cleaned up. The letter also included a copy of the tank test failure report, and documents indicating that the old tank had been removed and replaced with a new tank. Based on the information provided by Mr. Jerry William, this spill is closed. -QA"

Remarks: "TEST METHOD WAS EZ THREE LOCATOR PLUS. TNAK IS ON LEGS, 95% VISABLE. THE DELAY IN REPORTING WAS DUE TO CONFUSSION DUE TO WHO WAS GOING TO REPORT IT."

TIBBE/SANGESLAND 12/10/2002 Sangesland reviewed a report prepared by David Winslow of ATC Associates Inc (212-353-8280). Report states that contamination was found around a buried 1000 gal tank under the floor of the building. The tank was cleaned out and excavated around. Because of foundation issues, the tank could not be removed and not all of the contaminated soil could be removed. Based on the soil conditions, Sangesland requested groundwater samples from the area. ATC took four groundwater samples in the area of this tank. GW is at approx 8 ft below the cement floor level. 3 of 4 samples are clean. One has some VOC hits just over 8020. Based on the location and the inability to excavate further, and that the surrounding water samples were clean, we can conclude that the contamination is localized and not spreading. Spill closed "

Remarks: "CALLER STATES UPON REMOVAL OF THE UNDERGROUND TANK - FOUND HOLES IN THE TANK AND CONTAMINATED SOIL"

DOING PHASE I FOR THE PROPERTY OWNER. 06/16/06: This spill is transferred from Mike Mulqueen to Mr. Koon Tang. 3/10/2010 Sangesland received a letter from Anthony Lara from Riteway Tank (718-855-7272) He said he remembers this tank and what happened at the site. His letter (attached in eDocs) says the tank initially failed the tank test because the manhole gasket was damaged. Replacement of the gasket resulted in a passing tank test. No contamination was found. 2 years later (1997) this tank was removed and replaced with a new tank. No contamination was found during this period either. Spill closed."

Site Description: "Location: The site is located at 27-35 West 24th Street in the Borough of New York, New York. It is located on the northern side of West 24th Street. The site is designated as Block 826, Lot 19. Site Features: The site is a rectangular shaped parcel of land measuring approximately 9,000 square feet and is improved with an one 11-story building with a basement. Current Zoning and Land Use: The building on site is used for office space and a restaurant/bar on the first floor and part of the basement. The site is zoned M1-6, which allows industrial and manufacturing. The current use of the site complies with the zoning code. Past Use of the Site: A dry cleaning facility formerly occupied the restaurant/bar space until approximately 1990. The former dry cleaning operations are believed to have contributed to the known contamination found in groundwater and soil vapor on the site. Site Geology and Hydrogeology: The subsurface lithology was homogenous throughout the site. The subsurface soil was noted to consist of urban fill material and brown coarse grain sand. Based upon boring logs from various site investigations, groundwater is encountered 8-10 feet beneath the basement slab except along the western property boundary where the water table is shallower, resulting in the need to actively pump out water entering the service elevator pit. "

Env Problem: "Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs) such as tetrachloroethene (PCE), trichloroethene (TCE), and

Health Problem: cis-1,2-dichloroethene (DCE) which were detected in soil, groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan. "Direct contact with contaminants in the soil or groundwater is unlikely because the site is entirely covered with a building. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system was installed beneath the on-site building to prevent vapors beneath the slab from entering the building. Sampling at an adjacent structure indicates soil vapor intrusion is not a concern. Access to the other adjacent building was denied and soil vapor intrusion may be a potential exposure pathway at that structure. "

subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system was installed beneath the on-site building to prevent vapors beneath the slab from entering the building. Sampling at an adjacent structure indicates soil vapor intrusion is not a concern. Access to the other adjacent building was denied and soil vapor intrusion may be a potential exposure pathway at that structure. "

Date Record Added: 06/26/2015  
Date Rec Updated: 01/25/2018  
Updated By: LSZINOMA  
Site Description: "Location: The site is located at 27-35 West 24th Street in the Borough of New York, New York. It is located on the northern side of West 24th Street. The site is designated as Block 826, Lot 19. Site Features: The site is a rectangular shaped parcel of land measuring approximately 9,000 square feet and is improved with an one 11-story building with a basement. Current Zoning and Land Use: The building on site is used for office space and a restaurant/bar on the first floor and part of the basement. The site is zoned M1-6, which allows industrial and manufacturing. The current use of the site complies with the zoning code. Past Use of the Site: A dry cleaning facility formerly occupied the restaurant/bar space until approximately 1990. The former dry cleaning operations are believed to have contributed to the known contamination found in groundwater and soil vapor on the site. Site Geology and Hydrogeology: The subsurface lithology was homogenous throughout the site. The subsurface soil was noted to consist of urban fill material and brown coarse grain sand. Based upon boring logs from various site investigations, groundwater is encountered 8-10 feet beneath the basement slab except along the western property boundary where the water table is shallower, resulting in the need to actively pump out water entering the service elevator pit. "

Env Problem: "Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs) such as tetrachloroethene (PCE), trichloroethene (TCE), and cis-1,2-dichloroethene (DCE) which were detected in soil, groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan."

Health Problem: "Direct contact with contaminants in the soil or groundwater is unlikely because the site is entirely covered with a building. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system was installed beneath the on-site building to prevent vapors beneath the slab from entering the building. Sampling at an adjacent structure indicates soil vapor intrusion is not a concern. Access to the other adjacent building was denied and soil vapor intrusion may be a potential exposure pathway at that structure. "

**FORMER GUARDIAN CLEANERS (Continued)**

**S113916768**

Site Description: "Location: The site is located at 27-35 West 24th Street in the Borough of New York, New York. It is located on the northern side of West 24th Street. The site is designated as Block 826, Lot 19. Site Features: The site is a rectangular shaped parcel of land measuring approximately 9,000 square feet and is improved with an one 11-story building with a basement. Current Zoning and Land Use: The building on site is used for office space and a restaurant/bar on the first floor and part of the basement. The site is zoned M1-6, which allows industrial and manufacturing. The current use of the site complies with the zoning code. Past Use of the Site: A dry cleaning facility formerly occupied the restaurant/bar space until approximately 1990. The former dry cleaning operations are believed to have contributed to the known contamination found in groundwater and soil vapor on the site. Site Geology and Hydrogeology: The subsurface lithology was homogenous throughout the site. The subsurface soil was noted to consist of urban fill material and brown coarse grain sand. Based upon boring logs from various site investigations, groundwater is encountered 8-10 feet beneath the basement slab except along the western property boundary where the water table is shallower, resulting in the need to actively pump out water entering the service elevator pit. "

Env Problem: "Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs) such as tetrachloroethene (PCE), trichloroethene (TCE), and cis-1,2-dichloroethene (DCE) which were detected in soil, groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan."

Health Problem: "Direct contact with contaminants in the soil or groundwater is unlikely because the site is entirely covered with a building. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system was installed beneath the on-site building to prevent vapors beneath the slab from entering the building. Sampling at an adjacent structure indicates soil vapor intrusion is not a concern. Access to the other adjacent building was denied and soil vapor intrusion may be a potential exposure pathway at that structure. "

Site Description: "This site is a portion of site 231005 and previously referred to as V00530. Location: The site is the northwestern part of a larger, historic manufactured gas plant (MGP) operation which once encompassed portions of five city blocks along the western side of Manhattan, New York City. Remediation has already been accomplished at several other portions of the larger site. The descriptions of the other sections can be found under the listings for the sites noted above. This site is bounded by the West Side Highway (NY Route 9A) on the west, and West 18th and 19th Streets to the south and north, respectively. To the east, the rest of the block is made up mixed use commercial properties. Site Features: The site is almost flat, with a slight slope to the west, toward the Hudson River. Most recently, the site housed the Bayview Prison facility for women, which was closed following major flood damage from Tropical Storm Sandy in 2013. The entire site is covered with buildings or pavement. Current Zoning and Land Use: The former prison building and a building annex remain vacant on the site. Current site zoning is C6-3, for commercial purposes. The site is included in the Special West Chelsea District, a 14-square block area established in 2005 to allow mixed commercial and residential development, and to promote development around the adjacent High Line city park. Adjacent properties to the east are being redeveloped for residential and commercial uses. Past Use of the Site: The West 18th Street Gas Works began operations in 1834 and continued to expand through most of the 1800s, but was closed in the early 1900s. Manufactured gas was produced by heating coal in a closed vessel, collecting and purifying it, and then delivering it through underground networks of pipes into the surrounding area. The gas was used in homes and businesses for heating, lighting, and cooking in much the same way that natural gas is used today. Operable Unit 5 contained two gas holders during the period when the MGP was active. The gas manufacturing process produced a black, oily liquid waste known as coal tar. This tar escaped from underground storage tanks and pipes into surrounding subsurface soils. The tar is resistant to decay and is commonly found in soils at former MGP sites decades after operations ceased. Most of the tar contamination found at the West 18th Street MGP was found on neighboring properties, which have already been remediated or are in the process of being remediated. Relatively minor impacts have been detected on Operable Unit 5. Following closure of the MGP, the gas manufacturing facility was torn down and the site was subdivided and sold to a number of different owners. Subsurface structures such as building foundations and subsurface piping, however, were often not removed and remain in place today. A variety of commercial and industrial operations developed throughout the former MGP site in the middle and late 1900s. Based on investigation work conducted to date, it appears that gas holder foundations still exist beneath the site. Site Geology and

Hydrogeology: Between 50 and 80 feet of unconsolidated materials overlie Cambrian Hartland Formation bedrock. The unconsolidated units are divided in to three distinct stratigraphic units. From the surface down, the units consist of a fill unit (highly heterogeneous, generally highly permeable) a silty-clay unit (a low-permeability aquitard consisting of tidal marsh deposits), and a sand unit (highly permeable stratified alluvial sands). "

Env Problem: "Nature and Extent of Contamination: Sampling at the site was limited due to the presence of buildings that did not permit extensive sampling. Based on the limited sampling to date, which included analysis for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and metals, no significant contamination has been detected on this operable unit. There is a possibility that some source material may be present within the holder structure under the former prison building, however, there is no evidence that source material is migrating from the operable unit. The soil samples collected on this site contained SVOCs and metal contamination; the highest concentration of total SVOCs is 610 parts per million (ppm). Concentrations of mercury exceed the restricted residential SCOs, with a maximum concentration of 1.9 ppm. Groundwater collected north of this operable unit met ambient water quality standards, and the groundwater south of the adjacent operable unit (south of the site) contained minor contamination of SVOCs, with only naphthalene exceeding its groundwater standards at a concentration of 11 parts per billion. Soil vapor and indoor air sampling have not indicated the potential for soil vapor exposure. "

Health Problem: "As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns."

MAP FINDINGS

**LIRR WEST SIDE YARD (Continued)**

**S113916804**

Env Problem: "Nature and Extent of Contamination: Prior to Completion of Remediation Based upon investigations conducted to date, the primary contaminant of concern is coal tar. Soil- The most significant visual evidence of contamination, including staining, hydrocarbon and naphthalene-like odors and elevated PID readings, was observed within the fill deposits in soil borings SB-05 through SB-08, between 15 and 40 feet below grade, and starting at least 10 to 20 feet below the water table. Seventeen of the 20 subsurface soil samples exhibited detectable concentrations of PAHs, with total PAH concentrations ranging from 0.3 ppm in SB-03 (20.5 - 22.5 feet) to a maximum of 1,818 ppm in SB-05 (25 - 27 feet), adjacent to the West Side Yard along the east side of 12th Avenue in the vicinity of the historic observed area of contamination. This sample had visual evidence of contamination, which also exhibited the highest BTEX concentration, but were below the Industrial Use SCOs. Soil samples from SB-06 (21 - 23 feet) and SB-08 (30 - 33 feet) were sent for forensic fingerprint analysis. The analysis suggests that the sample contained pyrogenic material derived from coal and not petroleum, and the PAH distribution was very similar to tars formed from MGPs utilizing carbureted water gas processes. Groundwater- NAPL was not identified in any of the groundwater monitoring wells. However, six of the 17 groundwater samples identified BTEX and PAH compounds at concentrations above Class GA standards. These samples were collected at or in the vicinity of soil borings which exhibited soil contamination and were screened at a depth intercepting the zone of soil contamination observed at 15 to 40 feet below grade. Off-site wells demonstrate that this contamination is not migrated farther off-site. Soil Vapor and Indoor Air- Soil vapor and indoor air have not been evaluated."

Health Problem: "As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns."

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

|                                         |                                        |

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/29/2021

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

|                                         |                                        |

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

|                                         |                                         |

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

|                                         |                                         |

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

|                                         |                                         |

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

|                                         |                                         |

Data Release Frequency: Annually

### **NJ SHWS: Known Contaminated Sites in New Jersey**

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

## NY LTANKS: Spills Information Database

Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

|                                         |                                                  |

## ***State and tribal institutional control / engineering control registries***

### NY RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

## ***State and tribal voluntary cleanup sites***

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## NY VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

## NY ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

## ADDITIONAL ENVIRONMENTAL RECORDS

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

## NY PFAS: PFAS Contamination Site Location Listing

DEC surveyed select businesses, fire departments, fire training centers, bulk storage facilities, airports, and Department of Defense (DoD) facilities. The responses to the survey have helped to determine if these entities used or stored materials containing PFOA/PFOS including AFFF and dispersants used in Teflon coating operations. The results of this survey will be updated periodically as additional responses are received..

### NJ LIENS: Environmental LIENS

A listing of properties with environmental liens. The listing includes sites from the Site Remediation & Waste Management Program Sites where the Department has placed either a 1st Priority or Regular Spill Fund Lien against. 1st Priority Type Lien - a lien placed against the property where the discharge occurred providing that the owners of the property have some responsibility towards the discharge. First Priority Lien is superior to other types of liens. Non-Priority (Regular) Type Lien - a lien placed against the Responsible Party & their revenues and all real and personal property, other than the real property comprising the location of the discharge.

Date of Government Version: 05/12/2021  
Date Data Arrived at EDR: 05/18/2021

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## NY HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

## **Other Ascertainable Records**

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

## SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## NY E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

## NY HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

## NY SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

Data Release Frequency: Varies

## NYC LEAD 2: Recent Lead Paint Violations

Pursuant to New York City's Housing Maintenance Code, the Department of Housing Preservation and Development (HPD) issues violations against conditions in rental dwelling units that have been verified to violate the New York City Housing Maintenance Code (HMC) or the New York State Multiple Dwelling Law (MDL). Violations are issued when an inspection verifies that a violation of the HMC or MDL exists. It is closed when the violation is corrected, as observed/verified by HPD or as certified by the landlord.

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A

Data Release Frequency: No Update Planned

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

| Site Name:                  | MANHATTAN GENERAL MAIL FACILITY                                                                                                                                                                                                                       |
| Site EPA ID Number:         | NY6180000352                                                                                                                                                                                                                                          |
| Groundwater Flow Direction: | NOT AVAILABLE.                                                                                                                                                                                                                                        |
| Inferred Depth to Water:    | not available. Saturated layers impacted by salt water intrusion are present in the overburden. It is generally inferred that the depth to the uppermost 'aquifer' is greater than 70 feet at the surface of the bedrock/sediment interface.          |
| Hydraulic Connection:       | Detailed hydraulic connection information is not available. Glacial till and outwash deposit sediments overlie the Manhattan Schist, the uppermost bedrock unit at the site. The surface elevation of bedrock decreases to the southwest of the site. |
| Sole Source Aquifer:        | No information about a sole source aquifer is available                                                                                                                                                                                               |
| Data Quality:               | Information is inferred in the CERCLIS investigation report(s)                                                                                                                                                                                        |

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION</u><br><u>FROM TP</u> | <u>GENERAL DIRECTION</u><br><u>GROUNDWATER FLOW</u> |
|---------------|-----------------------------------|-----------------------------------------------------|
| Not Reported  |                                   |                                                     |

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### ROCK STRATIGRAPHIC UNIT

Era: Paleozoic  
System: Ordovician  
Series: Lower Ordovician and Cambrian carbonate rocks  
Code: OC (*decoded above as Era, System & Series*)

#### GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

## OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinator soil types may appear within the general area of target property.

Soil Surface Textures: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Surficial Soil Types: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock  
very gravelly - loamy sand  
stratified  
sandy loam

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### New York Public Water Wells

Source: New York Department of Health

Telephone: 518-458-6731

## OTHER STATE DATABASE INFORMATION

#### Oil and Gas Well Database

Source: Department of Environmental Conservation

Telephone: 518-402-8072

These files contain records, in the database, of wells that have been drilled.

### RADON

#### State Database: NY Radon

Source: Department of Health

Telephone: 518-402-7556

Radon Test Results

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

Phase I Environmental Site Assessment Report  
Proposed Substation: West 28<sup>th</sup> Street/8<sup>th</sup> Avenue Line

**Appendix C**  
**User Questionnaire**

**ASTM E1527-13**  
**X3. USER QUESTIONNAIRE**

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “*Brownfields Amendments*”), the *user* must provide the following information (if available) to the *environmental professional* completing the Phase I. Failure to provide this information could result in a determination that “*all appropriate inquiry*” is not complete.

**Site Name and Location: West 28<sup>th</sup> Street/8<sup>th</sup> Avenue Line, Portion of Roadbed and Sidewalks between Blocks 751 and 752, New York, NY**

**(1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).**

Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law? *No, I am not aware of any environmental cleanup liens regarding this property.*

**(2) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).**

Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? *No, I am not aware of any AULs regarding this property.*

**(3) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).**

As the *user* of the *ESA* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business? *I have no specialized knowledge associated with this property regarding environmental matters.*

**(4) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).**

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*? *I have no knowledge of any contamination at the Site at this time that has impacted purchase price of the property. Note that the property is not being purchased by NYCT.*

**(5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).**

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*,

- (a) Do you know the past uses of the *property*? *No*
- (b) Do you know the specific chemicals that are present or once were present at the *property*? *No*
- (c) Do you know of spills or other chemical releases that have taken place at the *property*? *No*
- (d) Do you know of any environmental cleanups that have taken place at the *property*? *No*

**(6) The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).**

As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence of likely presence of contamination at the *property*? *I have no knowledge of obvious sources of contamination.*

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by STV Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

BOARD OF ESTIMATE  
CITY OF NEW YORK

261

E. KARR

(Cal. No. 724)

Whereas, There has been presented to the Board of Estimate a deed dated May 14, 1962, executed by Mutual Redevelopment Houses, Inc., purporting to convey to The City of New York land within the lines of West 24th Street, West 25th Street, West 26th Street, West 28th Street and West 29th Street, Borough of Manhattan;

Whereas, The deed is tendered pursuant to the terms of an agreement dated as of March 25, 1959 between The City of New York and I.L.G.W.U. Houses Inc., (now Mutual Redevelopment Houses, Inc.), approved by the Board of Estimate on March 25, 1959 (Cal. No. 26);

Whereas, The Corporation Counsel under date of July 19, 1962, has approved the aforesaid deed as to form;

Resolved, That the Board of Estimate, pursuant to the provisions of Section B15-4.0 of the Administrative Code, hereby accepts the aforesaid deed without any exemptions from assessments against any remaining property of the grantors;

Resolved, By the Board of Estimate that the Corporation Counsel is hereby authorized to transmit the aforesaid deed executed by Mutual Redevelopment Houses, Inc., for recording in the office designated therefor, provided there are no unpaid taxes, assessments or other charges against the premises described in the deed to the date of acceptance of the deed and provided that title to the premises described in the deed free and clear of all encumbrances, is still in the grantor at the time of the recording of the deed.

A true copy of resolution adopted by the Board of Estimate on **JULY 26, 1962.**

Ruth A. Whaley

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by STV Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

**Certified Sanborn Results:**

Phase I Environmental Site Assessment Report  
Proposed Substation: West 28<sup>th</sup> Street/8<sup>th</sup> Avenue Line

**Appendix G**  
**Qualifications for Environmental Professionals**

# Daniel Brockerhoff

## Environmental Scientist

*An Environmental Professional for nearly 5 years, Mr. Brockerhoff has a portfolio of successful environmental projects specializing in environmental due diligence and remediation services. Mr. Brockerhoff is technically proficient in various field activities related to remediation services and has experience on nearly 50 sites. He has experience with report writing and project closeout.*

*Mr. Brockerhoff's technical expertise includes the following:*

- *Soil, Groundwater, and Soil Vapor Investigations and Remediation*
- *Surface Water Sampling*
- *Report Preparation*
- *Environmental Site Assessments*
- *Remedial Activity Oversight and Management*
- *Data Management*

### Project Experience

#### **Co-op Apartment, East 10<sup>th</sup> Street, New York, NY**

Mr. Brockerhoff served as Environmental Scientist and managed the field effort for remediation of impacted groundwater due to a fuel oil release in a high-rise residential apartment building. Remediation activities included groundwater sampling utilizing low-flow techniques, measuring and purging light non-aqueous phase liquid (LNAPL) from monitoring wells, installing absorbent socks in LNAPL-impacted monitoring wells, and installing oxygen releasing compound (ORC) socks in monitoring wells. Mr. Brockerhoff contributed to the preparation of the spill closure report for submission to the NYSDEC by preparing the report text and supporting documentation (i.e., figures and analytical data tables).

#### **Cape May County - Cape May County Airport, NJ**

Mr. Brockerhoff served as a Project Geologist on the Cape May Airport project, which consisted of performance of subsurface investigations and remediation involving multiple areas of concern (AOCs). Mr. Brockerhoff's responsibilities included soil characterization and sampling during advancement of soil borings; installation of temporary wells and permanent monitoring well; and, source removal consisting of excavation to the LNAPL-impacted water table. Mr. Brockerhoff's responsibilities also included collection of groundwater samples by low-flow and three well volume methods as well as grab and composite soil sampling. Mr. Brockerhoff prepared portions of the associated Remedial Investigation Report (RIR), performed analytical data tabulation, and interpretation of historical and current data for purposes of generating conclusions and recommendations. Mr. Brockerhoff also prepared an Asbestos Survey Report for the Cape May County in support of a future building demolition.

### **Education**

B.S., Geology; New Jersey City University (2016)

### **Training**

OSHA 40-Hour

HAZWOPER Training

OSHA 10-Hour Construction Training

OSHA 8-Hour HAZWOPER Refresher Training

Transportation Worker Identification Card (TWIC)

**Undisclosed Client - Clark, New Jersey**

Mr. Brockerhoff served as Project Geologist at an undisclosed industrial facility. Mr. Brockerhoff's responsibilities included oversight of the injection of the remediation amendment to facilitate anaerobic degradation of chlorinated volatile organic compounds. Mr. Brockerhoff also performed pre- and post-injection groundwater sampling utilizing low-flow, three well volume, and passive diffusive bag sampling methodologies.

**BROS Superfund Site, Gloucester County, NJ**

Mr. Brockerhoff served as a Project Geologist on the BROS Superfund Site. The BROS Superfund Site is impacted by both dense non-aqueous phase liquid (DNAPL) and LNAPL. Mr. Brockerhoff's responsibilities included collection of groundwater samples in support of routine and performance groundwater monitoring at the Site. Mr. Brockerhoff also performed surface water sampling.

**Undisclosed Client, Great Neck, NY**

Mr. Brockerhoff served as Project Geologist on the undisclosed project in Great Neck, NY. Mr. Brockerhoff's responsibilities included oversight of monitoring well installation and performance of routine groundwater, indoor air, soil vapor, and sub-slab vapor sampling. Also, Mr. Brockerhoff performed groundwater sampling for analysis for per- and poly-fluoroalkyl substances (PFAS) in accordance with PFAS sampling techniques.

**Industrial Site, Brooklyn, New York**

Mr. Brockerhoff served as Environmental Scientist for a Phase I Environmental Site Assessment (ESA) of a former industrial facility in Brooklyn, NY. Mr. Brockerhoff's responsibilities included performance of Site reconnaissance and preparation of the Phase I ESA report in accordance with the ASTM International (ASTM) E 1527-13 standard. Mr. Brockerhoff also prepared the associated Phase I ESI figures in GIS.

# Matthew Mankovich

## Senior Environmental Project Manager

*Mr. Mankovich is a senior environmental project manager with more than 20 years of experience managing and executing a wide range of environmental projects specializing in due diligence services for large and small public and private clients. Matt is technically proficient in environmental site assessments and investigations, quality assurance/quality control, project management, scoping, budgeting, and project closeout. Entrepreneurial leader and analytical problem-solver who can add value by fostering internal and external stakeholders. He has performed, reviewed, and/or managed staff in connection with over five hundred site assessments/ investigations in accordance with current ASTM International, New York State Department of Environmental Conservation (NYSDEC), New York City Office of Environmental Remediation (NYCOER), New York City Department of Environmental Protection (NYCDEP), and client-specific standards.*

*His technical expertise includes the management and comprehensive reviews of Phase I Environmental Site Assessments (ESAs), Phase II Environmental Site Investigation (ESIs), Phase II ESI Work Plans and Cost Estimates, Soil Vapor Intrusion (SVI) Investigations, Indoor Air Quality (IAQ) Investigations, Underground Storage Tank (UST)/Aboveground Storage Tank (AST) Investigations, NYSDEC spill investigations, Remedial Investigations and Work Plans, and other client-specific assessments and investigations.*

*A summary of Mr. Mankovich's employment history is presented below.*

- *Inspector/Technician, ACA Engineering, Inc.  
(October 1999 – March 2002)*
- *Environmental Scientist, GC Environmental, Inc.  
(March 2002 – May 2004)*
- *Senior Environmental Scientist/Project Manager, The Louis Berger Group  
(May 2004 – January 2007)*
- *Senior Project Manager, ATC Group Services LLC  
(January 2007 – July 2013)*
- *Senior Project Manager, TRC Engineers, Inc.  
(July 2013 – June 2017)*
- *Environmental Project Manager, STV Inc.  
(February 2018 - present)*

### Project Experience

#### **NYCSCA Hazardous Materials Consulting Services Contract – Lead Environmental Scientist**

#### **Office Location**

New York, NY

#### **Date joined firm**

2/5/18

#### **Years with other firms**

18

#### **Education**

Bachelor of Science, Natural Sciences; University of Pittsburgh at Johnstown (1999)

#### **Certifications**

Secure Worker Access Consortium

Brownfield Industry Professional, Gold Level; New York City Mayor's Office of Environmental Remediation (OER) (2016)

#### **Training**

OSHA 10-Hour Construction Safety and Health (2018)

OSHA 40-Hour HAZWOPER (2002)

OSHA 8-Hour HAZWOPER Refresher (2019)

MTA NYC Transit Track Safety Certification (ex. 08/21)

Mr. Mankovich has provided environmental consulting services to the NYCSCA's IEH Division since 2004. In that time, he has managed and provided technical assistance for a wide range of assignments including: due diligence (Phase I ESAs/Phase II ESIs/IAQs/SVIs); UST/AST Investigations; preparation of scopes of work and cost estimates for investigations, remedial actions, and design implementation; environmental construction phase services (contractor submittal reviews/tank closure reports); emergency responses related to odors and petroleum releases; product evaluations; and provided technical review of Disinfection and Water Quality Testing Plans (DWQTPs) prepared by contractors. Mr. Mankovich is well-versed in federal, state, and local regulations pertaining to the assignments on this contract. At a prior consulting firm, Mr. Mankovich served in a senior role on an on-call Hazardous Materials Services Contract with responsibilities inclusive of project management, client consultation and coordination; project scoping and schedule forecasting, budget review and management; project staffing and supervision; subcontractor and contractor coordination; and invoicing and payment monitoring. Technical experience included site assessments and investigations, subsurface investigations, work plans and cost estimates, SVI Investigations, IAQ Investigations, remedial investigations, and other client-related assessments and investigations. Additionally, he served as Project Manager on a NYCSCA on-call Asbestos, Lead, Mold & PCB Environmental Services Contract related to Polychlorinated Biphenyl (PCB) surface soil investigations and remediation for public schools. From March 2016 to June 2017, on assignment as Contingent Staff at the NYCSCA IEH Division in Long Island City, Queens, Mr. Mankovich provided in-house technical assistance and support services for due diligence efforts related to property acquisitions, new leases, and lease renewals for new and existing public schools. Mr. Mankovich also served as a project manager for an on-call Hazardous Materials Services Contract at another prior consulting firm and was responsible for the management and completion of Phase I ESAs, Phase II ESIs, IAQ Investigations, UST Investigations, emergency response, and spill investigations. Since beginning at STV in February 2018, Mr. Mankovich has served in a senior role providing comprehensive technical reviews of Phase I ESAs, Phase II ESIs, IAQs, and contractor submittals as well as performing site inspections for potential lease spaces in Queens to support the 3-K lease properties program. More recently, his role includes performing technical reviews of all due diligence work products that are produced by STV as well as construction phase services submittals and water disinfection projects. Mr. Mankovich's experience and long-standing relationships with NYCSCA staff form his understanding and approach to solving NYCSCA's problems as if they were STV's, and his technical review experience coupled with his business acumen and guidance to junior level staff ensure that the service provided by STV is delivered consistently and at the highest quality. (5/04 – 1/07, 7/13 – 6/17 and 2/18 – Present)

### **NYCT On-Call Environmental Services Contract – Environmental Project Manager**

Mr. Mankovich serves as Environmental Project Manager on a New York City Transit (NYCT) on-call environmental services contract. The scope of services includes Phase I ESAs; Phase II ESIs; Environmental Due Diligence

Assessments (EDDAs); Geotechnical Investigations; Environmental Impact Statement (EISs)/National Environmental Policy Act (NEPA) Evaluations/Categorical Exclusions; soil characterization investigations, test pit surveys; environmental testing; monitoring; lead-based paint and asbestos testing and abatement; hazardous waste disposal; field surveys; remediation oversight; development of a petroleum bulk storage (PBS) tank procedures manual; air and wetland permits; traffic analyses; and mitigation planning. He manages task order assignments and environmental scope services including client interfacing and coordination; project scoping, budget review and management; project staffing and supervision; subcontractor supervision; and client billing/invoicing and payment monitoring. Technical experience includes management and execution of investigations/assessments and senior review of Phase I ESAs, Phase II ESIs, Investigation Work Plans and Cost Estimates, Soil Management Specifications, and other related environmental assessments and investigations. He also conducts and prepares Hazardous Materials assessments for EISs/ NEPA Evaluations/Categorical Exclusions. (2/18 – Present)

**NYCT Elevator & Escalator Training Facility Expansion at P.S. 248 – Environmental Project Manager**

NYCT proposes to construct a new self-standing 4-story training facility located adjacent to the existing training facility at P.S. 248 in Brooklyn. Mr. Mankovich managed the completion of a Phase I ESA and Phase II ESI and provided technical input for the hazardous materials chapter of the EDDA. Based on results of the Phase I ESA, including the potential for generation of subsurface methane due to historic landfilling of organic rich deposits (peat), a Phase II ESI was recommended. The Phase II ESI included preparation of an investigation work plan. The scope of work included advancement of soil borings and installation of a temporary groundwater monitoring well and soil vapor probes to facilitate the collection of soil, groundwater, and soil vapor samples for laboratory analysis. Mr. Mankovich managed the Phase II ESI field activities and data analysis and preparation of the Phase II ESI Report including senior review and preparation of conclusions and recommendations. Testing, conducted as part of the Phase II ESA, confirmed the presence of methane in soil vapor at concentrations warranting mitigation. Mr. Mankovich was the primary author of a white paper that summarized the methane mitigation measures recommended for inclusion into the design of the new building. Methane mitigation measures include the installation of an active sub-slab depressurization system (SSDS) and gas vapor barrier (GVB). Mr. Mankovich is part of the STV team providing ongoing support and consultation services for the methane mitigation system. (2/20 – 8/20)

**NYCT York College Site 9 / Jamaica Bus Depot Reconstruction – Environmental Project Manager**

This project was a supporting task to the Jamaica Bus Depot EIS and included completion of a Phase I ESA and Phase II ESI on a 5.6-acre parcel of land that NYCT is considering leasing for temporary bus parking associated with the reconstruction and expansion of the Jamaica Bus Depot in Queens. Mr. Mankovich's responsibilities included client consultation and coordination,

preparation and administration of project progress presentations, preparation of a Phase I ESA which included conclusions and recommendations for the performance of a Phased II ESA. The Phase II ESI included preparation of a waste management plan and investigation work plan. The scope of work included advancement of soil borings, excavation of test pits, and installation of temporary groundwater monitoring wells and soil vapor probes to facilitate collection of soil, groundwater, and soil vapor samples. Mr. Mankovich managed the Phase II ESA field activities and data analysis and preparation of the Phase II ESA Report including conclusions and recommendations. (2/18 – 11/18)

**NYCT Penn Station Access Project / Phase I Environmental Site Assessments, Bronx and Queens – Environmental Project Manager**

To support the Penn Station Access (PSA) project and the real estate elements of the 15-mile long project corridor in the existing Amtrak right-of-way, STV was selected by NYCT to conduct Phase I ESAs at 28 properties identified for easements or acquisitions in Bronx and Queens. Among the properties were railroad yards and rights-of-way, industrial facilities, commercial retail properties, an institutional building campus, automobile repair facilities, NYC park properties, and vacant properties overgrown with vegetation. Mr. Mankovich managed this Phase I ESA program including client and subcontractor coordination, biweekly project status meetings, staffing and scheduling, and quality control and final and comprehensive technical reviews of each Phase I ESA. Although STV was challenged by Site access constraints, limited knowledgeable persons for interview, and the immense volume and schedule of the project, within the targeted timeframe of 16 weeks STV completed all elements of the Phase I ESAs—which included performance of site reconnaissance at 28 properties, regulatory agency and historical records review, physical setting sources review, and preparation of 23 Phase I ESA reports—and comments to draft reports by both NYCT's technical and legal departments were minimal. Mr. Mankovich was responsible for the exceptional technical performance of STV, which is a result of his programmatic vision and day-to-day hands-on involvement, and resulted in STV being selected to perform an additional 17 Phase I ESAs for the Penn Station Access Project on an expedited 12-week project schedule. Mr. Mankovich is managing the Phase I ESA program and providing quality control final and comprehensive technical reviews of each Phase I ESA and is responsible for the technical performance of STV. (12/20 – Present)

**Empire State Development (ESD) Brooklyn Development Center, Brooklyn, NY – Environmental Project Manager**

Mr. Mankovich provides technical review of hazardous materials analyses, including methodologies and findings, on behalf of Empire State Development (ESD) as part of a Vital Brooklyn initiative to redevelop the 27-acre former Brooklyn Development Center campus in the East New York neighborhood of Brooklyn, NY, into more than 2,600 units of affordable housing, as well as retail and public amenities. Mr. Mankovich evaluated the Phase I ESA, Phase II ESI Work Plan, and Phase II ESI, and led ESD coordination efforts with the NYS Homes and Community Renewal and the Conditionally Designated

Developer for the proposed project, who was responsible for conducting all hazardous materials studies, plans, and related documentation. He also supporting Environmental Impact Statement (EIS) efforts and assisted ESD in development of the General Project Plan and Restrictive Declaration to codify developer commitments related to hazardous materials. (12/19 – Present)

**New York City Housing Authority (NYCHA) On-Call Environmental Services Contract / Frederick Samuels Apartments Phase I Environmental Site Assessment for the Permanent Affordability Commitment Together (PACT) Program – Task Manager - Investigations and Assessments**

STV was selected to perform a Phase I ESA for NYCHA’s Edenwald development, which is a project in Round 9 of NYCHA’s PACT program, is located in the Edenwald neighborhood of the Bronx and consists of 4,783 residents, 2,009 households, 2,039 apartments, and 42 buildings. The spaces and uses that make up the Edenwald development comprise of 518,811,300 square feet (sf) of residential space, 1,869,036 sf of open space, 19,008 sf of community space; and, 185,308 sf of parking space. Mr. Mankovich managed the Phase I ESA including client consultation and staffing and provided quality control and final comprehensive technical review which included conclusions and recommendations for performance of a Phase II ESI and comprehensive hazardous materials surveys for asbestos containing material (ACM), lead-based paint (LBP), and polychlorinated biphenyl (PCB)-containing building materials and radon testing. Mr. Mankovich is providing on-going technical input regarding the scope of the investigation to be developed in consultation with the NYCHA project team. (6/21 – Present)

**PANYNJ Newark Liberty International Airport Terminal One Redevelopment Design-Build – Environmental Project Manager**

Providing environmental services for the \$1.4 billion design-build of the new Terminal One at Newark Liberty International Airport in Newark, NJ. The Port Authority of New York and New Jersey (PANYNJ) project encompasses phased demolition of the existing Terminal A building and associated infrastructure and construction of a new 1 million-sf, 33-gate common-use terminal; a new pedestrian bridge; new terminal parking garage and toll plaza facility; and airside and landside redevelopment. Mr. Mankovich assists with the development and implementation of an Environmental Management Plan, including project-specific environmental permitting. His responsibilities include review of prior environmental investigation reports, waste characterization and disposal facility approval plans, development of soil and concrete management plans, a soil gas investigation work plan and reporting, and preparation of treatment works approval permits for new sanitary connections. (2/18 – Present)

**NYCDDC On-Call Environmental Consulting Services – Senior Project Manager**

Mr. Mankovich managed and prepared corridor assessment reports, limited subsurface corridor investigations, Phase I ESAs, Phase II ESIs, and other environmental assessments and investigations for the New York City

Department of Design and Construction (NYCDDC). Mr. Mankovich provided the assessments in accordance with ASTM International and NYCDDC standards. Projects involved sidewalk and roadway infrastructure improvements and pedestrian plaza improvements throughout New York City. Other work included undeveloped land along the East River in Queens and the Bronx and along Thurston Basin, an inlet of Jamaica Bay, in Queens for construction of kayak/canoe launches. (1/07 – 7/13)

**NYC Economic Development Corporation Environmental Testing, Remediation & Monitoring Services Retainer Contract – Senior Project Manager**

Provided technical assistance for environmental tasks relating to Petroleum Bulk Storage Tank compliance and the assessment, investigation, and closure of spill sites. The properties were located throughout the New York City metropolitan area. (7/13 – 6/17)

**Developers, Non-Profit Organizations & Financial Institutions, Environmental Site Assessments and Investigations and Environmental Remediation Management – Senior Project Manager**

Provided overall project management and technical assistance for a wide range of due diligence site assessments and investigations. Project management responsibilities included development of new and existing clients; bid on new work opportunities; project scoping and budget management; interoffice project consultation and coordination; project staffing and mentoring; insurance and subcontractor agreement coordination; and client invoicing and payment monitoring. Technical experience included the performance of Phase I ESAs, Phase II ESIs, SVI Investigations, Remedial Investigations and Work Plans, Vapor Barrier Inspections, IAQ investigations, UST/AST Investigations, Risk Management Plans, and QA/QC of work products produced by colleagues. Transactions/properties included commercial, residential, industrial, manufacturing, acquisitions, loan/financial assistance for redevelopment, regulatory oversight including E-Designated properties and Voluntary Cleanup Program properties under the supervision and approval of the NYCOER or NYCDEP (prior to 2009). The projects also included properties in the NYSDEC spills program that required assessment, investigation, and spill closure. (1/07 – 7/13)

**The Port Authority of New York and New Jersey, Former World Trade Center Site and Transportation Hub – New York, NY**

Provided oversight and technical assistance with the sampling plan for the excavation and disposal of soils from the eastern “bathtub” of the former World Trade Center Site and Transportation Hub. (1/07 – 7/13)

**NYC Economic Development Corporation, Environmental Site Assessments, Staten Island, NY – Project Manager**

Prepared Phase I ESAs in accordance with ASTM International and client standards. Results and interpretations of the assessments were used to prepare the Hazardous Materials Chapter of the Environmental Impact Statement. (5/04 – 1/07)

**NYCT, Environmental Site Assessments – Number 7 Subway Extension and Hudson Yards Rezoning and Development Program – Project Manager**

Prepared Phase I ESAs and Phase II ESIs reports in accordance with American Society for Testing and Materials and client standards. The Phase II ESIs included collection of soil and groundwater samples for laboratory analysis. Results and interpretations of the assessments and investigations were used to prepare the Hazardous Materials Chapter of the Environmental Impact Statement. (5/04 – 1/07)
